NEFES

SMEs IN DENİZBANK

~1.8
MILLION

In line with serving to the country's future, we have taken on the mission of supporting the development of SMEs which are the arteries of the economy. In line with this perspective, we are proud of supporting the Nefes Project for the second time in 2018 as the only private bank and thus giving a breath (NEFES) to over 20 thousand SMEs.

AGRICULTURE
SECTOR CUSTOMERS

+1.2
MILLION

We are doing our best for the development of the agriculture sector which we consider a national matter, with our 42% market share and awareness that we owe each day that we are fed to our farmers, we mobilize our resources for our producers, agriculture and thus our country. Today, we are proud of being the private bank which supports agriculture the most with our services that we provide wherever our farmers are, from land to greenhouse and with our Denizden Toprağa application, a real innovation for the sector, which serves as the smart consultant of the producer in the field.

ABUNDANCE

We are Preparing for the Future with “Data Science Program”

As an institution that has the technology and innovation embedded in the DNA of its activities, we believe in the importance of data-based service model which originates from the real needs of customers. In line with this approach, with Data Science Program a first in the sector, which went live in July, we are getting ready to carry the customer experience to higher levels and make breakthrough moves for the sector with data scientists who dominate the Banking sector.

BIG DATA

DEVELOPMENT

Resource to +300 Projects Transforming
Big Dreams into the Future

We consider supporting vital projects as our social responsibility duty towards the sustainable development of our country such as Yavuz Sultan Selim Bridge, Istanbul Airport, TAV Bodrum Airport and Ilisu Dam as well as PPP urban hospitals.

DenizBank's Mission, Vision

DenizBank's mission

is to become a bank that maximizes employee, customer and shareholder satisfaction with its position, image and corporate characteristics in the market by adopting a supermarket approach to financial services.

DenizBank envisions

becoming one of the five largest banks in Turkey and the foremost financial institution in the region defined as the Middle East, Balkans, Caucasus and Commonwealth of Independent States countries through sustained and profitable growth.

Dividend Distribution Policy

After deducting any sums that would be compulsory for the Bank to pay or set aside, such as general expenditures and miscellaneous depreciation costs as well as any amount of taxes that would be compulsory for the Bank to pay, from the calculated income at the end of the accounting year, the remaining sum shall constitute the net income; after deducting the previous year's losses, if any, the net income shall be distributed as follows:

First Scheme Legal Reserves:

- a) 5% of this sum shall be allocated to the legal reserves.

First Dividends:

- b) Out of the remaining amount, the rate and amount set by the Capital Markets Board of Turkey is allocated to the first dividend.

Second Dividends:

- c) After deducting any sums specified in item (a) and (b) from the net income, the General Assembly shall be authorized to distribute such remaining amount, in part or in full, or to allocate as the extraordinary reserves.

General Legal Reserves:

- d) Out of the sum calculated after deducting a dividend of 5% of the paid-in capital from the set amount to be distributed to the shareholders and other parties participating in the profit, 10% shall be added to the general legal reserves in accordance with Article 519, Paragraph 2, Item c of the Turkish Commercial Code.

Unless the discretionary legal reserves are duly set aside, and unless the dividends determined for the shareholders are distributed in cash and/or in the form of share certificates as per the Articles of Association, no decision may be adopted to allocate further legal reserves, to pass any profits to the following year, or to distribute any dividends to the members of the Board of Directors as well as any officials, workers and employees, to foundations established for various purposes, and to similar person and/or persons.

The date and manner of distribution to shareholders of the annual profit shall be determined by the General Assembly upon a proposal by the Board of Directors prepared under the relevant legislation issued by the Capital Markets Board. As of the accounting period of the dividend, irrespective of its issuing and acquiring dates, annual profit shall be distributed equally to all existing shares. The profits distributed pursuant to the provisions of these Articles of Association shall not be recalled.

Dividend Distribution Proposal

As its meeting on February 22, 2019;

taking into consideration the net profit of the Bank for the financial year 2018 balance sheet amounting to TL 2,182,522,200.07 the Board of Directors hereby made a decision to submit for the approval of the General Assembly:

- to set aside 5% of the net profit, amounting to TL 109,126,110.00, as legal reserve as per Article 519/1 of the Turkish Commercial Code,

- to set aside the remaining TL 2,073,396,090.07 as extraordinary reserve.

Amendments to the Articles of Association

| There were no changes in the Articles of Association in 2018.

Changes in the Management, Shareholding Structure and Activities of DFSG Companies

Sale of DenizBank Shares

On May 22, 2018, Emirates NBD Bank PJSC (Emirates NBD) and Sberbank of Russia (Sberbank) announced that they have entered into a definitive agreement whereby Sberbank will sell its entire 99.85% stake in DenizBank to Emirates NBD. Upon closing of the transaction, Sberbank will cease to be a shareholder in DenizBank. In accordance with the signed agreement, the consideration for 99.85% equals TRY 14,609 million under a locked box mechanism, based on consolidated equity capital of DenizBank as of October 31, 2017. In addition, Emirates NBD will pay interest on the consideration for the period between October 31, 2017 and the transaction closing date. All profits from the locked box date until the closing date will be to Emirates NBD's account. As part of the transaction, and on closing, Emirates NBD will assume ownership of DenizBank's subordinated debt previously provided by Sberbank. The process of the regulatory approvals is ongoing with relevant filings having been made to authorities in Turkey, Austria and UAE.

Capital Increase of DenizBank AG

The Bank has participated 100% in the increase of the paid-in Capital Increase of DenizBank AG, headquartered in Austria, a 99.99% owned subsidiary of the Bank, from EUR 211,830,894.05 to EUR 231,831,230.38 by the issuance of 27,521 registered ordinary shares of DenizBank AG (from 319,006 shares to 291,485 shares) with an issuing price of EUR 1,816.83 per share which must be paid in cash. Following the transfer of EUR 20,000,336.33 to the "Paid-in Capital" account and EUR 30,000,642.10 to the "Share Premium" account, EUR 50,000,978.43 in total for all newly issued shares; the capital increase was completed on December 20, 2018.

Any Events Occurring After the End of Operating Period that Have a Special Importance

The process of the regulatory approvals related to DenizBank's share transfer is ongoing with relevant filings have being made to authorities in Turkey, Austria and UAE.

With the decision of the Board of Directors dated January 29, 2019, 100% shares of Deniz Kartlı Ödeme Sistemleri A.Ş., which a subsidiary of DenizBank Financial Services Group and owned by Intertech Bilgi İşlem ve Pazarlama Ticaret A.Ş., was purchased by DenizBank with a nominal value of 300,000 TL and the share transfer has been realized on January 29, 2019.

Shareholding Structure, Paid-in Capital and Changes, Shares Held by the Management

DenizBank's shareholding structure, and the shares held by ultimate controlling real person(s) as of December 31, 2018 are presented in the table below. DenizBank's shareholding structure does not contain any cross-shareholdings.

Shares Held by the Management

DenizBank's CEO Hakan Ateş owns 52,449 shares, corresponding to 0.000002% of the total capital.

DenizBank A.Ş. Shareholding Structure - 31.12.2018

TOTAL	3,316,100,000	100.00%

DenizBank in Brief

With a service network reaches out to all segments of Turkish society, DFSG consolidated its operations, financial control and accounting functions at the head-office level and converted DenizBank branches into marketing centers. As a result of this strategy, DenizBank increased overall operational efficiency.

Acquired by Zorlu Holding from the Privatization Administration as a banking license in early 1997, DenizBank became one of the country's major banks in a short period of time.

In October 2006, Dexia, a leading European financial services institution, acquired DenizBank from Zorlu Group and remained its primary shareholder for six years. On September 28, 2012, DenizBank started operating under the umbrella of Sberbank Group, Russia's oldest and largest bank. (In May 2018, an agreement was reached between Dubai based Emirates NBD, the second largest bank in United Arab Emirates, and Sberbank, one of the largest banks in continental Europe, for the transfer of 99.85% of DenizBank shares; the approval process for the transfer continues before regulatory bodies in Turkey, Russia, United Arab Emirates and Austria as well as other countries where DenizBank has operations.)

A rapid and extensive transformation

Following privatization in 1997, DenizBank implemented a "Return to Life" program that encompassed employee recruitment and new branch openings as part of its new corporate identity. These initiatives were undertaken in line with a five-year strategic plan, with all the Bank's growth objectives ultimately achieved. This growth was bolstered by buying back certain branches that were transferred to the Savings Deposit Insurance Fund, and by the Group's acquisition of Tarihbank at year-end 2002. To further extend its banking products and services, DenizBank established factoring, leasing, investment and portfolio management companies and acquired banks in Austria and Russia during this period.

As a result of the Bank's solid capital base and balanced financial structure, as well as the rapid growth of Turkey's banking sector, DenizBank reinforced its strong market position in very short order. In 2003, DenizBank Financial Services Group (DFSG)

was formed to create a "financial supermarket" that provides a wide variety of financial services under a single umbrella.

The "financial supermarket" era in banking

In addition to the flagship DenizBank, DenizBank Financial Services Group includes six domestic and three international financial subsidiaries, six domestic non-financial subsidiaries and a branch in Bahrain. The Group's domestic companies include Deniz Invest Securities, Deniz Real Estate Investment Trust, DenizAsset Management, DenizLeasing, DenizFactoring, Destek Asset Management*, Intertech, Ekspres IT and Trade, DenizKültür, Açık Deniz Radio-TV, Deniz Card Payment Systems and Bantaş. EuroDeniz, DenizBank AG and DenizBank Moscow are DFSG's international subsidiaries.

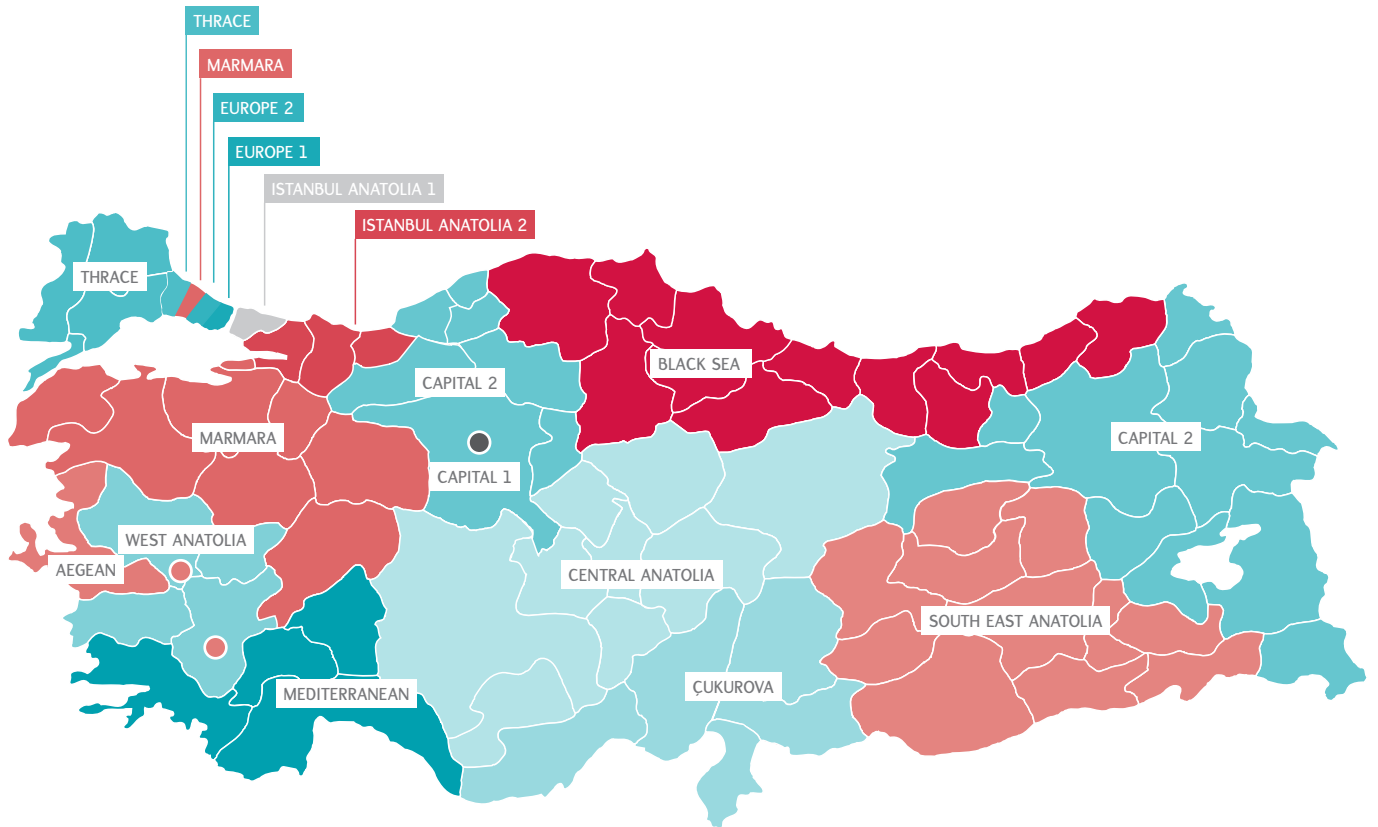

DenizBank Financial Services Group's primary customer segments include retail customers, small and medium-size enterprises, exporters, public and project finance customers, and commercial and corporate clients. The Group has identified the agriculture, energy, tourism, education, healthcare, sports, infrastructure and maritime industries as the top priority areas of its business activities. DFSG also operates in European Union countries via its Vienna-based subsidiary DenizBank AG. Additionally, DenizBank serves the Group's existing customers abroad that have commercial and trade ties with Russia, meeting their various financial needs.

DFSG consolidated its operations, financial control and accounting functions at the head-office level and converted DenizBank branches into marketing centers. As a result of this strategy, the Bank has maintained an optimal number of employees while increasing overall operational efficiency.

DFSG's service network reaches out to all segments of Turkish society. In addition to DenizBank's 711 branch locations in Turkey and Bahrain, DenizBank AG and DenizBank Moscow operate 43 branches in total. Additionally, DenizBank provides its retail and corporate clients the world over the opportunity to carry out financial transactions via the Internet, as part of its alternative distribution channel offering.

DECEMBER

According to research of Turkey’s Top 500 Companies by Capital magazine, DenizBank was awarded with the Vodafone Digitization Award.

Message from the Chairman of the Board of Directors

DenizBank has strong potential to achieve a sustainable performance in the coming years.

Dear Stakeholders, Customers and Business Partners,

2018 was marked by significant volatility in Turkish economy. Adverse developments in domestic and international markets triggered rapid devaluation in the Turkish lira of over 40% by August and caused inflation to run above 20% year-on-year in November.

Prescriptive measures taken by the Central Bank and the banking regulator helped stabilize the Turkish market and positively impact investor confidence by year's end.

The turmoil surrounding Turkey's economy resulted in higher costs of external funding for the banking sector. Despite these challenges, major Turkish lenders saw earnings growth for the year with NPLs remaining at a reasonable level of 3.6%.

DenizBank demonstrated a decent performance in 2018. Thanks to ongoing efforts to improve customer experience and deliver convenient banking solutions, DenizBank expanded its customer base during the year. The Bank's focus on lending to niche sectors of the economy – such as education, health, shipping, energy, infrastructure, tourism and loans to SMEs—mitigates the impact of systemic risks.

DenizBank remains well positioned in terms of its liquidity and funding profiles. The Bank's prudent risk management approach should continue to support the credit quality of its loan portfolio.

I am grateful to all the stakeholders who have actively supported DenizBank's developments for six years within the Sberbank family. DenizBank has strong potential to achieve a sustainable performance in the coming years.

Kind regards,

Herman GREF
Chairman of the Board of Directors

Message from the CEO

As DenizBank, we will focus on our objective to add value to our society, put our know-how in innovation and data science in the core of our activities and continue to work for our most valuable asset, our people, our niche sectors which we always support and our country on a larger scale.

Esteemed Friends of Deniz,

Despite conflicts of power among trade blocks, the global economy, which continued its strong growth in 2018, is expected to grow by 3.7% similar to its last year's performance according to IMF estimates. While the trade-related competition between the USA and China was marked the global economy in 2018, tariffs imposed by the USA on certain Chinese imports aggravated trade disputes and global headline inflation rate started to increase with the impact of rise in energy prices.

Strong growth performance observed in global economy despite commercial disputes

While the USA gained a conspicuous acceleration in economic activities with the influence of the fiscal expansion policies in 2018, inflation rate reached the level aimed by the Fed. Parallel to the improvement in the economy, Fed continued with the tapering policy that they exercised since 2015 and raised interest rates four times in 2018. Having reached the highest economic growth of the last decade in 2017, Eurozone continued its positive economic course in 2018 despite being partially affected by geopolitical risks. With the impact of positive climate, European Central Bank (ECB) decided to end their bond purchasing program and cease quantitative easing policy as of the end of 2018. It is expected that the ECB will raise their record-low interest rates incrementally starting from end of 2019. Emerging economies led by China and India had a rebound within the year with the impact of increasing commodity prices besides strong internal and external demand. Having entered into a milder growth path in recent years, China continued with controlled slowdown and their growth rate declined to 6.5%.

Monetary policies of Central Banks become prominent on a global scale

As the FED raised interest rates gradually, capital inflows to emerging economies lost some momentum compared to 2017. With the ECB and Bank of Japan (BoJ) not in hurry for monetary normalization, capital inflow to emerging economies continued while markets expect that it will remain below what it was after the global crisis.

Re-balancing steps in Turkish economy

Having had the highest growth performance among emerging economies in 2017 with the support of expansionary fiscal policy besides strong domestic demand, Turkey continued its growth performance in the first half of 2018 with limited loss of momentum. High volatility in financial markets and deterioration in pricing behavior in the second half of the year, especially starting from August, caused slowdown in consumption and investment expenditures by bringing along increase in inflation rate and interest rates in the market. Accordingly, growth rate was set as 3.8% for 2018 and 2.3% for 2019 within the framework of the New Economic Programmed. While such developments led to slowdown in consumption and investment expenditures, significant decline was observed in current account deficit with the support of strong external demand. As DenizBank, we believe that Turkish economy will have moderate growth in the upcoming period in the light of tight monetary and fiscal policies actualized starting from the second half of 2018 and re-balancing process based on low public and household indebtedness. Robustness of the Turkish banking sector and dynamism of the private sector will have a supportive role in this process.

Message from the CEO

Since day one, we embedded a service approach shaped to contribute to human life and our country's future into the core of our financial achievements.

Determined policies by CBRT to fight inflation

The volatility occurring in financial markets in 2018 was successfully managed thanks to the strong steps taken by the Central Bank of the Republic of Turkey (CBRT) and Banking Regulation and Supervision Agency (BRSA) in the right time, in coordination with the management of economy. CBRT raised interest rate by 500 bps in the first half of 2018 and by 625 bps in August after the severe fluctuation in the market, bringing the policy rate to 24%. We estimate that the Central Bank will prioritize fight against inflation in 2019 as they emphasize that the tight stance in monetary policy will be continued until significant improvement is ensured in inflation outlook.

We support New Economic Program targets as DenizBank

Peaking in the first half of 2018 parallel to the re-balancing process in the economy, budget deficit saw a fast decline in the second half of the year. The budget deficit / GDP ratio, which rapidly increased with the impact of pro-growth policies in 2017, had a moderate increase thanks to the re-balancing steps taken in 2018. With the additional revenue and saving measures within the framework of the New Economic Program covering 2019-2021, it is estimated that such ratio will evolve at reasonable levels in the upcoming period. Featuring budget discipline, which is the strongest anchor in Turkish economy, the New Economic Program aims for the budget deficit/ GDP ratio to remain below 2% and primary surplus / GDP ratio to go above 1% incrementally in the medium term. As DenizBank, we will continue to mobilize our resources to support the macroeconomic targets of the New Economic Program.

Strong financial results to carry DenizBank to the future

As DenizBank, we once more have reached successful financial results in 2018 in the guidance of our robust corporate culture of more than 20 years. As the fifth largest

private bank in Turkey, we raised our assets on a consolidated basis to TL 197 billion on a y-o-y basis, growing by 23% and reinforced our strong position in the market. Our unconsolidated assets grew by 14% on a y-o-y basis, reaching TL 138 billion. Besides increasing our net profit to TL 2.2 billion with 16% growth on a y-o-y basis, we continued to outperform the sector in terms of ROE with great stability.

In addition to our branch network of 754 branches in 81 provinces of Turkey as well as 43 subsidiary branches abroad, we raised our customer deposits to TL 137 billion and TL 81 billion on a consolidated and unconsolidated basis, respectively thanks to our customer base which expanded increasing by 10% in the last one year.

As DenizBank, we continued to transfer the funds we secured in 2018 into the economy and reached a consolidated cash loan volume of TL 139 billion. While our unconsolidated cash loan volume realized as TL 87 billion, our consolidated cash and non-cash loan volume amounted to TL 173 billion.

Within this context, we assumed it as our duty to support education and health sectors due to our demographics, shipping and tourism due to our geography and energy and infrastructure sectors as we are a transition economy. Besides these, we continued to provide finance to municipalities and sports clubs. As a consequence of our vision to stand by every project that will carry Turkey and quality of human life further ahead, we provided 20 billion USD project finance to national projects such as the 3rd Airport, Ankara Train Station, Third Bosphorus Bridge, Bilkent and Mersin PPPs which are critical for the future of our country.

As we continue our works in different business lines, we keep the concept of “data” as our focal point to carry customer experience to a whole new level and to draw future roadmaps.

We continued to provide full support to SMEs and farmers in 2018

As DenizBank, we continued to work ambitiously in a determined way in the agriculture sector which is key in the path of development in Turkish economy and which we consider as a national matter with small and medium sized enterprises. In 2018, we continued to be the only bank to participate in the Nefes (Breath) Facility, carried out in collaboration with the Union of Chambers and Commodity Exchanges of Turkey (TOBB) and Credit Guarantee Fund (KGF), aiming for SMEs to access low-cost funding. We provided financial support to over 20 thousand SME customer under Nefes Facility since 2017. We also did our best for farmers to produce more efficiently under more comfortable conditions and access financial resources easily with over 1.2 million customers, with 42% market share in agricultural banking, where we are the sector leader. On the other hand, upon merging our know-how in innovation with our expertise in agriculture, we reached over 100 thousand farmers with the “From Deniz to Earth” application, which we designed as the smart advisor of producers in the field and actualized as a new model to enhance technology-based efficiency.

We shape the future with big data

As we continue our works in different business lines, we keep the concept of “data” as our focal point to carry customer experience to a whole new level and to draw future roadmaps. Within this framework, as a first in the sector, we initiated the Data Scientist Training Program to raise colleagues who know banking sector and professionals in data science. Our objective is to keep data science in the core of our activities in the future and to mark achievements that take the sector into a new era and detect the needs of our customers before them and add value to their lives.

Quality of our products and services received awards

Our innovative products and services, which are the outcome of our vision to build a bridge between human and technology, earned our bank many international and local awards in 2018 as in previous years. Our “Ambassadors of Digital Change” project which we initiated to support the integration of the agricultural sector with technology and encourage young population who do not wish to continue agricultural activities received second prize in EFMA DMI Awards 2018 in “Corporate Social Responsibility – Social, Sustainable, Responsible Banking” category. Our “Credit X”, which is a new perspective in targeted advertising earned “Innovation in Marketing Award” at BAI Global Innovation Awards while “Send Cheques to Deniz”, which is our mobile application carrying factoring transactions into mobile phones received a Bronze Effie.

We will set sail for bigger targets

I would like to take this opportunity to thank all stakeholders who contributed to our journey in 2018, primarily our shareholder Sberbank, which enhanced our strength in the six years we worked together. The biggest power behind us in our history of 21 years has been the confidence of our stakeholders in our bank and of course, the devoted work of our Sailors. In the future, we will continue to focus on our objective to add value to our society, have our know-how in innovation and data science in the core of our activities and create value for niche sectors and our country on a larger scale.

Sincerely,

Hakan ATEŞ
CEO

Banking Services

DenizBank continued to expand its branch network in line with the strategy of delivering closer and more active services to customers, particularly in the Retail Banking, SME Banking and Agricultural Banking segments.

DenizBank Customer Segmentation

DenizBank has classified customers into six main segments to reflect its customer-oriented service approach across its operations in the most effective manner.

Corporate Banking: This segment serves all companies with annual sales turnover of at least TL 200 million, as well as the groups to which these companies belong. (Financial services companies are included in this segment regardless of their turnover amount.)

Commercial Banking: This segment serves companies with annual sales turnover of at least TL 40 million that do not fall within the scope of the Corporate Banking segment.

Public Banking: This segment serves local public administrations, their subsidiaries and economic enterprises, as well as state economic enterprises, their establishments and subsidiaries, and all other enterprises in which the public or public companies hold at least a 50% stake.

SME Banking: This segment serves firms and sole proprietorships with annual turnover of less than TL 40 million, as well as the owners and partners of businesses (from TL 25 million to TL 40 million is the common area with Commercial Banking).

Agricultural Banking: This segment covers producers with farmer certification who earn a living from agricultural activities as well as agricultural organizations with legal entity status and agribusinesses.

Retail Banking: This segment serves individuals, self-employed professionals, owners and partners of corporate and commercial segment companies and owners and partners of companies that are clients of the Bank's SME segment with annual turnover of more than TL 5 million.

In addition to these six main segments, DenizBank delivers private banking services to upper retail segment clients and companies with a liquid net worth of at least TL 500 thousand.

Branch Network/Segmentation

Aiming to become one of the major financial services providers in the region, DenizBank continued to expand its branch network in line with the strategy of delivering closer and more active services to customers, particularly in the Retail Banking, SME Banking and Agricultural Banking segments.

The Retail Banking Group's high service quality encouraged customers to choose DenizBank, and the Group closed 2018 with a number of achievements. The Group bolstered customer loyalty with an innovative and dynamic array of services.

Retail Banking Group

The Retail Banking Group runs operations within Retail Banking Sales Management and Marketing, in coordination and creating synergy with other business lines of the Bank.

The Group's main activities include:

- Developing products and services designed for specific customer segments, monitoring the market, generating impact analyses of changes in the competitive environment, and using analytical tools to create appropriate offers based on customer data;
- Improving technology and operations processes related to retail banking;
- Monitoring, evaluating, and conducting strategic planning to develop the business line;
- Offering banking products and services via the branch network and digital channels (internet, mobile);
- Working in coordination with other business lines to acquire new customers via contractual agreements related to salary payments, school tuition and condo fees;
- Providing innovative solutions with different branch and ATM concepts for changing customer needs in line with the Bank strategies while creating a network that includes all customers through effective branch and ATM network management;
- Developing new loan, deposit and other banking products with an innovative, customer-focused approach and closely monitoring product performance to boost their market share.

The Retail Banking Group's high service quality encouraged customers to choose DenizBank, and the Group closed 2018 with a number of achievements. The Group bolstered customer loyalty with an innovative and dynamic array of services. To that end, Fortune Magazine named Mr. Oğuzhan Özark, Executive Vice President for the Retail Banking Group, as one of the 50 most effective CMOs in Turkey in 2018.

The Retail Banking Group was crowned the winner in Gartner's competition in 2018 thanks to its groundbreaking customer experience project based on neuromarketing techniques. As part of the project, neuromarketing techniques were used to simulate customers' journey to the branch. Subsequently, an action plan was drawn up based on the results.

Banking Services

DenizBank has always aimed to build a stronger, more effective segmentation model. This allows the Bank to better understand the financial needs of its customers via the use of big data and thereby to offer them the most appropriate products and services.

Affluent Banking

Launched in 2010, Affluent Banking sets an example for the industry with its innovative business model while featuring a number of exclusive products and services. These offerings include customized personal consultancy at branch locations, priority in banking transactions, and special rates on deposit/investment products and loans.

The Affluent Hotline Service Model was established in 2015 to provide Affluent Banking services via telephone to customers of branches without Personal Consultants. This service was extended to more branch locations in 2017 as the Affluent Banking customer base continued to expand. While this channel has enjoyed increased customer awareness, it has also become the top-of-mind channel for all banking needs of Affluent Banking customers.

Affluent Banking values the highly trained human resources of Turkey, and closely monitors day-to-day changes in the needs of target professions, including lawyers, doctors, dentists, financial consultants, public notaries and pilots. To that end, the existing agreement between Istanbul Bar Association, the world's largest bar association, and DenizBank Affluent Banking has been extended for a term of three years to offer continuous access to financial solutions especially tailored for attorneys. In addition to collaborating with 50 bar associations across Turkey, DenizBank partners with 75 professional associations – for financial consultants, dentists, physicians, and notary publics – as it aims to become the primary bank of these target professionals.

While providing customized financial solutions for its Affluent Banking customers, DenizBank also holds social and cultural events, partners with various brands and makes discounts and benefits available to them to facilitate their lives in all aspects.

Mass Banking

DenizBank Mass Banking maintained a customer-oriented approach and relied heavily on analytics to conduct effective marketing operations in 2018.

Advantageous campaigns tailored for customer needs were offered across various channels to ensure deeper relationships with existing customers. Joint work with CRM included the updating of models related to products and customer attrition. These efforts ensured that the right offers were submitted to customers and promotional campaigns were optimized.

In addition to deepening relations with existing customers, the Bank developed a customer acquisition strategy aimed at acquiring new and inactive customers. This effort helped Mass Banking to acquire more than 400 thousand customers in 2018. Deeper relationships with recently-acquired customers is a focus as well. Any such acquisition saw the simultaneous launch of various promotional campaign strategies.

By focusing on acquiring parents as customers with attractive financial solutions in the education sector, DenizBank maintained its position as the leading bank in school payments in 2018.

Customer satisfaction in terms of the Bank's relations with its client base is monitored regularly via the Net Recommendation Score. Customer feedback from this effort is used to identify areas to improve product and service quality, and develop action plans to address these issues.

Embracing the principle of “Respect for Pensioners,” DenizBank develops solutions specially tailored to meet pensioners’ financial needs and touch their social lives under the motto “Pensioners are Happy at Deniz!”

Pensioner Banking

In line with its strategic focus on niche customer segments, DenizBank has closely monitored the needs of pensioners since 2010. Currently serving as the intermediary for pension payments to 1.2 million pensioners, DenizBank ranks third among all banks and first among private banks in this area.

Aiming to touch the lives of retirees under the motto “Pensioners are Happy at Deniz!”, DenizBank offers pensioner clients privileges that make a difference in terms of both their financial needs and social lives.

DenizBank’s pension customers enjoy discounted interest rates on general purpose, car and housing loans and special interest rates for their deposits, in addition to priority standing in branch transactions. They also benefit from special fees and commissions in many banking services.

Pensioner Bonus is the first Turkish credit card specially designed for pensioners. This innovative offering allows cardholders to conduct free-of-charge shopping by earning bonus points, enjoy discounts at contracted merchants, or receive billing discounts during seasonal promotional campaigns. In addition, Pensioner Bonus customers can benefit from external assistance services in the event of a utility outage, problems requiring a locksmith, or broken glass.

To better serve the pensioner segment, DenizBank branches with high numbers of pensioner customers feature a “Pensioners’ Corner.” This exclusive concept offers tea, coffee and daily newspapers pensioners can enjoy as they complete their transactions at the Bank.

DenizBank Pensioner Banking met our pensioners at concerts, breakfast and cinema events throughout 2018. Additionally, regular bulletins on healthy living keep pensioners up-to-date with monthly information they can use in their everyday lives.

Established in cooperation with Deniz Academy, “DenizBank Pensioners’ Academy” offers exclusive content for retirees on art, technology, healthcare, finance and sports.

DenizBank Pensioner Banking also serves the retiree segment on social media. It provides pensioners with access to a wide range of practical information. This includes live broadcasts with specialized medical doctors, recipes, prize contests and other content at its page on Facebook –the most popular web destination for pensioners.

DenizBank Pensioner Banking also acts as an intermediary for free advisory services for prospective pensioners who are in need of information on the retirement process, a major milestone in anyone’s life. It offers convenient maturities and attractive interest rates as well as exclusive loan facilities to those who receive a pension by paying their premium debts.

1.2
MILLION
PENSIONER
CUSTOMERS

Banking Services

DenizBank's Retail Banking segment continued to expand its total deposits in 2018, posting an increase of 32% at 2018 year-end.

Retail Banking Products

Deposits and Savings Products

DenizBank Deposits and Savings Products offer an extensive array of deposit and savings options to meet various retail customer needs such as accumulating savings or facilitating cash flow. These offerings are designed in consideration of customers' risk perception and expectations while channeling their savings towards investment. In line with this approach, DenizBank's Retail Banking segment continued to expand its total deposits in 2018, posting an increase of 32% at 2018 year-end.

Two major TV campaigns, the first one airing in October, were successfully launched in 2018. This effort greatly contributed to new customer acquisition for deposits.

2018 also saw the launch of other campaigns catering to target customers, primarily the Pensioner and Affluent Banking segments. For example, DenizBank successfully conducted the Expat Campaign – which offers advantages to Turkish citizens living abroad – between May and September, the period when this target group visits Turkey most frequently.

Branch locations kicked off a price optimization effort for deposits in order to manage deposit costs more efficiently and offer customers the most accurate pricing.

Consumer Loans

DenizBank is a key player in the industry thanks to its innovative, accessible and competitive loan product offerings.

General Purpose Loans

Thanks to the many innovations and campaigns introduced to the TL 205 billion market, DenizBank's general purpose loan portfolio continued to expand, capturing a 6.0% market share.

In 2018, DenizBank developed products and processes that were designed to meet evolving customer needs and expectations, which are increasingly shaped by the ever-changing retail environment. The Bank continued to offer private credit limits for current customers as part of pre-approved credit promotional campaigns. In addition, the Bank improved loan related processes in line with delivering an exemplary customer experience.

DenizBank allows customers with pre-approved loan limits to use their limits instantly through alternative channels – such as Telemarketing, Mobile Sales, Internet Banking, MobilDeniz, Teller Sales Officers and ATMs. This effort aims to ensure that customers enjoy ease of access at any point of contact with DenizBank. The contribution of such channels has enabled DenizBank's general purpose loan allocations and market share to continue to lead the industry.

The overdraft account product "Kurtaran Hesap," which meets customers' urgent demands for cash, is available to customers round-the-clock via all the Bank's alternative distribution channels. Customers who would like to access the overdraft account in the form of installments can opt for installment payments of up to 12 months with the Overdraft Account with Installments and Instant Money Account product.

Housing Loans

DenizBank aims to become "Turkey's Leading Bank in Urban Transformation Projects" with the support of successful efforts in extending home loans. Although it was the second bank to sign an agreement with the Ministry of Environment and Urbanization, DenizBank was the first Turkish banking institution to extend an Urban Transformation Loan and complete the urban transformation project. As of year-end 2018, DenizBank has extended TL 570 million in Urban Transformation Loans. The Bank maintained its current market share of over 40% in the urban transformation lending segment, thanks to the unique advantages it offers.

Retail Customer Deposits (TL million)**General Purpose Loans (TL million)****Branch and ATM Planning**

As part of optimization efforts in 2018, DenizBank merged 14 of its branches. The Bank then opened new branch locations in 31 cities with high potential for Agricultural Banking.

In 2018, DenizBank operated a branch network with 711 locations while the Bank's branch market share stood at 6.9%. At year-end 2018, DenizBank's branch network totaled 754 locations, including 43 subsidiary branches abroad.

The total number of ATMs, which was 3,055 at the end of 2017, was 2,917 at the end of 2018.

In line with its overall strategy, the Bank developed innovative branch and ATM concepts for different customer segments, boosted with disabled-friendly banking practices to transform its branches and ATMs. Furthermore, the Bank launched efforts to complete the updating of ATM menu content and design in February 2019, based on the relevant decision made in 2018.

Bancassurance*Insurance and Individual Pension Products*

Since the establishment of bancassurance in 2004, DenizBank has provided life insurance, non-life insurance and individual pension products to its customers.

DenizBank sold Deniz Pension and Life to MetLife in 2011 for 10x its book value, marking a huge success thanks to the strong position of Deniz Pension and Life in the market.

DenizBank's extensive product portfolio offers a full range of insurance and individual pension products and services. These include fire, agriculture, accident, engineering, liability, unemployment personal accident, and life insurance plans, as well as pension plans.

Individual pension products are on offer to the Bank's customers in the form of automatic participation system products, individual products, corporate products, and various plan options tailored for specific customer segments. In 2018, 34,262 individual pension contracts were sold and TL 4.8 million commission income was obtained.

DenizBank continues its cooperation with Axa Sigorta in non-life insurance and with MetLife in life insurance and individual pension products.

Banking Services

DenizBank's extensive product portfolio offers a full range of insurance and individual pension products and services which include fire, agriculture, accident, engineering, liability, unemployment personal accident, and life insurance plans, as well as pension plans.

DenizBank Bancassurance Performance (TL million)

DenizBank supports SMEs in order to contribute to Turkey's economy as a part of its corporate social responsibility.

SME Banking Group

The SME Banking Group ensures that DenizBank's:

- SME Banking, and
- Gold Banking

operations are run in coordination and create synergy with the Bank's other business lines.

The SME Banking Group's primary activities include:

- Developing products and services designed to meet SMEs' needs, devising sector and product-specific packages, and creating timely and multidimensional sales opportunities;
- Marketing and selling of gold and silver loans and deposits, and other products related to precious metals, as well as undertaking efforts to acquire new customers.

SME Banking

DenizBank's expert personnel at the Head Office, SME Banking Department, Regional Offices and branch locations across Turkey continued to provide new productivity-enhancing solutions to SME clients.

In 2017, the government increased the size of its Credit Guarantee Fund ("KGF") – which guarantees loans to SMEs that experience difficulties in accessing finance due to lack of collateral – to TL 250 billion. These additional funds helped SMEs stay resilient through challenging economic times and bolster their operations in 2018. DenizBank maintained its role as a major lender of KGF-backed loans to SME customers. The Bank has quickly delivered the loans to SME clients, thanks to its fast and efficient decision-making processes. DenizBank ranks 3rd in serving the most clients and 7th in offering most funds to SME Banking customers in terms of KGF-backed loans.

During the year, DenizBank achieved yet another first in the industry and began providing round-the-clock service and detailed information to customers via the KGF Support Hotline (0212 355 10 55).

At year-end 2016, DenizBank launched the "Nefes Kredisi" initiative in collaboration with TOBB (Turkish Union of Chambers and Exchanges) and KGF (Credit Guarantee Fund). Under this effort, DenizBank provided Nefes Loans totaling TL 1.15 billion with a 12-month maturity and an interest rate exclusive to more than 12,000 SMEs that are members of chambers and commodity exchanges under the TOBB umbrella. In April 2018, DenizBank emerged as the only private bank participating in the second round of the same loan initiative, extending loans up to TL 200 thousand – and totaling TL 1.2 billion – at an interest rate exclusive to more than 8,000 SMEs that are members of chambers and commodity exchanges under the TOBB umbrella, with a 6-month grace period and 18-month maturity.

Banking Services

We are proud of giving a breath (NEFES) to over 20 thousand SMEs.

Committed to facilitating SME access to financial products and streamlining the application process, DenizBank launched Swift Loan, for which customers may apply via SMS, online, AçıkDeniz Internet Banking, Facebook page and ATMs. With this innovative loan, SMEs can choose from among one or more of the product options – SME Card, Installment Commercial Loans, Commercial Kurtaran Hesap, DBS and Vehicle Recognition System products – in cash amounts of up to TL 80,000 thousand. SMEs that apply for Swift loans receive the result of their application within five minutes, and can easily obtain the products from DenizBank branches.

Shopkeepers and SMEs can save up to TL 5,000 thousand per year by selecting the best tariff suited to their needs from among a wide range of special SME tariffs for daily banking transactions that vary according to the type and frequency of transaction. Thanks to other banking packages tailored to their sector's specialized needs, they can also benefit from sector-specific advantages, convenient credit options, and banking transaction tariffs.

Furthermore, DenizBank provides consulting services to exporter SMEs to help them create a strategic business roadmap, obtain valuable information, make investments and enter new markets. Customers can call the Foreign Trade Hotline at 0212 348 34-44 to obtain information on many relevant topics, such as payment methods used in foreign trade, international rules, and the like.

DenizBank also offers special products and services for different sectors. For example, the Bank provides pharmacists additional contributions to their Private Pension Payments, cost-free banking transactions, as well as credit facilities at favorable rates, under the agreement reached with the Association of Turkish Pharmacists.

DenizBank provides women entrepreneurs the financial support they need to establish and expand their businesses. The fastest and easiest solutions at special interest rates are offered to meet their borrowing requirements. Female entrepreneurs can also take advantage of the Women Entrepreneur Tariff. This special tariff includes those transactions they need most to save on banking transactions, as well as time deposits at special interest rates for their savings in TL, USD, EUR or gold.

SME Banking places great importance on cooperating with business chambers and professional associations. DenizBank is the main sponsor of the SME Summits organized by TOSYÖV (Turkish Foundation for SMEs, Self-Employed People & Business Managers) in Istanbul and Ankara as well as SME Support Meetings held in seven cities across the country. The Bank organized events in many cities across Turkey – including Gaziantep, Bursa, Afyon and Iskenderun – and plans to continue its sponsorship in the coming period.

Thanks to collaborations with firms that lead their respective industries, the Bank provides small and medium enterprise customers with exclusive services to render their day-to-day operations easier, alleviating issues arising from their commercial operations.

Thanks to other various collaborations, SMEs that are customers of DenizBank receive discounted services from firms in relevant sectors – such as shipping, dry cleaning, electricity, catering and security services.

Gold Banking

The gold sector not only creates added value for Turkey but also stands out as a focus area for DenizBank. The Bank stepped up its focus on this burgeoning area and leapfrogged the competition by establishing the Gold Banking department in 2011. DenizBank aims to provide a comprehensive range of banking instruments, from loans to deposits, to fully meet the demands of the gold sector.

DenizAltın Days encourages households to invest their “under-the-mattress” savings in the national economy. This scheme has turned more than six tons of physical gold savings into deposits. The Gold Accumulating Account and Saver Account both provide savers the opportunity to grow their investments.

DenizBank Gold Banking aims to channel investors' gold assets in jewelry to clients as financial support under attractive terms, thus contributing to Turkey's economy.

DenizBank's total gold loan support has climbed to some five tons with a 17% market share. This success was achieved thanks to innovative efforts, such as special loan assessment processes for precious metals, in addition to groundbreaking product innovations, including Equal-Installment Gold Loan, Gold Loan with Early Closure Option and Gold Support Loan to Manufacturers.

As a core part of our social responsibility, we support the development of Turkish agriculture: “An investment in agriculture is an investment in our country’s future.”

Agricultural Banking Group

Agricultural Banking Group

- Ensures that DenizBank’s Agricultural Banking related activities are run in coordination and creating synergy with the Bank’s other business lines.

To reach out to target groups – such as farmers, agricultural businesses and investors interested in the agriculture sector – the Group engages in the following activities:

- Meeting the financing needs of producers and agricultural enterprises and developing financial products to this end;
- Researching and designing new funding products in agricultural banking;
- Developing new applications and projects to help Agricultural Banking keep abreast of new innovations and technological advancements in the future.

DenizBank conducts its business operations with a view toward supporting Turkish agriculture, boosting agricultural productivity, putting “a smile on every farmer’s face” and contributing to a brighter future for our nation.

With the belief that agriculture holds the key to Turkey’s future, DenizBank operates in the agricultural sector in line with its social responsibility mission. DenizBank is the first private Turkish bank to organize its Head Office, region and branch network structure in order to create a true agricultural banking enterprise. The Bank has executed all its agricultural efforts along the slogan “DenizBank: The Farmers’ Bank” and has touched the lives of about half of all farmers in Turkey.

The highest quality, fastest and state-of-the-art agricultural solutions

In line with its commitment to agriculture and land resources, DenizBank acquired Tarışbank in 2002 and launched its Agricultural Banking operations. Since these beginnings, the Bank has been proud to stand by Turkish farmers no matter what. Today, the Bank delivers the highest quality, fastest and state-of-the-art agricultural solutions to producers via a 370 branch network located across Turkey’s 81 provinces and with a field team composed largely of agricultural engineers.

DenizBank supports small scale producers who have difficulties in accessing finance as well as large producers and investors involved in modern agriculture on a larger scale.

In 2018, with the loan usage of over TL 9 billion, DenizBank recorded a total loan volume of over TL 12 billion, with more than 1.2 million customers. The Bank is the leader of agricultural loan allocations among private banks, boasting a market share of 42%.

DenizBank ranks fourth in credit card turnover with a market share of 10.5% and first in credit cards issued with a market share of 25.3%.

Producer Card

A leader in providing financing to the agricultural sector, DenizBank works to establish a Producer-Merchant-Bank relationship, offering solutions that provide maximum benefit to all parties. Leading the agricultural commercial card market with over 570,000 Producer Cards issued and a wide variety of innovative service offerings, DenizBank has customized the Producer Card to effectively meet the special requirements of the agriculture sector. Facilitating access to financing for micro producers and offering 0% interest rate and favorable maturity at contracted merchants, the Bank provides significant cost advantages for producers in their agricultural input purchases.

Banking Services

DenizBank's "Benim Bahçem Benim Tarlam" loans contribute to sustainable agriculture.

Producer Card-holders can purchase all their agricultural inputs – such as fertilizer, animal feed, seeds, saplings and pesticides – from 16,000 contracted merchants across the country with five-month repayment grace periods.

As part of DenizBank's collaboration with Petrol Ofisi dating back to 2006, producers can purchase fuel oil with the Producer Card, with a five-month repayment period and interest-free, from contracted dealers. In 2017 and 2018, the Bank entered into similar collaborations with Opet, Sunpet, Lukoil, Aytemiz, Moil, Alpet and TECO.

In 2017 and 2018, DenizBank continued to collaborate with the fertilizer sector, which started in 2016, spreading the advantages of the Producer Card across new locations. With the Producer Card Installment Loan product rolled out in early 2015, producers can obtain installment loans from DenizBank branches, via 24/7 DenizBank ATMs and on the SMS channel with maturity periods of up to three years, and with annual payments following harvest time. Additionally, Producer Card-holders can withdraw cash advances from DenizBank branch and 24/7 ATMs to meet their short-term cash needs.

Producers can pay for their TARSİM agricultural insurance policy – the essential insurance coverage to protect agriculture and livestock activities – with their Producer Cards and enjoy a "0" interest rate until the harvest. In addition, producers can pay the premiums on their Private Pension Insurance, Farmer Health Insurance and Farmer Individual Accident Insurance once a year, at harvest time. The Producer Card also helps farmers pay their monthly bills by giving them the option of repayment at harvest. Producers can make their monthly utility bill payments within a certain limit – including electricity, water and natural gas – at harvest time once a year, at more favorable

interest rates. Additionally, DenizBank gives producers the option of paying their Bağ-Kur premiums with automatic payment orders via the Producer Card. As a result, producers can pay their premiums at harvest time and enjoy timely, uninterrupted access to all the rights the social security institution provides.

Producer customers can use the Producer Card to make purchases of equipment in member establishments where the Bank has an agreement with the advantage of taking up to three years to pay in full and making payment just once a year. Producers can also postpone payment of their Turkcell phone bills within a certain limit until harvest time, interest-free.

DenizBank places great importance on agricultural chambers, unions and cooperatives to protect micro-scale farming and boost productivity. Thanks to the Bank's partnerships with leading unions and cooperatives – such as Çukobirlik, Tarış and Pankobirlik, irrigation cooperatives, as well as breeding animal and cattle cooperatives – their members are able to purchase agricultural inputs at attractive prices. In addition, the Producer Card gives producers the opportunity to postpone payment of their power bills related to agricultural irrigation until harvest time.

Producers can apply for the Producer Card at DenizBank branch locations, POS machines at contracted merchants, ATMs or with a simple SMS from their mobile phones, in an easy, fast and hassle-free manner.

PRODUCER CARD

The Facebook page “Deniz’den Toprağa (From Deniz to Land)” now boosts over 100,000 followers, enhancing farmers’ financial literacy and providing agricultural advisory to producers.

Other Products and Advantages

In agricultural loans, DenizBank offers customers the option of making repayment once a year, at harvest time, in line with its payment plans tailored to farmers’ cash and income flows. The Bank has developed numerous products to meet the specific requirements of the sector. These specialized lending products include Animal Husbandry, Greenhousing, Fruit Growing, Fishery, Tractor, Equipment, Land Purchase, Wedding Ceremony, Repair & Modernization, Plow & Drill, Best Agricultural Practices and Project Investment loans. The Bank’s innovative solutions help farmers finance their operational costs and all manner of agricultural investments.

DenizBank, in accordance with Ministry of Food, Agriculture and Livestock regulations to prevent the division of agricultural land through inheritance arrangements, offers “Benim Bahçem Benim Tarlam” loans. These special lending products are designed to protect unified land parcels, prevent the ongoing division of agricultural tracts and promote sustainable development. The loan provides up to 100% financing for the transfer of inheritable lands and agricultural tracts generating sufficient revenue, at maturity periods of up to 15 years. As such, farmers can continue agricultural activity on their parents’ land and are not forced to abandon their home village. To ensure the sustainability of agricultural production, farmers who earn the right to receive grants from the Young Farmer Grant Support Program are provided with financing featuring maturity periods of up to seven years and affordable interest rates.

After launching “Green Drop” branch locations, a groundbreaking model designed to bring the Bank closer to producers, DenizBank expended efforts in 2016 to ensure that producers can access banking services without even leaving their homes.

Employing technology to deliver practical banking services to producers more rapidly, DenizBank continues to introduce such innovations in every facet of agricultural banking. In addition to alternative channels such as telemarketing, SMS, ATM and digital banking, the Bank’s field personnel visit farmers in their villages, fields and homes to bring the branch to their doorstep in case the farmer customers are not able to easily access the Bank. Having in effect brought the branch to the village, DenizBank transferred its agricultural know-how and expertise to social media with its “Deniz’den Toprağa (From Deniz to Land)” platform. In another innovative solution for the agricultural sector, DenizBank launched in May 2015 the Facebook page “Deniz’den Toprağa (From Deniz to Land)” designed especially for producer users on the world’s most popular social media site. The dedicated page now boosts over 100,000 followers, enhancing farmers’ financial literacy and providing agricultural advisory to producers. The Facebook page provides advice to help farmers boost productivity, information on weather conditions, news on grants and other support, and price information during harvest times.

The “Deniz’den Toprağa” smart device application, the latest addition following the launch of the “Deniz’den Toprağa” Instagram account, won the Best New Product or Service Award in the “Innovation” category at the 2017 EFMA – DMI Awards. The DMI Awards is a highly prestigious international competition for financial markets.

All producers – whether they are customers of DenizBank or not – and anyone who is interested in agriculture or considers it a hobby can use this application for free. The app has so far been downloaded more than 120,000 times. Algorithms within the application simulate the entire growth of a crop, from planting to harvesting, in a virtual environment.

Banking Services

The “Deniz’den Toprağa” smart device application won the Best New Product or Service Award in the “Innovation” category at the 2017 EFMA – DMI Awards. The DMI Awards is a highly prestigious international competition for financial markets.

The app uses instant notifications to make specific recommendations to producers on fertilization, disinfestation and irrigation at each phase. The crucial “Ask the Engineer” feature enables users to submit their questions 24/7 to an expert team of agricultural engineers and receive their answers either via the application or by calling the indicated numbers. Producers can instantly access information such as market and stock prices, news updates, and official announcements. The “Rent a Tractor” feature helps producers share equipment and machinery that are required to continue production.

DenizBank is proud to have introduced such a groundbreaking application – dubbed “the farmers’ intelligent advisor in the field” – to the industry. The highly-successful app is recognized by a prestigious platform in the international arena.

In 2017, DenizBank rolled out another innovation in Agricultural Banking by extending tractor loans to producers directly through the dealers without having to visit a Bank branch. This practice continued in 2018. The project was initiated in collaboration with TürkTraktör and included the New Holland and Case IH brands. This lending product offers a solution to many difficulties faced when taking out tractor loans and provides easy access to lending products.

With the Farmer Card, specially customized by DenizBank, farmer customers can withdraw money round-the-clock from ATMs and shop from contracted merchants without having to carry cash. The Bank also intermediates in Turkish Grain Board (TMO) product payments to farmers, ranking first among all private banks in this category. Thanks to the Farmer Card, producers receive TMO payments earlier than they

would normally. With the Instant Farmer Card launched in 2017 to make a difference in TMO product payments, producers – even those who are not members of DenizBank – can receive their card while waiting in the queue at TMO agencies. Then, cardholders receive product payments 20 days earlier than normal wait times.

Committed to also supporting the development of licensed warehousing activities, DenizBank continues to intermediate for payment of crop proceeds and extend loans in return for Electronic Crop Receipts as collateral. Thanks to the licensed warehousing system, producers do not necessarily have to sell their crops at the time of harvest. Instead, they can store their crops in licensed warehouses at favorable rates for sales at a more convenient time later. The system enables storage of crops in a healthy environment. In addition, price disadvantages are eliminated in favor of producers.

DenizBank offers agricultural consulting services, facilitating access to information to those who need it.

DenizBank is committed to help increase the scale of agricultural enterprises – a key issue in Turkish agriculture. To this end, the Bank extends loans to producers to assist in covering agricultural investments and enterprise costs. Additionally, DenizBank provides services to facilitate establishing new processing plants, affect capacity increases in and modernization of existing facilities, and make equipment purchases easier.

To fuel the growth of the sector, DenizBank offers information and advisory services to large-scale producers and agricultural enterprises as well as entrepreneurs and industrialists with an interest in the sector. Furthermore, the Bank supports agricultural investment projects with attractive maturity and repayment terms so that investors can finance their projects in cattle breeding, animal husbandry for meat production,

DenizBank operates in the agricultural sector not simply as a lender but also as a comprehensive agricultural banking solutions provider that adds value to the everyday lives of producers in many ways.

dairy farming, sheep and goat breeding, greenhousing, and fruit growing.

The Bank also offers financing facilities under grant initiatives such as the Rural Development Investment Support Program (KKYDP) and the EU's Instrument for Pre-Accession Assistance in Rural Development (IPARD). DenizBank's specialized project team helps entrepreneurs to complete applications for these various programs.

DenizBank continues to add value to the everyday lives of producers through its corporate social responsibility activities.

DenizBank operates in the agricultural sector not simply as a lender but also as a comprehensive agricultural banking solutions provider that adds value to the everyday lives of producers in many ways.

To expand the availability of agricultural publications across Turkey and ensure that farmers have direct access to quality information, DenizBank joined forces with the Ministry of Food, Agriculture and Livestock to conduct Turkey's most extensive training campaign. Some 500,000 agricultural books were delivered to producers in 5,000 villages, intermediated by agricultural engineers who served as consultants. Sponsoring the "10th Agriculture and People" national photography competition held by the Ministry of Food, Agriculture and Livestock, DenizBank aimed to raise agricultural awareness across the country. In addition, high-achieving children of farmers who lack financial means are granted full tuition scholarships in collaboration with the Turkish Education Association.

In 2018, DenizBank paid visits to two villages in Edirne and Aksaray provinces under the Digital Transformation Ambassadors project. The Bank conducted social research on the two villages and the rural impact of agriculture. Social anthropologists participated in daily life and studied the cultural codes in the villages for a 10-day period. The project studied and sought solutions for social barriers to sustained involvement of young population in agricultural activities. This effort received the runner-up prize in the "Social Responsibility Category" at the 2018 DMI Awards by EFMA (European Financial Management Association).

In 2018, DenizBank provided support for a 4th time to the "Adding Value to Agriculture" competition held by the Ministry of Food, Agriculture and Livestock. The Bank intermediated in recognizing Ministry and Tar-Gel (Agricultural Know-How Enhancement Project) employees who made significant contributions to the agricultural industry with innovative initiatives that make a difference. DenizBank also helped promote these projects which set examples for the sector.

As in prior years, DenizBank officials participated in agricultural fairs, local harvest celebrations and agricultural festivals across Turkey in 2018. The Bank continued to stand by producers under all circumstances and put smiles on their faces.

Banking Services

The Corporate and Commercial Banking Group ensures that operations are conducted in coordination and creates synergy with the Bank's other business lines.

Wholesale Banking Group

The Wholesale Banking Group ensures that DenizBank's:

- Corporate and Commercial Banking Group,
- Project Finance and International Loans Coordination Group

operations are run in coordination and create synergy with the Bank's other business lines.

The core operations of the Group include bolstering relations and creating partnerships with overseas subsidiaries and branches. The Group also aims to expand the overseas subsidiary and branch network in line with the Bank's overall strategy. Furthermore, DenizBank Moscow, DenizBank AG, DenizLeasing, and DenizFaktoring report to the Board Member in charge of the Group.

Corporate and Commercial Banking Group

The Corporate and Commercial Banking Group ensures that operations are conducted in coordination and creates synergy with the Bank's other business lines.

The Group executes the following core activities geared toward its target group of corporate and commercial enterprises:

- Developing and marketing Corporate and Commercial Banking products in favor of strategic priorities;
- Organizing sales of products and services by the branches in line with set targets;
- Organizing the workflow between related departments and coordination of their relationships.

The Wholesale Banking Group's marketing approach is based on the following four pillars: The capacity to create high-quality assets, adapt rapidly to economic change, generate synergy with other business lines and among subsidiaries, and employ well experienced personnel who embody DenizBank's "collective wisdom" approach.

The Group has over 70 products in key areas such as loans, deposits, securities, cash management, project finance, leasing, factoring, insurance, foreign trade, and investment banking. DenizBank Corporate and Commercial Banking Group operations contributed to investment and privatization processes through its know-how in project finance and financial strength, thus bolstering its position in the market.

The Corporate Banking Group provides the right financial solutions to meet its customers' needs with innovative project finance, cash management and foreign trade products, as well as traditional corporate banking products. This approach creates value chains that integrate all business lines of DFSG and produces tailored and proactive solutions to meet any financial need.

Under its financial supermarket approach and collective wisdom strategy, the Group offers clients from diverse industries a wide range of products and services. In addition, the Group creates new business opportunities under DFSG and ensures synergy for DenizLeasing and DenizFactoring as well as the commercial, SME and Retail Banking groups. Providing support to target industries – including tourism, maritime, sports, health care, education and energy – the Corporate and Commercial Banking Group plans to continue serving these sectors in 2019.

The Corporate and Commercial Banking Group operates a total of 26 branch locations – including four Corporate branches and 22 Commercial Central branches – with an experienced and specialized sales team.

Project Finance and International Loans Coordination Group

The Department's core business includes providing structured financing for:

- Projects in target sectors,
- Industrial investments, and
- Privatization transactions.

The Project Finance Department focuses on large scale investments that play a key role in developing Turkey's economy, and thus require medium and long term financing. The Project Finance Department provides funds to such top priority industries as telecoms, energy, infrastructure (e.g. ports, airports and motorways), Public-Private Partnerships (PPP), healthcare and education — all of which form the backbone of economic and social development. The Department also conducts long-term transactions, including industrial investment, privatization and acquisition finance, as well as "club-loans" featuring multiple banks.

DenizBank has secured more than USD 20 billion in long term financing for more than 300 projects it has funded over the last 13 years.

By year-end 2018, Turkey's total installed power generation capacity expanded to 88,550 MW. Over the last 13 years, DenizBank has intermediated in commissioning some 6,400 MW in installed capacity. Including electricity distribution, natural gas distribution and wholesale projects, DenizBank has provided over USD 4 billion in financing to the energy industry.

DenizBank plays an active role in Turkey's infrastructure investments, and has specialized in airport financing. DenizBank provided EUR 500 million to İstanbul's Third Airport project, EUR 154 million for TAV Bodrum Airport, and varying amounts to İzmir Adnan Menderes Airport, İstanbul Atatürk Airport, Antalya Airport and Alanya Gazipaşa Airport — totaling EUR 800 million. DenizBank became the private bank extending the highest credit line to the Third Airport Project. Meanwhile, TAV provided financing to Bodrum Airport and Ankara High Speed Train Station projects on its own as a proof of its leadership in infrastructure financing.

Looking ahead to 2019, the Project Finance Department plans to bolster its pioneering position in large-scale infrastructure projects, while further boosting growth in the core sectors of energy, infrastructure, transportation, mining, healthcare and education.

Banking Services

DenizBank Call Center's first goal is to be both a major service channel with its high-quality service approach and an effective sales channel that generates value with its sales.

Payment Systems and Non-Branch Channels Group

The Payment Systems and the Non-Branch Channels Group make up the following functions within the coordination and synergy with other business lines at DenizBank:

- Call Center,
- Mobile Sales,
- Telemarketing-Collection and Customer Retention,
- Card and Product Management

are run in coordination and create synergy with the Bank's other business lines.

Call Center

The Call Center provides customers with top quality, non-stop services 24/7. All processes and the individual performance system are designed to maximize customers' experience in customer communications.

We communicate with our customers through a natural dialogue thanks to our Interactive Voice Response System, designed in an attempt to provide personalized, fast and simple service to customers using smart methods, and handle 60% of the calls without having to talk to a customer representative.

In addition to telephone, customers can reach DenizBank Call Center via Mobil Deniz, fastPay, and Skype offered in Turkish, English and Russian in line with the changing technological needs and emerging trends.

The Call Center's revenue-oriented business culture is focused on optimizing the customer experience and maximizing productivity. Systems were established at the Center to monitor its overall performance and issue warnings whenever problems arise. The General Service Performance of the Call Center (percentage of answered call, speed of answer, overage call quality score) is measured by monthly scorecard and the results are reflected in Call Center employees' performance system. Studies on incoming call projections and shift organizations and efficient performance monitoring allowed the Center to reach its numerical and quality targets. In 2018, 11.9 million incoming calls were answered. Another important link in the DenizBank communications chain is the POS Hotline, which responds to contracted merchant questions and provides immediate solutions to 88% of all incoming cases over the phone.

The Call Center screening used to serve inbound customers is capable of presenting the best offer and next best offer, determined according to the needs of the customer through analytical CRM models. The call blending infrastructure allows the Center to maximize productivity and enables respondent personnel to function as a Tele-marketing team. In 2017, the Call Center's top priorities included systems and technological enhancements, productivity improvements in sales automation, customer service representative staff increases, and deeper integration of sales activities with the business culture. In 2018, the Call Center, which is a standout with its superior service and sales-focus, sold more than 1.3 million products to customers.

Making the most effective use of technology infrastructure, the Mobile Sales Department attains the multi-product sales goal of the banking industry with a high level of efficiency in the field.

Mobile Sales

The Mobile Sales Group is a dedicated sales team focused on the marketing of payment systems, retail, SME, Agricultural Banking, digital banking and DenizFactoring products in line with segment-specific targets. The Group also lends support to the Bank's many business line as well as to general sales initiatives.

The Mobile Sales Group's primary goal is to acquire new customers through multiple sales efforts, while also making the best use of technology to conduct highly efficient sales transactions.

The mobile team visits individuals who have yet to become acquainted with DenizBank in their workplaces to respond to their needs with the widest product range possible, immediately meeting the financing needs of customers as part of Business Partnership projects. In addition to acquiring new customers, the team contributes to customer activation and profitability by offering new products to current customers encountered in the field.

Sales representatives use the Mobile Sales app installed on their tablet devices. Credit Cards, Consumer Loans, SME Card, Bonus Business, Factoring, Overdraft Account, Installment Cash Advance, Automatic Utility Bill Payment, Supplementary Card and Insurance products can be sold over this app. Thanks to upgrades effected in 2018, the Mobile Sales team will soon become capable of selling the Producer Card, the pilot testing of which is still underway, with their tablet devices in addition to the current transactions. Efforts to conduct POS sales and add it into the range of tablet products began. In 2019, the Bank aims to add new products to tablet apps and ensure that each staff member in contact with a customer can operate like a Mobile Branch.

Mobile Sales sold over 1.5 million products in 2018. As a result of this strong performance, Mobile Sales accounted for 52% of the Bank's total SME card sales through all channels for the SME Banking, 31% of all credit card sales for the Payment Systems unit, 68% of Bonus Business cards, 24% of all retail loan sales for the Retail Banking department, 27% of all overdraft account sales and 8% of retiring pension transfers, and 25% for Factoring, excluding the digital application.

Banking Services

The Group will continue to contribute to the future strategies of our Bank in the upcoming period with its channel management approach based on data analysis that makes a difference thanks to flexible and effective capacity management and uses high technology.

Telemarketing-Collection and Customer Retention

DenizBank's telephone channel, which manages all sales and collection processes that start and end telephonically, has three main functions, namely:

- Customer cross sales, activation and intensification via outgoing calls, and
- Customer retention and reacquisition through incoming and outgoing calls.
- Collection through incoming and outgoing calls.

Effective capacity management and high-technology use are the strongest suits of the channel that always focuses on delivering superior efficiency. In addition, data analysis-based channel strategy and management approach provide sustainable high performance in cross sales, collection and retention activities, which are the main operations in the channel.

The channel reached all of its annual performance targets in 2018, reporting a total of 1.54 million products sold and generating sales of TL 1.9 billion, and the telephone collections from defaulting accounts exceeded TL 10 billion.

Similarly, customer retention operations, another significant mission of the channel, were also conducted successfully. Increasing its persuasion rates compared to the previous year with its centralized staff of specialists, the channel retained the retail, commercial and agricultural credit cards that showed up in recommendation persuasion flows or returned via mail, thereby making direct contributions to the number of these products in circulation and the profitability goals of the business lines.

Thanks to the digital transformation that is visible to the naked eye in many areas as well as its many years of tele sales experience, the sales channel will continue to be a valuable partner in helping all business segments reach their productivity and profitability targets.

Card and Product Management

Credit Cards

DenizBank continued to expand its extensive credit card product portfolio appealing to different segments and preferences in 2018.

As of year-end, the Bank's total credit card unit market share rose from 6.40% to 6.68%. Credit card turnover increased from TL 39.9 billion in 2017 with a 32% rise to TL 52.6 billion as of year-end 2018. Meanwhile, DenizBank's turnover market share went up from 6.45% in December 2017 to 6.82% in 2018. Our year-end 2018 market share for credit card balance increased by 13 bps and reached 6.23%.

The number of credit cards issued rose by 6% sector-wide, while DenizBank's portfolio expanded by 11% during the year.

Bonus and Co-Branded Cards

In order to offer credit card products which will play a role in the life cycles of customers and to help meet their daily needs, DenizBank continued to undersign successful Co-Branded Projects with brands from various sectors, in addition to its privileged Bonus offerings with services that continued to make a difference in customers' lives in 2018.

Tailoring the Bank's card products for individual customers from the application stage through to exclusive promotional offers in order to provide the right product to the right customer, DenizBank offers a vast array of alternatives to its customer base.

Upon the completion of its credit card segmentation initiative, DenizBank has fully implemented its strategy of “delivering the right card product to the right customer.”

DenizBank is the official card supplier of the five of the major Turkish football teams, which have won the national championship, in addition to clubs across Anatolia. The Bank is also the official card supplier of Manchester United, the only international team with a credit card in Turkey. In total, the Bank has card agreements with 12 football teams. The portfolio grows rapidly with more than 260,000 Football Fan Cards.

The Football Fan Card portfolio generated turnover of TL 2 billion as of November 2018. Thanks to this shopping volume created by football fans, the Bank has made contributions exceeding TL 25 million to the sports clubs it collaborates with since 2008.

The Bank plans to render its current Football Fan Card partnerships more profitable, and continue providing more benefits to the clubs and customers with its innovative service approach.

DenizBank Bonus Business

Prioritizing all kinds of support to shopkeepers and SMEs through its innovative services, DenizBank strives to offer significant advantages to its commercial customers with DenizBank Bonus Business Credit Card. Bonus Business Card is a commercial credit card that shopkeepers and SMEs can use both for their personal expenditures and for easily tracking the expenditures made by company employees on behalf of the company, while also offering the opportunity of installment purchase at all Bonus merchants.

As of year-end 2018, the number of cards in total exceeded 93,000 and our turnover market share reached 2.3%.

DenizKartım Product Management

DenizKartım (My Deniz Card) was launched as the last leg of this strategy in 2017. DenizKartım is a mobile application with both loyalty and wallet features designed exclusively for DenizBank credit and debit cards. Aiming to provide the best benefit to customers at the right place and time, this application strives to reduce communication costs and increase customer use while ensuring customer satisfaction thanks to its ease of transaction features.

The DenizKartım mobile application enables customers to:

- View all campaign details, participate, and monitor their status in the campaign;
- View the campaigns in their vicinity and get directions via the map app;
- Reach all up-to-date information on their cards; View Card Limit, Cash Advance limit, Statement Details, Bonus balances; and pay their card balances;
- Perform transactions related to all services and products of their cards;
- Earn D-Points with each step they take using the Walk & Earn feature;
- Make contactless payments using their phones.

Banking Services

DenizBank continued to provide innovative campaigns and services to its segment customers.

Segment Cards

DenizPrivate, the credit card exclusively offered to Private Banking customers, was updated as DenizPrivate Limited Edition under the concept "An exclusive world, just for you." DenizPrivate Limited Edition aims to integrate this concept into its design and provide a personal touch to the card, presenting the initials of the holder on matte black surface with a special vertical design.

DenizPrivate Limited Edition offers cardholders the opportunity to benefit from wide-ranging discounts and privileges globally and in Turkey with Mastercard World Elite. In June, the new card was sent in a special kit to each customer with average total assets of TL 1 million or more at the Bank.

The new DenizPrivate Limited Edition offers a myriad of opportunities to cardholders. These include free lounge access with a guest at domestic and international terminals at Istanbul Atatürk, Ankara Esenboğa, Izmir Adnan Menderes and Bodrum Milas Airports; lounge access at about 1,000 airports in 125 countries; 10% discount on accommodation and restaurant expenditures abroad; and 30% discount for Sunday breakfasts in every part of Turkey.

Differentiated from its competitors thanks to the exclusive financial advantages it provides in Sunday breakfasts, theatre and movie tickets as well as airport parking/valet, the Affluent Bonus Platinum credit card offered to DenizBank Affluent Banking customers continued to provide innovative campaigns and services.

Through the special focus for the retiree customers and by setting out with the message that the life experiences of retiree customers should serve as a road map and a helm for the following generations, credit card design and card communication materials were overhauled with a more dynamic and distinctive image.

Debit Cards

DenizBank's first pre-paid debit card project was launched on June 21, 2018. This project aims to meet the needs of specifically the corporate clients such as personnel payment, bonus payment and closed circuit shopping.

In line with the tactical actions taken to increase shopping with debit cards, Paracard is now included in Masterpass, the secure payment infrastructure by MasterCard. This action will enable Paracard to be used with ease at merchants where Masterpass is valid.

During the year number of DenizBank's total Debit cards Increased by 23%. As such, cash withdrawal amount and shopping transactions turnover rose by 23% and 35%, respectively.

DenizBank added new features to DenizPOS Mobile in parallel with its digitalization policy in 2018.

Merchant Relations

In 2018, DenizBank Merchant Strategy was set to gain Active POS customers and grow the customer portfolio in a healthy manner by landing Bonus POS contracts with merchants that are currently not included in any loyalty program.

To this end, POS devices were taken back from members that have been inactive for over 90 days and have never been active at all. By focusing on efficient customers and active customer acquisition, customer activity reached 79.6% by December 2018.

In the same period, the number of POS sales stood at 65.302. Mobile Sales team began to sell the POS product starting from August.

In 2018, several new features, namely the early POS unblocking solution, online tracking of transactions and monitoring fastPay transactions, were added to DenizPOS Mobile, which was offered to merchants in 2017 in parallel with the digitalization policy of our Bank. DenizPOS, an alternative service channel, reached 50,000+ downloads and 30,000+ users.

DenizBank Merchants aim to increase the current portfolio efficiency through analytical portfolio management and improve operational efficiency by focusing on active merchants.

Banking Services

Treasury and Financial Institutions Group

The Treasury and Financial Institutions Group ensures that DenizBank's:

- Treasury, and
- Financial Institutions

operations are run in coordination and create synergy with the Bank's other business lines.

The Group's main activities include:

- Treasury: managing short-term liquidity, pricing treasury products, implementing the treasury-related aspects of asset-liability decisions, and performing profit-oriented trading activities;
- Financial Institutions: establishing, enhancing and maintaining DFSG's correspondent bank relations, carrying out talks to intermediate the Bank customers' foreign trade transactions jointly with correspondent banks, securing bilateral loans from correspondent banks;
- Management of Nostro – Vostro account relations: conducting talks with overseas banks and other financial institutions concerning medium and long term borrowing activities, structuring and monitoring relevant transactions, coordinating these with the relevant Bank departments, corresponding with foreign banks and other financial institutions as regards medium and long-term borrowing activities, structuring and monitoring transactions, as well as coordinating these efforts with other Bank units.

Treasury

The Treasury Department operates via four groups:

1- Treasury Marketing and Pricing primarily deals with the pricing and marketing of treasury products to customers via branches and alternative delivery channels and with managing the exposures resulting from transactions. The Group is comprised of three units:

The FX and Interest Transactions Department is mainly responsible for supporting the branches in FX and precious metal transactions. The Department aims to train the staff at branch locations on treasury transactions and boost the competitiveness of branches via pricing. In addition to the services offered to branches, the FX and Interest Transactions Department is responsible for monitoring and managing on a daily basis the FX/precious metal exposures of the Bank as a result of customer transactions and performing transactions on the OTC and organized markets; responding to loan pricing from the relevant business lines in line with the spreads set based on the decisions by the Assets and Liabilities Committee; responding to requests for quotations for IRS and XCCY swap transactions; and making customer visits in coordination with the branches and Treasury Sales Units. The Department bases its activities on the principle of attaining sustainable profit rather than short-term gain.

The Securities Department responds to requests for quotations on securities (Treasury Bond, Government Bond, Eurobond, Private Sector Bonds/Bills and Repo) placed by External Financial Institutions, Treasury Sales Department, Private Banking and other branches. The Department executes trading transactions on the OTC and BIST markets in order to manage the exposures that occurred within this framework.

The Derivative Transactions Department provides the fastest and most competitive response to requests for quotations on FX, commodity and interest options submitted via the Treasury Sales and Private Banking Center. The Department is responsible for managing the options portfolio in the aftermath of FX option transactions by customers within the limits assigned to each customer concerned. Furthermore, the Derivative Transactions Department performs the required option, spot, futures and swap transactions on the OTC and organized markets to manage the risks of the options portfolio.

2- Fixed-Income Securities and Money Markets is comprised of the Fixed-Income Securities and Money Markets Departments.

The Fixed-Income Securities – FIS Department is responsible for managing DenizBank's Bank bill portfolio within the guidelines and goals set by the Assets and Liabilities Committee in addition to supporting the Assets and Liabilities Committee in hedging interest rate risk on the Bank's balance sheet. The FIS Department fully exercises its rights and meets its responsibilities under the Market Maker System of the Undersecretariat of Treasury and manages relations with the relevant institutions.

The Money Markets Department monitors the entire cash flow of the Bank in foreign currency and TL, and meets the needs for short-term funding and cash surplus placement. Turkish Lira Money Markets is responsible for performing optimal transactions (in consideration of the cost and maturity structure) within the limits available in line with the Bank's needs on the CBRT Interbank Money Market, Interbank Money Market (OTC Market), Interbank Swap Market, Takasbank Money Market and the markets to be potentially structured; on BIST Repo/Reverse Repo Market within the limits available and in return for securities; and optimally managing (in consideration of the cost and maturity structure) the Bank's surplus funds on the above-mentioned markets within the same conditions. FX Money Markets is responsible for the entire cash flow of the Bank in foreign currency (FX).

3- Treasury Sales coordinates between the branches and the Treasury Group, establishes direct contact with the customer base via the branch channel, while providing active sales and pricing service for capital market products. The Treasury Department's core strategy is to boost the transaction volume of financial products. Treasury Sales offers its customers treasury products to manage their balance sheets and mitigate possible financial risks.

The Department also plays a role in determining the sales strategies and targets of treasury products (foreign exchange, options, and securities). Treasury Sales develops new and sophisticated treasury products and offers these for sale, while ensuring that the branches market these products in line with overall targets. The Department strives to establish long term, sustainable relationships with customers as well as branch personnel.

The Department visits potential customers in person in order to expand the customer base and boost transaction volume.

The Treasury Sales Department's other duties include informing customers about all treasury products, keeping track of customer exposures, in addition to providing clients with fast, high quality services.

The Department plays an active role in the issuance of DFSG bonds and bills — which have a nominal volume of TL 2.9 billion and a market share of 8.2%. The Treasury Sales Department is key in ensuring the coordination between departments and managing institutional investor relations.

4- The Subsidiaries Treasury Department is responsible for liquidity management and optimal funding in line with the resolutions and instructions by the management of subsidiaries.

Banking Services

Expanding its Foreign Trade solutions portfolio, DenizBank continued to stand by its clients.

Financial Institutions

Correspondent Relations and Foreign Trade Financing: DenizBank continued to expand and diversify its funding portfolio thanks to its strong and extensive network of more than 700 correspondents in 112 countries. The Bank emerged as a key and active player in the sector by increasing its market share in Turkey's foreign trade.

Despite recent political and economic fluctuations in Turkey and around the world, Turkey's exports rose in 2018 against a decline in imports, thus increasing the export-to-import ratio. Turkey's exports and imports grew 7% and 5%, respectively and total foreign trade volume was USD 391 billion. Meanwhile, DenizBank's total foreign trade volume realized as USD 16.3 billion increasing by 4%, while its exports rose 21%.

Thanks to its various financing solutions related to exports and imports, DenizBank reached its market share in letters of credit for imports and exports by 11% and 5%, respectively, in 2018.

In addition, DenizBank added to its already long list of collaborations with various export loan insurance agencies from America and Asia, to Europe and the Middle East. The Bank continues to be a major solution partner by meeting domestic companies' long term financing needs thanks to

agreements with Chinese banks and the China Export and Credit Corporations.

DenizBank continues to expand its network of correspondent banks in new markets for exporters, thereby supporting customers that seek protection from country risk in new markets and want to boost their exports.

Committed to making a difference and delivering solution-oriented services to customers, DenizBank continued to use international funds to provide customers operating in various countries with the opportunity to trade in 146 different currencies.

Furthermore, DenizBank supports exporters with loans extended through its own funds or the CBRT and Eximbank funds. The Bank also serves as solution partner to construction companies operating throughout the world for their external guarantee needs.

SME-friendly DenizBank continued to stand beside SMEs this year, as always, by providing appropriate financing solutions via Product and Service Packages customized for SME clients. Continuing to support SMEs this year, DenizBank maintained its support for SMEs by providing them with product offerings tailored specifically to their commercial cycles. In addition, the Bank continued to support foreign trade with its SME Foreign Trade Hotline, set up exclusively for SMEs.

In 2019, DenizBank's Correspondent Relations and Foreign Trade Departments plan to expand their foreign trade solutions portfolio, while providing critical support to customers. DenizBank aims to meet customers' foreign trade financing and investment needs via country loans as well as domestically and internationally-sourced funds. In addition, the Bank offers insurance solutions aimed at risk management with its specialist staff and customer-friendly approach.

The Financial Institutions Credit Analysis Department is responsible for conducting credit analyses of correspondent banks whose risk will be assumed by the Bank in line with its requirements, initiating the credit allocation process and following up until completion. All the necessary coordination is facilitated with the Credit Analysis Group, Credit Allocation and other related groups. We take the responsibility for 356 bank limits in different countries.

The Structured Finance Department is primarily responsible for maintaining relationships with foreign banks and other financial institutions to meet the medium and long term borrowing needs of DenizBank Financial Services Group. The Department also manages the financing process, monitors and structures transactions, and coordinates with the Bank's other business lines.

DenizBank continued to provide loans secured from the European Bank for Reconstruction and Development (EBRD), European Investment Bank (EIB), International Finance Corporation (IFC), Deutsche Investitions- und Entwicklungsgesellschaft mbH (DEG), Japanese Bank for International Cooperation (JBIC), and the European Fund for Southeast Europe S.A. SICAV-SIF (EFSE), Agence Française de Développement (AFD) continued to provide credits to its clients in the agricultural and public sectors as well as SMEs.

In 2019, DenizBank plans to continue cooperating with international investment and development banks to secure such loans, thereby boosting its market share and supporting the real economy with low-cost and long term funds.

The share of the sales of the products and application penetrations within the Bank increased in 2018. DenizBank plans to further increase these shares in accordance with its digitalization goals.

Digital Transformation, CRM and Change Management Group

Digital Transformation, CRM and Change Management Group ensures that DenizBank's:

- Digital Generation Banking,
- Change Management,
- Business Analytics and CRM,
- Project Management,
- Electronic Money and Payment Systems,
- Cash Management and Public Finance

operations are run in coordination and create synergy with the Bank's other business lines.

The Group's main activities include:

- Delivering banking products and services via all digital channels, increasing the sales capacity and performance of these channels, monitoring and measuring the transactions undertaken;
- Monitoring technological developments related to the channels and adapting innovative projects and new products to the channels;
- Developing new business model solutions based on digital media for all subsidiaries and business lines, analyzing user behavior to develop new applications, helping the Bank acquire new customers and enhance customer loyalty;
- Monitoring innovative practices and integrating these innovations into the banking system;
- Expanding the base of those who benefit from products and services in digital media, in addition to shifting products and services to less costly channels.

Digital Generation Banking

Digital Generation Banking operations are divided into the Digital Channel Management, Fintech Banking, Digital Sales and Marketing, and Innovation Management Departments.

Digital Channel Management

Internet Banking

In 2018, Internet Banking continued to serve customers with advanced functionality both before and after login. The Bank embraced innovations to acquire new customers and enrich the customer experience in frequently used screens. Furthermore, in yet another first in Turkey, DenizBank offered customers, including those who are foreign nationals, a password-free login to the e-Government Portal both via AçıkDeniz and e-Government, thus becoming a pioneer once again in the banking industry. In 2018, principal and agent customers were given the opportunity to take action by using the Password-Free Login button to e-Government. Controls were installed for proxy accounts to prevent password-free login to e-Government under the Law on the Protection of Personal Data.

Banking transactions were performed via an online chat service under Disabled-Friendly Banking for hearing-impaired customers.

Lost/stolen card notifications, credit card restriction/non-restriction and expenditure objection menus enabled customers to take quick action over Internet Banking, thus significantly reducing the operational workload at the branches and communication center.

It is now possible to place instructions to top up istanbulkart thanks to the istanbulkart payment function under the Transport Payment menu in Internet Banking. This boosted customer satisfaction and strengthened a leading position for the Bank.

Banking Services

In 2018, the Bank completed work related to legal and regulatory requirements, specifically under the Law on the Protection of Personal Data. These changes affected applications, investment and loan transactions, leading to major changes in Internet Banking.

In 2019, users will be greeted with a brand new welcome page and offered a next generation user experience.

Mobile Banking

In 2018, Digital Channel Management maintained the highly successful Mobile Banking operations from the prior year.

MobilDeniz, DenizBank's mobile banking application, is available on app stores. It is positioned as a new application that combines customer-oriented and best user experience with the most recent technological trends.

Customer comments, feedback and habits were monitored and taken into account during the development of the new MobilDeniz. The Bank formed an internal analysis group to have a more efficient understanding of customer feedback and ensure the application was customer-oriented.

The software development process saw a switch to the Agile methodology, leading to continuous production, business visibility and continuous development. Usability tests were conducted at every stage of development to see whether flows and screens met customer demands. Data from such efforts were and are still integrated into the development process.

Neuroscience studies were used to observe the emotional and cognitive journeys of users during application use. Data from such efforts were and are still integrated into the development process.

Digital Sales and Marketing Management

The Digital Marketing team is responsible for the sales and marketing of the Bank's products and services across all digital channels as well as monitoring and analyzing data regularly. The team supports efforts to grow the Bank's products – time deposits, loans, credit cards, cash advances, installment cash advances, installments for cash, insurance – as well as Internet Banking and mobile applications. The Digital Marketing team also works to differentiate these products from the competition to give DenizBank a competitive edge. In this process, the team focuses on customer satisfaction, the Bank's profitability, and lowering costs.

The Digital Marketing team aims to perform an end-to-end measurement of marketing operations on digital media and of the digital customer journey. The goal is to optimize the marketing budget and operations. The team is responsible for integrating the required analytics and measurement tools into all banking products and practices in the most accurate fashion, and managing the integration tests as well as the process of launching them.

The share of the sales of the products and application penetrations within the Bank increased in 2018. DenizBank plans to further increase these shares in accordance with its digitalization goals.

Under Digital Sales, campaigns, targeting and awareness-raising efforts continued in terms of the penetration of digital products at all physical branches. Digital transformation efforts continued at all DenizBank branches throughout the year in parallel with the Bank's main strategies. This work will continue apace in 2019.

Web Platforms Department

The Web Platforms Department conducted initiatives to identify services to be offered on the DenizBank corporate internet site, mobil.denizbank.com and other digital platforms. The Department also formulated the strategies; implemented the projects; added the functionality for marketing and sales of banking products and services through interactive communication channels in accordance with marketing strategies; supported efforts to launch the planned projects; and provided post-launch reporting.

In 2018, the number of monthly visitors to denizbank.com topped 3.5 million. The Bank's web site has become a more effective tool thanks to a reorganization of the business flows, and personalization of the page according to each users' behavior patterns while on the site.

As a result of web site upgrades that enhance the user experience, the number of credit card applications went up 16% over the prior year. The Bank also launched numerous deposit projects in 2018 in response to the time deposit reform.

Innovation Committee and Management

Launched in 2015 to manage DenizBank's innovation processes, the Innovation Committee is comprised of the Chairperson, senior managers representing business lines, Board of Directors and the Committee Secretary General. The Committee's vision is to make DenizBank the leading innovative enterprise in Turkey and worldwide, not only in finance but across all industries. The mission is to interpret innovation in a way that touches upon both internal and external customers to ensure that all DenizBank units actively engage in innovation and think innovatively. The Innovation Committee strives to foster a culture of innovation among all Bank employees, and transform DenizBank into a veritable innovation factory.

The follow-up of all business lines and coordination of the Innovation Committee are carried out by the Innovation Management Department. To enhance current innovative products and identify new issues that arise, the Committee and Innovation Management team join forces, design DenizBank's upcoming product processes, and take the necessary action to implement these. In addition to traditional banking operations, the Innovation Committee continues to shape banking of the future in every way as a leading bank in innovation and creativity.

The Innovation Management Department convened the DenizBank Innovation Committee in December 2018. The Department aimed to share its vision for the new period under a new innovation management process. The new process will allow for an efficient functioning of innovation working groups that will be participated by DenizBank's regional offices and branch offices in line with a model that would accommodate the dynamic structure of the organization. The first working group became active in December 2018. Focus areas planned for 2019 include customer-oriented innovation vision and customer experience. An annual timeline was developed for working groups, laying the foundation for the start of their work.

Responsible for managing and developing digital projects within the Bank in conjunction with various business segments, the Committee commissioned the banking integration for the "From Deniz (Sea) to Land" application last year. In addition to the Neuroscience project with the Call Center, efforts are underway to commission a separate application comprising a neuroscience direction for the "New MobilDeniz" app and a new format for the "I Found a Solution" project with Human Resources.

Furthermore, "AlgoLab: The Algorithmic Investment Platform" – an award-winning project – was successfully managed in beta version. Plans are underway to launch a live version. Designed to facilitate the participation of all DFSG employees and managers in innovation and developed as a tool to combine internal innovation with collective wisdom, the Innovation Portal is pending for launch soon.

The Innovation Management Department attended many broadcasts of "TEKNODENİZ" in 2018 to share methods and action schedules on how to make more efficient and creative use of the combined power of innovation processes and interdepartmental innovation. The Committee is also working on innovative initiatives that are currently in the planning stages.

In 2018, the "I Found a Solution" application underwent a revision process. This effort aimed to ensure access to more users via the gamification infrastructure and better manage the internal open innovation culture. The application is an open innovation platform where users can easily share their ideas, findings and solutions on the Bank and innovation within the Bank. Users also can assign scores to each other, make comments and compete. The "I Found a Solution" app is intended to be a stand-alone application separate from the Denizde app for a better management of findings and solutions. Further, all employees vote on existing solutions and evaluate them with their comments.

The Committee delivers highly synergistic efforts with DenizBank Agricultural Banking to boost the productivity of farmers in the agriculture industry, the engine of Turkey's economy. In 2017, the "From Deniz (Sea) to Land" application was launched, developing a phenology engine that makes specific and dynamic recommendations to

anyone seeking to increase productivity in agricultural practices. "From Deniz (Sea) to Land" is an agricultural advisory service that generates technology-supported customized solutions for farmers interested in lowering their production costs and boosting their yields. In addition, the "Ask an Engineer" feature enables farmers to be educated by expert agricultural engineers about challenges they face. Furthermore, farmers can follow the Wholesale Produce Market and Exchange prices and access the latest prices in real time. All developments in the agricultural industry – such as news, official announcement, grant and support notifications, and lucrative promotional campaigns – are found in the "News & Announcements" section of the application. In addition, users can contact tractor owners via classified ads to lease the tractor that meets their brand, model, horsepower, and daily rental price criteria. The Banking Integration project, which will maximize the value proposition for the "From Deniz (Sea) to Land" application, is also currently underway. This structure will ensure successful communication between the Banking APIs and the application. Integration of time-consuming monitoring transactions – such as loan debt query, debt balance, remaining maturity, which the Producer Card holders can only perform at branches – will be achieved. In addition, the new structure will enable functionality such as applying for the Producer Card, joining campaigns and making payments.

In second quarter 2018, the Innovation Committee commenced more intensive work on Alternative Credit Scoring. The Alternative Credit Scoring initiative aims to make more regular risk analysis and take robust steps to boost the Bank's market share in retail loans. The Innovation Committee works jointly with the Credit Analytics and Modelling Department on this project. Proof of Concept work with a third party company is planned for first quarter 2019.

Banking Services

The Bank started the studies for Platform Banking with a vision to render the Open API Platform a stronger business model as of the third quarter 2018. DenizBank Platform Banking is designed to meet all the financial and non-financial needs of people in today's world. To that end, a Platform Banking Strategy Committee comprised of Bank managers and 50% independent sector managers is being formed. Work is underway related to business models under the pilot business development process. This effort is conducted in cooperation with more than 20 companies from various sectors, including but not limited to small technology firms and telecommunication giants. The platform is scheduled for launch with a complete set of essential business partners and the required infrastructure by the end of first quarter 2019.

Working in parallel with the Innovation Committee, the Innovation Management Department follows up on in-house innovation processes, while also keeping track of all innovative products and technologies from Turkey and worldwide. The Department explores how these innovations can be used at DenizBank. The Innovation Committee conducts meetings and agreements with fintech start-ups and third parties that provide high quality services which can generate value for DenizBank. This contributes to the formation of an open innovation ecosystem across DenizBank. In 2018, the Committee embraced a corporate stance that validated the Ecosystem Banking vision. DenizBank actively introduced itself to startups via content on various platforms, granting special access to such startups. This effort helped DenizBank transform into a bank that startups want to work with. In addition, the Innovation Committee launched "News of the Week" in 2018. This innovation bulletin is used to inform the entire Bank staff on global technology and trending news.

To sustain DenizBank's international innovation achievements, which are valued across the world, the Bank maintains relations with global authorities that recognize innovative products and services. Furthermore, in order to expand DenizBank's successes and unique experiences in this area, efforts are made to prepare and publish domestic and overseas publications on technology, digitalization and innovation.

Our Awards

2017 was yet another year when DenizBank bolstered its reputation as an "Innovation Leader." DenizBank became the only financial institution to be named the "World's Most Innovative Bank" four times in a row after receiving the World's Most Innovative Bank awards from BAI in 2014 and from EFMA in 2015. That was followed by the BAI 2016: The World's Most Innovative Bank award in October 2016. In 2018, the Bank received prestigious awards from Gartner, BAI and EFMA for its mass market practices after adopting a customer-oriented philosophy in product design. DenizBank not only maintained product leadership but also used the new customer-oriented approach as leverage to reach customers more often over products. This added more to brand recognition.

Digital Transformation Ambassadors/EFMA – Silver Award for Social, Sustainable and Responsible Banking

In 2018, DenizBank added another item of success to its tally in the field of agriculture during Efma Innovation Awards. The Bank received Silver awards in Social, Sustainable and Responsible Banking with its Digital Transformation Ambassadors initiative.

Credit X/BAI – Innovation in Marketing Winner

DenizBank was crowned the winner in the "Innovation in Marketing" category thanks to its Credit X marketing strategy at the Global Banking Innovation Awards by the US Bank Administration Institute (BAI). The competition received thousands of projects from financial institutions in more than 22 countries.

Algolab/The Banker Tech Projects of the Year 2018 – Trading Platforms Winner

Furthermore, DenizBank was the first place winner in the "Trading Platforms" category at Tech Projects of the Year 2018, held by The Banker, a leading global magazine for financial services industry. The Bank also won the "Most Innovative Project of the Year" category with AlgoLab, the next generation innovative algorithmic transaction platform developed in cooperation with DenizInvest.

DenizBank Neuroscience Project/Gartner Eye on Innovation – EMEA Winner

DenizBank recorded a historical success when it received an award in its own category and at the same time emerged as the winner in EMEA* region at Gartner Eye on Innovation 2018 Awards thanks to its neuroscientific work in Call Center process improvement and MobilDeniz redesign and software processes

*Europe, Middle East and Africa

Change Management

Turkey's banking industry is undergoing a major change and transformation process, both quantitatively and qualitatively. To make a difference in competition in this period of rapid digital transformation, it is a must to closely monitor and follow technological developments, adapt quickly to changes, review IT strategies in parallel with agility strategies, ensure the appropriate use of resources, and establish an IT infrastructure and business model that support cyclical developments. This period saw the need for change and transformation in risk, operation and customer perspectives.

To lead this industry-wide and structural transformation process and gain a competitive edge, the Change Management Group aims to offer consulting and support services to the Bank's senior management, subsidiaries and relevant staff. This effort will help them develop new strategies in line with legislative and regulatory changes, efficient risk management, cost effectiveness, efficient performance management models, inter-channel integration and advanced customer analytics. Due diligence based on retrospective analyses supports resource optimization and balance sheet management from a perspective of maximum rate of return/minimum cost.

DenizBank's Change and Transformation Management strategy can be summarized as follows:

- Increasing Company Value,
- Ensuring Qualified Personnel,
- Effecting Structural Changes,
- Developing Savings Methods,
- Implementing Process Improvement and Changes,
- Embracing Cultural Change – Customer Focus.

A robust and efficient IT infrastructure is critical for catching up with the rapidly digitalizing world and providing the fastest, most appropriate solution to changing customer needs. To that end, the Bank engaged in efforts to redesign the IT structure in a way that eliminates competitive risks and boosts internal efficiency while introducing organizational and structural changes. Adopting the principle "If You Can't Measure It, You Can't Manage It," the Bank designed dashboard screens for more transparent and efficient monitoring of IT project processes by all stakeholders. The DenizBank PMO team was established to bolster cooperation between Intertech and DenizBank while ensuring effective management of the former Service Quality functions under the relevant business lines and groups.

To ensure effective management of costs and resources, increased efficiency and sustainable growth, recommendations and presentations were delivered to the Board of Directors. All subsidiaries and groups under DFSG are provided with internal consulting services.

Subsidiaries – such as DenizFaktoring, DenizLeasing and DenizBank AG – are analyzed in detail in terms of operational, organizational and business model aspects. Efforts are supported to make more efficient use of inefficient or idle functions and staff positions as identified following cooperation and exchanges with the management of the relevant companies. In addition to work on modernizing and improving the effectiveness of the branch network, an active role is played to boost synergy and collaboration among IT and the relevant groups. The aim is to optimize and increase the efficiency of competitively-advantageous structures such as NBC (Non-Branch Channels) and digital channels.

In an increasingly competitive operating environment, changes in the business model are suggested to ensure an organizational structure that maximizes customer satisfaction in parallel with customer needs. Internal processes are reviewed from that perspective.

Business Analytics and CRM

Already a highly dynamic sector, Turkey's banking industry is marked by ever-increasing competition as firms from other sectors – such as telecommunications, retail, Internet and fintech – enter the field. Tightening regulations and changes in economic conditions force banks to rapidly revise their multiple functions. It is critically important to develop 360-degree knowledge of customers and manage them as efficiently as possible in such a dynamic environment.

The "Pole Star" project of 2018 gathered on a single platform the entire set of customer data from the Bank and non-bank sources – ranging from the Interbank Card Center and Corporate KKB, to Memzuç (Consolidated Data System) and derivatives notifications from TBB (Banks Association of Turkey). This effort provided both branches and Head Office with 360-degree knowledge on customers including risks, profitability, product needs and share of wallet. In addition, data from such sources is fed into the Bank's various systems, including MDS, POS application and early warning for supporting decisions. Financial networks of customers were drawn up from money transfers between customers (EFT, remittance, cheques, notes and bills, salary) or from customer relations with alternative data sources (DDS, KRM). This effort took the opportunity for 360-degree analysis from a customer level to a network level. Network analyses are actively used not only for customer acquisition and deepening relations but also for risk management. Efforts to identify specifically those that would be put in a difficult position by firms suffering from financial bottlenecks within their own networks are ongoing.

Banking Services

The “Pole Star” project gathered on a single platform the entire set of data from the Bank and non-bank sources with a customer-focused approach, ensuring a 360-degree analysis of customers.

Simply getting to know customers in a highly competitive market is not sufficient to gain a competitive edge. Effectively managing customers is as important as knowing customers. To that end, the Bank developed dedicated strategy presentations for business lines and shared findings on how different customer segments could be managed more efficiently. Action was taken on conducting price sensitivity analyses, lowering operating costs, managing unproductive customers on alternative channels, among others. Additional work on branch optimization as well as ATM/Cash optimization aims to reduce the Bank’s overall costs without negatively impacting customer satisfaction.

Following the increasing importance of digitalization to remain competitive, the Bank engaged in various efforts to direct customers to digital channels. Special support was provided to ensure an innovative campaign design for the fastPay product. In addition, dedicated CRM presentations were prepared for various firms to engage in brand collaboration. The objective is to use the power of CRM to build business partnerships and enrich existing ones.

For corporate customers, the Bank targeted capturing a share of cash flow in return for the loan extended under the “Denizyıldızı (Star Fish)” concept and engaged in efforts to expand the deposit base of the Bank.

DenizBank launched the Datascientist program to ensure that a data-based perspective extends across the Bank’s corporate culture. The Business Analytics and CRM Department played an active role in various stages of the program – from participant selection to training design.

Project Management

The Project Management Department is responsible for rapidly and effectively

completing projects by DFSG business units with the goal to launch their strategies to make a difference through customer satisfaction under today’s conditions which reflect a high competition in the finance sector.

In cooperation with DFSG business units, the Project Management Department ensures an appropriate selection of strategic projects that comply with DFSG’s business strategies and pursues them before the Executive Board. This includes bringing into action the resulting strategic and tactical requests in a fast and quality manner in addition to developing, managing, and improving, if necessary, the relevant processes.

In terms of effectively realizing the requests of DFSG business units, the Project Management Department is charged with designing and managing the processes required for synergistic work among DenizBank PMO, Intertech PMO and DFSG Business Units. Potential priority conflicts in IT Product Teams in regard to the strategically and tactically prioritized requests of the Business Units are resolved.

Requests submitted by DFSG business units are analyzed for any points that could be helpful for different business units. The resulting solution is made available to multiple business units. The required follow-up and coordination work is conducted to launch the DFSG Strategic and Tactical projects requested by the Business Units. The required management and coordination work is undertaken in order for DenizBank PMO, DFSG Business Units Project Management and Intertech Project Management Office to work within an agile structure in line with DFSG’s strategic objectives.

The Project Management Department proactively attends the Intertech A/G Committee to validate the costs associated with IT requests by DFSG. Furthermore, it reviews and updates, when necessary, the DFSG’s IT costs.

Electronic Money and Payment Systems

Electronic Collection Services

In electronic collection services, the Bank contracted 55 new companies in the Direct Debit System (DDS) and corporate collection projects in 2018. As of year-end, the number of parent companies to have signed up to DDS and Card Payment System projects grew 18%, with a total collection volume of TL 7.8 billion.

Electronic Payment Services

During 2018, DenizBank intermediated about 6.4 million in payment transactions through the Bulk Payment System. In addition, the Bank increased the electronic payment transaction volume by 39% to TL 195 billion.

The Bank's Foreign Currency Bulk Payment System, launched to facilitate DenizBank customer domestic and overseas bulk foreign currency transfers, recorded a 36% rise in the number of transactions in 2018.

One of the first banks to activate the QR Code feature in cashier's cheques in 2015, DenizBank captured 6.8% market share in cashier's cheques in 2018.

Collections from Institutions and Municipalities

DenizBank signed contracts with new billing companies and continued to enrich its customer service channels in 2018. Further, the Bank offered IT solutions tailored exclusively to municipalities and continued to forge strategic partnerships. As a result of these efforts, the Bank provides collection services to more than 60 municipalities.

Cash Management and Public Finance

Cash Management

The Cash Management Group uses the power of technology and processed data so customers can complete their collection and payment transactions quickly and easily. The Group aims to access the right customer with the right product at the right time. The aim is to alleviate the operational burden assumed by both the customer and the Bank and minimize the time cost. Placing great importance on building multifaceted, long term relations with the client base, the Cash Management Group sees customers as a business partner. To this end, the Groups develops a comprehensive range of products that support its customers' collection and payment processes. The Group adopts a customer-focused approach to produce solutions that tailor the product for the customer rather than fitting the customer to the product.

The Analytical Marketing Group's data processing capability and analytical models are used to develop action plans that will contribute to customer penetration, profit and efficiency. The Cash Management Segmentation launched to serve that purpose embraced a customer-focused approach in 2018.

The Cash Management Groups always highlights customer needs across all business processes. The Group is committed to providing fast, high quality products tailored for customers to fully meet their needs rather than offering one-size-fits-all products. The aim is to give customers the right solution.

In 2019, the Cash Management Group plans to maintain its customer-centric approach to accurately analyze customer needs and offer the right product at the right time as a core strategy.

Public Finance

DenizBank broke new ground in Turkish banking by targeting public finance as one of its strategic business areas. The Public Finance Department was established to service a target group: local government, its subsidiaries and economic enterprises, as well as state economic enterprises, their entities and subsidiaries. To date, the Public Finance Department has provided low cost and long term financing to more than 300 projects.

The Public Finance Department provides the full range of banking services to local governments with its specialized and highly-experienced staff at the Head Office, regional offices, and branches.

The cash management systems developed exclusively for DenizBank in addition to the Bank's branch network and alternative distribution channels maximize operational efficiency and productivity in tax collection processes. Today, the Bank provides collection services for tax, water bill, and other collections for more than 80 municipalities.

Banking Services

DenizBank's active POS rate reached 71%. Thanks to POS services enabling customers to receive 24/7 support, DenizBank has achieved the service quality level required to become their preferred bank.

Information Technologies and Support Operations Group

The Information Technology and Support Operations Group, IT Security and Digital-Card Payment Operations Group, Branch and Central Operations Group, and Intertech report to the Chief Operating Officer (COO).

IT Security and Digital-Card Payment Operations Group

The IT Security and Digital-Card Payment Operations Group ensures that DenizBank's:

- IT Security,
- Digital and Card Payment Operations

are run in coordination and create synergy with the Bank's other business lines.

The Bank keeps close watch on customer behavior and IT security structures that evolve as technology advances, and upgrades its relevant processes. DenizBank manages risks arising from digitalization in the most effective way. The Bank is committed to instilling confidence in our future in the digital world, which has become an indispensable part of our corporate and individual lives. The Bank has designed and built behavior-based security technologies, leading to better protection against zero-day attacks. Security risks are minimized by isolating Internet access from the surrounding environment.

Today, security processes are much more dynamic. The new feature publishing cycle is now significantly shorter. The Bank makes a point of raising user and customer awareness against cyber attackers who exploit people's weaknesses.

Internal users and customers are more and more exposed to cyber security risks with the widespread use of digital devices. These rising threats aggravate the risks associated

with digital media. The IT Security Unit is further enhancing its detection and prevention activities with additional security-related investments. Integration of new security technologies into the network allows the Bank to swiftly receive information about global threats. The Bank carries out ongoing risk management activities related to IT processes, applications, infrastructure and security systems. The IT Risk Management Unit was restructured with a focus on cyber risks. The Unit is less susceptible to such risks thanks to the increase in its capacity.

Card payment systems, very well-developed in Turkey, affect customers' choice of bank with the ease of use and convenience they bring to their lives. As such, card payments form a critical service that makes a competitive difference. Understanding that card payment systems are a key component of its competitive edge, DenizBank aims to be the best service provider in the industry in terms of all card payment transactions offered to customers.

Committed to providing customers the best experience while striving to achieve operational excellence, DenizBank's delivery of credit and debit cards is the fastest and most accurate in the sector. DenizBank boasts the highest level of completeness and accuracy in terms of customer address structure among Turkish banks.

Cards are sent to customers with a 94% delivery success rate, demonstrating the Bank's exemplary operational accuracy.

DenizBank closely monitors technological developments and offers customers the most innovative products available to the market – the first of their kind not only in the industry but also worldwide. By adding anonymous prepaid and preauthorized prepaid cards to its existing credit/debit card portfolio, DenizBank succeeded in providing banking

DenizBank has launched Inter-Paynext, a new card package integrated with the banking system, and NFC Card, which is based on Cloud Technologies.

services to an even larger customer base. DenizBank has become an industry leader with instant credit card service provided at branch locations. DenizBank's card services reach a vast, diverse population in Turkey via card products specially designed for transportation use, sports events and campus projects. Payment automation systems set up at Marmara University and TED University provide students and academics with secure payment and safe access at these campus locations.

DenizBank conducts ongoing campaigns related to the statement process. The Bank posts a success rate of 96.9% in statement notifications via SMS and mail, ensuring significant cost savings.

In 2018, DenizBank's active POS devices rose to 71%, up from 51%. Thanks to POS Support Service, which enables customers to receive 24/7 support, DenizBank achieved the service quality level required to become their preferred bank.

The Bank participated in the design and manufacture of the New Generation Payment Registration Devices (ÖKC) demanded by the Ministry of Finance. DenizBank was the first bank in the world to launch these devices at contracted merchants. DenizBank has over 70,000 ÖKC devices in active use.

With the additional models that support the banking application, Payment Registration Device (ÖKC) models are varied and this wide range makes more clients prefer DenizBank.

Projects devised for current POS models were integrated with payment recording device terminals. In 2018, the Producer Card was integrated with Vera Payment Recording Devices. Payment recording devices were enhanced to integrate with the multi-bank operation system. This development has a positive impact on customer satisfaction.

In another innovation, the ÖKC device has the capability to serve as a POS terminal only. Clients who do not need or want a cash register but only a POS terminal can now also use a VERA ÖKC.

Thanks to the DENİZPOS mobile app for smartphones, POS clients can easily access banking applications and various services, such as bank statements, materials, POS application or rate changes.

A new payment method was created in ÖKC devices for payments made via FastPay, as it has become possible to generate and scan QR codes with the FastPay mobile application.

To capture a larger share of the rapidly growing card market in Turkey, banks must rapidly launch POS/card/card packages in line with consumer preferences. To this end, DenizBank has developed its own card payment package, inter-PayNext. The POS client and contracted merchant side was made compatible with this package, ensuring a safer and faster operation through the Bank's own package. DenizBank continues work on upgrades for POS clients and contracted merchants.

DenizBank currently operates 2,917 ATMs. In addition, the Bank has over 400 "Express Gişe (Cash Kiosks)." These specially designed

machines offer money deposit and withdrawal services and function as alternative distribution channels in retail chains. A channel that entirely feeds on a CRM infrastructure, DenizBank ATMs are used to suggest products and services to customers and support sales. The Bank enhanced the ATM Cash Flow Management application to minimize the funding cost of money transfers to ATMs, and render their operation more efficient. Recycle support, which allows the money deposited in ATMs to be used in withdrawals, allows ATMs to run for longer periods without being supplied. As a result, operating costs were reduced. During the year, the Bank launched innovative projects at its ATMs, including card-free money withdrawal, login via SMS, money withdrawal by voice, and FastPay.

The Bank added Diebold ATMs, one of the top three brands in the world, to its existing NCR and WINCOR ATM model portfolio. Over 320 Diebold brand ATMs are now in service at DenizBank.

The Bank's Chargeback project and the Visa-MC Foreign Barter Accounting Automation project have minimized the operations-related loss of time and labor and operational failure risk. Reports have started to be stored in a digital format.

The Bank analyzed actions in response to payment system fraud, increasingly widespread across the world. Proactive and reactive measures were adopted according to customer lifestyles. As a result, DenizBank customers, who carry out transactions across all channels via the Bank's systems, were provided with Turkey's most secure payments services. The Bank merged loan and credit card applications under Fraud Risk Management, and established a more secure structure. In the area of customer information and security, DenizBank took measures against financial losses of customers in line with recent trends. As a result, total losses were reduced despite a rise in the number of attacks.

Banking Services

The Branch and Central Operations Group ensures that banking products previously or currently purchased by DenizBank customers and their after-sales aspects are in accordance with national, international and in-house regulations.

Branch and Central Operations Group

The Branch and Central Operations Group ensures that DenizBank's:

- Central Operations and Branch Operations,
- Organizational and Operational Quality,
- Fund Management and Investment Banking Operations

are run in coordination and create synergy with the Bank's other business lines.

In line with its functions, Central Operations delivers a wide range of production operations for branches and customers, including:

- Foreign trade operations,
- Cash and non-cash loan operations,
- Operations related to customer information and documentation, reception, introduction, scanning and archiving,
- Operations at branches' accounting and current accounts center,
- Attachment, pledge and account research transactions,
- Operational transactions related to domestic subsidiaries of the Bank,
- Fund management and investment banking operations,
- Operations related to cheques and bonds,
- Risk center reporting operations,
- Operations related to payments to institutions,
- Fraud and insurance operations,
- TL and FX domestic and international payments,
- Fund management, middle office, custody, and investment banking operations.

The Branch and Central Operations Group ensures that banking products previously or currently purchased by DenizBank

customers and their after-sales aspects are in accordance with national, international and in-house regulations.

In line with the goal of transforming branches from Service Centers to Service and Sales Offices, the Bank restructured the operational staff positions at branch locations in February 2018. Now, these positions report to Branch Managers. As of November 2018, the task group for Teller Sales Officers and Cash Transactions Officers at branches report to the Retail Banking business line on the organizational matrix. Field sales will be accelerated through the sales expertise and mentoring of Regional Sales Managers.

To manage the Bank's risks efficiently, all CGF lending, control and compensation processes can be run with final control and approval by Central Operations after the team responsible for these processes receive specialized training.

Delegated to branches for performance under efficient workforce management, the types of transactions within the pool have been increased and expanded. Attachment entry and cheque entry transactions were transferred to large-scale branches pool to boost efficiency.

To improve expertise and make promotion conditional on the certification program at the Central Operations Product Departments, a Vice President Certification Process was introduced.

The export module was updated and rendered compatible and integrated with today's conditions in an electronic file format.

Maximizing information exchange among all DenizBank employees, DenizPortal intranet consolidates all internal information and serves all employees across the organization.

Organizational and Operational Quality

To help DenizBank achieve its strategic goals, the Organizational and Operational Quality Department focuses on improving processes and developing competitive, efficient and productive business methods. The aim is to move the Bank forward to achieve operational excellence. The Department's main targets include:

- Delivering project management for Central Operations,
- Achieving simplicity and productivity in operational processes,
- Maximizing automation.

As part of process development and improvement efforts in operations, process analysis modeling is applied, as the projects are put into practice. The departments strive to ensure that processes are defined and interconnected and that responsibilities and roles are clearly identified. In parallel with continuous follow-up and improvement efforts, experiences yielded by each project are considered when undertaking other projects and processes. The goal is to establish a learning organization.

To boost branch productivity with a customer-focused approach and while minimizing and controlling risks, the improvement needs of branches are identified, turned into projects and resolved. Strategic projects related to the branches are implemented within the set deadlines.

In order to implement operational projects, the Bank conducts training, notification and coordination related activities. These efforts are designed to spread and reinforce those innovations that will make DenizBank more competitive and customer oriented. To this end, the necessary methodology for extending and systematically implementing these training programs is outlined and documented.

Maximizing information exchange among all DenizBank employees, DenizPortal intranet consolidates all internal information and serves all employees across the organization.

To that end, the Portal offers a "one-stop shop" access to the following:

- All product information required via DenizBank Product Tree platform;
- All procedures and work flows in a simple and comprehensible manner via the Way of Doing Business platform, and all documents required in terms of work flows via the same platform;
- The terms of reference and job definitions for departments working in integration and the staff at various departments via the Job Definitions platform.

As part of its enterprise resource planning (ERP) initiatives, DenizBank continues to conduct capacity requirement assessment efforts for permanent staff in the Branch Operations and Portfolio Management, and Central Operations Departments.

Process measurement efforts continued in order to set the basis for permanent staff position calculations and activity-based costing. The standard transaction durations and cost centers were identified for each step in relation to transactions processed.

Fund Management and Investment Banking Operations

In 2018, the Fund Management and Investment Banking Operations Group implemented the following improvements to comply with applicable legal and regulatory requirements, boost operational productivity and minimize operational risk:

Fund Management Operations

The "Netting" module was been created and commissioned in interbank transactions, for more effective management of correspondent bank costs and operational efficiency purposes.

Banking Services

DenizBank became a member of SWIFT GPI for more efficient monitoring of FX Customer Transfers.

Private Banking Operations, Foreign Payments and FX Cheques Operation

Action was taken to ensure all fax orders to Private Banking branches are directed to the pool of the central Private Banking Operations. This change made it possible to serve customers faster.

In the second half of 2017, Private Banking Operations made it possible to accept customer orders via voice recording. This practice was extended in 2018, enabling Multi-Currency FX Spot transactions via voice recording.

DenizBank became a member of SWIFT GPI for more efficient monitoring of FX Customer Transfers, completed system-wise development efforts and launched the project.

GPI enabled monitoring of outgoing FX payment orders, transaction times and fees charged. The customers are informed via SMS or e-mail if their beneficiary account is credited depending on their choice.

Investment Banking Operations

To maintain DenizBank's competitive edge in securities operations, in addition to the standard services offered in the market, DenizBank's exclusive securities projects are developed and automated in the securities system.

The Investment Banking Operation Department conducts the following transactions:

- Trading in liquid and short term investment funds via branches and alternative distribution channels, 24/7;
- Automatic trading for the "Captain Account" application of the Liquid Fund's Short-term bond fund;

- Automatic terminating of Liquid Funds and short-term bond fund during cash withdrawal from ATMs;
- Performing automatic fund sales in line with the criteria of the "Deposit Fund" project;
- Executing public offering of Capital-Protected Funds, termination of these funds according to certain criteria, and repayment on maturity date;
- Executing public offering of Umbrella Funds, termination of these funds according to certain criteria, and repayment on maturity date;
- Issuing DenizBank Asset-Backed Securities, related Central Registry Agency transactions and customer transactions;
- Issuing DenizBank Bonds, related Central Registry Agency transactions, distribution, trade, repayment of principal and coupons.
- Carrying out registry, issuance and trading transactions for Electronic Warehouse Receipts (ELÜS).

Since the start of 2013, DenizBank has enjoyed market-maker status in the government debt securities (DİBS) market with the approval of the Undersecretariat of Treasury. . The Bank's transactions on the Stock Exchange and OTC market have expanded in terms of number and volume. Due to its market-maker status, the Bank also participates in Open Market Transactions (API) tenders and direct trading tenders. An automatic tender notification infrastructure was established to communicate with the Central Bank of Turkey regarding weekly DİBS tenders.

Branches, customers, CBRT cash transactions and offsite ATM management were all combined under the roof of the Cash Operations and Reconciliation Department for more effective cash management.

Custody Services, Fund Services Operations

In line with Capital Markets Board communiqués, DenizBank's Custody Services Department provides custody services to:

- Customers served by portfolio management companies, and individual customers;
- Investment funds and investment trusts (collective investment companies);
- DenizBank AG customers with their portfolios on customer basis.

The core products that fall under custody services include:

- Stocks,
- Fixed Income Securities,
- Eurobonds,
- Investment Fund Participation Certificates,
- Domestic and foreign currency deposits,
- Foreign currency exchange transactions,
- OTC derivative transactions and Futures and Options Market (VIOP).

The Fund Services and Operations Department uses Infleks software to provide various services. These services include price calculation, accounting, notifications and reporting of investment funds set up and managed by Deniz Portföy A.Ş., or other portfolio management companies.

Changes and improvements required by applicable laws, rules and regulations are communicated to the software company and completed as a joint effort. As of end-2018, DenizBank serves a total of 36 investment funds including 19 hedge funds.

Cash Operations and Reconciliation

Launched by the Issue Department at CBRT, the Decentralized Cash Management (DCM) system saw the introduction of DCM storage to keep Turkish lira banknotes on behalf of CBRT.

Branches, customers, CBRT cash transactions and offsite ATM management were all combined under the roof of the Cash Operations and Reconciliation Department for more effective cash management.

Foreign Subsidiaries

DenizBank AG plans to expand its service offerings through the renewed Mobile Banking application.

DenizBank AG (Austria) – JSC DenizBank Moscow (Russian Federation) – EuroDeniz International Banking Unit Ltd. (TRNC)

DenizBank AG (Austria)

Established in 1996 by the former Esbank in Vienna, Esbank AG was acquired by DenizBank A.Ş. in 2002, and renamed DenizBank AG in 2003.

DenizBank AG operates with an extensive range of deposit and loan products in Retail and Commercial Banking. The Bank serves corporate, commercial, SME and retail customers by focusing on key products – such as investment loans and project and foreign trade finance – based on market needs and identified opportunities. Headquartered in Austria, DenizBank AG operates a network of 43 branches – 27 locations in Austria and 16 branches in Germany – as of year-end 2018. Closely monitoring global development trends, DenizBank AG is the third biggest bank in Austria in terms of direct banking customer portfolio.

Some 95% of retail customers at DenizBank AG are either Austrian or German citizens. The bank also offers retail banking services to many Turkish citizens abroad. The synergy between DenizBank AG and DenizBank is attained by pooling resources such as the extensive branch network, the increasing number of money transfer points,

and easy access to services. This synergistic relationship has ensured a positive customer experience that reflects well on both companies, and thereby expands their respective customer bases.

As of year-end 2018, DenizBank AG's total assets rose to EUR 11.0 billion, while its equity increased to EUR 1,515 million.

In the coming year, DenizBank AG plans to grow its ATM network and expand the scope of its Internet banking services in Austria and Germany. The updated Mobile Banking application started serving customers in early 2018. Eleven thousand users downloaded the application and the active user base reached 2 thousand.

Recording steady growth for more than 20 years, DenizBank AG used its expert staff and principal shareholder as leverage to raise its asset size to EUR 11.0 billion. As a result, DenizBank AG is currently one of the top five private banks in Austria. In terms of total assets, DenizBank AG ranks among the five largest Turkish banks abroad.

In early 2017, DenizBank AG acquired accredited bank status for European Exim loans and reached an agreement with the global leader Allianz Group for the sale of its insurance services and products. The bank continues to diversify its product portfolio. Previously brokered in Austria, the sale of Santander customer loans also started in Germany in 2018. DenizBank's business partnership with Wüstenrot for mortgage loans and building savings and with Money Gram for global money transfers, exclusively in Austria, continued in 2018.

JSC DenizBank Moscow (Russian Federation)

DenizBank acquired Iktisat Bank Moscow in 2003 and changed the name to CJSC DenizBank Moscow. This company name was changed to JSC DenizBank Moscow on

December 3, 2014. The Bank provides a full array of banking services to corporate and commercial clients.

The opportunities for economic partnership between Turkey and Russia generate new investments, primarily in foreign trade and tourism. As such, the number of Turkish entrepreneurs investing in Russia is rising steadily. By establishing close relationships with entrepreneurs, JSC DenizBank can identify the needs of these businesses accurately and bring all financial services offered by DFSG to its customers. The bank can also respond quickly to requests by way of DenizBank's financial power.

DenizBank customers perform their foreign trade transactions in Russian rubles with the support of the subsidiary. Customers can also perform many other banking transactions, including money transfers, account openings, external guarantees, foreign exchange transactions, Russian ruble purchasing, in addition to forwards and arbitrage.

As of end-2018, JSC DenizBank recorded total assets of USD 263 million and shareholders' equity of USD 81.7 million, maintaining its leadership position in the Turkish niche market.

EuroDeniz International Banking Unit Ltd. (TRNC)

Acquired by DenizBank from the Savings Deposit Insurance Fund of Turkey in 2002, the bank was renamed EuroDeniz International Banking Unit (IBU) Limited in February 2009. EuroDeniz IBU is licensed to engage in all commercial banking operations. The bank offers various deposit and loan products to the corporate and commercial customer segments.

As of year-end 2018, EuroDeniz IBU recorded total assets of USD 191.2 million and shareholders' equity of USD 7.1 million.

Information Technology (IT) Services

Intertech's latest integrated finance platform "inter-Vision" serves 50 institutions in 10 different countries.

INTERTECH

Established to provide much needed IT services to the financial sector, Intertech operates under the umbrella of DenizBank Financial Services Group (DFSG) since 2002. Intertech reports to the DenizBank COO, under the umbrella of the DenizBank Financial Services Group (DFSG) and designs innovative and efficient solutions for 50 institutions in 10 countries.

Intertech has developed four core banking packages used in many domestic and foreign banks, and has capitalized on its experience and expertise to further upgrade its product range. A strategic solution partner of Microsoft's, Intertech has built its inter-Vision integrated banking platform on Microsoft-based current technologies such as .NET and Microsoft SQL Server.

Intertech provides cutting edge IT solutions-recognized by multiple international awards-for DenizBank to achieve its targets of "Operational Excellence" and "Unique Customer Experience." Having received numerous awards since its establishment, Intertech received the Silver prize in the special category 'The Most Innovative, Groundbreaking Bank on a Global Scale' and the top prize in the most prestigious award category, namely 'The Best Product/ Service Category', with its application 'From Sea to Land', at the 2017 Innovation Awards,

which is organized by European Financial Management Association (EFMA) and the business consultancy company Accenture, and is considered by international finance circles to be one of the most prestigious award platforms, and the innovation arena of the global banking industry.

Furthermore, at the US-based Bank Administration Institute's (BAI) Global Innovation Awards, organized since 2011 with thousands of participations from over 22 countries, DenizBank received an award in the Internal Process Innovation category with its "Intelligent Workforce Management" project developed jointly with Intertech, its technology hub.

After Austria, Bahrain, Germany, TRNC, Saudi Arabia, Turkey, Albania, Kosovo and Lebanon, Intertech's latest integrated finance platform "inter-Vision" has extended its services to Azerbaijan, thus bringing up the number of national markets it serves to 10 and its institutions to 50 as of 2018.

After DenizBank and Turkcell Payment Services, PTT also opted for Intertech's solutions in Card Payment Systems and ATM Applications management in 2018, and our applications thus came into use in Turkey's most extensive network. As of end-November 2018, the "eTuğra" Istanbul Card Infrastructure Renewal Project has been completed, whereby our inter-Paynext platform has come into service in one of the world's largest public transport networks comprising over 30 million cards, 15,000 terminals and 3,000 merchants. We plan to extend the project "eTuğra", our first reference in the transportation sector, across metropolitan municipalities all over Turkey.

Following an 18-month project phase, in April 2018, HSBC Turkey's "Future Core Banking" project was completed without errors and interruptions thanks to Intertech's

immense experience in similar projects, thereby adding yet another client to Intertech's long list of success stories. In a unique step for the global organization of HSBC, the company has thus procured its almost entire financial IT requirements from a sole provider.

Agile project management methods were employed in the development of new mobile banking and API banking projects, which stood out as two other significant and innovative projects in the year 2018.

The next generation banking platform, inter-Vision Integrated Banking Platform, was developed in line with DFSG's IT strategy. It is a web-based banking application built entirely on service oriented architecture to assure scalable solutions through the quick application and unique combination of the best IT infrastructure in its field. The inter-Vision Integrated Banking Platform links DenizBank's corporate marketing strategy with banking processes in a manner that places customer process management at the center, thus allowing DenizBank to execute its activities in line with customer needs and expectations. Information retrieved from consolidated and central data feeds marketing applications to provide dynamic access to decision support models and turns its operational employees into a fully equipped sales force.

DenizBank has achieved the following results via the inter-Vision Integrated Banking Platform:

- Customer Relationship Management for a Customer- Oriented Perspective: Customers are offered high-quality products and services aligned with their preferences and financials.
- Business Process Management for Operational Productivity: The platform was provided to design, automate, implement and optimize customer-

Information Technology (IT) Services

oriented business processes, achieve low training costs and inject agility across all levels of the organization.

- Financial Solutions for Agility: Intertech's fields of expertise are not limited to basic banking operations, but also include financial topics that appeal to all institutions. As such, the relevant companies in DFSG not only utilize Intertech's solutions in basic banking, but also in factoring and leasing.
- Business Intelligence Solutions for Efficient Decision Support: This platform has strengthened the management of financial data storage and created an integrated decision support structure.
- Alternative Distribution Channels Management for Banking, Anytime and Anywhere: The platform has provided uninterrupted 24/7 financial services through all distribution channels and has developed IT solutions and infrastructure in line with business growth.

Intertech designs a continuous, robust and flexible IT development infrastructure for DFSG. The Company has also established the Disaster Recovery Center in Ankara, outside operational areas, with a view to providing continuous services in cases of emergencies and disasters. Twice a year, Intertech controls the operations expected to be delivered by the Disaster Recovery Center to ensure the continuation of banking services.

As the expansion of online services across the world brings about a parallel increase in IT security threats, Intertech has expanded its IT security team. As such, Intertech provides the following security measures:

- Development of security policies and procedures,
- Training of code security and techniques for secure code development,
- Training of security awareness,

- Audit for IT security,
- Application security audits,
- Network weakness analyses and penetration tests,
- Installation of public key infrastructures,
- Encryption and electronic signature applications,
- IT security risk analyses,
- Project consulting for security technologies,
- Architectural modeling for security technologies,
- Cyber crisis management and
- Border, Endpoint and Network Security Technologies management.

Intertech implements processes based on the global ITIL and COBIT standards to continuously improve and sustain the quality of IT services provided to DFSG, and to keep its services in line with defined Service Level Agreement (SLA)s.

With the belief that service quality can be guaranteed only with a quality life cycle, Intertech continuously improves and sustains its service quality by using DevOps Processes and Agile project management methodologies and including the quality life cycle into all process within its projects, developed through the total quality management approach.

In its DenizBank/Intertech IT infrastructure (storing units, servers and network equipment, cooling systems), DenizBank prefers green hardware which uses energy efficiently. In the evaluation of the bid offers, costs and sensitivity for the environment are important criteria. When calculating the total cost of ownership, energy costs are also included in the calculation.

Energy consumption figures of DenizBank's systems are monitored and the Bank's IT infrastructure was virtualized by 85%.

Green cooling systems and high efficiency UPS systems are utilized in the Bank. In order to control the Data Center's energy consumption, air-conditioning is made at the optimum temperature the systems can tolerate. The right space for energy optimization is where there are too many devices. For this purpose, all PCs and monitors are managed remotely by Microsoft SCCM; when they are not in use, standby mode is activated and thus energy savings are achieved.

Ekspres IT and Trade

Ekspres Securities joined DenizBank Financial Services Group at the end of 2002 and focuses on offering equity investment services for foreign institutional investors.

In the final quarter of 2013, it was decided that EkspresInvest and DenizInvest would merge under the trade name of the latter and the merger was finalized by year's end.

A Securities Trading Brokerage Authorization Certificate sales agreement was signed in July 2015, and transfer procedures were finished in June 2016; and the Company has changed its status from financial company to non-financial company. Upon a resolution adopted at the Ordinary General Assembly in August 2016, the company's primary business line was changed to provision of IT services, solutions and systems integration, communication network services, system installation and operation services, IT support and consultancy services, and its trade name was registered as Ekspres Bilgi İşlem ve Ticaret A.Ş. (Ekspres IT and Trade).

Private Banking and Investment Activities

DenizBank Investment Services Group has developed a business model that maximizes the confidence and profits of customers with a focus on customer satisfaction.

Denizbank Investment Services Group

DenizBank Investment Services Group has gathered DenizBank Private Banking, DenizInvest, DenizPortfolio and Deniz REIT under one single roof to offer a “one-stop shop” for all financial products.

Customers can access mutual investment instruments — including securities, investment funds organized market products, over-the-counter products, and derivatives — and conduct their transactions.

In keeping with its motto “Don’t Invest in Hype,” DenizBank strives to improve its investors’ financial literacy and deliver the best service to its clients, while using simple, easy-to-understand language. To stand by its clients at all times and make their lives easier, the Bank aims to develop new technologies and innovative products with its specialized staff. DenizBank launches new products designed to bolster its innovative and dynamic position in the industry.

Although most companies focus on providing specific products, the Group’s main emphasis is on customers and their satisfaction. The Bank’s business model is designed to maximize both customer trust and profits.

DenizBank provides investment instruments to customers at every service point in line with its financial supermarket approach. The Bank has determined the service and product model best suited for each customer segment.

DenizBank Private Banking

DenizBank Private Banking serves clients with net worth of over TL 1 million.

DenizBank Private Banking has 11,622 active clients as of end-2018, and offers a wide range of customized services and solutions. The Private Banking Group boasts the widest private banking network in Turkey.

It operates a total of 18 Private Banking service points: seven in Istanbul and 11 locations elsewhere across the country, in Ankara, Izmir, Antalya, Bursa, Adana, Trakya, Kayseri, Samsun, Bodrum and Diyarbakir. The Bank established the first private banking service points in Kayseri, Samsun, Bodrum and Diyarbakir, staying one step ahead of the competition.

The Private Banking Group closed fiscal year 2018 with total assets of TL 31.4 billion. DenizBank’s trajectory of success received a boost when the Bank joined the Sberbank family in 2012. This success was further enhanced upon the acquisition of Citibank Turkey’s Retail Banking Division in 2013. Operating in harmony and collaboration with other business lines to constitute a single gateway for customers, the Group’s 62 portfolio managers deliver all DenizBank Financial Services Group product and services with their many advantages and privileges.

In line with customer preferences, DenizBank Private Banking offers a diverse range of mutual funds, including Private Sector Bonds/Bills established by DenizPortfolio, Hedge (FX) Funds, Eurobond, Lease Certificate Funds and BIST 25 Dividend funds. Special umbrella funds were created for clients to manage their wealth in a more professional manner. In 2018, the Group brokered the issuance of over TL 12 billion in bank and non-bank private sector bills and bonds, enabling customers to access alternative, non-deposit products.

In addition to Hillside Leisure Group, DenizBank signed new sponsorship agreements with Big Chefs Group and Su Group to offer its Private Banking customers various advantages at restaurants managed by these entities that serve upmarket clientele.

Private Banking and Investment Activities

DenizPrivate, the credit card exclusively offered to Private Banking customers, was updated as DenizPrivate Limited Edition under the concept “An exclusive world, just for you.” DenizPrivate Limited Edition combines this concept with a personal card design.

DenizPrivate Limited Edition offers cardholders the opportunity to benefit from wide-ranging discounts and privileges globally and in Turkey with Mastercard World Elite. In June 2018, DenizPrivate Limited Edition was sent in a special kit to each customer with average total assets of TL 1 million or more at the Bank.

The new DenizPrivate Limited Edition offers myriad opportunities to cardholders. These include free lounge access with a guest at domestic and international terminals at Istanbul Atatürk, Ankara Esenboğa, Izmir Adnan Menderes and Bodrum Milas Airports; lounge access at about 1,000 airports in 125 countries; 10% discount on accommodation and restaurant expenditures abroad; and 30% discount for Sunday breakfasts in every part of Turkey.

DenizBank Private Banking aims to offer its customers exclusive event experiences where they will feel special and valued. The Group is committed to getting to know its customers well and strives to maximize customer satisfaction with exclusive activities. In 2018, the Group reached over 2,000 Private Banking customers and enriched their lives via special screenings, concerts, auctions, gala, launch and festival invitations.

In 2019, the Private Banking Group plans to expand its asset size and raise its service quality, while providing personalized solutions with a dedicated workforce to meet customer needs and expectations. The Group also aims to continue standing by its customers with special, exclusive activities, and other non-banking services.

DenizInvest

DenizInvest operates at 37 service centers. 18 of these have Private Investment Center status, delivering personalized services in an ever-expanding capital market product range. Sixteen service centers that have “Investment Center” status are positioned to deliver services in organized markets products.

Continuing to break new ground in the sector, DenizInvest launched an innovative scheme called “T+0.” Under this service, DenizInvest immediately transfers the sums for equity sales to clients’ accounts, without having to wait for two business days.

As a result, clients can sell their equities and have immediate access to the proceeds round-the-clock.

Thanks to this restructuring, DenizInvest has transitioned from a product focus to a customer focus approach, providing a full range of capital markets products.

Firsts and Milestones

- 2006 — Brokerage services at international derivatives exchanges
- 2007 — Offering foreign corporate investors direct electronic access to BIST
- 2010 — Repurchase Guarantee and Bonus Shares incentive mechanisms under the Investor Protection and Incentive Program for the first time in Turkey, and
- 2012 — Development of Daily Purchasing Order Guarantee and Financial Performance Guarantee mechanisms
- 2013 — Intermediation of Electronic Crop Receipts allowing electronic spot trading of agricultural products

DenizInvest’s Investor Protection and Incentive Practices, which are utilized during public offerings, won the “Most Creative Capital Markets Award” at the second edition of the Capital Markets Awards organized by Turkish Capital Markets Association in 2017.

DenizInvest is the leader of the sector with its 16.7% market share in the public offerings both collection of domestic IPO demand and in terms of number of domestic investors.

As Consortium Leader, DenizInvest underwrote 15 key IPOs worth over USD 1 billion, including real estate investment trusts, football companies, among others.

DenizInvest played a leading role in the expanding market of private sector borrowing instruments. The company has underwritten bond issues of many companies from the financial services sector and the real economy since 2012. DenizInvest provides advisory and intermediation services for all capital markets instruments of Turkey’s four major sports clubs.

DenizInvest commenced margin trading operations after receiving the relevant license from the Capital Markets Board in 2012. The firm recorded a total margin trading volume of over USD 35 billion as of year-end 2018.

In parallel with the increasing use of technology and digital channels in the industry, DenizBank continued to invest in these key areas. The Bank now boasts 13 electronic delivery channels with 78% of all orders communicated digitally. Furthermore, orders for equities and the TurkDex are now placed via hardware positioned in Borsa İstanbul’s co-location center. This arrangement allows for significant improvements in end-to-end order performance.

Since 2015, all the reports of the Research Department have been issued under the brands of both Sberbank CIB and DenizInvest following the integration process with Sberbank CIB Research Department.

DenizAsset Management

In May 2003, Ege Portföy Yönetimi A.Ş. (Ege Portfolio Management) was acquired from the Savings Deposit Insurance Fund of Turkey. The entity was renamed Deniz Portföy Yönetimi A.Ş. (DenizAsset Management) in June 2003. DenizAsset is committed to delivering top quality services in response to changing market conditions. DenizAsset manages 30 DenizBank investment funds and 14 pension investment funds, providing investors both high performance and consistent returns. Boasting a well experienced team of professionals, DenizAsset plays a key role in capital markets with world-class services that include domestic and foreign investment funds, pension funds and portfolio management.

DenizAsset Management aims to grow its alternative funds as a core investment strategy. The company focuses on the sales and management of funds investing in private sector bills and bonds. DenizAsset has come to enjoy a prominent standing in the industry with its successful performance over the last three years. DenizAsset figures among the top players in the market thanks to the personalized funds that it has established, as well as its Eurobond funds. As of end-2017, DenizAsset recorded total assets under management of TL 3.7 billion with 4% market share in investments funds.

Although the Turkish mutual fund market contracted to TL 47 billion in second quarter 2018 due to cyclical events, DenizAsset Management maintained its volume thanks to a special fund composition strategy. The firm grew the size of its mutual funds to TL 2.6 billion and increased its market share to about 5.5%. In 2019, DenizAsset plans to offer new products to the public, while considering the investment preferences of its clients. The company also aims to capture a greater total market share by growing specifically in the investment fund market and focusing on individual/corporate portfolio management.

Deniz Real Estate Investment Trust

Joining DFSG at year-end 2001 as a subsidiary of DenizYatırım Menkul Kıymetler A.Ş. under the commercial name DenizYatırım Ortaklığı A.Ş., the company was transformed into a real estate investment trust on December 20, 2013 and changed its commercial name to Deniz Gayrimenkul Yatırım Ortaklığı A.Ş. (DenizREIT). On December 31, 2013, DenizREIT acquired Pupa Gayrimenkul Kiralama ve Yönetim Hizmetleri A.Ş. (Pupa), a DFSG company, and then merged with Pupa on June 11, 2014 to form its real estate portfolio.

DenizREIT's core business consists of investing in real estate, real estate-based capital market instruments, real estate projects, real estate-based rights and capital markets instruments, in order to create and enhance a robust real estate portfolio.

DenizREIT's real estate portfolio includes 29,157 m² of leasable area and 146 independent sections.

In the REIT sector, 33 companies are listed on Borsa Istanbul, six of which – including DenizREIT – were established by banks. As of year-end 2018, DenizREIT's real estate portfolio amounted to TL 202 million and total assets stood at TL 566 million.

In addition to the existing real estate portfolio, DenizREIT develops niche real estate projects in accordance with its mission and vision. The company has two ongoing real estate development projects, one in Istanbul's Tarabya and the other in Bodrum. DenizREIT is currently developing two real estate projects. Le Chic Bodrum, comprises 133 villas/residences and a 50-room boutique hotel on a 40-decare tract in Bodrum's Asarlık Region. Le Chic Tarabya, a flat-for-land project comprised of 156 housing units on a 15-decare tract, is located in Istanbul's Tarabya. Le Chic Bodrum has an 8-decare natural sand beach extending for about 200 meters in addition to piers, restaurants, a marina and the opportunity for boat access. Le Chic Tarabya is a niche development project thanks to its social facilities, exclusively-designed landscapes and special location.

Backed by the corporate and financial resources of DFSG, DenizREIT conducts its business operations in line with its mission: "Engaging in activities to increase the value of the property featured in its real estate portfolio, generating regular lease income, consistent growth and profitability, and developing original real estate and construction projects, especially in the Istanbul region, by making a difference with business partners meticulously chosen to meet the requirements of each project and by upholding ethical principles."

Leasing and Factoring Services

DenizLeasing maintains its pioneering position in the financial leasing sector by providing the right financing method for the right investment, establishing customer relationships based on trust, and meticulously evaluating the financial requirements of customer projects.

DENİZLEASING DENİZFAKTÖRİNG

DenizLeasing

DenizLeasing provides financial and operational leasing services to corporate, commercial, SME and agricultural customers in the Turkish economy, which is in need of modern financing methods due to its rapid development. Established in 1997 with a customer-oriented approach and a strategy to launch new products in response to customer needs, DenizLeasing is committed to becoming the leading provider in the field. The company maintains its pioneering position in financial leasing by providing the right financing method for the right investment, establishing customer relationships based on trust, and meticulously evaluating the financial requirements of customer projects.

With its active sales policy; personalized financial solutions developed for the renewable energy, healthcare, real estate, business and construction machinery sectors; and the fleet leasing services launched under the DenizFleet brand, DenizLeasing has deepened its relationships with existing customers while acquiring new ones. As a result, the company also maintains its position as an innovative service provider.

Keeping the organization's internal dynamics refreshed with a specialized staff, continuous improvement and ongoing restructuring, DenizLeasing strives to offer added value to its solution partners and the sector as a whole. DenizLeasing manages its sales operations with 18 branches across the country. DenizLeasing offers customers, regardless of their sector, the opportunity to pay in varying repayment periods, in Turkish lira or foreign currency, over the medium or long term, or in accordance with their respective sector's cash flow to finance any and all investment goods.

DenizLeasing plans to use all its products in support of the DFSG portal in the future as a key part of the financial supermarket approach, an overall strategy of the Bank. The company aims to reach all customers of the Group in the SME segment with both leasing and fleet products.

DenizFleet

DenizLeasing initiated operational leasing activities, the first to do so in Turkey among leasing companies. The company set up its new brand DenizFleet, a pioneering enterprise in the sector, in 2014.

DenizFleet was established under the umbrella of DenizLeasing in order to provide long term car rental services. DenizFleet stands out in Turkey as the only operational leasing brand operating within a leasing company. DenizFleet offers common, fast and reliable solutions across Turkey via its professional staff and is committed to delivering unconditional customer satisfaction. To this end, the company offers the most reliable and comprehensive service package to customers who demand fleet rental service. As of end-2018, the number of cars in the fleet totaled 3,600.

Capitalizing on the synergy created with DFSG's 754 branch network and 14 thousand-strong workforce, DenizFleet provides boutique services to every customer and strives to deliver unconditional and sustainable customer satisfaction.

Leasing Receivables and Asset Size

DenizLeasing provided services for investment financing in line with its strategy of productivity and profitability. The company strengthened its position among sector leaders in terms of assets and shareholders' equity. In 2018, DenizLeasing recorded leasing receivables of TL 2.9 billion and assets of TL 3.5 billion.

The “Deniz’e Çek Gönder (Send a Cheque to Deniz)” application helps customers conduct factoring transactions swiftly.

In 2019, DenizLeasing plans to execute a stable, controlled growth strategy to maintain its position among the sector leaders. It also aims to make progress as a company that leads the industry with innovative practices. In addition, DenizLeasing will differentiate by offering the advantages of operational leasing to customers in need of leased car fleets and further improve performance in the SME segment by providing special financing facilities. The company plans to boost market share by offering a specialized service approach to commercial and corporate enterprises on the basis of each specific customer and project.

DenizFactoring

DenizFactoring was set up in 1998 under the umbrella of DenizBank Financial Services Group. Primarily providing customers with guarantee, collection and financing services, DenizFactoring is a pioneer in the sector with a wide product and service range. These offerings include Express Factoring, Collection Management System, Supplier Finance Application, Public Sector Factoring and Export Factoring.

In August 2001, DenizFactoring became a member of the world’s most prominent international factoring organization, FCI (Factors Chain International).

In October 2004, DenizFactoring became a Full Member of FCI, after confirmation of its transaction volume and service quality.

In 2013, the company became a member of the Association of Financial Institutions (Association of Financial Leasing, Factoring and Financing Companies). The CEO represents the company as a Board Member at the Association of Financial Institutions.

DenizFactoring delivers its products and services to customers via a highly qualified, capable team at the Head Office and via the DFSG network, in a rapid and accessible

manner. DenizBank branch employees support DenizFactoring within applicable legal and regulatory requirements. Becoming one of the top three factoring companies by guaranteeing sustainable and profitable growth, DenizFactoring strives to expand DenizBank’s product range with factoring products and contribute significantly to the Group’s success.

In 2018, DenizFactoring recorded a market share of 6.5% in profitability, and return on equity of 27.7%, well above the sector average of 20.6%. DenizFactoring posted a cost/income ratio of 9.5%, outperforming by a large margin the sector-wide ratio of 30.9%. DenizFactoring has 6.8% market share in factoring receivables. Domestic factoring transactions account for 94% of total transaction volume while international transactions account for 6%.

Breaking new ground in the sector, DenizFactoring launched its “Digital Factoring” service in 2017, in keeping with the latest digital platform trends across the world.

Thanks to the application “Deniz’e Çek Gönder (Send a Cheque to Deniz),” customers can access factoring services over their smartphone or tablet. This capability allows firms in the micro or SME segments to swiftly perform smaller scale factoring transactions. The application also allows clients to rapidly access financing without having to wait for the maturity date of cheques with invoice.

To apply, customers can scan the QR code of the cheque for the transaction or upload a photo of the cheque to the application and complete the form for a quick result. Furthermore “Deniz’e Çek Gönder” shows the nearest DenizBank branches and their addresses to facilitate fast access to financing.

DenizFactoring, under the guarantee of Sberbank Factoring, is the only Turkish company to provide insurance for exports to Russia, and enjoys an unrivaled market position in this area.

Cultural Services

DenizKültür upholds the DFSG's corporate and social mission with its various activities in education, culture, arts and sports.

DenizKültür

Established in 2004 to organize and support scientific research, arts, literature and other cultural activities, DenizKültür represents the Group's corporate and social mission through various educational, cultural, arts and sporting events.

DenizKültür's activities include the following:

- Publishing books on science, arts and literature,
- Producing audio and visual cultural materials,
- Staging arts events,
- Organizing collection/exhibition projects geared toward the plastic arts and handcrafts,
- Organizing campaigns in line with the Bank's social mission, as well as other cultural activities to emerge from new ideas.

Arts Productions and Publications in 2018

Agriculture and People 4 Seasons – Book

This book comprises award-winning archive photos from the Agriculture and People Photo Competition, which has been held for 10 years by the Ministry of Food, Agriculture and Livestock in conjunction with DenizBank.

New Discoveries in Ani – Book

New Discoveries in Ani by Vedat Akçayöz, an investigative author, presents photos and information on the recently-discovered and photographed underground cities at the ancient ruins of Ani.

Black Week Festival

During the festival organized by DenizBank and Pera Palace Hotel, top Turkish and international crime writers convened in Istanbul for four days. The festival included talks by prominent authors, book signing days, and theatrical performances.

GaleriDeniz Art Exhibition

An exhibition of photos from the "Agriculture and People Photo Competition" organized on Farmers Day for DenizBank customers and employees was on display at GaleriDeniz. Subsequently, the sculpture exhibition by sculptor Özge Önkok welcomed visitors until the end of the year. The works of illustrator Ezgi Karaata were also exhibited at Deniz Academy in 2018.

Board of Directors

HERMAN GREF
CHAIRMAN OF THE BOARD OF DIRECTORS

Mr. Gref was born in 1964 and received an undergraduate degree in Jurisprudence from Omsk State University, Faculty of Law. Subsequently, he received his postgraduate degree from Leningrad State University, Faculty of Law before completing his Ph.D. in Economics at the National Academy of Economics established by the government of the Russian Federation. Starting his professional career in 1992 as first rank legal advisor at the Administration of Petrodvorets, St. Petersburg, Mr. Gref served on the City Property Committee of St. Petersburg Mayor's Office between 1994 and 1997 as First Deputy Chairman and Vice Chairman of the Committee. From 1997 to 1998, he served as Chairman and Vice Chairman on the City Property Committee of St. Petersburg Mayor's Office. After holding the post of First Deputy Minister of the Ministry of State Property of Russia in 1998-2000, Mr. Gref served as Minister for Economic Development and Trade of Russia from 2000 until 2007. Mr. Gref has been a Member of the Supervisory Board and Chairman of the Executive Board & CEO of Sberbank since November 2007 and Chairman of DenizBank A.Ş. Board of Directors since September 2012.

HAKAN ATEŞ
*MEMBER OF THE BOARD OF DIRECTORS,
PRESIDENT AND CEO*

Mr. Ateş was born in 1959 and graduated from Middle East Technical University, Faculty of Economics and Administrative Sciences, Department of Business Administration after completing his studies at TED Ankara College. He started his banking career in 1981 as an Internal Auditor at İşbank. After serving at various Interbank units from 1986 to 1993, he worked as Branch Manager at the Elmadağ, Şişli, Bakırköy, İzmir and Central Branches. He established Interbank's Cash Management System and was promoted in 1993 to Executive Vice President in charge of Central Operations. Mr. Ateş worked as Executive Vice President in charge of Financial Affairs and Operations at Bank Ekspres between 1994 and 1996 and led the bank's restructuring project with Bank of America. He established Garanti Bank Moscow in Russia and worked as CEO for one year starting from June 1996. Mr. Ateş has continued his duties as President & CEO at DenizBank, where he started in June 1997 as Founder President. During his management tenure, DenizBank shares were offered to the public in October 2004; the offering was 5.5 times oversubscribed. His management ran the sale of Zorlu Holding owned DenizBank shares to Dexia S.A. in May 2006 for USD 3.250 billion – 4.7 times its book value, a record in Turkey. Mr. Ateş's management was also responsible for the sale of 99.85% of DenizBank shares owned by Dexia Group to Sberbank six years later in June 2012 for USD 3.6 billion – 1.33 times its book value. Serving as the Chairman of the Board of Directors at DenizBank subsidiaries Deniz Yatırım Securities, Intertech A.Ş., DenizBank Moscow and DenizBank AG Vienna, Mr. Ateş was granted the "Those Who Add Value to Turkey" award presented by Bahçeşehir University in 2015. Hakan Ateş is married with two children. He speaks fluent English.

Summary Report of the Board of Directors to the General Assembly

Dear Shareholders,

DenizBank has achieved successful financial and operational results higher than the sector average in 2018 in the guidance of our robust corporate culture of more than 20 years.

DenizBank recorded consolidated net profit of TL 2,204 million and non-consolidated net profit of TL 2,183 million in 2018. Despite the increased funding costs sector-wide, DenizBank's consolidated net interest income rose 12% while unconsolidated net interest income went up 3% over the prior year. In the same period, the Bank's fees, commissions and banking services revenues increased 39% on both a consolidated and an unconsolidated basis, higher than sector averages. DenizBank's consolidated and unconsolidated total operating revenue went up 25% and 17%, respectively.

DenizBank, the fifth largest Turkish private bank by consolidated asset size, continued its operations along the vision of contributing to Turkey's economic and social development in 2018. The Bank expanded its assets, loans, deposits and shareholder equity with a growth above the sector average.

As of year-end 2018, DenizBank reported consolidated and unconsolidated assets of TL 197,311 million and TL 137,658 million, up 23% and 14%, respectively, compared to the prior year. DenizBank's consolidated shareholders' equity, including subordinated loans, grew 20% to TL 21,780 million, while the Bank's consolidated capital adequacy ratio stood at 14.93%. Unconsolidated shareholders' equity, including subordinated loans, rose to TL 21,719 million, with an unconsolidated capital adequacy ratio of 19.49%.

As part of its social responsibility approach, DenizBank, as the only private bank to participate in the Nefes Loan Programme - aiming for SMEs to access low-cost funding once more in 2018, financed more than 20 thousand SMEs—key in the path of development in Turkish economy—in two years. DenizBank provide all kind of support over 1.2 million customers to produce more efficiently under more comfortable conditions and access financial resources easily in agricultural banking as the sector leader.

During the year, extending new financing facilities to numerous sectors, together with agriculture and mainly such as tourism, energy, construction, infrastructure, healthcare, municipalities, sports clubs and education, DenizBank succeeded in expanding its consolidated loan portfolio by 21% over 2017 to TL 139,057 million. The Bank also maintained its market leading position in turning deposits into loans, with a loan/deposit ratio of 101%. Meanwhile, on an unconsolidated basis, DenizBank's loan volume increased 15% to TL 87,176 million.

In line with the Bank's core principles of providing unconditional and sustainable customer satisfaction, at year-end 2018. DenizBank operated a branch network with 754 locations, employed a workforce about 14 thousand and served almost 12.7 million customers, up 10% over the prior year. Additionally, the Bank's consolidated customer deposits soared 28% to TL 137,264 million. Meanwhile, on an unconsolidated basis, customer deposits grew 18% to TL 81,271 million.

As a reflection of these positive financial results, DenizBank compensated DFSG personnel with performance based premium payment of an average 3 monthly salaries. Placing great importance in its target to

make society meet quality arts and hand down the cultural heritage to future generations, DenizBank has continued its support to Istanbul State Symphony Orchestra DenizBank Concerts in 2018-2019 season. In addition, DenizBank also supported the 4th International Ankara Puppet Fest hosting puppet theatres from nine different countries and the 4th Black Week event bringing the leading names of crime fiction and crime fiction readers together.

DenizBank continued to make a difference with its innovative products and services in 2018 by receiving numerous international and local awards. Its "Ambassadors of Digital Change" project which DenizBank initiated to support the integration of the agricultural sector with technology and encourage young population who do not wish to continue agricultural activities received second prize in EFMA DMI Awards 2018 in "Corporate Social Responsibility – Social, Sustainable, Responsible Banking" category. Our "Credit X", which is a new perspective in targeted advertising earned "Innovation in Marketing Award" at BAI Global Innovation Awards while "Send Cheques to Deniz", which is our mobile application carrying factoring transactions into mobile phones received a Bronze Effie.

We would like to take this opportunity to extend our gratitude to our customers, shareholders, business partners and employees for their unwavering support during the operating year 2018, and to our esteemed shareholders and stakeholders for gracing our General Assembly with their presence.

Human Resources

DFSG is committed to offering equal opportunities to its employees, cultivating the future's managers from within its ranks, and giving preference to current staff members when filling vacancies.

DenizBank's nearly 14 thousand employees served customers at a total of 754 domestic and international branches in 2018. As a result of meticulous workforce planning, DenizBank boasts one of the lowest number of employees per branch location among Turkey's banks.

Human Resources continued to focus on digital transformation, candidate and employee experience. This approach is based on fact that the number of generation Y employees is on the rise (70% generation Y) and generation Z will soon be entering the workforce.

To conclude processes more efficiently and rapidly, the Recruitment and Career Management functions under the Human Resources Recruitment, Career and Talent Management Department have been separated since December 2017.

Committed to being the preferred bank of jobseekers, DenizBank actively uses accounts named "Career at Deniz" on Instagram, LinkedIn, Facebook (DenizBank Human Resources), Twitter (@denizbankik) and YouTube, with increases in follower numbers. The kariyer@denizbank.com page receives more than 150,000 unique visitors annually. In 2018, the page incorporated a chatbot to further improve candidate experience. With this innovation, DenizBank can respond to questions from job candidates round-the-clock. In 2018, DenizBank Human Resources social media accounts received the top prize for a second time in the "Career" category at Social Media Awards Turkey, held by BoomSonar and Marketing Türkiye, in recognition of their creative content.

Since university events and social media promotions are important in shaping student preferences, DenizBank participated in a total of 51 events in 2018, 22 of which were at universities. In addition to university events, online interviews were held with more than

1,000 students during the Online Virtual Career Fair. A popular website for university students (anlatsin.com) shared videos where DenizBank employees told about their experience at the Bank. The videos were viewed by more than 30,000 students. Four different internship programs aiming to facilitate the Bank's recruitment of university students provided internship opportunities to more than 1,500 university and vocational high school students in 2018. To that end, over 400 students passed the evaluation for the Pearls of Deniz internship, and completed their internship with success at branch locations or the Head Office. The Pearls of Deniz – Plus long term internship program for university students offered 6-month internships to 41 senior-year students. The interns who graduated and completed the program with success were recruited for various staff positions. Over 400 vocational high school students attended the vocational high school internship program called "Deniz'de İlk Adım (First Step in the Sea)." In 2018, 700 students participated in the "Deniz Aşırı (Overseas)" Online Internship Program, the first of its kind in Turkey. According to the results of the Universum youth perception survey, the Bank increased its ranking in the employer choices of students.

Once again, the Smart Recruitment strategy focused on digitalization and recruitment analytics in recruitment processes at the Bank this year. In 2018, a total of 2,589 persons were recruited for employment at the Bank. As a bank training new professionals for the industry, new graduates composed 60% of the staff recruited in 2018. About 20,000 people participated in online exams in 2018. Fifty percent of 8,000 job interviews during the year were conducted online. The experience of candidates and managers in recruitment processes were measured by the Bank. The satisfaction rate was 80%.

+1,500
INTERN STUDENTS

This year marked another first, the Data Science Program, yet another milestone in an innovation-oriented corporate culture. The program is a first in Turkey and is expected to shed light on the Turkish banking industry. A total of 46 data scientists comprising new graduates as well as experienced employees were assigned to the program. 20 new recruits – a combination of experienced professionals and new graduates – in addition to 26 existing employees were selected from among 2,500 applicants to attend the training program by Deniz Academy. In 2018, the Bank continued to collaborate with İŞKUR for the On-the-job Training Program. Over 300 course participants attended the On-the-Job Training program for various positions in 2018.

Corporate MBA and Executive MBA Programs continued at Bahçeşehir University and Sabancı University, which have graduated 134 Bank employees to date, for staff development at DenizBank. The Bank is committed to training the managers of today and tomorrow. Five employees were selected to attend the “A New Leader” program, which was held for the first time this year.

The Bank continued its assessment process called Development Center, attended by employees at the Vice President level. 150 Vice Presidents from the Bank attended the Development Center.

In 2018, the “FikriNNe (What Do You Think)” platform was launched, where questionnaires are sent periodically to candidates and employees. This effort is designed to measure satisfaction among both candidates and employees and proactively take the necessary action according to the results. The Head Office practice of a casual dress code on Fridays was extended to include Thursdays in an attempt to boost employee satisfaction.

Career Opportunities

All employees receive consultancy services on their career paths in order to contribute to their performance, competencies and personal development. All efforts maintained a focus on an awareness related to the new generation leadership style, generational differences and story diversity. The Bank's top priorities include providing an environment where employees can engage in self-development. In 2018, a total of 1,390 Bank personnel received job promotions. Some 85% of manager appointments during the year were current staff members.

In line with the importance placed on continuous communications with employees, one-on-one and online interviews were held with 2,456 personnel in 2018. Equal horizontal and vertical opportunities are provided for all staff members in line with their career maps. In 2018, the positions of 2,540 employees were changed.

FORA Team Leadership launched in 2014 for employees in the Non-Branch Channels Group (Mobile Sales, Call Center, Telemarketing and Collection). FORA included staff members in the evaluation process in line with the emerging needs for Team Leaders, with successful employees pursuing a career as a Team Leader. In 2018, 23 employees at the Bank were appointed as Team Leaders.

PRUVA, another innovative program, aims to prepare employees for their new job roles. This effort helps staff by benefiting from the knowledge, wisdom and experience of their guides within the branch through the one-month training and appraisal program. Relevant employees attend PRUVA for a transfer to branch sales positions. To that end, 43 successful employees at the Bank were appointed to their new roles in 2018.

Human Resources continued to focus on digital transformation, candidate and employee experience based on fact that the number of generation Y employees is on the rise (70% generation Y) and generation Z will soon be entering the workforce.

Training

Deniz Academy

Deniz Academy structures the personal and professional development of all DFSG employees in a planned way. The training needs of all personnel are analyzed in line with the importance of training to effect professional improvement. Deniz Academy prepares training maps for field employees according to their level, and structures their development throughout their career with compulsory and elective courses. This approach allows the staff in the field to enjoy a faster moving and more satisfying career path.

Deniz Academy sees rapidly transforming beginners into “sailors” and the training of managers as a mission guiding the corporate culture. The Academy develops training projects spread over a period of time by using different teaching methods to make learning by practice more stimulating. Deniz Academy has the capacity to provide training to 1,500 persons simultaneously. The Academy organizes seminars, hobby workshops and many other activities in addition to employee training, while also playing host to many DFSG events.

In 2018, Deniz Academy helped DFSG increase and improve its investment in human resources – the Group’s most valuable asset. Throughout the year, Deniz Academy reached out to every employee at DenizBank. The Academy became one of the top institutions in the sector by organizing an average of 10.2 days of training per employee, some 950,000 hours in total.

In 2018, Deniz Academy prepared and assigned training courses to employees at the Sales Faculty for field teams and at the Qualifications Faculty for Head Office employees and field teams.

Sales Faculty is a video learning journey that includes the trainings that operational and field sales employees need to attend based on their job titles. The videos on Deniz TV, as filmed by internal and external trainers, aim to provide employees with all the information they need from a technical and qualifications point of view.

The Qualifications Faculty was established based on the results from Deniz’de Gelecek Diyalogu, which was completed in 2017. Specifically focused on qualifications that managers requested for their employees, the Qualifications Faculty commenced in May 2018. A diverse range of content – videos, articles, quotes, book recommendations, and the like – is prepared in line with personal development areas. Relevant content is assigned to employees at the Bank weekly.

In 2018, new learning trajectories were designed and aligned with the strategic goals of all business lines, such as Retail, Private, SME, Agriculture, Commercial and Corporate Banking. A new model was taken up in relation to such design. These designs shifted to a new model, where exams are organized to measure an individual employee’s competence. New training programs are then created in line with the competence level. These programs focus on case studies and simulations, ensuring a more intensive learning experience. To that end, exams were held on the topics of Deposits and Loans in order to identify the required training subjects on a personal basis and form training content in 2018. Exams on Deposits and Loans were attended by 4,776 and 2,210 employees (709 Branch Managers and 1,401 Branch Employees), respectively.

The Bank developed and launched a Credit Wiki application in June 2018. This effort aimed to complement classroom training in addition to training events held after the exams.

The Credit Wiki application allows DenizBank staff to use their mobile phones to instantly access a diverse set of subjects. These topics range from general loan information to what needs to be done during company visits, and sector-specific information to tips on financial statement analysis.

In fourth quarter 2018, the “3D – Dalgali Denizlerin Denizcisi (Sailor on Rough Seas)” training was introduced to help establish a common way of doing business within the Bank on Collection and Risk Management, Deposits and Cross-Sales. The Bank is planning for SME-Agricultural-Retail Sales Managers and Regional Operational Department Heads to deliver the training to their teams in their own regions within a single day. The training program is designed to provide branch personnel with the information they need in parallel with the economic developments of the period. To that end, the content of the training program was enriched based on the comments and suggestions from all business lines. At the end of the program, an exam will be administered to measure the level of learning.

The Development Center continued to identify the strengths and any improvable areas in the role of Vice Presidents during the year. Vice Presidents who attended this program furthered their personal development by participation in the Vice President Development Program. The program consists of three modules over six days. It is divided into two separate sub-programs designed for branch managers and departmental managers. The target audience for these programs is the Vice Presidents. Other programs are designed for Branch Managers and Department Heads who were promoted internally. The New Captains Club (YKK) program consists of three modules: “I Am a Leader,” “We Are a Team” and “The Customer Is Our Priority.” This program is designed to help managers improve their banking know-how and managerial skills. It lasts a total of 13 days for Branch Managers and nine days for Department Managers.

Employees gain practical experience on speaking, reading and writing at a total of five English training groups.

In addition to classroom training programs, DenizBank added virtual instruction to its alternative learning portfolio. These include practical screen simulations and reinforcement, e-learning, mobile learning and Deniz TV. With this approach, Deniz Academy has implemented a multifaceted training model and provides an average of 37 hours of training per employee. The Academy also extends support via mobile applications before, during and after training. The development follow-up system (Assignment Module) ensures that people participate in training programs with proper preparation.

In 2018, simulation programs provided a key experience to participants before the training, preparing them for the actual training. Exams are administered before and after the training events over the reinforcement application to ensure that learning concepts are retained.

In 2018, students from various Turkish universities participated in online internship programs under the Pearls of Deniz and Overseas at denizakademi.com.

During the 21st Captains’ Meeting in October, the topics of customer experience, efficient use of data to boost customer experience and the Bank’s vision for the coming period were shared with attendees. Key messages from the meeting were compiled by Deniz Academy for use by all Sailors, leading to the Captains Training Sailors training program. Key messages were shared with all Bank employees under the guidance of Captains.

DenizBank Corporate Governance Principles Compliance Report

PART I: CORPORATE GOVERNANCE PRINCIPLES COMPLIANCE STATEMENT

Prior to its IPO, DenizBank voluntarily conducted studies for compliance with the Capital Markets Board's (CMB) Corporate Governance Principles in line with international principles and sectorial practices; the "Corporate Governance Report" was published which was firstly approved at the Board of Directors Meeting dated September 16, 2004. DenizBank views Corporate Governance Principles as a dynamic field open to further improvement and works to enhance its operations in this spirit.

DenizBank operates with a management approach built on the principles of transparency, equality, responsibility and accountability, and exercises maximum care to comply with the corporate governance provisions outlined in the Banking Legislation, Capital Market Legislation, Turkish Commercial Law and other related regulations as regards the management of relations with shareholders, as well as the determination of the duties, authorities and responsibilities of the Board of Directors and the management tiers that report to the Board. Mandatory principles of the annex to BRSA's "Regulation on Corporate Governance Principles" (Regulation) and CMB's Corporate Governance Communiqué (Communiqué) no II-17.1 are complied.

The Bank complies with the majority of the non-mandatory principles and continues the full compliance studies. The main principles that have not yet been fully complied are as follows and this info is also included under the related subjects in this report.

- › Article 1.5.2: the use of minority rights to whose own less than one twentieth of the outstanding shares was not extended by The > Articles of Association and minority rights are provided under the general provisions of the regulations.
- › Article 4.3.9: We do not have a policy regarding the ratio of women members.
- › Article 4.5.5: Only one Board Member is also an associate member of another committee.
- › Article 4.6.5: The payments made to the Board Members and the executives with administrative responsibility are publicly disclosed in parallel with the general practice in the Ordinary General Assembly and Independent Audit Reports.

As for the compliance with the non-mandatory provisions, the differences between the CMB Corporate Governance Principles and the Bank applications are outlined under the relevant sections of this report.

DenizBank updates the annual report, website and other information channels to comply with the related principles and shares them with all the stakeholders. Shareholders are able to access to comprehensive information through these channels and keep themselves informed about the latest developments and activities.

According to the Capital Markets Board's decision Nr. 2/49 dated 10 January 2019, it was decided that the companies should be made their Corporate Governance Compliance Reporting in accordance with Nr. II-17.1 "Corporate Governance Communiqué (Communiqué) by using the Corporate Governance Compliance Report (URF) and the Corporate Governance Information Form (KYBF) templates through KAP. Within the framework of compliance with this decision, our Bank announced the URF and KYBF forms at KAP on the date of 27.02.2019. The forms are accessible at <https://www.kap.org.tr/tr/sirket-bilgileri/ozet/2415-denizbank-a-s>

PART II: SHAREHOLDERS

2.1 Investor Relations Department

Established in 2004 with the aim of taking necessary measures to comply with the existing legislation, the Articles of Association, and other in-house regulations regarding the protection and exercising of shareholders' rights, and the right to obtain and review information in particular, the Department has been carrying out its activities with name of Investor Relations and Financial Communication Department within the structure of Financial Affairs Group, under the supervision of Financial Affairs Group- EVP, CFO. The tasks of Investor Relations Department within the 5th Clause of the 11th Article of the Communiqué are carried out in coordination with the Investor Relations and Financial Communication, Secretary General, Corporate Compliance, Financial Performance Evaluation and Analysis and Treasury and Financial Institutions departments. Names and contact info regarding the staff members of the Department are given below. Due to the fact that the portion of shares in public float is 0.15%, the number of inquiries made by investors within the period was limited, and thus all inquiries were answered verbally or in writing.

Yeliz Koraşlı Özdemir - Department Head - Corporate Governance Rating License, Capital Market Activities Level 3 License
yeliz.korasliozdemir@denizbank.com
Tel: +90 212 348 59 95

Simay Ağaçdiken – Assistant Specialist
simay.agacdiken@denizbank.com
Tel: + 90 212 348 59 91

Department Fax: +90 212 336 61 86
+90 212 336 30 80

Due to the fact that most of the tasks specified in the 11th Article of the Communiqué are carried out by our Bank's Investor Relations and Financial Communication Department the Department Manager Yeliz Koraşlı Özdemir was appointed as the "Director of Investor Relations Department" upon the Board of Directors decision dated June 20, 2014. Furthermore, within the scope of the 1st Clause of the 11th Article of the Communiqué she was appointed as a member to the Corporate Governance and Nomination Committee.

Activities during the Period

- › Material event disclosures,
- › Preparation of the annual reports, interim activity reports sections of financial reports, and press releases on financial data,
- › Updating relevant information on the Bank's website,
- › Examination of sector data and preparation of market share reports,
- › Responding to questions received by email and telephone,
- › Organization of Ordinary/Extraordinary General Assembly Meeting,
- › Preparation of documents within the scope of the issuance of bonds/bills, making necessary announcements and disclosures,
- › Coordinating the practices developed in the Bank within the scope of Corporate Governance Practices.

The report regarding the activities carried out within the scope of the Communiqué was prepared in coordination for 2018 and planned to be submitted to the Board of Directors in March 2019.

2.2 Exercise of Shareholders' Right to Information

The Investor Relations and Financial Communication Department treats all shareholders equally. All shareholder and other stakeholders' inquiries were first assessed to determine whether or not they concerned trade secrets, and then answered accordingly either in written form, or else verbally. Queries made to the Investor Relations and Financial Communication Department concerned the following topics:

- › The Bank's financial statements,
- › Activities in business lines,
- › General Assembly Meetings,
- › Dividend Distribution,
- › Share Price Info,
- › Main shareholder change,
- › Bonds/bills issued.

DenizBank exercises maximum care to release information that may impact the exercising of shareholders' rights and the decisions of investors, in the most rapid and effective manner. Disclosures are considered within the scope of the CMB's Communiqué and Guide on Principles Regarding Public Disclosure of Material Events, announced via the Public Disclosure Platform and also published on

the Bank's website. The Bank's website is itself used actively to provide shareholders, investors and other stakeholders' easy access to information. The information published on our website is explained in detail under "Part III/3.1 Company Website and Contents."

Request for the Appointment of a Special Auditor

Our Bank applies the provisions of the Turkish Commercial Code regarding the appointment of a special auditor; therefore, no special regulation is included under the Articles of Association about this issue. During the period, no request from shareholders, who have such a right according to internal and legal regulations, for the appointment of a special auditor was received.

2.3 General Assembly Meetings*Invitation to and Information about the General Assembly*

DenizBank issues the invitation to the Annual General Assembly at least 3 (three) weeks before the meeting date, as stated in Articles 10 of the Articles of Association. The announcement/invitation on/to the General Assembly is published in the Trade Registry Gazette, on the Central Registry Agency's (MKK) Electronic General Meeting System (e-GEM), Public Disclosure Platform (PDP) as well as on the DenizBank website. The company ensures the clarity of the General Assembly agenda, and that an item on the agenda does not cover multiple topics. Furthermore, the agenda items, proxy forms, Annual Report, Articles of Association, financial statements and their footnotes, old and new versions of the Articles of Association in case of any amendments, information stated on principles on Board Members and candidate Members in case the agenda items include the dismissal, replacement or election of Board Members, any requests from the shareholders to add items to the agenda, and Information Document including all other documents regarding the agenda and other documentation are submitted for shareholder scrutiny at the Bank's Head Office and on the Bank website as of the date of the announcement.

Documents regarding the agenda items are also published via MKK's portals including the e-GEM. Proxy voters do not have to be shareholders. It is no longer necessary to place voting shares under participant's blockage in the General Assembly Meeting. Shareholders can now register to participate in the meeting

via the e-GEM, until 00:00 hours the day before the meeting. All shareholders whose names are included on the Shareholders List obtained from the e-GEM prior to the meeting can participate in person.

Although not stipulated in the Articles of Association, DenizBank's Board of Directors can decide to open General Assembly meetings to the wider public, including stakeholders and the press, although the latter do not have the right to take the floor. The meeting minutes of the General Assembly and the Attendance List are published on the e-GEM, Public Disclosure Platform (PDP) and the Bank's website. In 2018, DenizBank held an Ordinary General Assembly Meeting.

Date: 29.03.2018

General Assembly: 2017-Ordinary

Participants: Shareholders, Representatives of Legal Authorities and Independent Auditors

Participation Rate: 99.85%

Form of Invitation: Trade Registry Gazette, and announcement on the e-GEM, PDP and the Bank website.

In 2018, there is no transaction conducted by insiders with privileged information on their behalf within the scope of the Bank's activities, so there is no need to provide information at the general assembly.

Shareholders' Right to Add Items to the Agenda and Ask Questions

As indicated in Article 10 of the Articles of Association, shareholders representing at least one twentieth of the paid-in capital may add items to the agenda through notary public or written request submitted to the BoD and request the Board of Directors to call an Extraordinary General Assembly via justifiable written requests.

As per Article 15 of the Articles of Association, all shareholders have the right to express their opinions and ask questions during General Assemblies. Questions directed at the Board of Directors shall be answered immediately and verbally, if possible. Otherwise, these will be answered in written form within 15 (fifteen) days of the General Assembly. In line with recent amendments to the Communiqué, questions posed during General Assembly meetings and their answers are published in 30 (thirty) days on the Bank's website.

DenizBank Corporate Governance Principles Compliance Report

The Bank makes donations and gives aid in line with the Donation Policy and relevant procedures defined by the Social Responsibility Policy. The sum of donations made during the period and the benefactors of these donations are listed in the Annual Report and presented to the shareholders at the General Assembly as a separate agenda item with the policy changes if existed.

2.4 Voting Rights and Minority Rights

DenizBank shares do not have any preferential rights. As per Article 14 of the Articles of Association, each share carries one vote. Obstructions to the exercising of voting rights are avoided. Shareholders can be represented at the General Assembly by other shareholders, or an external proxy.

The Bank does not have any cross-shareholding relationships with any company. As stipulated by the Article 29 of the Capital Market Law No. 6362, minority rights shall be exercised by shareholders representing at least one-twentieth of the paid-in capital as per Article 411 of the Turkish Commercial Code, and this condition is met by Article 10 of the Articles of Association.

2.5 Dividend Rights

The Bank's dividend distribution policy is outlined in Article 32 of the Articles of Association and published on the website. Prior to being presented by the Board of Directors to the General Assembly, the dividend distribution proposal is announced as a material event disclosure to shareholders and published on the Bank's website and e-GEM. The dividend distribution policy and the dividend distribution proposal for the relevant year are published in the Annual Report. There are no privileges concerning the distribution of dividends. Pursuant to the

decision of the General Assembly held in March, no dividend is being paid for the year 2017.

2.6 Transfer of Shares

There is no provision in the Bank's Articles of Association restricting the transfer of shares. According to Article 8 of the Articles of Association, the transfer of shares is allowed in accordance with Turkish Commercial Code, Banking Law no.5411, Capital Market Law and the Articles of Association.

PART III: PUBLIC DISCLOSURE AND TRANSPARENCY

3.1 Information Policy

The Information Policy has been prepared in line with relevant laws, the regulations of Banking Regulation and Supervision Agency (BRSA) and Capital Market Board (CMB) and Corporate Governance Principles and announced to public on the website upon approval of the Board of Directors. Establishment, execution and supervision of the information policy are under the responsibility of the Board of Directors. Coordination and fulfillment of the information function are carried out by the General Manager, Executive Board Members, employees of Financial Affairs Department, Management Services Department, Internal Control and Compliance Department and the Secretary General as well as the related managers of all business lines in terms of access to internal information. The information policy aims to ensure timely, accurate, complete, comprehensible, easily and affordably accessible and uniform delivery of information that does not constitute trade secret and disclosure of which is not against laws to stakeholders and beneficiaries. Forward looking information can be disclosed to public in written or verbal form. Forward looking information about the Bank's financial situation and operations are stated in activity reports, press releases and other informative documents. Forward looking information should be consistent with the Bank's current financial situation and activity results as well as other information disclosed to public and should not contain groundless, exaggerated or misleading projections.

3.2 Corporate Website and Contents

In accordance with the public disclosure and transparency principles of the Corporate Governance Principles, DenizBank has created an effective website which is updated periodically to provide timely, accurate, complete, comprehensible, easy to analyze, low-cost and accessible information. The Bank's web address is www.denizbank.com.

The majority of the information specified in the CMB's Corporate Governance Principles has also been submitted in English in our Corporate Internet Site and important sections are also available in Russian. The website, available in Turkish and English, contains all the information stipulated in CMB's Corporate Governance Principles. The following information is available on the website:

- › Trade Registry and share information, shareholding and management structure,
- › The latest version of the Bank's Articles of Association, information about the changes,
- › Material event disclosures,
- › Press releases,
- › Annual reports and financial reports,
- › Documents concerning securities issued,
- › General Assembly forms,
- › Information on the internal control system and risk management,
- › Curricula Vitae of the Board of Directors and the Executive Management team,
- › Policies,
- › Corporate Governance Principles Compliance Report,
- › List of social responsibility activities.

3.3 Annual Report

The Annual Report is published in sufficient detail to provide complete and accurate information about the Bank's operations, and in accordance with BRSA and CMB regulations. The Annual Report features all topics listed in the relevant regulations. Following its release on the Public Disclosure Platform, it is also published on the Bank's website.

PART IV: STAKEHOLDERS

4.1 Informing Stakeholders

The rights earned through legislation and the reciprocal contracts of DenizBank's stakeholders (employees, clients, correspondent banks, entities participating in syndication loans, public agencies, borrowers, lenders, credit rating agencies, suppliers, the social environment, and other interest groups the Bank is in contact with) are protected by DenizBank. If these rights are violated, the injured party is compensated. Relationships with all stakeholders are maintained with respect to the Code of Ethics. Employee rights have been determined through the Bank's approach, and through its human resources policy, remuneration policy, employee, disciplinary, and other regulations. In the internal portal established for informing the employees, all the related procedures, notifications and announcements are published. It is ensured that such information is accessed from different points in the most efficient way. Stakeholders are provided with information related to the Bank within the framework of the disclosure policy and other in-house regulations. Stakeholders are regularly informed through General Assembly minutes; material event disclosures; press releases; internal bulletins; in-house announcements; "Team Spirit" magazine; emails to clients; announcements via SMS, the call center, web platforms and social media channels; annual reports; financial reports; and all notifications made via the Bank website.

In addition, information is provided via meetings organized upon request and in written statements. Easy access to up-to-date information is facilitated by posting all the aforementioned information on the Bank's website.

Several mechanisms have been set up by which stakeholders can share complaints and suggestions regarding the Bank's activities and transactions with the management. While employees can use the suggestion system to share their wishes, requests, suggestions and complaints with the executive management, other stakeholders can share their requests and complaints with the Bank's management via the customer satisfaction system. Furthermore, within the scope of

the "Anti-Corruption Policy" and "Corporate Responsibility Communication Procedure", our Bank has "Ethical Notification" channels which can be reached by the employees via phone, e-mail and portal and which is for notifying the transactions which may lead to financial loss, conflict of interests and damage of our Bank's prestige, such as embezzle, abuse, bribery, fraud and misuse.

4.2 Stakeholder Participation in Management

To ensure optimum satisfaction while preserving the balance between customers, employees, shareholders and other stakeholders, the Bank strives to improve its product and service quality, and to fulfil the expectations of domestic and foreign customers. To this end, DenizBank acts in accordance with the "collective wisdom" concept and gears its systems towards continuous improvement.

Within the framework of the customer-oriented approach of the Bank, dialogues and surveys, which are performed by the Customer Satisfaction and CRM Departments with the customers for getting to know the customer and understanding their expectations regarding our products and services, help a lot while determining the new product and service strategies of the Bank.

Stakeholders can participate in the Bank's management by attending various committee meetings and the General Assembly, as well as by using the suggestion system and by exercising their right (as stated in Article 20 of the Articles of Association) to demand from the Chairman in writing the placing of an item on the agenda of the General Assembly meeting.

Furthermore, as per Article 10 of the Articles of Association, minority shareholders may request in written form that the Board of Directors add an item to the agenda of the General Assembly through justifiable written requests prior to the creation of said agenda. Moreover, shareholders may request the Board of Directors to call for an Extraordinary General Assembly through justifiable written requests and create the agenda for discussion. Below is a list of systems that facilitate employee, customer and shareholder participation in management. The output of these systems is presented to the Executive Management after being analyzed by related departments.

Employees

- > Committees
- > Suggestion System

Customers

- > Customer Satisfaction System
- > Suggestion System

Shareholders

- > General Assembly
- > Board of Directors
- > Management Meetings

4.3 Human Resources Policy

General human resources policies designed for the Bank and its subsidiaries to perform their functions in the most effective fashion are based on the principles summarized below. These principles are posted as related procedures and processes on the Bank's website and intranet portal "DenizPortal" and are accessible by all members of staff.

Respect for Individuals: Recognizing that the first criterion for success is respect for the individual, and providing all employees, without discrimination, with the harmonious Professional environment and physical means necessary for them to fully utilize and improve their abilities and skills.

Transparency in Management: Facilitating new ideas within the framework of mutual trust understanding and communication; and problem solving through collective wisdom. Establishing and developing user-friendly technological systems that give employees the opportunity to communicate their demands, suggestions and opinions by further informing them on the applications that concern them.

Opportunity for Training and Development: Keeping in mind that the Bank's most valuable investment is the development of employees using every available training tool, as well as managing their careers in accordance with their accomplishments and competencies, and aiming to select the managers and directors of the future from among Bank employees.

DenizBank Corporate Governance Principles Compliance Report

Fair and Reliable Remuneration Management:

Implementing a compensation management system that provides fair and reliable salaries and benefits that encourage and reward success and excellence in line with market and prevailing conditions.

Practices and attitudes related to matters such as hiring criteria, salaries, training and health, in accordance with the general approach adopted within the framework of the human resources policy, are documented through guidelines, procedures and policies, all of which are available to employees.

All kinds of decisions that affect the employees are available in the regulations that are accessible in the common platforms and are announced with general announcements. There are no trade union activities in our Bank based on the Law No. 6356 on Trade Unions and Collective Labor Agreements. Our Bank respects the constitutional rights of our employees.

"Future at Deniz Dialogue" which focus on the improvement of employee performance and development of their competencies is performed twice a year. It is aimed at increasing the number of feedbacks that each employee is received and creating guidance steps in the middle of the process.

Announcements that are of interest to Bank employees are communicated over the intranet (DenizPortal), mobile application "Denizde" and by email. Suggestion systems have been developed where the employees can share any suggestions and opinions. In order to focus on the candidate and employee experience and measure the satisfaction level at these areas and to be able to take the necessary actions proactively depending on the

results obtained, the platform "FikriNNe" (What'sYourIdea) which contains periodic surveys has been started to be used.

Suggestions submitted through "I Have an Idea" on DenizPortal are evaluated and pre-assessed by the Organization Department. Suggestions deemed viable are evaluated at the Suggestions Committee and rewarded accordingly. Furthermore, all employee concerns and problems regarding working practices are evaluated by their supervisors and brought to the attention of the Executive Management, where necessary.

As a learning organization, DenizBank allows three different generations to learn from each other and to grow based on the differences between them. Within this scope, the second leg of the mentorship program called "Bilakis" has been launched which enables different generations to learn from each other. With this program, employees, interns and also university students who were included in the program this year that are born no earlier than 1990 are acting as mentors about the expectations of the young generations and about up-to-date issues, primarily being the social media developments, to the senior management members.

There have been no complaints from employees regarding discrimination in the workplace.

We believe that development is the most important factor of our human resource policy, and we support the personal development and career path of every DenizBank Financial Services Group employee with a policy of equal opportunity. All related programs are carried out at Deniz Academy, with training needs analyzed. Modern training tools and methods like e-Deniz Academy, Deniz TV, mobile training and social media are used in training projects.

The Bank's employee remuneration policy was designed to establish the principles governing payroll and social benefits. The Remuneration Committee was established to audit and monitor pay policies and practices on behalf of the Board of Directors. Salaries, factors significant in determining increase rates, the performance based pay system and criteria used in assessments have been identified within the scope of the policy. The policy has been made available to employees via the website and DenizPortal.

4.4 Code of Ethics and Social Responsibility

DenizBank carries out its activities within the framework of the Banking Code of Ethics it has adapted and published on its corporate website. Taking and implementing management decisions necessary for compliance with "Ethical Principles Policy" published by The Banks Association of Turkey, constitute the basis of the activities. Furthermore, the Bank published the "DenizBank Compliance and Integrity Policy" in order to establish respect for laws and regulations, ensure trust among customers, employees and shareholders, and prevent misconduct and fraud.

In addition to contributing to the national economy through its financial activities, DenizBank supports projects designed to raise public awareness, mainly in the fields of education, culture and the arts and sports, in line with its social responsibility approach. DenizBank Financial Services Group's Corporate Social Responsibility has also been published on the website.

As part of its social responsibility activities, the Bank makes donations, supports projects, organizes cultural events and publishes Works via DenizKültür.

The list of activities conducted to this end is presented on the Bank's website.

PART V: BOARD OF DIRECTORS

5.1 Structure and Formation of the Board of Directors

The Annual Report includes the names and short biographies of the Bank's executive, non-executive and independent Board Members. The formation, duties, and responsibilities of the Bank's Board of Directors, as well as its meeting format, are described in detail in Articles 16, 17, 18, 19, and 20 of the Articles of Association. The Board of Directors consists of 12 members, four independent members of which three are also the Members of the Audit Committee (as per Articles 6-(3) of the CMB Communiqué on Corporate Governance) 9 are non-executive and three are executive members. In line with Article 17 of the Articles of Association, the duties of Chairman and CEO are performed by different individuals. The term of office for all members of the Board of Directors is defined within the scope of Article 18 of the Articles of Association as three years. A member whose term of office expires can be re-elected. There are no quantitative limits as to the Board Members'

taking office in the Bank's subsidiaries. In order to ensure efficient management, in principle, Board Members are asked not to take up more than three duties beyond the Bank's subsidiaries. A Directors and Officers liability insurance has been subscribed covering less than 25% of the capital.

A "Statement of Independence" has been received from the independent members pursuant to Articles 4.3.6 of the CMB's Corporate Governance Principles to fulfil the criteria of independence.

Investigating the independence of the independent Board Members and identifying any conflicts of interests are among the duties and responsibilities of the Corporate Governance and Nomination Committee. Within the framework of the principles in force during the period of activity, there were no circumstances which could compromise the independence of the Board Members. In line with the revision of Communiqué criteria, the statements from independent Board Members were renewed in 2018 according to CMB principles as follows:

I hereby declare that;

I do not have a relationship in terms of employment at an administrative level to take upon significant duty and responsibilities within the last five years, do not own more than 5% of the capital or voting rights or privileged shares either jointly or solely or have not established a significant commercial relation between the Bank, companies on which the Bank hold control of management or significant effect and shareholders who hold control of management of the Bank or have significant effect in the Bank and legal entities on which these shareholders hold control of management and myself, my spouse and my relatives by blood or marriage up to second degree,

I have not been a shareholder (5% and more), an employee at an administrative level to take upon significant duty and responsibilities or member of board of directors within the last five years in companies that the Bank purchases or sells goods or service at a significant level within the framework of the contracts executed, especially on audit (including tax

audit, statutory audit, internal audit), rating and consulting of the Bank, during the time period when the Bank purchases or sells services or goods.

I have professional education, knowledge and experience required to duly fulfill the duties assigned for being an independent board member.

I am not a full time employee at public authorities and institutions after being elected, except being an academic member at university provided that is in compliance with the relevant legislation.

I am residing in Turkey in accordance with the Income Tax Law (I.T.L) dated 31 December 1960 and numbered 193.

I am capable of contributing positively to the operations of the Bank and maintaining my objectivity in conflicts of interests between the Bank and the shareholders, and have strong ethical standards, professional reputation and experience to freely take decisions by considering the rights of the stakeholders.

I will allocate time for the Bank's business in order to follow up the activities of the Bank and duly fulfill the allocated duties.

I have not conducted membership of board of directors for more than a term of six years within the last ten years.

I am not an independent member of the board of directors in more than three of the companies whose control is held by the Bank or the shareholders of the Bank and in more than five companies in total which are admitted to the trading on the exchange.

One of the Bank's 12 Board members is female. According to the objective set by CMB's Corporate Governance Principles, Article 4.3.9, at least 25% of the members need to be female, which corresponds to four women in DenizBank's case. Women account for 34% of the Bank's managers; the Bank is keen on attaining this objective concerning the Board of Directors.

5.2 Operating Principles of the Board of Directors

Principles and quorum for Board of Directors meetings have been established in Article 20 of the Articles of Association. Although the Articles of Association state that the Board of Directors should meet at least four times per year, the Board meets as frequently as required to fulfil its duties effectively. The Board of Directors is convened by the Chairman of the Board or by the Vice Chairman if the Chairman is not present. The agenda of the Board of Directors meetings consists of items arising from the duties and responsibilities of Board Members as stipulated in Article 19 of the Articles of Association, as well as members' requests, matters discussed at the weekly Executive Committee meetings and Committee resolutions. In line with shareholder rights, minority and majority shareholders and stakeholders may demand that a certain subject be addressed at the Board of Directors meeting through a written request to the Chairman, and have it added to the agenda.

In the year 2018, the Board of Directors made 140 decisions.

It is essential that Board Members attend the meetings in person, although attendance is also permitted via any means of remote conferencing. Each Board Member has one vote, all votes are equal and no member or Chairman has the privileged or weighted power to vote or veto.

Corporate Governance Principles are applied on related party transactions.

The Chairman of the Board does his utmost to enable the participation of non-executive members at the meetings. The Chairman is responsible for ensuring that Board meeting invitations and discussions are conducted in accordance with procedures, and that decisions are recorded in the meeting minutes.

DenizBank Corporate Governance Principles Compliance Report

During the Board of Directors meetings, members who cast dissenting votes are required to sign the minutes along with a statement explaining the reason for their votes. Minutes of the meetings and documents related to the meetings are duly included into the resolution book, archived and kept under the supervision of the Chairman. The manner in which the Board of Directors meetings are held is determined by in-house regulations. Information and documents related to the items on the agenda of the Board of Directors meetings are presented to Board Members for scrutiny by the Board Secretariat prior to the meeting in order to establish equal information flow. The compliance of the Bank's meeting minutes with legislation is ensured by the Board Secretariat, and a report is presented to authorized parties upon request. The duties of the Board Secretariat have been passed onto the Secretary General upon resolution of the Board of Directors. Decisions of the Board of Directors that are significant to stakeholders are made public via material event disclosures.

5.3 Number, Structure and Independence of Board Committees

The Board of Directors shall form the committees, by virtue of law and/or at its discretion, in order to execute its duties and responsibilities professionally, effectively, efficiently, and being informed in the best possible way. The Audit Committee and the Corporate Governance and Nomination Committee were established in 2004 within the scope of CMB Corporate Governance Principles. In addition, in 2011, the Board of Directors established the Remuneration Committee to monitor and

inspect remuneration practices on behalf of the Board of Directors in accordance with the "Regulation on the Banks' Corporate Governance Principles" of the Banking Regulation and Supervision Agency. The Committees (excepting the Credit Committee) are composed of at least two committee members. Only one Board Member is also an associate member of another committee. The duties and operating principles of committees are posted on the Bank's website. Information about the committees reporting to the Board of Directors and on the executive committees providing information flow to the management is presented below.

Committees Reporting to the Board of Directors

Corporate Governance and Nomination Committee

The Committee determine application of the corporate governance principles and detect the reasons and negative consequences of failure to apply them comprehensively, as well as suggest the measures for improvement; form a transparent system of selection, determination, evaluation, and traineeship of the candidates for top management; and investigate the matters of independence and conflicts of interests. The Committee is composed of four members. Due to the fact that most of the tasks specified in the 11th Article of the Communiqué are carried out by our Bank's Investor Relations and Financial Communication Department; the Department Manager was appointed as the "Director of Investor Relations Department" and as a member to the Corporate Governance and Nomination Committee upon the Board of Directors decision dated June 20, 2014.

The qualifications of committee members are presented in the "Management" section of the report.

The Corporate Governance and Nomination Committee convene at least three times a year. It also convenes whenever else required in the performance of its duties. The procedures related to the structure, duties, authorities and responsibilities of the Corporate Governance and Nomination Committee have been determined, and its main activities are posted on the Bank's website. In 2018, Corporate Governance and Nomination Committee made

6 decisions to recommend candidates to the Board of Directors as regards the appointment of executives. The nominated executives were appointed in line with the recommendations presented to the Board of Directors. The Committee has reviewed its operating principles during the meetings and made an effort to improve these through suggestions to the Board.

Audit Committee

The Audit Committee is in charge of the supervision of the Bank's accounting system, public disclosure of the financial information, independent auditing, the operation and efficiency of internal control, internal audit and risk management systems. The Committee consists of three members. The qualifications of committee members are presented in the "Management" section of the report.

The Audit Committee convenes at least once every three months - at least four times a year. In addition, the Committee meets with the independent auditors of the Bank, separate from the executive units, at least four times a year to discuss issues regarding internal control, financial statements, internal audit and other important items that need to be discussed. Minutes of Audit Committee Meetings are reported to the Board of Directors. The procedures regarding the structure, duties, authorities and responsibilities of the Audit Committee have been defined and its main activities are posted on the Bank's website. The Audit Committee's activities during the year 2018 can be found in the section entitled "Assessments of the Audit Committee" in the Annual Report.

Remuneration Committee

A Remuneration Committee was established on December 7, 2011, to monitor and inspect remuneration practices on behalf of the Board of Directors in accordance with the Regulation on the Banks' Corporate Governance Principles issued by the Banking Regulation and Supervision Agency.

The Committee evaluates remuneration policies and practices within the framework of risk management and reports its recommendations annually to the Board of Directors. The qualifications of the members of the Committee are presented in the section of "Management" of the report.

Credit Committee

The Credit Committee is authorized to decide on credits and loans, which are under consideration to be granted to the individuals or corporations in accordance with the Banking Law, the regulations of the BRSA, and the internal rules of the Bank. The Committee convenes every week, assesses these proposals or applications, and approves, or rejects those within its limits of authority. The Committee submits those proposals or applications beyond its authority to the Board of Directors. The Committee consists of three full and two alternate members. The qualifications of the members of the Committee presented in the "Management" section of the report.

Other Committees

Management Board

The DFSG Management Board is a committee operating under the authority of the CEO with powers delegated by the Board of Directors. The Management Board meets once a week under the chairmanship of the CEO. Secretariat General and Sberbank Coordination Group EVP is a natural member of the Management Board without voting rights. The Management Board was established to prepare and provide information to the Board of Directors, and to evaluate, conclude and exchange ideas regarding certain strategic decisions. Upon accepting recommendations regarding subjects within the authorization limits of the CEO, the CEO along with the EVP of the relevant unit, or the GM of the relevant subsidiary proceeds to enact the change. Recommendations related to subjects within the authorization limits of the Board of Directors are presented to the Board of Directors by the CEO, and the decisions made are executed under the responsibility of the Board of Directors.

Committee Members

Hakan Ateş (CEO), Wouter Van Roste (Board Member in charge of Internal Systems), Timur Kozintsev (Board Member in charge of Credit Risk- CRO), Derya Kumru (Board Member), Ali Murat Dizdar (Chief Legal Advisor), Ayşenur Hıçkırır (Payment Systems and Non-Branch Channel Group EVP), Bora Böcügöz (Treasury and Financial Institutions Group EVP), Dilek

Duman (Information Technology and Support Operations Group EVP), Mustafa Saruhan Özel (Economic Research, Strategy and Program Management Office Group EVP), Ruslan Abil (Financial Affairs Group EVP), Tanju Kaya (Administrative Services and Investment Group EVP)

Executive Committee

DFSG Executive Committee is a consultation body that operates within the framework of the responsibilities delegated to the CEO by the Board of Directors. The Executive Committee, in principle, meets at least once a month under the chairmanship of the CEO. The Executive Committee aims to make timely and reliable decisions in accordance with the "collective wisdom" principle.

Committee Members

Hakan Ateş (CEO), Wouter Van Roste (Board Member in charge of Internal Systems), Timur Kozintsev (Board Member in charge of Credit Risk- CRO), Derya Kumru (Board Member), Bank's EVPs, Ahmet Mesut Ersoy (DenizBank AG GM), Oğuz Yalçın (DenizBank Moscow GM), Kahraman Günaydın (DenizLeasing GM), Alper Tunga Emecan (DenizFactoring GM), Fatih Arabacıoğlu (DenizAsset Management GM), Hüseyin Melih Akosman (DenizInvest Securities GM and Board Member), Mehmet Çitil (Deniz Real Estate Investment Trust GM)

Assets and Liabilities Committee

The Assets and Liabilities Committee meets every week under the chairmanship of the CEO and with the participation of the Bank's Chief Economist and the managers of groups which conduct activities that can impact the balance sheet. The meeting agenda consists of the balance sheet of the Bank, activities of the business lines, general economic data and evaluation of current political and economic developments, along with the determination of the weekly assets and liabilities strategy.

Committee Members

Hakan Ateş (CEO), Saruhan Özel (Economic Research, Strategy and Program Management Office Group EVP), EVPs and SVPs involved in activities affecting balance sheet

Executive Credit Risk Committee

Executive Credit Risk Committee is responsible for reviewing the market and economic conditions and evaluating the issues that might cause negative effect on the credit portfolio of the Bank and subsidiaries, monitoring the economic developments that might lead to deterioration of the credit worthiness of customers and changes in other conditions, monitoring our Bank's legal follow up collections, evaluating the credit provision budget and convenes on a quarterly basis.

Committee Members

Hakan Ateş (CEO), Timur Kozintsev (Board Member in charge of Credit Risk- CRO), Wouter Van Roste (Board Member in charge of Internal Systems), Derya Kumru (Board Member), Ruslan Abil (Financial Affairs Group EVP), Ali Murat Dizdar (Chief Legal Advisor), İbrahim Şen (Credits Follow-up and Risk Monitoring Group EVP), Selim Efe Teoman (Corporate and Commercial Credits Group EVP), Hakan Turan Pala (Corporate, Commercial and Medium Enterprises Credits Administrative Follow up Group EVP), Edip Kürşad Başer (Credit Policies and Retail, SME, Agricultural Banking Credit Allocation Group EVP)

Disciplinary Committee

The Disciplinary Committee identifies operations and behavior punishable under the Bank's regulations and disciplinary code, as well as the perpetrators, their degrees of fault, and the potential damages. The meetings are chaired by the EVP in charge of Administration Services and Investment Group. The Disciplinary Committee meets at least six times a year and whenever required, depending on the meeting call and creates its own agenda.

DenizBank Corporate Governance Principles Compliance Report

Committee Members

It manages the processes of identification, assessment, monitoring and reporting process of reputation risk taking into account all activities under the DFHD framework. Ensures preparation and implementation of internal documents on reputation risk and evaluates their efficiency. Approves internal documents accordingly. Manages reputation risk crises.

Committee Members

Wouter Van Roste (Board Member in charge of Internal Systems), Tanju Kaya (Administrative Services and Investment Group EVP), Cem Demirağ (Head of Internal Control and Compliance) and Ali Murat Dizdar (Chief Legal Advisor)

5.4 Risk Management and Internal Control Mechanism

The Board of Directors has established the risk management and internal control systems designed to minimize the risks that could affect shareholders and stakeholders; and the Annual Report includes detailed information on the functioning, management, authority, responsibilities and efficiency of the system. The Bank's Internal Control mechanism is managed by the Internal Control Center and Compliance Department, and by the Internal Audit Department. The Board of Directors monitors the efficiency of risk management and internal control systems via quarterly analyses and reports prepared by the Audit Committee. The Annual Report's section on the assessment of the Audit Committee provides further

5.5 The Company's Strategic Objectives

The Board of Directors administers and represents the Company by making strategic decisions that prioritize the long term interests of the Company, through a rational and prudent risk management approach designed to strike the optimum balance between the Bank's risk, growth and returns. To this end, the Board of Directors sets the Bank's strategic objectives, identifies the human and financial resources it will necessitate, monitors the planning of the organization and operations geared towards this goal, and audits the management's performance in line with defined targets. During the implementation of the strategy, the Board oversees the compliance of the Bank's operations with legislation, the Articles of Association, in-house regulations and policies.

The Company's Strategic Objectives have been approved by the Board of Directors. The strategic objectives and the actual degree of completion of the business plans and budgets designed to meet these objectives are periodically monitored and reported through a robust infrastructural system.

5.6 Remuneration

DenizBank publishes on the corporate website its Remuneration Policy, approved by the Board of Directors and established to set the principles of payroll and social benefits. Principles regarding the performance-based evaluation and remuneration of members of the Board of Directors, executive managers, the second-level managers of DenizBank, and second-level managers of subsidiaries are defined in the Remuneration Policy. Members of the Management Board (Executive Members of the Board of Directors and Vice Presidents) receive bonuses based on performance. The Chairman, Vice Chairman, and Board Members are paid an attendance fee determined by the General Assembly. Each Board member residing in Turkey were paid a gross monthly sum of TL 10,000 in 2018. As part of managers' bonus payments GM Premiums and the PUPA Premium system, performance based premium payment of approximately 3 monthly salaries were made to DFSG personnel in 2018. The loans to be extended by the Bank to the Board Members and the managers are restricted by a specific framework in Article 50 of the Banking Law. Transactions in 2018 are within the legal limits. The details of the transactions with the risk group are disclosed in Note VII of Section 5 of the Consolidated Financial Statements as of 31 December 2018.

DenizBank - URF (CRF - Corporate Governance Compliance Report)

	Compliance Status

Internal Audit, Internal Control, Compliance and Risk Management Systems

At DenizBank, the activities, duties, and responsibilities of the internal audit, internal control, compliance and risk management functions have been separated. The Internal Audit Department, Internal Control Center and Compliance Department, and Risk Management Group perform these respective activities under the supervision of a Member of the Board of Directors, who is also a member of the Audit Committee. These activities are conducted pursuant to internationally accepted audit standards, domestic laws, rules and regulations, as well as the needs of the Bank and the Group.

Internal Control Center and Compliance Department

Reporting directly to the Board of Directors and Audit Committee, the Internal Control Center and Compliance Department is charged with making sure that the Group's activities are conducted efficiently and productively in compliance with national laws and in-house regulations. The Department is also responsible for reducing operational and other risks; and ensuring the reliability and integration of accounting, financial reporting and IT systems.

Internal control and compliance efforts consist of control and reporting related activities performed independently at specified intervals by internal control and compliance employees at the Head Office and/or at branches. The aim is to assess the compliance, adequacy and efficiency of the Bank's operations.

The units are also responsible for ensuring coordination with domestic and foreign subsidiaries regarding internal control and compliance and routine report flow.

The Internal Control Center and Compliance Department has two SVPs who report to the Head of the Department, and 92 staff members across nine units as of end-2018, pursuant to national laws, rules, regulations,

communiqués, as well as in-house bylaws. Once every three months, the Audit Committee is informed about the activities, agenda and organization of the Internal Control Center and Compliance Department.

Internal Control Activities

The Financial and Official Control Department conducts the analysis and control of activities that have an impact on the Bank's balance-sheet and profits/losses, pursuant to legal and regulatory requirements, accounting, transaction and customer. Additionally, the Department controls the reports prepared by various departments to be sent to public agencies. These include the Banking Regulation and Supervision Agency, the Central Bank of Turkey and the Savings Deposit Insurance Fund.

The Branches Internal Control Department produces 6-monthly control plans and carries out control efforts across the branch network. Via both branch visits and from the center, the Branches Internal Control Department controls the compliance of transactions with applicable laws, procedures and in-house regulations. The Department also searches for any deficiencies in the internal control function, shares its findings with the relevant branches and business lines, and follows up future developments.

The Corporate Compliance Department organizes the processes of reporting and coordination inside the Internal Control Center and Compliance Department. In addition, the Department performs administrative and organizational duties, manages the Bank's support services processes and assists the Consumer Affairs Coordinating Officer.

The Central Controls Department conducts regular centralized controls on the basis of scenarios created over the ACL.

The Fund Management Internal Control Department is charged with controlling transactions conducted by Fund Management and relevant operational departments, in financial and operational terms.

The Control Assessment and IT Control Department conducts information technology controls over IT activities that support the Bank's operations, communication channels, IT systems, and IT security policies. The Department also oversees the harmony between IT security policies, standards and guides in line with the COBIT framework.

The Loans and Credit Cards Control Department performs periodic controls to ensure that the loan and credit card payment transactions undertaken by the Bank comply with applicable laws, rules, regulations and the Bank's internal procedures.

Compliance Activities

In 2018, the Compliance Group fulfilled its duties via the following departments:

- Corporate Compliance Department and
- Anti-Money Laundering Department.

The Corporate Compliance Department is responsible for setting basic compliance rules; overseeing the coordination of compliance risk management; ensuring compliance with Group standards and local rules and regulations; organizing compliance-related information flow and reporting procedures among the subsidiaries.

Pursuant to Law No. 5549 on the Prevention of Laundering Proceeds of Crime and Law No. 6415 and related regulations on the Prevention of Financing of Terrorism, the Anti-Money Laundering Department's duties include formulating and updating the Bank's policies and procedures; evaluating the Bank's risks and taking the necessary measures; providing continuous

information to the senior management; monitoring and controlling risk-bearing customer transactions; giving opinion on or approval for transactions concerning risk-bearing customers, sectors and countries; controlling correspondent banks; identifying and monitoring suspicious transactions; reporting suspicious transactions to the public authorities; and organizing classroom, e-learning and Deniz TV seminars among Bank personnel on the Prevention of Laundering Proceeds of Crime and Financing of Terrorism. Annual training plans are drawn up and followed up, and visits are made to branches and regions. Control points are established to adapt to changes in legislation, and to identify any new money laundering methods. Measures and upgrades are designed to monitor, control and mitigate risks.

Internal Audit Department

The auditors of the Internal Audit Department inspect the level of compliance of the Bank's operations with legal requirements, the Articles of Association, in-house regulations and banking principles. The promotion of auditors is based on examination results and job performance. Recruited after a very rigorous selection process followed by an intensive training program, internal auditors conduct their work in an impartial, independent and meticulous fashion, in line with their professional code of ethics. Additionally, the Internal Audit Department actively informs and trains Bank personnel. In 2018, the Internal Audit Department staff administered 740 hours of training to 2,641 employees. As of year-end 2018, Internal Audit Department operates with 109 staff members. The Internal Audit Department performs its functions under the following five organizational categories:

1- Audits of Head Office Processes and Subsidiaries

The Department audits the processes of Head Office units, and the processes and activities of domestic and foreign subsidiaries in accordance with applicable laws, rules and regulations. In addition, the Department monitors its findings in line with an action plan, and analyzes relevant processes. Forty-six such audits were performed in 2018.

2- Branch Audits

The Department conducts risk assessments of the branches, prepares annual branch audit plans, audits branch activities, and shares the findings with relevant branches and Head Office departments. In 2018, 350 branches and five regional offices were audited in accordance with the audit plan.

3- Investigations and Inquiries

The Department makes investigations and inquiries in accordance with Internal Audit regulations, prospectus, the Bank's internal rules and legal requirements; prepares reports; and monitors the cases. Additionally, the Department provides training for employees in the early detection and prevention of misconduct. In 2018, 1,328 Bank employees received 308 hours of training in this area.

4- Audit of Information Systems Processes

The Department conducts audits to ensure that DFSG's IT systems processes are structured to support the Bank's policies, and are managed in compliance with applicable laws, rules and regulations. Sixteen such audits were performed in 2018.

5- Audit Management Office

The Department's activities include making necessary plans and arrangements regarding all DFSG internal audit activities; contributing to the identification of the best audit tools and methods; generating relevant reports; preparing operational procedures; and updating existing procedures under the supervision of the Head of Internal Audit.

Risk Management Group

The Risk Management Group carries out comprehensive risk management efforts which play a critical role in the formulation of DenizBank's operational strategies. The Group is responsible for creating, auditing and reporting necessary policies and procedures to identify, measure, analyze and monitor risks, which are primarily real, or potential risks including the risk/return ratio of cash flows. These policies and procedures follow the principles set by the Bank's executive management and Risk Management Group and are approved by the Board of Directors. The Group is also responsible for coordinating efforts in line with the risk appetite statement.

Depending on the type and necessity of the process involved, the Risk Management Group submits reports to the Audit Committee, Assets and Liabilities Committee, Credit Committee and Risk Committee. The Group also works in collaboration with the Internal Control Center and Compliance Department, and the Internal Audit Department regarding both policies and practices.

- The Risk Management Group periodically reports risk analyses to the Audit Committee and the Assets and Liabilities Committee to provide guidance in setting and monitoring risk limits and developing risk management strategies.
- Credit risk management is performed through a holistic approach that incorporates modeling, validation, analysis, evaluation and monitoring processes. Credit risk-related processes are managed with the participation of the Corporate and Commercial Loans Group, Credit Policies, and Retail, SME, Agricultural Loan Allocation Group, Credit Follow-Up and Risk Monitoring Group, Risk Management, Credit Committee, and Executive Credit Risk Committee.
- While each business unit is responsible for managing its own operational risk, the Risk Management Group sets policies and monitors and reports activities in coordination with the Internal Control Center and Compliance Department, and the Internal Audit Department. Assessments are performed by the Risk Committee and the Audit Committee.

Risk management policies consist of risk identification measurement and management processes. DenizBank conducts its banking activities by strictly adhering to risk management policies that aim to analyze risks and manage them within acceptable limits. Adopting this approach as a core operating principle across the organization, the Bank also develops systems that comply with Basel Banking Supervision Committee regulations, and other guiding international risk management principles.

Internal Audit, Internal Control, Compliance and Risk Management Systems

Risk management operations are conducted in line with the principles set forth in the following risk policies:

- Credit Risk Policy
- Concentration Risk Policy
- Model Risk Policy
- Liquidity Risk Policy
- Structural Interest Rate Risk Policy
- Market Risk Policy
- Exchange Rate Risk Policy
- Operational Risk Policy
- Reputation Risk Policy
- Country Risk Policy
- Compliance Risk Policy
- Tax Risk Policy

In its Risk Appetite Statement, DenizBank specifies its risk limit setting, monitoring and reporting processes. The Risk Appetite Statement includes the phased risk limit list, the action plans to be pursued specifically for each phase when limits are exceeded, and explanations on decision-making departments and individuals. The document is normally reviewed at least once a year and comes into force upon the approval of the Board of Directors. Actual values regarding the metrics included in the Risk Appetite Statement are monitored at various intervals and reported monthly depending on the relevant risk.

Market Risk

The Bank conducts activities in the money and capital markets in accordance with its risk policies and limits. DenizBank measures market risk using the internationally accepted Value at Risk (VaR) method, which is known for its dynamic structure that adapts easily to changing market conditions. VaR quantifies the loss of value that the portfolio of the Bank and its financial subsidiaries might sustain at a given time and confidence interval as a result of fluctuations in risk factors. VaR analyses are

supported by scenario analyses and stress tests. This method allows for adaptation to changing market conditions when the risk level is determined. The reliability of the model used in calculating VaR is periodically validated through back testing.

Credit Risk

In line with BRSA's regulations on Basel II, the Risk Management Group performs the calculation of legal credit risk weighted assets in Pillar I. With regard to Pillar II, the Bank calculates the annual general stress test in accordance with its plans and scenarios. Meanwhile, the Internal Capital Assessment Process Report is prepared by Bank management in coordination with other departments. To ensure compliance with Basel II credit risk internal assessment methods, the Group participates in the development of the necessary credit risk models and coordinates efforts on data systems infrastructure and data integration. The Group is also charged with validating, controlling and reporting credit levels yielded by the internal credit assessment models.

Liquidity Risk

Liquidity adequacy is monitored within the limits defined by the Board of Directors to ensure that the Bank has sufficient liquidity and reserves under any conditions. The adequacy of existing liquidity and reserve opportunities are tested against worst-case scenarios. While analyzing liquidity adequacy, any negative developments that may arise as a result of a change in market conditions or customer behavior are taken into account. The measures to be taken and procedures to be followed under stress conditions in order to preserve liquidity were put down in writing. Scenario assumptions and measures in relation to liquidity stress testing are reviewed at least once a year. The analyses are repeated monthly on the basis of the scenarios adopted.

Operational Risk

All events that bear operational risk for the Bank and its subsidiaries; and the causes, effects of these event are recorded. Measures are taken to prevent their repeat occurrence. Events that are frequent or significant are discussed by the Internal Control Center, the Internal Audit Department and the relevant department. Corrective/preventive measures are put into practice. Potential operational risk is assessed by the Risk and Control Self-Assessment. The adequacy of current measures is reviewed during this study. New measures are implemented when deemed necessary. Additionally, coordination of the Business Continuity Program is kept up to date. Testing of the BCP is undertaken periodically to ensure its effectiveness.

Structural Interest Rate Risk

DenizBank monitors structural interest rate risk exposure due to the Bank's balance sheet structure by using advanced models. The Bank also controls assumed risks through the limits defined by the Board of Directors. The Bank conducts interest sensitivity analyses to measure the impact of the Bank's maturity mismatch on net present value and income.

Assessment of the Audit Committee

Reporting to the Board of Directors, the Bank's Audit Committee functions in accordance with Banking Law No. 5411 and the Bank's regulation on Internal Systems and Internal Capital Adequacy Evaluation Process. The Audit Committee meets periodically on behalf of the Board of Directors and sets the Bank's audit policies.

The Audit Committee's responsibilities include:

- ensuring that the Bank's internal audit, internal control and risk management systems are efficient and sufficient, and that these systems and the accounting and reporting systems operate within the relevant legal and regulatory framework of relevant legal and regulatory, and that the produced data remains integral,
- conducting primary assessment for the Board of Directors to choose independent audit agencies and rating, valuation and support service providers,
- regularly monitoring the activities of the above-mentioned agencies and service providers chosen and contracted by the Board of Directors,
- coordinating and ensuring that the internal audit activities of the partners subject to consolidation are carried out in a consolidated manner,
- overseeing that the audit and control process is created in order to provide the necessary assurance for the adequacy and accuracy of İSEDES (Internal Capital Adequacy Assessment Process),
- ensuring that the Bank's activities are conducted in a complete and reliable manner and in compliance with relevant legal and regulatory requirements as well as internal procedures.

The Audit Committee receives end-of-period reports from the control units (i.e. internal audit, internal control and compliance, risk management) in order to evaluate the adequacy of the methods for identifying,

controlling and monitoring risks that the Bank is exposed to. The Committee reports its findings to the Board of Directors. Furthermore, the Audit Committee submits its opinions and recommendations on significant matters to the Board of Directors.

In line with the four meetings it held in 2018 and the activities it conducted as part of its responsibilities, the Audit Committee took the following actions:

The Audit Committee audited the Bank's financial statements and notes for year-end 2017 and the first, second and third quarters of 2018 for compliance with the Bank's accounting principles and international accounting standards, as well as to confirm the accuracy of the information used. The results were reported to the Board of Directors along with the Audit Committee's own assessments. The Committee reviewed the Internal Audit Plan for 2018 and submitted it to the Board of Directors for approval. The Audit Committee assessed and approved the quarterly reports which include important issues, findings and legislative amendments related to the period of the quarters and were received from the Internal Audit, Internal Control and Compliance, and Risk Management units.

In addition, the Committee inspected the performance and objectivity of the independent external auditors and monitored their work at all stages.

The Audit Committee performed a risk assessment related to support services to be received by the Bank. The Committee submitted its assessments and risk management program in a report to the Board of Directors, complete with a list of these service providers.

The 2018 activities of the groups that report to the Audit Committee are indicated below.

Internal Audit Department

Reporting directly to the Board of Directors, the Internal Audit Department ensures that internal audit activities are in line with applicable laws, rules and regulations and the Bank's strategies, policies, principles and targets. The Internal Audit Department oversees the efficiency and adequacy of internal control and risk management systems. The Department also makes a risk assessment of the operations of the Bank and its subsidiaries. Efforts to efficiently manage operational risk account for a large portion of the audit activity. In 2018, the Internal Audit Department also successfully audited the financial and IT systems of the Bank's entire domestic and overseas business lines and subsidiaries, both from the Head Office and on-site.

Operating with a 109 member staff, DenizBank's Internal Audit Department operates in an impartial and independent manner, and reports its findings to the Audit Committee. Aiming to establish a proactive audit structure, the Internal Audit Department runs its audit operations largely based on the results of risk assessments. The Department completed all the activities listed in the 2018 Annual Audit Plan as scheduled. In addition to pre-planned audit activities, in 2018 the Department also conducted investigations and inquiries, participated in various projects and provided a range of consultancy services requested by the Bank's executive management, when deemed necessary.

Internal Control Center and Compliance Department

Reporting directly to the Audit Committee, the Internal Control Center and Compliance Department conducted its 2018 activities with a staff of 92 employees. The Internal Control Center and the Board of Compliance performed central and on-site controls of the branches, Head Office units and subsidiaries through the Bank's own internal control and reporting software. Subsequently, the Center shared the findings of these controls with the relevant business lines and managers, and monitored the actions taken. Classroom and web-based training seminars (including examinations) were held for all employees of the Bank and its subsidiaries on the prevention of money laundering and the financing of terrorism, ethical principles, fight against corruption, prevention of conflicts of interest, reinforcement of the compliance culture and IT security.

Using the Bank's internal tracking software, the Department performed controls pertaining to the laundering proceeds of crime and financing of terrorism, monitored relevant national and international legislation and regulations, and took measures necessary for compliance.

In line with relevant BRSA regulations, the Department monitored, updated and tested processes related to the Management Declaration.

Work on the reviews of projects by the Bank and its affiliates as project stakeholder was carried out during the year. Opinions and approvals were provided on scope documents related to the new products and processes.

Risk Management Group

The Risk Management Group is responsible for identifying and measuring risks; creating and implementing risk policies and procedures; analyzing, monitoring, reporting, investigating, confirming and auditing risks; and coordinating efforts under the risk appetite statement, in

line with the principles set jointly by the Bank's executive management and the Risk Management Group, and approved by the Board of Directors.

The Risk Management Group had 18 staff members as of December 31, 2018.

The Risk Management Group's Market and Interest Rate Risk Department measures market risk, interest risk and liquidity risk, continually upgrades the analyses and methods used, and oversees compliance with risk tolerance as defined by the Board of Directors. The Department also reports to the relevant units, executive management and the Audit Committee.

While analyzing the possible effects of market fluctuations on the Bank's balance sheet and income statement, and setting in-house risk policies, the Risk Management Group takes into account legally prescribed limits and regulations, best practices, and the Bank's own requirements. Each year, the Board of Directors reviews the risk limits determined for the risk types in question.

The Credit Risk Control and Risk Models Validation Department coordinates the Bank's compliance with relevant legal regulations on credit risk and capital requirements as well as the reporting process. The Department also controls the Bank's internal credit risk models and validates all risk models. The Department coordinates the processes related to the calculations on internal capital assessment and stress tests in conjunction with the Bank's strategic plan.

The Operational Risk Department coordinates the business continuity plan developed against any business interruption risk of the Bank. Business continuity plans are regularly updated, tested and preventive measures are taken as needed. Certain regulations and policies are developed at DenizBank in accordance with Sberbank Group standards: operational risk policy, internal regulation on data loss recovery, scenario analysis and self-assessment regulations. The Bank's Business Continuity Program is coordinated to cover potentially significant operational risks.

INDEPENDENT AUDITOR'S REPORT ON THE ANNUAL REPORT OF THE BOARD OF DIRECTORS

To the General Assembly of Denizbank A.Ş.

1) Opinion

We have audited the annual report of Denizbank A.Ş. (the "Bank") and its subsidiaries ("the Group") for the period of 1 January 2018 - 31 December 2018.

In our opinion, the consolidated and unconsolidated financial information provided in the annual report of the Board of Directors and the discussions made by the Board of Directors on the situation of the Group are presented fairly and consistent, in all material respects, with the audited full set consolidated and unconsolidated financial statements and the information we obtained during the audit.

2) Basis for Opinion

We conducted our audit in accordance with "Regulation on independent audit of the Banks" published in the Official Gazette no.29314 dated 2 April 2015 published by BRSA (BRSA Independent Audit Regulation) and Independent Auditing Standards (InAS) which are part of the Turkish Auditing Standards as issued by the Public Oversight Accounting and Auditing Standards Authority of Turkey (POA). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Annual Report section of our report. We are independent of the Group in accordance with the Code of Ethics for Independent Auditors (Code of Ethics) as issued by the POA, and we have fulfilled our other ethical responsibilities in accordance with the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

3) Our Auditor's Opinion on the Full Set Consolidated and Unconsolidated Financial Statements

We have expressed an unqualified opinion in our auditor's reports dated 21 February 2019 on the full set consolidated and unconsolidated financial statements of the Group and the Bank for the period of 1 January 2018 - 31 December 2018.

4) The Responsibility of the Board of Directors on the Annual Report

In accordance with Articles 514 and 516 of the Turkish Commercial Code 6102 ("TCC") and communique on 'Principles and procedures set out by the regulations on preparation and issuance of annual reports of Banks', the management of the Group is responsible for the following items:

- Preparation of the annual report within the first three months following the balance sheet date and submission of the annual report to the general assembly.
- Preparation and fair presentation of the annual report; reflecting the operations of the Group for the year, along with its financial position in a correct, complete, straightforward, true and honest manner. In this report, the financial position is assessed according to the consolidated and unconsolidated financial statements. The development of the Group and the potential risks to be encountered are also noted in the report. The evaluation of the board of directors is also included in this report.

c) The annual report also includes the matters below:

- Subsequent events occurred after the end of the fiscal year which have significance,
- The research and development activities of the Group,
- Financial benefits such as salaries and bonuses paid to the board members and to those charged governance, allowances, travel, accommodation and representation expenses, financial aids and aids in kind, insurances and similar deposits.
- Other matters prescribed in the communique on 'Principles and procedures set out by the regulations on preparation and issuance of annual reports of Banks' published in official gazette no.26333 dated November 1, 2006.

When preparing the annual report, the board of directors takes into account the secondary legislative arrangements published by the Ministry of Customs and Trade and related institutions.

5) Auditor's Responsibilities for the Audit of the Annual Report

Our aim is to express an opinion, based on the independent audit we have performed on the annual report in accordance with provisions of the Turkish Commercial Code and the Communique on 'Principles and procedures set out by the regulations on preparation and issuance of annual reports of Banks' published in official gazette no.26333 dated November 1, 2006 , "Regulation on Accounting Applications for Banks and Safeguarding of Documents" published in the Official Gazette no.26333 dated 1 November 2006 and other regulations on accounting records of Banks published by Banking Regulation and Supervision Agency (BRSA), circulars, interpretations published by BRSA and "BRSA Accounting and Financial Reporting Legislation" which includes the provisions of Turkish Financial Reporting Standards (TFRS) for the matters which are not regulated by these regulations, on whether the consolidated and unconsolidated financial information provided in this annual report and the discussions of the Board of Directors are presented fairly and consistent with the Group's audited consolidated and unconsolidated financial statements and to prepare a report including our opinion.

The independent audit we have performed is conducted in accordance with InAS and BRSA Independent Audit Regulation. These standards require compliance with ethical provisions and the independent audit to be planned and performed to obtain reasonable assurance on whether the consolidated and unconsolidated financial information provided in the annual report and the discussions of the Board of Directors are free from material misstatement and consistent with the consolidated and unconsolidated financial statements.

The name of the engagement partner who supervised and concluded this audit is Yaşar Bivas.

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Denizbank Anonim Şirketi:

A) Audit of Unconsolidated Financial Statements

1) Opinion

We have audited the accompanying unconsolidated financial statements of Denizbank A.Ş. (the "Bank") which comprise the statement of financial position as at December 31, 2018, and the unconsolidated statement of income, unconsolidated statement of income and expenses recognized under shareholders' equity, unconsolidated statement of changes in shareholders' equity and unconsolidated statement of cash flows for the year then ended and notes to the unconsolidated financial statements and a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying unconsolidated financial statements present fairly, in all material respects, the unconsolidated financial position of Denizbank A.Ş. as at December 31, 2018 and unconsolidated financial performance and unconsolidated its cash flows for the year then ended in accordance with the Banking Regulation and Supervision Agency ("BRSA") Accounting and Financial Reporting Legislation which includes "Regulation on Accounting Applications for Banks and Safeguarding of Documents" published in the Official Gazette no.26333 dated 1 November 2006, and other regulations on accounting records of Banks published by Banking Regulation and Supervision Agency and circulars and interpretations published by BRSA and Turkish Financial Reporting Standards ("TFRS") for those matters not regulated by the aforementioned regulations.

2) Basis for Opinion

Our audit was conducted in accordance with "Regulation on Independent Audit of the Banks" published in the Official Gazette no.29314 dated 2 April 2015 by BRSA (BRSA Independent Audit Regulation) and Independent Auditing Standards ("InAS") which are the part of Turkish Auditing Standards issued by the Public Oversight Accounting and Auditing Standards Authority ("POA"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Bank in accordance with of Code of Ethics for Independent Auditors (Code of Ethics) published by POA and have fulfilled our other responsibilities in accordance with the code of ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

3) Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the unconsolidated financial statements of the current period. Key audit matters were addressed in the context of our audit of the unconsolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matter	How the Key Audit Matter is addressed in our audit
<p><i>Financial impact of transition to TFRS 9 “Financial Instruments” standard and recognition of impairment on financial assets and related important disclosures</i></p> <p>As disclosed in footnote XXIV of Section 3; as of 1 January 2018, the Bank adopted the TFRS 9 “Financial Instruments” standart began to recognize expected credit losses for financial assets in accordance with TFRS 9. We considered the transition to TFRS 9 and impairment of financial assets as a key audit matter since;</p> <ul style="list-style-type: none"> • Amount of on and off balance sheet items that are subject to TFRS 9 expected credit loss calculation is material to the financial statements. • The effect of TFRS 9 transition on the Bank's equity is %2 • There are complex and comprehensive requirements of TFRS 9 • The classification of financial instruments is based on the Bank's business models and the characteristics of contractual cash flows in line with TFRS 9 and the Bank uses significant judgment on the assessment of the business model and identification of the complex contractual cash flow characteristics of financial instruments • The Bank determines the fair value of financial assets presented at fair value with respect to its relevant business model category and determines the financial inputs that are not-observable in the fair value measurement as Level 3 due to the existence of significant estimates and assumptions • Policies implemented by the Bank management include compliance risk to the regulations and other practices • New or re-structured processes of TFRS 9 are advanced and complex • Estimations and assumptions used in expected credit losses are new, important and complex. • Complex and comprehensive disclosure requirements of TFRS 9. 	<p>Our audit procedures included among other procedures include:</p> <ul style="list-style-type: none"> • Evaluating the appropriateness of accounting policies as to the requirements of TFRS 9, Bank's past experience, local and global practices • Reviewing and testing of new or re-structured processes which are used to calculate expected credit losses by involving our Information technology and Process audit specialists • Evaluating the reasonableness of management's key judgements, estimates and data sources used in expected credit loss calculations considering the standard requirements, sectorial, local and global practices • Reviewing the appropriateness of criteria in order to identify the financial assets having solely payments of principal and interest and checking the compliance to the Bank's business model • Analysis of the Bank's financial instruments classification and measurement models (financial instruments identified as fair value hierarchy level 3) and comparison with the requirements of the TFRS 9 standard • Assessing the appropriateness of definition of significant increase in credit risk, default criteria, modification, probability of default, loss given default, exposure at default and forward looking assumptions together with the significant judgements and estimates used in these calculations to regulations and Bank's past performance. Evaluating the compliance of those forward looking parameters to Bank's internal processes where applicable • Assessing of the accuracy and completeness of information used during the calculation of expected credit losses • Testing the mathematical accuracy of expected credit loss calculation on sample basis • Evaluating the judgments and estimates used for the individually assessed financial assets. • Evaluating the accuracy and the necessity of post-model adjustments • Auditing of disclosures related to TFRS 9.

<i>Derivative Financial Instruments</i>	
<p>Derivative financial instruments including foreign exchange contracts, currency and interest rate swaps, currency and interest rate options and other derivative financial instruments which are held for trading are initially recognized on the statement of financial position at fair value and subsequently are re-measured at their fair value. Details of related amounts are explained in Section Five Note I.b.3. and Note II.b.</p> <p>Fair value of the derivative financial instruments is determined by selecting most convenient market data and applying valuation techniques to those particular derivative products. Derivative Financial Instruments are considered by us as a key audit matter because of the subjectivity in the estimates, assumptions and judgements used.</p>	<p>Our audit procedures included among others involve reviewing policies regarding fair value measurement accepted by the Bank management fair value calculations of the selected derivative financial instruments and the assessment of used estimations and the judgements and testing the assessment of operating effectiveness of the key controls in the process of fair value determination.</p>

4) Responsibilities of Management and Directors for the Unconsolidated Financial Statements

Bank management is responsible for the preparation and fair presentation of the unconsolidated financial statements in accordance with the BRSA Accounting and Reporting Legislation and for such internal control as management determines is necessary to enable the preparation of the financial statement that is free from material misstatement, whether due to fraud or error.

In preparing the unconsolidated financial statements, management is responsible for assessing the Bank's and its subsidiaries ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank and its subsidiaries or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's financial reporting process.

5) Auditor's Responsibilities for the Audit of the Unconsolidated Financial Statements

In an independent audit, the responsibilities of us as independent auditors are:

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with BRSA Independent Audit Regulation and InAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with BRSA Independent Audit Regulation and InAS, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the unconsolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. (The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.)
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank and its subsidiaries' internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank and its subsidiaries' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the unconsolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank and its subsidiaries' to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the unconsolidated financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with government with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the unconsolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

B) Report on Other Legal and Regulatory Requirements

1) In accordance with Article 402 paragraph 4 of the Turkish Commercial Code ("TCC"); no significant matter has come to our attention that causes us to believe that the Bank's bookkeeping activities and financial statements for the period January 1 – December 31, 2018 are not in compliance with the TCC and provisions of the Bank's articles of association in relation to financial reporting.

2) In accordance with Article 402 paragraph 4 of the TCC; the Board of Directors submitted to us the necessary explanations and provided required documents within the context of audit.

The engagement partner who supervised and concluded this independent auditor's report is Yaşar Bivas.

SECTION ONE GENERAL INFORMATION

I. Bank's date of establishment, beginning statute, its history including changes in its statute

Denizbank A.Ş. ("the Bank") was established as a public bank to provide financing services to the marine sector in 1938. In 1992, as a result of the resolution of the Government to merge some public banks, the Bank was merged to Emlakbank. Following the resolution of the High Council of Privatization numbered 97/5 and dated 20 March 1997 to privatize 100% of shares of Denizbank A.Ş., share sale agreement between Zorlu Holding A.Ş. and the Privatization Administration was signed on 29 May 1997 and the Bank started its activities on 25 August 1997 upon obtaining a permission to operate. Bank's shares have been quoted on Borsa İstanbul ("BIST") since 1 October 2004. 0,15% of the Bank's shares are publicly held as of 31 December 2018.

Dexia Participation Belgique SA, owned 100% directly and indirectly by Dexia SA/NV, acquired 75% of the outstanding shares of the Bank from Zorlu Holding A.Ş. on 17 October 2006, and subsequent to the transfer of shares, Dexia Participation Belgique's ownership rate increased to 99,85%.

Dexia has transferred 99,85% of shares of the Bank to Sberbank with a total consideration of TL 6.469.140.728^(*) (Euro 2.790 million) which is the Preliminary Purchase Price determined as per the sale and purchase agreement as of 28 September 2012. Following the completion of the adjustment process of the Preliminary Purchase Price to Purchase Price in accordance with the terms in the Share Purchase Agreement, an additional amount of Euro 185 million which is equivalent of TL 430.947.685^(*) was paid on 27 December 2012. Ultimately the process was completed with a total Purchase Price of TL 6.900.088.413^(*) (Euro 2.975 million).

(*) Amounts are reflected as in full TL.

II. Capital structure, shareholders controlling the management and supervision of the Bank directly or indirectly, and if exists, changes on these issues and the Group that the Bank belongs to

IV. Explanations regarding the real person and corporate qualified shareholders at the Bank

Commercial Title	Share Amounts	Share Percentages	Paid-in Capital	Unpaid Capital
Sberbank of Russia	3.311.211	99,85%	3.311.211	--

Sberbank is the controlling party of the Bank's capital having both direct and indirect qualified shares.

As of 31 December 2018 the capital structure of Sberbank is as follows:

Shareholders	Share Percentages
Central Bank of Russia	50,00 %
Publicly traded	50,00 %
Total	100,00 %

Central Bank of the Russian Federation holds 50%+1 share within 22.586.948.000 ordinary and preferred shares in total in Sberbank of Russia (the rate in 21.586.948.000 ordinary shares corresponds to 52,32%).

V. Type of services provided and the areas of operations of the Bank

The Bank is a private sector deposit bank which provides banking services to its customers through 710 domestic and 1 foreign branch as of 31 December 2018.

Activities of the Bank as stated in the 3rd clause of the Articles of Association are as follows:

In accordance with the Banking Law and regulations;

- Performing all kinds of banking activities,
- Dealing with transactions on all kinds of capital market instruments within the limits set by the related regulations and Capital Market Law regulations,
- Establishing domestic and/or foreign entities and participating in existing entities. Entering into loan and intelligence agreements with domestic and international financial institutions. Participating in consortiums and syndications,
- Incorporating insurance companies, operating insurance agencies, participating in insurance companies which are existing or planned to be founded.

Apart from the above-mentioned activities, in case different activities deemed advantageous and necessary for the company are to be undertaken in the future, they will be submitted to approval of the General Assembly based on Board of Director's decision and the company will be able to implement activities after the relevant decision is made by General Assembly.

VI. Existing or potential, actual or legal obstacles to immediate transfer of capital between Bank and its subsidiaries and repayment of debts.

None.

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Unconsolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

SECTION THREE ACCOUNTING POLICIES

I. Basis of presentation

a. Preparation of the financial statements and the accompanying footnotes in accordance with Turkish Accounting Standards and Regulation on Principles Related to Banks' Accounting Applications and Preserving the Documents

Unconsolidated financial statements have been prepared in accordance with the regulations, communiqués, explanations and circulars published with respect to accounting and financial reporting principles by the Banking Regulation and Supervision Authority ("BRSA") within the framework of the provisions of the Regulation on the Principles and Procedures Regarding Banks' Accounting Applications and Document Keeping published in the Official Gazette no. 26333 dated 1 November 2006 in relation with the Banking Law no. 5411, as well as the Turkish Accounting Standards ("TAS") and Turkish Financial Reporting Standards ("TFRS") enforced by the Public Oversight Accounting and Auditing Standards Authority ("POA") and the annexes and commentaries relating to these Standards (hereinafter collectively referred to as "Turkish Accounting Standards" or "TAS") if there is no specific regulations made by BRSA. The form and content of the unconsolidated financial statements which have been drawn up and which will be disclosed to public have been prepared in accordance with the "Communiqué on the financial Statements to be Disclosed to the Public by Banks and the Related Explanations and Footnotes" and "Communiqué On Disclosures About Risk Management To Be Announced To Public By Banks" as well as the communiqués that introduce amendments and additions to this Communiqué. The shareholder Bank keeps its accounting records in Turkish Lira, in accordance with the Banking Law, Turkish Commercial Law and Turkish Tax legislation.

Financial statements have been prepared based on historical cost principle, except the financial assets and liabilities indicated at their fair values.

The amounts in the financial statements and explanations and footnotes relating to these statements have been denoted in Thousand Turkish Liras unless otherwise stated.

In the preparation of unconsolidated financial statements according to TAS, the management of the shareholder Bank should make assumptions and estimations regarding the assets and liabilities in the balance sheet. These assumptions and estimations are reviewed regularly, the necessary corrections are made and the effects of these corrections are reflected in the income statement. The assumptions and estimations used are explained in the related foot notes.

Explanations on TFRS 16 Leases Standard

"TFRS 16 Leases" Standard was published in the Official Gazette dated 16 April 2018 and numbered 29826, to be applied in the accounting periods beginning after 31 December 2018. According to this standard, the difference between operating leases and financial leases has been eliminated and leasing transactions will be shown by the lessee on the balance sheet as the asset (utilization right) and financial debt related to lease payment.

The Bank has started its operations to comply with TFRS 16 Leases Standard effective as of January 1, 2019, and its operations are continuing as of 31 December 2018. As of 1 January 2019, no significant impact on the Bank's financial statements is expected during the transition to IFRS 16.

The Bank will apply this standard from 1 January 2019, that is the mandatory application date. The Bank plans to use the simplified migration application and not to rearrange the comparable amounts for the prior year to the first implementation.

b. Accounting policies and changes in the presentation of financial statements

Accounting policies and valuation principles used in the preparation of the financial statements are determined in accordance with the regulations, communiqués, interpretations and legislations related to accounting and financial reporting principles published by the Banking Regulation and Supervision Agency ("BRSA"), and in case where a specific regulation is not made by BRSA, "Turkish Accounting Standards" ("TAS") and "Turkish Financial Reporting Standards" ("TFRS") and related appendices and interpretations put into effect by Public Oversight Accounting and Auditing Standards Authority ("POA").

In accordance with the transition rules of TFRS 9, the prior period financial statements and notes are not restated and presented in Section two.

DENİZBANK ANONİM ŞİRKETİ

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Unconsolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

Accounting policies and valuation principles used for the year 2018 and 2017 periods are separately presented in the notes and the accounting policies for the year 2017 are included in Section three notes XXV. Impacts of transition to TFRS 9 and its adoption is disclosed in Section three notes XXIV.

c. Additional paragraph for convenience translation:

The differences between the standards set out by BRSA Accounting and Financial Reporting Legislation and the accounting principles generally accepted in countries in which the accompanying financial statements are to be distributed and International Financial Reporting Standards (IFRS) have not been quantified in the accompanying financial statements. Accordingly, the accompanying financial statements are not intended to present the financial position, results of operations and changes in financial position and cash flows in accordance with the accounting principles generally accepted in such countries and IFRS.

II. Explanation on the strategy for the use of financial instruments and transactions denominated in foreign currencies

a. Strategy for the use of financial instruments

The Bank's external sources of funds are comprised of deposits with various maturity periods, and short-term borrowings. These funds are fixed rate in general and are utilized in high yield financial assets. The majority of the funds are allocated to high yield, floating rate instruments, such as Turkish Lira and foreign currency government securities and Eurobonds, and to loans provided to customers on a selective basis in order to increase revenue and support liquidity. The liquidity structure that ensures meeting all liabilities falling due, is formed by keeping sufficient levels of cash and cash equivalents by diversifying the sources of funds. The Bank assesses the maturity structure of the sources, and the maturity structure and yield of placements at market conditions and adopts a high yield policy in long-term placements.

The Bank assumes risks within pre-determined risk limits in short-term currency, interest and price movements in money and capital markets and market conditions. These positions are closely monitored by the Risk Management System of the Bank and the necessary precautions are taken if the limits are exceeded or should there be a change in the market environment. In order to avoid interest rate risk, assets and liabilities with fixed and floating interests are kept in balance, taking the maturity structure into consideration. The asset-liability balance is monitored on a daily basis in accordance with the maturity structure and foreign currency type. The risks associated with short-term positions are hedged through derivatives such as forwards, swaps and options. No risks are taken as far as possible on foreign currencies other than US Dollar and Euro. Transactions are made under the determined limits to cover the position.

b. Transactions denominated in foreign currencies

Foreign currency exchange rates used in converting transactions denominated in foreign currencies and their presentation in the financial statements

The Bank accounts for the transactions denominated in foreign currencies in accordance with TAS 21 "The Effects of Changes in Foreign Exchange Rates". Foreign exchange gains and losses arising from transactions that are completed as of the balance sheet date are translated to TL by using historical foreign currency exchange rates. Balances of the foreign currency denominated assets and liabilities are translated into TL by using foreign currency exchange rates of the Bank and the resulting exchange differences are recorded as foreign exchange gains and losses. The Bank's foreign currency exchange rates are as follows:

	31 December 2018	31 December 2017
US Dollar	TL 5,2810	TL 3,7719
Euro	TL 6,0422	TL 4,5155

Foreign exchange gains and losses included in the income statement

As of 31 December 2018, net foreign exchange loss included in the income statement amounts to TL 2.952.690 (1 January – 31 December 2017: TL 94.451 net foreign exchange loss).

Total amount of valuation fund arising from foreign currency exchange rate differences

TL 69.078 (31 December 2017: TL 46.163), consisting of conversion of Bahrain Branch's financial statements into TL in accordance with TAS 21, and TL 3.635.950 (31 December 2017: TL 1.726.524), sourcing from recognizing Denizbank AG, JSC Denizbank and Eurodeniz, which are foreign currency associates of the Bank, with equity method, are recorded under "Other Comprehensive Income That Will Be Reclassified in Profit or Loss" account.

DENİZBANK ANONİM ŞİRKETİ

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Unconsolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

The Bank applies net investment accounting hedge as of 1 July 2015 in order to ensure exchange difference hedge sourcing from equity method implementation for its net investment at a total amount of Euro 1.347 million and US Dollar 7 million belonging to Denizbank AG and Eurodeniz, which are subsidiaries of the Bank. A part of foreign currency deposits at same amounts is defined as hedging instrument and the part, in which the value change sourcing from foreign currency exchange rates is effective, is recognized in hedge funds under shareholder's equity.

III. Explanations on investments in associates, subsidiaries and joint ventures

Financial associates are recognized in accordance with equity method in the framework of TAS 28 Communique on Investments in Subsidiaries and Joint Ventures with respect to amendment in TAS 27 Communique on Separate Financial Statements in non-consolidated financial statements.

Equity method is the accounting treatment which prescribes to increase or decrease the book value of share included in associate as quota per participant from change amount occurring in period in the shareholder's equity of the participated partnership and to deduct/set off dividends received from participated associate from the amended value of the associate.

Accordance with the TAS 27, in the unconsolidated financial statements, associates, jointly controlled entities and non-financial subsidiaries are recognized at cost, after deducting the provision for impairment, if any. However, in accordance with the "IFRS 9 Financial Instruments" standard (IFRS 9), which is effective as at 1 January 2018, the Bank has started to recognize "Intertech", its unconsolidated and non-financial subsidiary, at fair value.

IV. Explanations on forward transactions, options and derivative instruments

The Bank's derivative transactions mainly consist of foreign currency and interest rate swaps, foreign currency options and forward foreign currency purchase/sale contracts.

In accordance with IFRS 9, forward foreign currency purchase/sale contracts, swaps, options and futures are classified as "Derivative Financial Assets/Liabilities at Fair Value Through Profit or Loss". Derivative transactions are recorded with their fair values at contract date. Also, the liabilities and receivables arising from the derivative transactions are recorded as off-balance sheet items at their contractual notional amounts.

The derivative transactions are valued at fair value subsequent to initial recognition and are presented in the "Derivative Financial Assets/Liabilities at Fair Value Through Profit or Loss" items of the balance sheet depending on the resulting positive or negative amounts of the computed value. Gains and losses arising from a change in the fair value are recognized in the income statement. Fair values of derivatives are calculated using either discounted cash flow model or market value.

V. Explanations on interest income and expenses

Interest income and expenses are recognized by applying the effective interest method. As of 1 January 2018, the Bank has started to calculate accruals for its non-performing loans. The net book value of the non-performing loans (Gross Book Value Expected Loss) is discounted with effective interest rate and recorded on the gross carrying amount of the non-performing loan.

VI. Explanations on fees and commissions income and expenses

Fees and commissions income and expenses are accounted for on an accrual basis or effective interest method and IFRS 15 "Revenue from Contracts with Customers" standard according to their nature excluding wage income related to certain banking transactions that are recorded as income in the period in which they are collected. Revenues provided through contracts or through services related to transactions such as the purchase or sale of assets for a third party or legal entity are recognized as income at the time of collection.

VII. Explanations on financial assets

The Bank categorizes its financial assets as "Fair Value Through Profit or Loss", "Fair Value Through Other Comprehensive Income" or "Measured at Amortized Cost". Such financial assets are recognized or derecognized according to TFRS 9 Financial Instruments Part 3 Issued for classification and measurement of the financial instruments published in the Official Gazette No. 29953 dated 19 January 2017 by the Public Oversight Accounting and Auditing Standards Authority. Financial assets are measured at fair value at initial recognition in the financial statements. During the initial recognition of financial assets other than "Financial Assets at Fair Value Through Profit or Loss", transaction costs are added to fair value or deducted from fair value.

The Bank recognizes a financial asset into financial statements when it becomes a party to the contractual terms of a financial instrument. During the first recognition of a financial asset into the financial statements, business model determined by the Bank management and the nature of contractual cash flows of the financial asset are taken into consideration. When the business model determined by the Bank's management is changed, all affected financial assets are reclassified and this reclassification is applied prospectively. In such cases, no adjustments is made to earnings, losses or interest that were previously recorded in the financial statements.

a. Financial assets at fair value through profit or loss

"Financial assets at fair value through profit or loss" are financial assets other than the ones that are managed with business model that aims to hold to collect contractual cash flows or business model that aims to collect both the contractual cash flows and cash flows arising from the sale of the assets; and if the contractual terms of the financial asset do not lead to cash flows representing solely payments of principal and interest at certain date; that are either acquired for generating a profit from short term fluctuations in prices or are financial assets included in a portfolio aiming to short-term profit making. Financial assets at the fair value through profit or loss are initially recognized at fair value and remeasured at their fair value after recognition. All gains and losses arising from these valuations are reflected in the income statement.

b. Financial assets at fair value through other comprehensive income

In addition to Financial assets within a business model that aims to hold to collect contractual cash flows and aims to hold to sell, financial asset with contractual terms that lead to cash flows are solely payments of principal and interest at certain dates, they are classified as fair value through other comprehensive income.

Financial assets at fair value through other comprehensive income are recognized by adding transaction cost to acquisition cost reflecting the fair value of the financial asset. After the recognition, financial assets at fair value through other comprehensive income are remeasured at fair value. Interest income calculated with effective interest rate method arising from financial assets at fair value through other comprehensive income and dividend income from equity securities are recorded to income statement. "Unrealized gains and losses" arising from the difference between the amortized cost and the fair value of financial assets at fair value through other comprehensive income are not reflected in the income statement of the period until the acquisition of the asset, sale of the asset, the disposal of the asset, and impairment of the asset and they are accounted under the "Accumulated other comprehensive income or expense to be reclassified through profit or loss" under shareholders' equity.

Equity securities, which are classified as financial assets at fair value through other comprehensive income, that have a quoted market price in an active market and whose fair values can be reliably measured are carried at fair value. Equity securities that do not have a quoted market price in an active market and whose fair values cannot be reliably measured are carried at cost, less provision for impairment.

During initial recognition an entity can choose in an irrevocable way to record the changes of the fair value of the investment in an equity instrument that is not held for trading purposes in the other comprehensive income. In the case of this preference, the dividend from the investment is taken into the financial statements as profit or loss.

c. Financial assets measured at amortized cost

Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are classified as financial assets measured at amortized cost.

Financial assets measured at amortized cost are initially recognized at acquisition cost including the transaction costs which reflect the fair value of those instruments and subsequently recognized at amortized cost by using effective interest rate method. Interest income obtained from financial assets measured at amortized cost is accounted in income statement.

Unconsolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

The Bank has government securities with a maturity of 5-10 years and indexed to CPI in the 6 months real coupon ratios that remain constant throughout the maturity in the "Fair value through other comprehensive income" and "Measured at amortized cost" securities portfolios. As stated by Secretary of Treasury in CPI indexed investor guide, the reference indexes used in calculating the actual coupon payment amounts of these securities are based on the CPI indexes of two months ago. The Bank predicts the inflation rate in parallel to those. The estimated inflation rate is updated as needed within the year.

VIII. Explanations on expected credit loss

The Bank allocates impairment for expected credit loss on financial assets measured at amortized cost and measured at fair value through other comprehensive income. As of 1 January 2018, the Bank recognize provisions for impairment in accordance with TFRS 9 'Financial Instruments' standard requirements according to the "Regulation on the Procedures and Principles for Classification of Loans by Banks and Provisions to be set aside" published in the Official Gazette dated 22 June 2016 numbered 29750.

The expected credit loss provision is weighted according to the probabilities determined by taking into consideration possible results and reflects the time value of money as a unbiased amount, past events, current conditions and forecasts of future economic conditions as reasonable and supportable information that can be obtained without incurring excessive cost or effort at the reporting date.

According to TFRS 9, after each financial instrument has been recognized for the first time in the financial statements for which there is a need for an impairment assessment, if there is a significant increase in the credit risk at each reporting date.

Estimated credit loss provision is calculated to estimate the loss if the financial instrument defaulted.

Due to the deterioration in credit quality since their initial recognition, financial instruments are allocated to one of the following stages:

Stage 1: Financial instruments with 12-months expected credit loss provision calculated, no significant increase in credit risk;
Stage 2: Financial instruments with a significant increase in credit risk and where the expected credit loss provision is calculated for lifetime;
Stage 3: impaired, non-performing(defaulted) loans.

The financial instruments in Stage 1 are financial instruments that has been recognized for the first time in the financial statements or do not have a significant increase in the credit risk after the initial recognition in the financial statements. For these instruments, credit risk impairment provision is calculated as the expected credit loss provision for 12-months default risk from the reporting date.

After the initial reporting period, a significant increase is observed in the credit risk and result of the provision for credit risk impairment for the financial instruments mentioned in Stage 2 is calculated as the expected loss provision over the remaining life from the reporting date.

Financial instruments in Stage 3 are assumed to be defaulted and therefore impaired. For these assets, lifetime expected credit losses are recognized.

The expected credit loss provision is calculated as whole(collective) or separte(individual).

Financial instruments with common credit risk characteristics are grouped for the expected loan loss provisions calculated collectively.

In the Bank, grouping of credit risks according to common characteristics was made according to 'risk segments'. The standards for the separation of credit risks by risk segments have been prepared in accordance with the Basel II recommendations for the assessment of capital adequacy based on credit risk in the context of the standard internal rating-based approach("IRB"). The purpose of classifying credit risks according to risk segments is to determine the approach for analyzing and evaluating credit risk for the relevant risk segment.

The credit risk classification is as follows:

- Segment classification for non-retail loans is made at the counterparty level to collect all the risks of the counterparty only to a risk segment based on the credit products requested by the counterparty;
- Segment classification for retail loans is based on both product level and counterparty characteristics. This means that Credit risks of the other party can be classified into different risk segments.

DENİZBANK ANONİM ŞİRKETİ

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Unconsolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

The main groupings based on risk segments for the expected credit loss provision calculation are as follows:

- Corporate/Commercial loans
- OBI loans
- KBI loans
- Agricultural loans
- Consumer loans
- Mortgage loans
- Vehicle loans
- Overdraft
- Credit cards
- Loans granted to local governments
- Project financing loans
- Central administrations
- Banks

The expected loan loss provisions calculated collectively are calculated by using the components such as default amount(DA), default probability(DP), loss in default(LiD) and effective interest rate of the loan.

Default amount

The default amount is the expected economic receivable at the time of default.

In order to calculate the expected loan loss provision, the DA value of each loan is calculated by discounting the expected principal and interest payments from the future dates to the reporting date using the effective interest rate. The loan conversion rate is also applied to the DA value.

Probability of default

The probability of default indicates the probability of default of the debtor in a certain period of time.

There are two types of PD values calculated in accordance with TFRS 9 requirements:

- 12-month PD: Estimate the probability of default for 12 months after the reporting date of the financial instrument.
- Lifetime default probability: Estimated probability of default over the life of the financial instrument.

The credit ratings of the internal rating systems used by the Bank in credit allocation processes are used to classify the customers in the expected credit loss provision calculations.

Internal rating systems used for non-individual customers are mainly divided into Corporate/Commercial, OBI, CBI and Agriculture model groups. The internal ratings in the Corporate/Commercial and OBI model groups take into account quantitative characteristics such as indebtedness, liquidity and size of the customer as well as qualitative assessment elements. The internal ratings in the KBI and Agriculture model groups reflect behavioral information such as the trend in the use rate of the entire banking sector in the banking sector, the duration of use of the CBM product in the Bank, or the recent frequency of delays in loan payments.

Internal rating systems for retail consumers are differentiated at level Consumer, Mortgage, Vehicle Loans, Overdraft and Credit Card products group. In order to produce these scores, behavioral data such as the customer's trend in the limit usage rate in the Bank and the sector, the frequency of the delays in the current period, customers' ownerships of the cross products and their payment habits of the other products are used.

In the first step, the outputs of the internal rating systems are grouped on the basis of risk segments according to the common characteristics of credit risks for PD calculations in accordance with TFRS 9. Historical default data of these groups were prepared. A basket creation analysis was performed for the default data obtained for the purpose of obtaining reasonable and valid accumulated default rates.

PD curves are drawn by running regression method used by proper distribution through data obtained for the baskets. Since the PD values obtained represent PD values 'throughout the life cycle', they were converted to 'instant' PD values in accordance with TFRS 9. In the last step, macroeconomic expectations for PD value are reflected.

For credit risk groups that do not have sufficient historical default data, external default statistics or minimum PD rates in Basel documentation are used.

The internal validation of the process described above was carried out at the end of 2018.

See Note 3.1.c*

Loss given default

In case of default, the loss refers to the ratio of the economic loss to the debtor has defaulted.

For the purpose of calculating the expected credit loss provision, two types of LGD rate is calculated: LGD ratio for the unsecured credit risk and LGD ratio for the collateralized credit risk.

The LGD ratio for unsecured credit risk was calculated using the Bank's previous collection data and grouped on the basis of risk segments based on common characteristics of credit risks.

The following TFRS 9 requirements are taken into account for the LGD ratio calculation for unsecured credit risk:

- Long-term LGD is used(excluding regression effect)
- In the case of conservative approach it is excluded
- Excludes indirect costs in the case of existence
- The result figures are discounted by the effective interest rate

The LGD ratio for collateralized credit risk is calculated by considering the collateral structure for each loan. To calculate this ratio, the rates of consideration taken for the Bank's collateral type, the periods of cash conversion and the effective interest rate of the loan to which the collateral belongs are used. Historical data and in the case of absent of it best estimates are used to determine the relevant rates of consideration and cash-through periods.

For unsecured credit risk groups with insufficient historical collection data, the standard rate included in the Basel documentation is used.

The internal validation of the process described above was carried out at the end of 2018.

Effective interest rate

The effective interest rate is the discount rate that equals the future expected cash receipts and collections that are expected to occur over the expected life of the financial asset or liability to the gross carrying amount of the financial asset or the amortized cost of the financial liability.

Other than the expected credit loss provisions calculated collectively, the expected credit loss provisions of the financial instruments that are subject to a coverage over a certain risk or which will be determined by the Bank management are calculated based on the separate(individual) evaluation. In accordance with the Guideline on Calculation of Provision for Loan Losses in Accordance with TFRS 9 announced by the BRSA on 26 February 2018, the calculation was made using at least two scenarios for each financial instrument in accordance with the discounted cash flow method. The ultimate expected credit loss provision of the financial instrument is based on the fact that the expected credit loss provisions calculated for the related scenarios are weighted by the probability of realization of the scenarios.

Low credit risk

In accordance with TFRS 9, the risk of the default of the financial instrument is low, the borrower has a strong structure to meet the contractual cash flow obligations in the short term, and the negative changes in the economic conditions and operating conditions in the longer term reduce the power of the debtor to fulfill the contractual cash flow obligations. the credit risk of the financial instrument is considered to be low.

It has not been concluded that financial instruments have a low credit risk only if the risk of loss of the financial instruments is considered to be low due to the value of the collateral and if the credit risk of the related financial instrument is not evaluated as low.

Furthermore, it is not considered that the financial instruments have a low credit risk only because they have less risk than the other financial instruments of the enterprise or the credit risk of the region where the business is operating.

In the case of low risk determination of any financial instrument and also assuming that the first contact of the credit risk is not significantly increased after the financial statements, the relevant financial instrument is evaluated in Stage 1.

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Unconsolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

Financial instruments considered to have a low credit risk under TFRS 9 are presented below:

- Receivables from CBRT.
- Risks in the case of the counterparty is the TC Treasury
- Loans to subsidiaries of the main shareholder.
- Transactions with banks with AAA rating

The Participation of Senior Management of the Bank to the IFRS 9 Process

Principles and Procedures for the Classification of Loans and Provisions to be Reserved in the Official Gazette dated June 22, 2016 and numbered 29750 within the scope of the regulations related to internal systems, risk management, corporate governance and credit classification, which are issued pursuant to the Banking Law No. 5411 In accordance with Article 20 of the By-Law, 'TFRS 9 Management Committee' has been established in accordance with the 'Guide on the Calculation of Provision for Loan Loss Expected under TFRS 9' prepared by the BRSA.

In accordance with TFRS 9, the Committee is responsible for the control of the classification and measurement of financial instruments, the approval of business models and an adequate calculation of the expected credit loss provision. The Committee is also responsible for ensuring that the Bank's existing policies and processes' control to establish and maintain in accordance with TFRS 9 and relevant good practice guidelines.

The Committee is responsible for ensuring that the expected credit loss provisions are based on reliable and robust methods, that these methods are documented, developed, updated in a timely manner and are accounted for as required.

Executive Board Member responsible for Loans, Assistant General Manager responsible for Financial Affairs, Assistant General Managers responsible for the duties of the Board member charging with loans and Assistant General Manager responsible for Risk Management are the among of members of Committee.

IX. Explanations on offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported in the balance sheet when the The Bank has a legally enforceable right to offset the recognized amounts and there is an intention to collect/pay the related financial assets and liabilities on a net basis, or to realize the asset and settle the liability simultaneously.

X. Explanations on sale and repurchase agreements and transactions related to the lending of securities

Government bonds and treasury bills sold to customers under repurchase agreements are classified according to purpose of being hold into portfolio on the assets side of the accompanying balance sheet within "Financial assets at fair value difference through profit or loss", "Financial assets at fair value difference through other comprehensive income" and "Financial assets measured at amortized cost" and are measured according to valuation principles of relating portfolio. Funds obtained from repurchase agreements are presented on the liability side of the balance sheet within the account of "Due to money markets". The accrual amounts corresponding to the period is calculated over the sell and repurchase price difference determined in repurchase agreements. Accrued interest expenses calculated for funds obtained from repurchase agreements are presented in "Due to money markets" account in liability part of the balance sheet.

Securities received with resale commitments are presented under "Due from money markets" line in the balance sheet. The accrual amounts for the corresponding part to the period of the resale and repurchase price difference determined in reverse repurchase agreements are calculated using the effective interest method. The Bank has no securities which are subject to borrowing activities.

XI. Explanations on assets held for sale and discontinued operations and related liabilities

Property and equipment held-for-sale consist of tangible assets that were acquired due to non-performing receivables, and are accounted in the financial statements in accordance with the regulations of "Turkish Financial Reporting Standard for Assets Held for Sale and Discontinued Operations (TFRS 5)".

A discontinued operation is a division of a bank that is either disposed or held for sale and represents a separate major line of business or geographical area of operations; or is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations; or is a subsidiary acquired exclusively with a view to resale.

As at 31 December 2018 and 31 December 2017, the Bank does not have non-current assets held for sale and discontinued operations.

XII. Explanations on goodwill and other intangible assets

a. Goodwill

Goodwill represents the excess of the total acquisition costs over the shares owned in the net assets of the acquired company at the date of acquisition and the "net goodwill" resulted from the acquisition of the investment and to be included in the balance sheet, is calculated based on the financial statements of the investee company as adjusted according to the required accounting principles. Assets of the acquired company which are not presented on financial statements but separated from goodwill represented with fair values of tangible assets (credit card brand equity, customer portfolio etc.) and/or contingent liabilities to financial statements in process of acquisition.

In accordance with "TFRS 3 – Business Combinations", the goodwill is not amortized. It is tested yearly or if there is any indication of impairment according to "Turkish Accounting Standard 36(TAS 36) Impairment of Assets".

b. Other intangible assets

Intangible assets are initially measured at acquisition cost and other costs which are required for activation of the financial asset in accordance with TAS 38 "Intangible Assets" standard. Intangible assets are evaluated over excess value of net cost that derived from accumulated depreciation and accumulated impairment after recognition period.

The Bank's intangible assets consist of software, license rights, data/telephone line, total values of credit cards and personal loans portfolio.

Intangible assets purchased before 1 January 2003 and after 31 December 2006 are amortized on a straight-line basis; and those purchased between the aforementioned dates are amortized by using the double-declining method. Useful life of an asset is estimated by assessment of the expected life span, technical, and technological wear outs of the asset. The amortization rates used approximate the useful lives of the assets.

Maintenance costs associated with the computer software that are in use are expensed at the period of occurrence.

XIII. Explanations on tangible assets

The Bank has passed to revaluation model from cost model in the framework of TAS 16 "Tangible Fixed Assets" in valuation of properties in use as of 31 December 2016, while it tracks all of its remaining tangible fixed assets by cost model in accordance with TAS 16. Positive differences between property value in expertise reports prepared by licensed valuation firms and net carrying amount of the related property are recorded under equity accounts while negative differences are posted to the income statement.

	Estimated Economic Life(Year)	Depreciation Rate
Movables		
-Office machinery	4 Years	10 % 50 %
-Furniture and fixtures	5 Years	10 % 50 %
-Motor vehicles	5 Years	20 % 50 %
-Other equipment	10 Years	2,50 % 50 %
Real estate	50 Years	2 % 3,03 %

Maintenance and repair costs that are routinely made on tangible assets are expensed. The capital expenditures incurred in order to increase the capacity of the tangible asset or to increase the future benefit of the asset are capitalized on the cost of the tangible asset.

There is no restrictions such as pledges and mortgages on tangible assets or no purchase commitments.

XIV. Explanations on investment properties

None.

XV. Explanations on leasing activities

The maximum period of the lease contracts is mostly 4 years. Fixed assets acquired through financial leasing are recognized in tangible assets and depreciated in line with fixed assets group they relate to. The obligations under finance leases arising from the lease contracts are presented under "Finance Lease Payables" account in the liabilities. Interest expense and currency exchange rate differences related to leasing activities are recognized in the income statement.

Transactions regarding operational agreements are accounted on an accrual basis in accordance with the terms of the related contracts.

The Bank does not have finance lease transactions as "lessor".

DENİZBANK ANONİM ŞİRKETİ

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Unconsolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

XVI. Explanations on provisions and contingent liabilities

Provisions other than specific and general provisions for loans and other receivables and free provisions for probable risks, contingent liabilities are provided for in accordance with TAS 37 "Provisions, Contingent Liabilities and Contingent Assets". Provisions are accounted for immediately when obligations arise as a result of past events and a reliable estimate of the obligation is made by The Bank management. Whenever the amount of such obligations cannot be measured, they are regarded as "Contingent". If the possibility of an outflow of resources embodying economic benefits becomes probable and the amount of the obligation can be measured reliably, a provision is recognized. If the amount of the obligation cannot be measured reliably or the possibility of an outflow of resources embodying economic benefits is remote, such liabilities are disclosed in the footnotes.

XVII. Explanations on obligations for employee benefits

Provision for employee benefits has been accounted for in accordance with TAS 19 "Employee Benefits".

The Bank in accordance with existing legislation in Turkey, is required to make retirement and notice payments to each employee whose employment is terminated due to reasons other than resignation or misconduct. Except to the this extents, the Bank is required to make severance payment to each employee whose employment is terminated due to retirement, death, military service and to female employees following their marriage within one year leave the job of their own accords by fourteenth clause of Labour Law.

The Bank, in accordance with TAS 19 "Employee Benefits" realized provision registry under the condition of prediction of present value of possible liability in the future related to employee termination benefits. Losses and gains which occur after 1 January 2013 are adjusting under the Equity Accounts in accordance with updated TAS 19 Standard.

The Bank has recognized vacation pay liability amount which is calculated from unused vacation to financial statement as a provision.

XVIII. Explanations on taxation

a. Current taxes

By the provisional article added to Corporate Tax Law no.5520 by the Clause 91 of law no. 7061, current tax rate is declared to be 22% for corporations in 2018, 2019 and 2020 taxation periods(for accounting periods beginning from the relevant year for the institutions with special accounting period).

Companies file their corporate tax returns between the 1st and 25th days of the following four months period after to which they relate and the payments are made until the end of that month.

The provision for corporate tax for the period is reflected as the "Current Tax Liability" in the liabilities and "Current Tax Provision" in the income statement.

In accordance with the Corporate Tax Law, tax losses can be carried forward for 5 years. The tax authorities can inspect tax returns and the related accounting records back to a maximum period of five years.

Besides institutions reside in Turkey, dividends paid to the offices or the institutions earning through their permanent representatives in Turkey are not subject to withholding tax. According to the decision no. 2006/10731 of the Council of Ministers published in the Official Gazette no. 26237 dated 23 July 2006, certain duty rates included in the articles no.15 and 30 of the new Corporate Tax Law no.5520 are revised. In this respect, the withholding tax rate on the dividend payments other than the ones paid to the nonresident institutions generating income in Turkey through their operations or permanent representatives and the institutions residing in Turkey is 15%. While applying the withholding tax rates on dividend payments to the foreign based institutions and the real persons, the withholding tax rates covered in the related Avoidance of Double Taxation Treaty are taken into account. Addition of profit to capital is not considered as profit distribution and therefore is not subject to withholding tax.

Tax effects of items that are accounted for under the shareholders' equity are also recorded under equity accounts.

b. Deferred taxes

In accordance with TAS 12 "Income Taxes", The Bank accounts for deferred taxes based on the tax effect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax assets and liabilities of the Bank have been offset in the unconsolidated balance sheet. As a result of offsetting, as of 31 December 2018 deferred tax assets of TL 956.687(31 December 2017: TL 171.853) have been recognized in the accompanying financial statements.

DENİZBANK ANONİM ŞİRKETİ

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Unconsolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

Deferred tax liabilities are generally recognized for all taxable temporary and deferred tax assets are recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Deferred tax asset was not computed over general provisions according to the circular of BRSA numbered BRSA.DZM.2/13/1-a-3 and dated 8 December 2004. In addition, deferred tax assets has started to be recognized over temporary expected provision losses differences according to TFRS 9 articles from 1 January 2018.

Deferred taxes directly related to equity items are recognized and offset in related equity accounts.

c. Transfer pricing

In the framework of the provisions on "Disguised Profit Distribution Through Transfer Pricing" regulated under article 13 of Corporate Tax Law no. 5520, pursuant to the Corporate Tax Law General Communiqué no. 1, which became effective upon its promulgation in the Official Gazette dated 3 April 2007 and numbered 26482, Corporate Tax Law General Communiqué no. 3, which became effective upon its promulgation in the Official Gazette dated 20 November 2008 and numbered 27060, Council of Ministers Decree no. 2007/12888, which became effective upon its promulgation in the Official Gazette dated 6 December 2007 and numbered 26722, Council of Minister Decree no. 2008/13490, which became effective upon its promulgation in the Official Gazette dated 13 April 2008 and numbered 26846, "General Communiqué No. 1 on Disguised Profit Distribution Through Transfer Pricing", which became effective upon its promulgation in the Official Gazette dated 18 November 2007 and numbered 26704 and "General Communiqué No. 2 on Disguised Profit Distribution Through Transfer Pricing", which became effective upon its promulgation in the Official Gazette dated 22 April 2008 and numbered 26855, "General Communiqué No. 3 on Disguised Profit Distribution Through Transfer Pricing", which became effective upon its promulgation in the Official Gazette dated 7 December 2017 and numbered 30263, profits shall be deemed to have been wholly or partially distributed in a disguised manner through transfer pricing if companies engage in the sales or purchases of goods or services with related parties at prices or amounts defined contrary to the arm's length principle. Buying, selling, manufacturing and construction operations and services, renting and leasing transactions, borrowing or lending money, bonuses, wages and similar payments are deemed as purchase of goods and services in any case and under any condition.

Corporate taxpayers are obliged to fill in the "The Form on Transfer Pricing, Controlled Foreign Corporation and Thin Capital" regarding the purchases or sales of goods or services they perform with related parties during a fiscal period and submit it to their tax office in the attachment of the corporate tax return.

Furthermore, the taxpayers registered in the Large Taxpayers Tax Administration (Büyük Mükellefler Vergi Dairesi Başkanlığı) must prepare the "Annual Transfer Pricing Report" in line with the designated format for their domestic and cross-border transactions performed with related parties during a fiscal period until the filing deadline of the corporate tax return, and if requested after the expiration of this period, they must submit the report to the Administration or those authorized to conduct tax inspection.

XIX. Additional explanations on borrowings

Borrowings are initially recognized at cost representing their fair value and remeasured at amortized cost based on the internal rate of return at next periods. Foreign currency borrowings have been translated using the foreign currency buying rates of the Bank at the balance sheet date. Interest expense incurred for the period has been recognized in the accompanying financial statements.

General hedging techniques are used for borrowings against liquidity and currency risks. The Bank, if required, borrows funds from domestic and foreign institutions. The Bank also borrows funds in the forms of syndication loans and securitization loans from foreign institutions.

XX. Explanations on issuance of share certificates

As at 31 December 2018 and 31 December 2017, the Bank does not have issuance of share certificates.

XXI. Explanations on acceptances

Acceptances are realized simultaneously with the customer payments and recorded in off-balance sheet accounts, if any.

As of the balance sheet date, there is no acceptances recorded as liability in return for assets.

XXII. Explanations on government grants

As of the balance sheet date, the Bank does not have any government grants.

XXIII. Explanations on segment reporting

Segment reporting is presented in Note XII of Section Four.

XXIV. Explanations on TFRS 9 financial instruments standard

TFRS 9 "Financial Instruments", which is effective as at 1 January 2018 replaced TAS 39 Financial Instruments: recognition and measurement. TFRS 9 sets out the new principles for the classification and measurement of financial instruments, impairment for credit risk on financial assets and hedge accounting.

Classification and measurement of financial assets

According to TFRS 9 requirements, classification and measurement of financial assets will depend on the business model within which financial assets are managed and their contractual cash flow characteristics whether the cash flows represent "solely payments of principal and interest(SPPI)".

Assessment whether contractual cash flows are solely payments of principal and interest:

For the purposes of this assessment, "principal" is defined as the fair value of the financial asset on initial recognition. "Interest" is defined as consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs(e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the The Bank considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Bank considers contingent events that would change the amount and timing of cash flows, leverage features, prepayment and extension terms, terms that limit the Bank's claim to cash flows from specified assets, features that modify consideration for the time value of money.

The Bank fulfills the on-balance sheet classification and measurement criteria by applying the procedures described above for all financial assets.

Upon initial recognition each financial asset will be classified as either fair value through profit or loss, amortized cost or fair value through other comprehensive income. The classification and measurement of financial liabilities remain largely unchanged under TAS 39.

Explanations of the effect of The Bank's implementation of TFRS 9 can be found below.

a. Classification and measurement of financial assets

	Before TFRS 9		In scope of TFRS 9	
	Measurement base	Book value	Measurement base	Book value

Reclassified to fin. assets at fair value through profit or loss		(59.159)	-	
Balance after reclassification				6.650.346
Unconsolidated and non-financial subsidiaries				
Balance before TFRS 9	16.425			
Fair value difference		-	603.851	
Balance after TFRS 9				620.276
Unconsolidated and financial subsidiaries				
Previous amount	7.442.877			
TAS 27/Equity method		-	(471.690)	
Current amount				6.971.187

The reasons for the classification of certain financial assets held by the Bank as above in accordance with the TFRS 9 classification and measurement provisions are explained below.

Equity securities designated at fair value through profit or loss in accordance with TFRS 9 standard

The Bank has classified equity securities amounting to TL 59.159, which were classified as "Available-for-sale financial assets" to designated at "Fair Value Through Profit or Loss" as of the first application date of TFRS 9.

Classification of financial instruments based on equity in accordance with TFRS 9 standard

The Bank has decided to measure its "Unconsolidated and non-financial subsidiary", Intertech, which is not traded in an organized market, at Fair Value Through Other Comprehensive Income, irrevocably. The accumulated fair value changes of this subsidiary will not be reclassified to profit and loss if it is disposed of.

The effects of the implementation of the TFRS 9 standard in the subsidiaries applied the TAS 27

As a result of the implementation of TFRS 9 standard by the subsidiaries that the Bank applies the TAS 27-equity method, the negative difference of TL 471.690 has been classified as "Prior Period Income/(Loss)" in shareholders' equity.

Reclassification of categorized items without a change in measurement

In addition to the statements above, since the previous categories under TAS 39 of the debt instruments below were "out of use", they are reclassified in new categories under TFRS 9 without changing any measurement principles:

- (i) Previously classified as available-for-sale and as of 1 January 2018 classified as "Fair Value Through Other Comprehensive Income", and
- (ii) Previously classified as held-to-maturity and as of 1 January 2018 classified as "Measured at Amortized Cost".

c. Reconciliation of the opening balances of the provision for expected credit losses to TFRS 9

The table below shows the reconciliation of the provision for impairment of The Bank as of 31 December 2017 and the provision for the expected loss model as measured in accordance with TFRS 9 as of 1 January 2018.

	Book value Before TFRS 9 31 December 2017	Remeasurements	Book value After TFRS 9 1 January 2018
Loans	4.506.405	231.760	4.738.165
Stage 1	1.044.612	(208.448)	836.164
Stage 2	299.763	842.726	1.142.489
Stage 3	2.811.827	(52.315)	2.759.512
Others ^(*)	350.203	(350.203)	--
Financial assets^(**)	26.272	(21.649)	4.623
Non-cash loans^(***)	204.037	(233)	203.804
Stage 1 and Stage 2	105.552	67.044	172.596
Stage 3	98.485	(67.277)	31.208
Total	4.736.714	209.878	4.946.592

^(*) Includes free provisions that have been booked among "12.5 Other provisions" for certain risks that could have risen in the future by The Bank at 31 December 2017.

^(**) Within the scope of TFRS 9, provisions include provisions for Amortized Cost, Fair Value Through Other Comprehensive Income, Banks, Receivables from Money Markets and Other Assets.

^(***) Before TFRS 9, the expected credit loss for stage 1 and 2 non-cash loans is classified "12.1 General Provision" and expected credit loss for stage 3 non-cash loans is classified "12.5. Other Provisions" under liabilities. In accordance with TFRS 9, the expected loss provisions for the 1st, 2nd and 3rd stage non-cash loans are in the "10.4 Other Provisions" column in the liabilities.

d. TFRS 9 transition effects on equity

According to paragraph 15 of Article 7 of TFRS 9 Financial Instruments Standard, published in the Official Gazette numbered 29953 dated 19 January 2017, it is stated that it is not compulsory to restate previous period information in accordance with TFRS 9 and if the previous period information is not revised, it is stated that the difference between the book value of 1 January 2018 at the date of application should be reflected in the opening aspect of equity. The explanations about the transition effects to TFRS 9 presented in the equity items under the scope of this article are given below.

Negative difference of TL 209.878 between the provision for impairment of the previous period of the Bank and the provision for expected credit loss that is measured in accordance with TFRS 9 as of 1 January 2018 is classified as "Prior Period Net Profit/(Loss)" while difference of TL 2.116 is classified as "Other Accumulated Comprehensive Income That Will Be Reclassified in Profit or Loss" in shareholders' equity.

As stated in the Communiqué on "Uniform Chart of Accounts and Prospectus" issued on 20 September 2017, for general provisions (TFRS 9 expected credit loss provisions for Stage 1 and Stage 2 loans), recognition of deferred tax assets has started as of 1 January 2018. Within this scope, deferred tax assets amounting to TL 381.619 have been reflected to the opening financials of 1 January 2018 and the related amount has been classified under "Prior Period Net Profit/(Loss)" in shareholders' equity. For the specific provisions (TFRS 9 expected credit loss provisions for Stage 3 loans), which have been cancelled due to TFRS 9 transition, corporate tax loss amounting to TL 26.310 is also classified under "Prior Period Net Profit/(Loss)" in equity as of 1 January 2018.

Negative remeasurement difference amounting TL 2.500, after tax, for the security amounting to TL 3.205 priorly classified among available for sale securities and measured at historical cost before 1 January 2018 and reclassified to fair value through other comprehensive income after TFRS 9, is classified as "Other Accumulated Comprehensive Income That Will Not Be Reclassified in Profit or Loss" in shareholders' equity. Additionally, remeasurement difference amounting TL 14.839, after tax, for the security amounting to TL 59.159 priorly classified among available for sale securities before 1 January 2018 and reclassified to fair value through profit or loss after TFRS 9, has given way to a transition between "Other Accumulated Comprehensive Income That Will Be Reclassified in Profit or Loss" and "Prior Period Net Profit/(Loss)" in shareholders' equity.

Remeasurement difference amounting TL 603.851 for Intertech, the unconsolidated and non-financial subsidiary of The Bank, which was being measured at historical cost and that is reclassified to fair value through other comprehensive income after TFRS 9, is classified as "Other Accumulated Comprehensive Income That Will Not Be Reclassified in Profit or Loss" in shareholders' equity.

Due to the application of TAS 27 in the individual financial statements of the Bank for its subsidiaries and associates subject to consolidation, in these subsidiaries and associates, the effect amounting to TL 471.690 is classified as "Prior Period Income/(Loss)" which was calculated with the transition to TFRS 9.

XXV. Explanations on prior period accounting policies not valid for the current period

TFRS 9 standard came into effect instead of TAS 39 standard as of 1 January 2018. Accounting policies that have lost their validity with the transition of TFRS 9 are given below:

Financial assets are classified and measured as; "As financial assets at fair value through profit or loss", "Financial assets available-for-sale", "Investments held-to-maturity", and "Loans and receivables" by the Bank. Sale and purchase transactions of the financial assets mentioned above are recognized and derecognized at the "Settlement dates". The appropriate classification of financial assets of the Bank is determined at the time of purchase by the Bank management, taking into consideration the purpose of the investment.

a. Financial assets at fair value through profit or loss

Financial assets held for trading

Trading financial assets are financial assets which are either acquired for generating a profit from short-term fluctuations in prices or are financial assets included in a portfolio aimed at short-term profit making.

Trading financial assets are recognized at their fair value in the balance sheet and remeasured at their fair value after recognition.

All gains and losses arising from valuations of trading financial assets are reflected in the income statement. In accordance with descriptions of the "Uniform Chart of Accounts", favorable difference between acquisition cost of a financial asset and its discounted value are recognized in "Interest Income"; and in the case of fair value of asset is above its discounted value, favorable difference between them are recognized in "Capital Market Transactions Profits" account, in the case of fair value is below discounted value, unfavorable difference between them are recognized in "Capital Market Transactions Losses" account. In the case that the financial asset is sold before its maturity, consisted gains or losses are accounted with the same principals.

Derivative financial assets are classified as trading financial assets unless they are used for hedging purposes.

Financial assets designed at fair value through profit or loss

The Bank does not have any securities designated as "financial assets at fair value through profit or loss".

b. Investment securities available-for-sale

Available-for-sale assets are financial assets that are not loans and receivables, held to maturity investments and financial assets at fair value through profit or loss.

After the recognition, financial assets available for sale are remeasured at fair value. Interest income arising from available for sale calculated with "Effective interest method" and dividend income from equity securities are reflected to the income statement. Unrealized gains and losses arising from the differences of fair value of securities classified as available for sale and that is representing differences between amortized cost calculated with effective interest method and fair value of financial assets are recognized under the account of "Marketable securities valuation differences" under shareholder's equity. Unrealized profits and losses are not reclassified to the income statement until these securities are sold or matured and the related fair value differences accumulated in the shareholders' equity are then transferred to the income statement.

c. Investment securities held-to-maturity

Held to maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity that an entity has the positive intention and ability to hold to maturity other than those that the entity upon initial recognition designates as at fair value through profit or loss, those that the entity designates as available for sale; and those that meet the definition of loans and receivables.

Held to maturity financial assets are initially recognized at acquisition cost including the transaction costs which reflects the fair value of the those instruments and subsequently recognized at amortized cost by using effective interest rate method.

Interest income obtained from held to maturity financial assets are presented in the line of "Interest received from securities portfolio – investment securities held-to-maturity" in the unconsolidated statement of income.

There is no financial assets that are banned from being classified as investment securities held-to maturity for two years due to the violation of the tainting rule.

*Convenience Translation of
Unconsolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

The Bank has government securities with a maturity of 5-10 years and indexed to CPI in the 3 months real coupon ratios that remain constant throughout the maturity in the available for sale and held to maturity securities portfolios. As stated by Secretary of Treasury in CPI indexed investor guide, the reference indexes used in calculating the actual coupon payment amounts of these securities are based on the CPI indexes of 2 months ago.

d. Loans and specific provisions

Loans and receivables are non-derivative financial assets that are not classified as either financial assets at fair value through profit or loss or financial assets available for sale, are unlisted in an active market and whose payments are fixed or can be determined. Loans and receivables are carried initially by adding acquisition cost to transaction costs which reflect fair value and subsequently recognized at the discounted value calculated using the "Effective interest rate method".

Foreign currency loans are subject to evaluation and currency exchange differences arising from such re-measurements are reflected in "Foreign Exchange Gains/Losses" account in the income statement. Foreign currency-indexed loans are initially recognized in their Turkish Lira equivalents; repayments are calculated with exchange rate at payment date, and currency exchange differences occurred are reflected in profit/loss accounts.

Specific and general provisions are calculated in accordance with the "Regulation on the Principles and Procedures Related to the Determination of the Loans and Other Receivables for which Provisions Shall be Set Aside by Banks and to the Provisions to be Set Aside" published in the Official Gazette numbered 26333 dated 1 November 2006.

When collections are made from loans that have been provided for, they are credited to the unconsolidated income statement accounts "Provision for Loan Losses or Other Receivables" if the provision was made in the current year, otherwise such collections are credited to "Other Operating Income" account with respect to allowances made in prior years. The interest income recovered is booked in "Other Interest Income" account.

e. Explanations on impairment of financial assets

The existence of objective evidence whether a financial asset or group of financial assets is impaired, is assessed at each balance sheet date. If such evidence exists, impairment provision is provided.

Impairment for held-to-maturity financial assets carried at amortized cost is calculated as the difference between the present value of the expected future cash flows discounted based on the "Effective interest method" and its carrying value. Regarding available-for-sale financial assets, when there is objective evidence that the asset is impaired, the cumulative loss that had been recognized in other comprehensive income shall be reclassified from equity to profit or loss as a reclassification adjustment even though the financial asset has not been derecognized.

XXVI. Explanations on other matters

None.

c. Main differences between "Equity" amount mentioned in the prior tables' equity statements and "Equity" amount in balance sheet arise from general provisions and subordinated loans. The portion of main amount to credit risk of general provision up to 1,25% and subordinated credits are considered as supplementary capital in the calculation of "Equity" amount included in equity statement as result of deductions mentioned in scope of Regulation on Equity of Banks. Additionally, Losses reflected to equity are determined through excluding losses sourcing from cash flow hedge reflected in equity in accordance with TAS which are subjects of discount from Core Capital. On the other hand, leasehold improvement costs monitored under Plant, Property and Equipment in balance sheet, intangible assets and deferred tax liabilities related to intangible assets, net carrying value of properties acquired in return for receivables and kept for over three years and certain other accounts determined by the Board are taken into consideration in the calculation as assets deducted from capital.

II. Explanations related to the credit risk

a. Information on risk concentrations by debtors or group of debtors or geographical regions and sectors, basis for risk limits and the frequency of risk appraisals

Credit risk is the risk and losses likely to incur due to the counterparties of the Bank not meeting in full or in part their commitments arising from the contracts.

Credit risk limits of the customers are allocated based on the customers' financial strength and the credit requirement, within the credit authorization limits of the branches, the credit evaluation group, the regional directorates, the executive vice presidents responsible from loans, the general manager, the credit committee and the Board of Directors; on condition that they are in compliance with the related regulations.

Credit risk limits are determined for debtors or group of debtors. Credit risk limits of the debtors, group of debtors and sectors are monitored on a weekly basis.

Information on determination and distribution of risk limits for daily transactions, monitoring of risk concentrations related to off-balance sheet items per customer and dealer basis

Risk limits and allocations relating to daily transactions are monitored on a daily basis. Off-balance sheet risk concentrations are monitored by on-site and off-site investigations.

Information on periodical analysis of creditworthiness of loans and other receivables per legislation, inspection of account vouchers taken against new loans, if not inspected, the reasons for it, credit limit renewals, collaterals against loans and other receivables

The Bank targets a healthy loan portfolio and in order to meet its target there are process instructions, follow-up and control procedures, close monitoring procedures and risk classifications for loans in accordance with the banking legislation.

In order to prevent the loans becoming non-performing either due to cyclical changes or structural problems, the potential problematic customers are determined through the analysis of early warning signals, and the probable performance problems are aimed to be resolved at an early stage.

It is preferred to obtain highly liquid collaterals such as bank guarantees, real estate and ship mortgages, pledges on securities, bills of exchange and sureties of the persons and companies.

Explanations related to the definitions of the loans, which have been overdue and impaired, value adjustments and provisions

Explanation is given in Note VIII-c-4-i of Section Four.

Methods and approaches regarding valuation adjustments and provisions

Based on the "Regulation on Procedures and Principles for Determination of Qualifications of Loans and Other Receivables By Banks and Provisions to be Set Aside" the Bank calculates general provision for past due loans and specific provision for impaired loans.

(**) Arithmetical average of the quarterly reported amounts.

b. Information on the control limits of the Bank for forward transactions, options and similar contracts, management of credit risk for these instruments together with the potential risks arising from market conditions

The Bank has control limits defined for the positions arising from forward transactions, options and similar contracts. Credit risk for these instruments is managed together with those arising from market conditions.

c. Information on whether the Bank decreases the risk by liquidating its forward transactions, options and similar contracts in case of facing a significant credit risk or not

Forward transactions can be realized at maturity. However, if it is required, reverse positions of the current positions are purchased to decrease the risk.

d. Information on whether the indemnified non-cash loans are evaluated as having the same risk weight as non-performing loans or not

Indemnified non-cash loans are treated as having the same risk weight as non-performing loans.

DENİZBANK ANONİM ŞİRKETİ

NOTES TO UNCONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Unconsolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

Information on whether the loans that are renewed and rescheduled are included in a new rating group as determined by the Bank's risk management system, other than the follow-up plan defined in the banking regulations or not; whether new precautions are considered in these methods or not; whether the Bank's risk management accepts long term commitments as having more risk than short term commitments which results in a diversification of risk or not

Loans that are renewed and rescheduled are included in a new rating group as determined by the risk management system, other than the follow-up plan defined in the banking regulations.

Long term commitments are accepted as having more risk than short term commitments which results in a diversification of risk and are monitored periodically.

e. Evaluation of the significance of country specific risk if the banks have foreign operations and credit transactions in a few countries or these operations are coordinated with a few financial entities

There is no significant credit risk since the Bank's foreign operations and credit transactions are conducted in OECD and EU member countries in considering their economic climate.

Evaluation of the Bank's competitive credit risk as being an active participant in the international banking transactions market

Being an active participant in the international banking transactions market, the Bank does not have significant credit risk as compared to other financial institutions.

f. The Bank's

1. The share of the top 100 and 200 cash loan customers in the total cash loans portfolio

The share of the top 100 and 200 cash loan customers comprises 27% and 32% of the total cash loans portfolio(31 December 2017: 16%, 19%).

2. The share of the top 100 and 200 non-cash loan customers in the total non-cash loans portfolio

The share of the top 100 and 200 non-cash loan customers comprises 47% and 59% of the total non-cash loans portfolio(31 December 2017: 43%, 54%).

3. The share of the total cash and non-cash loan balance of the top 100 and 200 loan customers in the total assets and off-balance sheet items

The share of the total cash and non-cash loans from its top 100 and 200 loan customers comprise 19% and 24% of the total assets and off-balance sheet items(31 December 2017: 13%, 17%).

g. The Bank's general loan provision for its loans

As at 31 December 2018, the Bank's first and second stage expected loss provisions amounts to TL 2.258.643.

As at 31 December 2017, the Bank's general loan provision amounts to TL 1.476.199.

III. Explanations related to the foreign exchange rate risk

a. Foreign exchange rate risk of the Bank is exposed to, related impact estimations, and the limits set by the Board of Directors of the Bank for positions which are monitored daily

Foreign currency exchange rate risk can be taken by the Bank within defined position and value at risk limits. Measurable and manageable risks are taken within legal limits.

Foreign exchange rate risk is monitored along with potential evaluation differences in foreign currency transactions in accordance with "Regulation on Bank's Internal Systems and Internal Capital Adequacy Assessment Process". Value at Risk approach is used to measure the exchange rate risk for trading positions and calculations are made on a daily basis.

Based on general economic environment and market conditions the Bank's Board of Directors reviews the risk limits and makes changes where necessary.

b. The magnitude of hedging foreign currency debt instruments and net foreign currency investments by using derivatives

In accordance with TFRS 9, The Bank applies net investment hedge accounting to avoid foreign currency exchange rate risk arising from retranslation of its foreign investments in its financial statements.

Information relating to investment hedge to avoid foreign currency exchange rate risk arising from retranslation of its foreign investments are explained in Note XI-a of Section Four.

c. Foreign currency risk management strategy

Foreign exchange risk can be taken by the Bank within defined position and value at risk limits. Measurable and manageable risks are taken within legal limits.

d. The Bank's spot foreign exchange bid rates as of the balance sheet date and for each of the five days prior to that date

US Dollar purchase rate as at the balance sheet date	TL 5,2810
Euro purchase rate as at the balance sheet date	TL 6,0422

Date	US Dollar	Euro
25 December 2018	5,3034	6,0419
26 December 2018	5,2832	6,0185
27 December 2018	5,2889	6,0245
28 December 2018	5,2609	6,0280
31 December 2018	5,2810	6,0422

e. The basic arithmetical average of the Bank's foreign exchange bid rate for the last thirty days prior to the balance sheet date

The arithmetical average US Dollar and Euro purchase rates for December 2018 are TL 5,3010 and TL 6,0359.

IV. Explanations related to the interest rate risk

Interest rate risk arises from disagreements between the repricing dates of the assets, liabilities and off-balance sheet items (for floating-rate products) or maturities (for fixed-rate products). Although this dispute is a structural situation in the banking system, it may affect the bank's interest income and expense and the economic value of the balance sheet if there are unexpected changes in interest rates.

The ultimate responsibility for managing the interest rate risk is in the Asset and Liability Committee (ALCO). However, the Treasury and Asset Liability and Capital Management units are responsible for identifying the most appropriate strategies for interest rate risk management and recommending them to decision makers. There are limits approved by the Board of Directors for the control of interest rate risk.

a. Interest rate sensitivity of the assets, liabilities and off-balance sheet items (Based on repricing dates)

c. Interest rate risk on banking book

The interest rate risk arising from banking accounts is managed according to the principles stated in the "Interest Rate Risk Management Policy".

Sensitivity limits were determined by the Bank for possible negative developments in the market. Among the metrics; the sensitivity of the net present value of the balance sheet to certain interest rate shocks, the sensitivity of the net interest income, Financial Assets at Fair Value Difference to Other Comprehensive Income has impact and interest rate gap analysis on the CAR. These criteria are not only monitored in weekly ALCOs, but are also submitted to the senior management and the Board of Directors due to the limits set forth in the risk appetite declaration.

Interest rate risk calculation and reporting arising from banking accounts according to the "Regulation on Measurement and Assessment of the Interest Rate Risk from Banking Accounts" published in the Official Gazette no. 28034 dated 23 August 2011. The related ratio is prepared monthly as the other interest rate metrics that the bank follows. In addition, it is provided with close monitoring by weekly estimation studies and submitted to ALCO.

Cross currency swaps or interest swaps are used to hedge up to 10 years against the negative effects of interest rate risk.

The Bank's economic value differences arising from the interest rate fluctuations pursuant to the "Regulation on the Measurement and Assessment of Interest Rate Risk Arising from Banking Accounts According to the Standard Shock Method" in a manner separated by different currencies are demonstrated in the following table as of 31 December 2018.

Current Period: 31 December 2018			
Type of Currency	Shocks Applied (+/-x basis points)	Gains/Losses	Gains/Equity- Losses/Equity
1 TL	(+) 500 bps	(1.656.294)	(%7,50)
2 TL	(-) 400 bps	1.493.763	%6,76
3 Euro	(+) 200 bps	(554.423)	(%2,51)
4 Euro	(-) 200 bps	681.910	%3,09

VI. Explanations related to the liquidity risk

Liquidity risk can form as a result of significant changes which can happen in market liquidity or a general funding risk. Funding risk states the risk of not meeting cash outflows completely because of maturity mismatch between assets and liabilities while market liquidity risk states the risk of not liquidating assets because of a collision in market conditions or insufficient market depth.

Information on liquidity risk management, including the Bank's risk capacity, responsibilities and structure of liquidity risk management, liquidity risk reporting in the Bank, liquidity risk strategy, policy and practices, communication with the board of directors and business lines:

Within the Bank, the procedures and principles regarding liquidity risk management are determined by the "Liquidity Risk Management Policy " approved by the Board of Directors. This policy includes the basic duties and principles of liquidity risk management within the Bank including the related methods, procedures, controls, and reporting framework. The "Liquidity Emergency Action Plan" was established within the Liquidity Risk Management Policy , enclosing possible precautions which can be taken against unexpected liquidity squeezes.

"Risk Appetite Statement" is reviewed annually in order to manage risks in accordance with the Bank's strategy and its financial power. Risk Appetite Statement includes limits towards liquidity risks besides other risk limits. Risk appetite limits are reported to senior management monthly in scope of risk management activities. In the risk appetite declaration(RAD), limits were set based on the loan/deposit ratio and the LCR criteria for liquidity risk. Other indicators followed outside these metrics are; liquidity buffer, large consistent deposits, and core deposits.

Short-term liquidity management of the Bank is under the responsibility of Treasury Group. Treasury Group weekly reports to Assets and Liabilities Committee(ALCO) related to liquidity structure. ALCO has an active role in establishing related systems and monitoring and decision making processes regarding liquidity risk management. ALCO is also responsible and authorized for monitoring current liquidity position and legal and internal liquidity indicators and taking decisions related to liquidity management taking risk appetite framework into consideration. Different departments of the Bank such as the Treasury Group, Financial Institutions Group, Financial Affairs Group and Risk Management Group contribute to the liquidity management process of the Bank in accordance with the ALCO decisions and also provide the necessary support to the ALCO with the information, analysis and recommendations needed in the decision-making process.

Information on the centralization degree of liquidity management and funding strategy and the functioning of the Bank's partnerships:

Liquidity risk management is performed as par consolidated and non-consolidated. In this context, liquidity monitoring and management in subsidiaries are performed by the related subsidiary and monitored closely by the Bank. In order to meet the liquidity needs of partnerships in case of emergency, limits are allocated by the Bank.

Information on the Bank's funding strategy, including policies on the diversity of fund resources and durations

Management of risk sourcing from funding presents the fundamental of liquidity management activities of the Bank. Main funding source of the Bank is deposits since it is a more stable funding source compared to other sources and it provides a diversified source of funding. Additionally, security issuance and borrowing activities are performed in order to extend the maturity of funding.

On the other hand,the securities portfolio of the Bank carried in order to liquidity risk management that maintain in CBRT and BIST is structured in a way to consist of sovereign securities issued by Treasury of Turkey in order to reduce liquidity risk sourcing from market to minimum level. Criteria and principles related to security investments which shall be received to this portfolio are committed on paper and approved by the related committee.

Information on liquidity management on the basis of currencies constituting a minimum of five percent of the Bank's total liabilities

A large majority of Bank's liabilities consist of TL, US Dollar, Euro and gold. The main foreign currency funding source of the Bank is deposit and borrowings provided from credit agencies. Foreign currency liquidity risk is at a low level since the foreign currency sources of the Bank are at a higher level and have longer maturity than assets. For this reason, Turkish Lira is created by swap transactions using the current foreign currency liquidity. In other words, foreign currency liabilities are used in the funding of Turkish Lira assets.

See Note 3.1.c*

Information on liquidity risk mitigation techniques used

Reducing the liquidity risk continues to prepare and follow up liquidity buffer where possible fund outflows exist. Securities required to manage short-term risks are kept within the balance sheet together. On the other hand, in order to reduce structural liquidity risk, diversified funding sources are aimed to be diversified and the maturity structure will be expanded. Another important element is the strategy of spread to deposit base.

Explanations related to using the stress test

Scenario analyses, including specific conditions having significance with respect to liquidity which have been experienced or which shall possibly be experienced, are performed in order to measure liquidity level under stress conditions. A liquidity level at a sufficient amount to meet all liabilities even under stress conditions is aimed in scope of this scenario analyses through evaluating measures which can be taken. Assumptions related to liquidity stress tests are reviewed annually at minimum. Periodical stress tests are performed within the determined scenarios and liquidity situation is monitored and the duration of the Bank can survive is calculated and the results are compared with the determined limits and presented to the related committees.

General information on the liquidity emergency and contingency plan

In order to be prepared for the liquidity crises that can be experienced and to make the management in a healthy and planned manner, "Liquidity Unexpected Situation Plan Regulation" has been set up to prepare appropriate processes and guide these processes. In this document, early warning indicators, action plans, duties and responsibilities of the units within the Bank are used to determine the unexpected liquidity situation.

In addition, in order to ensure that the Bank maintains its liquidity in all circumstances and meets its liquidity obligations, an emergency liquidity limit to be used by the shareholder to be used within the framework of emergency liquidity management is defined. The mentioned limit is reviewed every year in the budget period and approved by the prevailing partner in the Board of Directors.

a. Liquidity coverage ratio

Liquidity coverage rates calculated in accordance with the Regulation on Calculation of Bank's Liquidity Coverage rate published in Official Gazette dated 21 March 2014 and numbered 28948 are as follows. Unconsolidated foreign currency rate calculated for the last three months is at the lowest level in 322,57 in December and at the highest level in December 407,94 while the liquidity coverage rate is at the lowest level in December 129,95 and at the highest level in October 157,54.

Calculation table of liquidity coverage rate is reported to BRSA weekly and monitored daily in the Bank.

High quality liquid assets consist of cash assets, reserves kept in Central Bank of Republic of Turkey and unrestricted marketable securities. Cash outflows consist of deposits, bank borrowings, non-cash loans, derivatives and other liabilities without a certain maturity. Additionally, several bank borrowings are shown as cash outflow regardless of their maturity since they include contingent early payment condition. In addition, additional collateral liability that may arise from the possible changes in the fair value of derivative transactions within the cash outflows are included. Cash inflows consist of credits having maturity less than 30 days and a certain payment due date and receivables from banks and derivative products.

LCR is considered as an important liquidity management criterion for our Bank. The Bank managed to manage the LCR management in terms of the minimum limits that would reach 80% for the foreign currency in 2019 and 100% for the total by searching by the Regulation in terms of 10% each year. In the Risk Appetite Declaration, internal limits are set above the legal minimum limits for the LCR and the related ratio is reported and monitored at the level of ALCO, senior management and the Board of Directors.

VII. Explanations related to leverage ratio

Information on matters causing difference between leverage ratios of current period and previous period:

As of 31 December 2018, the leverage ratio calculated from the average of the three-month average is 7,15%. This ratio is over minimum ratio. Difference between leverage ratios of current and previous period mainly sources from increase in risk amounts regarding assets on balance sheet.

Leverage ratio common disclosure template:

	Current Period ^(*)
On-balance sheet exposures

VIII. Explanations on Risk Management

Notes and explanations in this section have been prepared in accordance with the Communiqué on Disclosures about Risk Management to be Announced to Public by Banks that have been published in Official Gazette no. 29511 on 23 October 2015 and became effective as of 31 March 2016. As the Standard Approach is used in calculating the Bank's capital adequacy, the tables to be prepared under the Internal Rating Based Approach(IRB) have not been presented yet as of 31 December 2018.

The risk management disclosures were prepared as to comply with the internal control process that is approved by the Board of Directors.

a. Risk management and overview of risk weighted assets

1. Disclosures related to the risk management approach

Risks, exposed as a result of business model of the Bank, are determined on a consolidated basis through risk identification and materiality assessment of the Bank. Risk mitigation factors and monitoring activities are established for significant risks which are identified. Limits are identified for risks, considered to be significant, in Risk Appetite Declaration of the Bank and those limits are approved by the Board of Directors. Developments with respect to risk limits determined in Risk Appetite Declaration are monitored on a monthly basis and actions which are pre-determined in risk appetite declaration if those limits are exceeded.

Denizbank Risk Management Group Directorate is an internal systems unit responsible for carrying out risk management activities working subject to Board of Directors. It directly reports to Board of Directors. Risk Management Group is responsible to carry out processes such as definition and measurement of risks, establishment and application of risk policies and implementation procedures, analysis, monitoring and reporting of risks in the framework of principles determined by Senior Management of the Bank and Risk Management Group and approved by Board of Directors.

Delegation levels of groups, formed by client and clients at the Bank, are determined in accordance with risk categories established based on limit and credit grade components within the body of the Bank.

Rating process executed by Credit Analysis department and reviews of Credit Allocation department are periodically audited by Credit Risk Control in line with determined rules and the related outputs are presented to the Rating Committee.

Main components of risk measurement systems and its scope

The Bank, including its subsidiaries, has a comprehensive risk identification process. The process aims to determine significant risks specific to the Bank based on a broad list including inherent risks of banking and it is performed on an annual basis. Opinions and reviews of expert individuals within the body of the Bank during the determination of materiality level of risks. Review outputs are used in reports and form a basis to internal capital adequacy assessment processes of the Bank.

The purpose of the studies made in the scope of measurement of risks includes measuring of financial risks exposed by the Bank and its subsidiaries in order to prepare internal and legal reports and form a relation between carried risks and estimated profitability and evaluation of validity of parameters and assumptions used in risk measurement.

It determines which type of reports shall be prepared as consolidated and unconsolidated. It ensures to establish an effective internal audit system which shall prevent to take risk exceeding targeted risk level and limits determined by regulatory authority. Risk limits, approved by Board of Directors for each type of risk types, are taken into account while controlling and reporting of risks.

There is an effective control system to prevent the risk level from being taken and the limits determined by the regulatory authority. The risk limits that are approved by the Board of Directors are taken into account for each type of risk during the control and reporting of risks.

The Risk Management Group, provides the coordination of the internal capital adequacy assessment process(ICAAP) and the measurement of the risks undertaken by the bank. The annual stress test report, which presents the bank's capital and liquidity, is reported to the BRSA by the scenarios in which the macroeconomic variables are taken into account within the framework of the annual ICAAP report and the 3-year strategic plan. The Bank internally monitors the capital requirement level on a monthly basis.

Disclosures on risk reporting processes provided to Board of Directors and senior management, especially the scope and main content of the reporting

Risk Management Group performs reporting to Senior Management and Board of Directors through Audit Committee, ALCO and Rating Committees.

Audit Committee holds quarterly meetings in ordinary situations. Activities performed by the Risk Management Group and risk indicators are presented to the Committee.

ALCO holds weekly meetings. Risk-limit follow-up and detailed analysis related to indicators such as interest and liquidity risk, capital adequacy are presented.

Rating Committee: Rating Committee holds meetings on a quarterly basis. It is the Committee to which the Risk Management presents its evaluation, analysis and findings regarding Internal Rating processes.

Model Risk Management and Validation Committee: It is the committee that the Risk model validation results, prepared within the frame of annual plan, are presented to and approved.

Risk management, hedging and mitigation strategies of the Bank sourcing from business model and monitoring process with respect to continuing effectiveness of hedging and mitigating components

Limits, which are defined for risks considered to be significant, are monitored on a monthly basis and actions included in risk appetite statement are taken, if required.

In addition, emergency plan related to capital adequacy in order to meet its strategic aims considering stress conditions of the Bank.

^(**) It includes risk which are included in credit risk calculation.

3. Disclosures on differences between amounts valued in accordance with TAS and risk exposures

Differences between valued amounts in accordance with TAS and risk exposures:

It is obtained through addition of potential risk exposures according to type of transaction and maturity to risk exposure renewal costs in derivative transactions included in counterparty credit risk and through offsetting of cash amount subject to amount adjusted with volatility made to related security in repo and reverse repo transactions.

Amounts of items which are value in accordance with TAS and subject to market risk indicate fair value of financial instruments held for trade. Amounts in line of risk amount related to aforementioned transactions indicate principal amount subject to market risk sourcing from capital requirement calculated related to potential losses which can be caused by interest rate risk, share price risk, exchange rate risks in scope of "Communique on Measurement and Evaluation of Bank's Capital Adequacy".

Disclosures on controls performed and systems used in order to ensure prudence and reliability of valuations estimates of the Bank in accordance with prudential valuation principles and procedures included in accompanying Annex-3 to Communique on Measurement and Evaluation of Bank's Capital Adequacy:

If the financial instruments recognized through fair value have an active and deep market, valuation is performed based on prices included in market in question. Reliability of market data used in valuations is examined periodically. The Bank does not operate in markets which do not have a depth. Discounted cash flow model is mainly used in the evaluation of derivative instruments and generally accepted valuation models are used for derivative transactions including optionality. Accuracy of market data and model outputs used in valuations are periodically controlled and differences between counterparty valuations and bank's evaluations are monitored regularly.

c. Credit risk

1. General qualitative information about credit risk

How does the business model of the Bank transform to components in its credit risk portfolio

Credit risk within the body of the Bank is managed in the framework of Credit Risk Management Policy approved by Board of Directors. Risk, related to credit, are defined, duties of departments are determined and main principles of credit risk management are brought in aforementioned policy document. Departments assigned in credit management and their authorization/responsibilities are defined in aforementioned document.

In this direction, main limitations related to credit risk are determined in Risk Appetite Statement approved annually by Board of Directors and reported throughout the year by Risk Management Department. Concentration limits on the basis of sector, customer segment and risk groups are determined. Actions which shall be taken in case of a possible overflow are also determined in this document.

In this scope, credit portfolio of the Bank draws a dispersed view with respect to customer segments and sectors.

Criteria and approach used while determining credit risk policy and credit risk limits

Risk limits defined to all counterparties in monitoring of credit risks are tracked on the basis of products, customers and risk groups separately by systems and it is not permitted to take risks exceeding determined limits. Many factors such as ability to pay, features of the sector and possible impacts of geographical and economic conditions are taken into consideration while determining the credit limits of counterparty. If deemed appropriate, it is tried to reduce possible losses of the Bank to minimum through applying required risk mitigation techniques. All documents required by the related legislation should be taken into account during credit examinations. Credit worthiness of counterparty is periodically controlled for limits provided for multi-use and limits are revised considering changes and requirements in the credit worthiness of counterparty. Customers/ transactions are classified based on their credit worthiness by credit allocation officers and respective classes are changed, if required.

Structure and organization of credit risk management and control function

Credit allocation and monitoring is performed in accordance with segregation of duties and therefore, the credit can be reviewed in an objective manner during its economic life. Risk models are used in order to measure credit risk of customers in both allocation and monitoring groups in an accurate and objective manner. Early Warning Systems are used for the monitoring of credit customers and signals received are regularly tracked by Monitoring groups and pre-determined action plans are taken with allocation groups if pre-determined triggers are detected.

Relation between credit risk management, risk control, legal compliance and internal audit functions

The newly developed credit risk models undergo validation process before its implementation, after the approval of the Bank's Model Risk Management and Validation Committee, they are used in the risk management processes. Validation of Credit risk models in use are repeated at least on an annual basis and the results are presented to the Model Risk Management and Validation Committee.

Credit Risk Control periodically presents analysis and results of execution of internal rating systems, evolution of credit rating grades, documentation of changes made in credit grade and compliance to internal limitations to Rating Committee. Compliance of Credit Risk Control activities to intra-bank arrangements and regulations and guides is periodically audited by internal audit departments of the Bank and issue requiring to be developed are monitored following their identification.

4. Additional disclosure related to the credit quality of assets

(i) Scope and definitions of "overdue" receivables and "provisioned" receivables used for purposes of accounting

The Bank considers loans that have overdue principal and interest payments and are classified as second group according to the "Communiqué on "Determining the Quality of Loans and Other Receivables by Banks and Procedures and Principles of Provisions to be made" as "past due loans." Loans that have overdue principal and interest payments for more than 90 days after the maturity date or the debtor of which are deemed unworthy by the Bank are considered as "impaired loans."

(ii) Part of overdue receivables(over 90 days) which are not considered as "Provisioned" and reasons for the implementation in question.

Loans that have overdue principal and interest payments for more than 90 days after the maturity date are transferred to "Nonperforming loans" accounts and the Bank calculates "specific provisions" for such loans in compliance with the "Communiqué on "Determining the Quality of Loans and Other Receivables by Banks and Procedures and Principles of Provisions to be made".

(iii) Definitions of methods used while determining amount of provision

The methods used in the calculation of the provision amount are presented in Note VIII of Section Three.

(iv) Definitions of restructured receivables

The Bank can restructure both of its first and second group credits and its nonperforming credit and receivables. Restructuring in first and second group of credits and in other receivables are made in order to improve repayment ability of the customer as well as including changes made in contract terms with the request of the customer independent from credit risk of the customer. Restructurings made in nonperforming claims and receivables are changes made in payment plan of the credit towards ensuring of collection of the receivable.

Loans in close follow-up and restructured from other receivables	4.577.399
Restructured from non-performing assets	298.597

5. Credit risk mitigation techniques

The Bank uses balance sheet netting and/or uses a general netting contract by taking into account the provisions related to risk mitigation of private equity instruments. As of the reporting date, financial collaterals are valued at their latest values and included in the credit risk mitigation process. While the allocation of the collateral amount to the loan is taken into consideration, the risk mitigation effects are calculated over the collateral values by taking into account the possible loss in the value of the collateral in terms of collateral value and credit risk mitigation is made according to the comprehensive financial collateral method. The legal validity of real estate mortgages is ensured by the timely and duly registered registration of the mortgage; changes in market conditions are important.

Within the scope of the Bank's credit risk mitigation, most of the loans were collateralized by real estate and property pledges, commercial enterprise pledges, collateral bills and other liquid assets in collateral, bank letters of guarantee and other persons and institutions by accepting bail.

The Bank performs credit risk mitigation according to comprehensive financial collateral method in accordance with "Communique on Credit Risk Mitigation Techniques". Exchange mismatch between receivable and collateral and cut-off rates based on type of collateral are considered through inspecting standard cut-off ratios mentioned in annex of the communique while maturity mismatch between receivable and collateral is taken into account in accordance with method mentioned in the Article 40. In credit risk mitigation, cash, financial debt securities, real estate mortgages and Treasury guaranteed Credit Guarantee Fund bails are used.

Credit policies establish an operational link between the Bank's operations and risk capacity and cover the main areas of activity consistent with the target portfolio structure, risk targets related to expected and unexpected losses in line with risk capacity and limits on risk concentration. It is ensured that the limits are complied with the relevant legislation and the limitations set by the regulatory and supervisory authorities. The Bank uses a holistic approach in concentration risk management in which all risk concentrations are identified, monitored and evaluated. For this reason, not only the loans extended to individuals and companies, but also the market, sector, country and activity areas are taken into consideration. In line with its policy and internal procedures, the Bank takes maximum care to ensure that credit and market risk is not concentrated in a specific counterparty or risk category.

7. Disclosures on rating grades used while calculating credit risk with standard approach

Ratings provided by international rating agency Fitch are used for the determination of risk weights which shall be applied in the calculation of capital adequacy. The scope, in which the credit rating grades are taken into consideration, covers receivables from governments or central banks and receivables from banks and intermediary institutions and corporate receivables for those having residence abroad.

When determining the risk weight, the credit rating of the issuer is taken into account in the absence of a credit-specific rating.

The matching of risk ratings with risk weights according to credit quality level and risk classes are shown in the table below.

d. Counterparty Credit Risk

1. Counterparty credit risk(CCR) explanations

Policies regarding counterparty credit risk management; Turkish Banking Legislation is determined by the Board of Directors in compliance with the regulations of the Banking Regulation and Supervision Agency and international standards.

Counterparty credit risk is included derivative financial products and repo transactions. Counterparties are divided into segments as financial institutions, corporate-commercial customers, SME-Micro-Gold-Agriculture customers and individual customers. In order to determine the products and services to be offered to customers, "Conformity Test" is applied according to the product information, financial status and frequency of transactions of the customers. Conformity testing is not mandatory for customers classified as professionals.

The counterparty's creditworthiness is analyzed and re-evaluated at regular intervals before the transactions with counterparties. The limits are set separately for each counterparty and for the counterparties within the same risk group. Limits are approved in the relevant credit committees according to the segment of counterparties. The revision of the limits is made at least once a year. If deemed necessary, the approved limits are blocked by the approval of the Credit Committee/Credit Allocation Department.

Risk monitoring of transactions within the scope of CCR; the potential risk and daily valuation method, which are calculated by multiplying the rates varying by type, maturity and type of foreign currency by the nominal amount of the transaction, is carried out by monitoring the current risk. Risk reduction methods included in international agreements such as ISDA, CSA, GMRA and EMA signed with the counterparty are used in transactions with financial institutions. For other counterparties, collateral adequacy rates are monitored on a daily basis within the scope of the Bank's current credit policies and procedures, and where necessary, collateralization and margin completion practices and risk mitigation are carried out. The margins to be used in collateral agreements are reviewed regularly. Margins; is determined according to the volatility and liquidity of the collateral. The risks of transactions that are subject to netting and which are subject to netting are monitored together. In the event of a decrease in the Bank's credit rating, the Bank's obligation to provide additional collateral is followed.

The Bank also takes into account the risk of countertrend risk in the credit evaluation of counterparties. Countertrend risk; the risk of general adverse trend and specific countertrend risk arise in two ways.

General countertrend risk; denotes the risk that occurs when there is a positive correlation between the probability of default of counterparties and general market risk factors.

Specific countertrend risk; states the risk that occurs when there is a positive correlation between the risk amount and the probability of default of the counterparty due to the nature of the transaction. Where the counterparty is expected to have a high probability of default, the risk of a specific countertrend risk will be expected if the future risk amount is expected to increase.

f. Market Risk

1. Explanations on market risk

Within the scope of financial risk management, market risk management activities are defined in accordance with the "Regulation on the Banks' Internal Systems and Internal Capital Adequacy Assessment Process" and the "Regulation on Measurement and Assessment of Capital Adequacy Ratios of Banks" and necessary measures are taken in order to avoid excessive market risk.

Standard method and internal model are used for the measurement of market risk. The principals of standard method are defined by BRSA and calculation is performed monthly for the consolidated and non consolidated scope. Risk measurement with the internal model is performed on a daily basis and risk indicators such as value at risk, interest rate sensitivity and option sensitivities are monitored. The "Trading Book" classification defined by the regulation is used for market risk measurement. Limits based on risk indicators and stop-loss limits are set by the Board of Directors in order to control the market risk exposure.

g. Operational risk

1. Disclosures on operational risk calculation

Principal amount subject to operational risk is calculated through using year-end gross income of 2017, 2016 and 2015 of the Bank belonging to last 3 years via "Basic Indicators Approach" dated in accordance with "Communique on Measurement and Evaluation of Bank's Capital Adequacy" published on Official Gazette dated 23 October 2015 numbered 29511.

2. Basic indicators approach

	31/12/2015	31/12/2016	31/12/2017	Total/Positive GI year number	Ratio(%)	Total
Gross Income	3.513.707	4.847.874	5.644.424	4.668.668	15	700.300
Amount Subject to Operational Risk						8.753.753

IX. Presentation of financial assets and liabilities at their fair value

a. Calculation of financial assets and liabilities at their fair value

The fair value of financial assets measured at amortized cost are determined based on market prices, or when they are not available, based on market prices quoted for other securities subject to similar terms of interest, maturity and other conditions.

The expected fair value of the demand deposits represents the amount to be paid upon request. The fair value of the overnight deposits and floating rate placements represent their carrying value. The expected fair value of the fixed rate deposits are determined by calculating the discounted cash flows using the market interest rates of similar instruments.

Fair value of credits are calculated by discounting cash flow with current market interest rate.

Estimated fair value of banks, funds provided from other financial entities, issued securities and deposits is calculated through determination of discounted cash flows using current market interest rates.

The following table summarizes the carrying value and fair value of financial assets and liabilities. The carrying value represents the sum of the acquisition costs and interest accruals of financial assets and liabilities.

	Book Value Current Period	Fair Value Current Period
Financial Assets	105.046.854	99.302.139

Transfers	323.627
Balance at the end of the period	323.627

X. Transactions carried out on behalf and account of other parties and fiduciary transactions

a. Information on whether the Group performs sales, purchase, management, consultancy and custody services on behalf and account of others, or not

The Bank performs sales, purchase, management, consultancy and custody services on behalf and account of others.

b. Transactions directly realized with other financial institutions depending on fiduciary contracts and probability of material effect of such transactions on the financial position of the Bank.

None.

XI. Explanations related to hedging transactions

a. Net Investment Risk

The Bank applies net investment hedge strategy to hedge against the currency risk arising on a consolidated basis from the net investments amounting to a total of Euro 1.347 million and US Dollar 7 million of subsidiaries Denizbank AG and Eurodeniz as of 1 July 2015. The part consisting of the same amounts of its foreign currency deposit has been defined as "hedging instrument". The effective part of the change in value of the foreign currency deposit arising from exchange rate has been recognized as "hedging funds" under equity. Total net investment hedging funds recognized under equity is amounting to TL(2.828.755) as of 31 December 2018(31 December 2017: TL(1.277.553)).

b. Cash Flow Hedge

Cash flow hedge valuation difference in the Bank's equity is contracted under the scope of exchange rate risk management of Deniz Finansal Kiralama A.Ş., one of its subsidiaries, which is in accordance with TAS 27 equity method. has started to apply cash flow hedge accounting as of 1 April 2018 by matching the estimated second-hand vehicle sales with the loans received in Euro.

In the cash flow hedge accounting that Deniz Finansal Kiralama A.Ş.; as a hedged item, forward operating lease receivables and fair values have been determined in future sales of second hand vehicles in Euro and as hedging instruments Euro loans were taken into consideration.

As at 31 December 31 after tax profit/(loss) accounted under shareholders' equity using cash flow hedge accounting is TL(29.409)(31 December 2017: None).

XII. Explanations related to the segment reporting

The Bank is active in four areas; namely, wholesale banking, SME and agricultural banking, retail banking, and treasury.

Wholesale banking offers financial and banking solutions to large-scale local and international corporate and commercial customers. In order to meet customer needs related to projects, investment and working capital, corporate banking offers short and long-term working capital loans, investment loans, non-cash loans, foreign exchange transactions, export finance, project finance, structured finance, corporate finance, and deposit products and cash management services.

The Bank offers loan products(consumer loans, mortgage, vehicle, agricultural and investment loans), distinctive credit cards, producer card, investment products(mutual funds, shares, government bonds/treasury bills, and repos), deposit products(time, demand, protected), insurance products, SME loans, agricultural loans to the customers classified under retail, SME and agricultural segments. Alternative distribution channels allow customers to meet their banking needs without the need to physically visit the branches. Among products that meet every day needs of customers are overdraft loans, automated bill payment, checkbooks and rental safes.

SECTION FIVE

DISCLOSURES AND FOOTNOTES ON UNCONSOLIDATED FINANCIAL STATEMENTS

I. Explanations and disclosures related to assets

a. Information on cash and balances with the Central Bank of the Republic of Turkey

1. Information on cash and balances with the Central Bank of the Republic of Turkey

	Current Period	
	TL	FC
Cash in TL/Foreign Currency	629.476	575.968
Central Bank of the Republic of Turkey	1.744.616	10.962.810
Other	--	--
Total	2.374.092	11.538.778

	Prior Period	
	TL	FC
Cash in TL/Foreign Currency	1.100.460	702.489
Central Bank of the Republic of Turkey	1.966.321	13.097.273
Other ^(*)	--	--
Total	3.066.781	13.799.762

2. Information on balances with the Central Bank of the Republic of Turkey

	Current Period	
	TL	FC
Unrestricted Demand Deposits	1.683.477	3.764.264
Unrestricted Time Deposits	--	--
Restricted Time Deposits	61.139	7.198.546

Unrestricted Time Deposits	1.072.212	--
Restricted Time Deposits	--	11.390.634
Total	1.966.321	13.097.273

3. Information on reserve requirements

As per the Communiqué no. 2013/15 "Reserve Deposits" of the Central Bank of the Republic of Turkey ("CBRT"), banks keep reserve deposits at the CBRT for their TL and FC liabilities mentioned in the communiqué.

As of 31 December 2018, all banks operating in Turkey should provide a reserve in a range of 1,5% to 8% (31 December 2017: between 4% and 10,5%) depending on the terms of the deposits for their liabilities in Turkish Lira and in a range of 4% to 20%(31 December 2017: between 5% and 19%) in US Dollars or standard gold for their liabilities in foreign currencies.

CBRT began paying interest for the reserve deposits maintained in Turkish Lira as from November 2014 and for the reserve deposits maintained in US Dollar as from May 2015. The interest income of TL 193.978 derived from the reserve deposits maintained by the Bank at CBRT(1 January – 31 December 2017: TL 101.420) has been recorded under the account "interests derived from reserve requirements".

d. Information on financial assets at fair value through other comprehensive income

1. Major types of financial assets at fair value through other comprehensive income

Financial assets at fair value through other comprehensive income consist of share certificates, debt securities representing government bonds, Eurobonds and foreign currency government bonds issued by the Turkish Treasury.

2. Financial assets at fair value through other comprehensive income given as collateral and book value

Financial assets at fair value through other comprehensive income which were collateralized consist of securities offered to various financial institutions, primarily the Central Bank of the Republic of Turkey and İstanbul Takas ve Saklama Bankası A.Ş. (Settlement and Custody Bank) for interbank money market, foreign exchange market and other transactions. Such financial assets include government bonds and Eurobonds, and their total book value amounts to TL 238.181.

Total	69.141.046	11.837.956	2.436.476	3.365.139

(*) It includes loans measured at amortized cost.

(**) In order to restructure the debts of a firm operating in the telecommunication sector through the loan agreements, the Bank has agreed between all the lenders, including the Bank, and the pledge of which the company owns 55% of the issued capital of the company and which constitute the collateral of the existing loans. All of the lenders were transferred directly or indirectly by a special purpose company. As a result of the transfer of the debt in question, the risk balance amounting to TL 237.211 has been left off, all legal and administrative permissions have been taken and the restructured risk amount as of 31 December 2018 has started to be followed as financial assets at fair value through profit or loss in accordance with TFRS 9.

11. Liquidation policy for uncollectible loans and receivables

For uncollectible loans and receivables, the Bank tries to solve the issue with the customer. If no result is obtained, all legal actions are taken. Such actions are completed when the insufficiency of collaterals is documented or a certificate of insolvency is obtained.

12. Information on write-off from assets policy

Unrecoverable non-performing loans are written off with the decision of the Board of Directors on condition that receivable of the Bank is not material compared to the costs to be incurred for the preparation of necessary documentation.

f. Information on financial assets measured at amortized cost

1. Information on securities subject to repurchase agreement and given as collateral or blocked

(i) Information on securities subject to repurchase agreement

Financial assets measured at amortized cost subject to repurchase agreement are TL 1.111.654(31 December 2017: TL 1.306.054).

(ii) Information on securities subject to given as collateral or blocked

Collateralized financial assets measured at amortized cost are government bonds, whose book value amounts to TL 951.233(31 December 2017: TL 2.048.110).

d. Contingent assets and liabilities

In addition to the matters explained in detail above, the Bank has provided a provision amounting to TL 85.669(31 December 2017: TL 23.429) for the lawsuits against the Bank in accordance with the precautionary principle. These provisions are classified among "Other provisions". Except for those provisioned, other ongoing lawsuits are unlikely to result in a negative conclusion and cash outflow is not foreseen for them.

e. Activities carried out on behalf and account of other persons

The Bank provides trading, custody, management and consultancy services to its customers.

Investment Securities Available-for-Sale	527.387	39.136
Investment Securities Held-to-Maturity	428.610	77.568
Total	966.060	123.426

As stated in the chapter III footnote numbered VII, the Bank has government securities in the financial assets at fair value through other comprehensive income and financial assets measured at amortized cost portfolios with a maturity of 5 to 10 years and having CPI indexed 3 months real coupon ratio fixed until maturity. As stated in the Undersecretariat of Treasury's securities indexed CPI Investors Guide, the reference indexes used in calculating the actual coupon payment amounts of these assets are based on the CPI of previous two months. The Bank determines the estimated inflation rate accordingly. The estimated inflation rate is updated as needed within the year. The Bank determines the estimated inflation rate in parallel. Estimated inflation rate is updated during the year when deemed necessary.

The Bank has a net profit is amounting to TL 2.182.523(31 December 2017: TL 1.879.792).

k. Information on net profit and loss

1. The nature and amount of certain income and expense items from ordinary operations is disclosed if the disclosure for nature, amount and repetition rate of such items is required for the complete understanding of the Bank's performance for the period

Income generated from the Bank's ordinary banking transactions during the current and prior period are mainly consisted of interest income from loans and marketable securities and income from other banking services. Main expense items are the interest expenses related to deposits and borrowings which are the main funding sources of marketable securities and loans.

2. No changes have been made in the accounting estimates which may have a material effect in the current period and materially affect subsequent periods.

3. The Bank recognized its associates, in which it has direct or indirect shares, according to equity method in accordance with TAS 27 "Separate Financial Statements", having a permission to be applied earlier, while preparing its non-consolidated financial tables dated 31 December 2017.

4. The Bank applies net investment accounting hedge as of 1 July 2015 in order to ensure exchange difference hedge sourcing from equity method implementation for its net investment at a total amount of Euro 1.347 million and US Dollar 7 million belonging to Denizbank AG and Eurodeniz, which are subsidiaries of the Bank. A part of foreign currency deposits at same amounts is defined as hedging instrument and the part, in which the value change sourcing from foreign currency exchange rates is effective, is recognized in hedge funds under shareholder's equity.

d. Information on distribution of profit

General Assembly of the Bank is authorized body for the profit appropriation decisions. As of the preparation date of these financial statements, annual ordinary meeting of the General Assembly has not been held yet.

e. Other comprehensive income and expenses

"Unrealised gain/loss" arising from changes in the fair value of financial assets at fair value through other comprehensive income are not recognized in current year income statement but recognized in the "Marketable securities valuation differences" account under equity, until the financial assets are derecognised, sold, disposed or impaired. The net amount after tax for the current period is TL(345.120).

Deniz Finansal Kiralama A.Ş., one of its subsidiaries, has started to apply cash flow hedge accounting as of April 1, 2018 within the scope of currency risk according to TAS 27. Profit/(loss) after tax recognized under equity in the current period through cash flow hedge accounting is TL(29.409).

Revaluation surplus of tangible fixed assets amounting to TL 25.099 was offsetted with the deferred tax effect of TL 6.209 and accounted under shareholders' equity.

The fair value of Intertech amounting to TL 176.702 in accordance with TFRS 9 is recognized under equity.

Net TL(30.188) related with the actuarial gain/(loss) after tax is recognized for under equity.

After tax net amounting to TL(1.551.202) of hedging fund of net investment in foreign subsidiaries has been recognized for under shareholders' equity.

Foreign currency translation differences amounting to TL 1.932.341 have been recognized under shareholders' equity.

f. Amounts transferred to reserves

The Bank transferred TL 1.785.802(31 December 2017: TL 1.271.963) to extraordinary reserves from prior period profits in 2018. TL 93.990 is transferred to legal reserves in 2018(31 December 2017: TL 70.464).

VI. Explanations and disclosures related to cash flow statement

a. Information on cash and cash equivalents

Components of cash and cash equivalents and the accounting policy applied in their determination:

Cash and foreign currency together with demand deposits at banks including the CBRT are defined as "Cash"; interbank money market and time deposits in banks with original maturities less than three months are defined as "Cash equivalents".

1. Cash and cash equivalents at the beginning of the period

	Current Period 01/01/2018
Cash	2.073.688
Cash in Vault, foreign currencies and other	1.802.940
Banks demand deposits	270.748
Cash and Cash Equivalent	8.059.690
Interbank Money market placements	750.000
Banks time deposits	7.191.206
Securities	118.484
Total Cash and Cash Equivalents	10.133.378
	Prior Period 01/01/2017
Cash	2.073.608
Cash in Vault, foreign currencies and other	1.754.183
Banks demand deposits	319.425
Cash and Cash Equivalent	9.910.140
Interbank Money market placements	3.001.396
Banks time deposits	6.812.558
Securities	96.186
Total Cash and Cash Equivalents	11.983.748

2. Cash and cash equivalents at the end of the period

	Current Period
	31/12/2018
Cash	4.601.357
Cash in Vault, foreign currencies and other	1.205.444
Banks demand deposits	3.395.913
Cash and Cash Equivalent	6.579.674
Interbank Money market placements	--
Banks time deposits	6.162.915
Securities	416.759
Total Cash and Cash Equivalents	11.181.031
	Prior Period
	31/12/2017
Cash	2.073.688
Cash in Vault, foreign currencies and other	1.802.940
Banks demand deposits	270.748
Cash and Cash Equivalent	8.059.690
Interbank Money market placements	750.000
Banks time deposits	7.191.206
Securities	118.484
Total Cash and Cash Equivalents	10.133.378

b. Information on cash and cash equivalent assets of the Bank that are not available for free use due to legal restrictions or other reasons

The Bank made a total provision for required reserves on CB of Turkey and other foreign Central Banks in amount of TL 12.707.426(31 December 2017: TL 15.063.594). Additionally, there is no limited amount in foreign banks account(31 December 2017: TL 1.986.820).

c. Disclosures for "other" items in the statement of cash flows and effect of changes in foreign currency exchange rates on cash and cash equivalents

"Other" item amounting to TL(7.714.831)(31 December 2017: TL(3.418.730)) before "changes in operating assets and liabilities" comprise other operating expenses, fees and commissions paid and net trading loss. As a result of these changes in the cash flow statement, the balance of cash and cash equivalents has changed from TL 10.133.378(31 December 2017: TL 11.983.748) to TL 11.181.031 in 2018(31 December 2017: TL 10.133.378). "Other liabilities" item included in "change in assets and liabilities arising from banking activities", amounting to TL 3.241.165(31 December 2017: TL(503.852)) comprise changes in sundry creditors, taxes and duties payable, and other external resources.

The impact of change in exchange rate on cash and cash equivalent assets consists of exchange difference occurring as a result of translation of foreign currency cash and cash equivalent assets average to TL with rates belonging to beginning and end of the period and it amounts to TL 2.194.889 as of 31 December 2018(31 December 2017: TL 982.577).

c. Subsequent events

On 22 May 2018, Emirates NBD Bank PJSC(Emirates NBD) and Sberbank of Russia(Sberbank) announced that they have signed a definitive agreement about selling 99,85% of Denizbank's shares, which is owned by Sberbank to Emirates NBD.

Sberbank's shareholding in Denizbank will expire with the completion of the sales transaction. In the direction of the signed agreement, the sales price of the 99,85% shareholder was determined as 14.609 million TL with Denizbank's price fixing mechanism based on the equity size in the consent of DenizBank on 31 October 2017. Additionally, Emirates NBD will pay interest that is over the transfer fee, on Sberbank for the period between October 31, 2017 and the closing date of the sales transaction. The profit to be earned by Denizbank from 31 October 2017 until the closing date of the sales transaction will be recorded at Emirates NBD's account. As part of the transfer process, with the closing of the sales transaction, Emirates NBD will also own the ownership of subordinated loans granted to Denizbank by Sberbank in the past.

The completion of the transaction, Turkey, Russia and the United Arab Emirates and is subject to approval by the regulatory authorities of other countries in which it operates Denizbank.

Convenience Translation of the Auditor's Report Originally Issued in Turkish (See Note I in Section Three)

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Denizbank Anonim Şirketi:

A) Audit of Consolidated Financial Statements

1) Opinion

We have audited the accompanying consolidated financial statements of Denizbank A.Ş. (the "Bank") and its subsidiaries (collectively referred as the "Group"), which comprise the statement of financial position as at December 31, 2018, and the consolidated statement of income, consolidated statement of income and expenses recognized under shareholders' equity, consolidated statement of changes in shareholders' equity and consolidated statement of cash flows for the year then ended and notes to the consolidated financial statements and a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of Group as at December 31, 2018 and consolidated financial performance and consolidated its cash flows for the year then ended in accordance with the Banking Regulation and Supervision Agency ("BRSA") Accounting and Financial Reporting Legislation which includes "Regulation on Accounting Applications for Banks and Safeguarding of Documents" published in the Official Gazette no.26333 dated 1 November 2006, and other regulations on accounting records of Banks published by Banking Regulation and Supervision Agency and circulars and interpretations published by BRSA and Turkish Financial Reporting Standards ("TFRS") for those matters not regulated by the aforementioned regulations.

2) Basis for Opinion

Our audit was conducted in accordance with "Regulation on independent audit of the Banks" published in the Official Gazette no.29314 dated 2 April 2015 by BRSA (BRSA Independent Audit Regulation) and Independent Auditing Standards ("InAS") which are the part of Turkish Auditing Standards issued by the Public Oversight Accounting and Auditing Standards Authority ("POA"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Group in accordance with of Code of Ethics for Independent Auditors (Code of Ethics) published by POA and have fulfilled our other responsibilities in accordance with the code of ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

3) Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. Key audit matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matter	How the Key Audit Matter is addressed in our audit
<p><i>Financial impact of transition to TFRS 9 "Financial Instruments" standard and recognition of impairment on financial assets and related important disclosures</i></p> <p>As disclosed in footnote XXIV of Section 3; as of 1 January 2018, the Group adopted the TFRS 9 "Financial Instruments" standart began to recognize expected credit losses for financial assets in accordance with TFRS 9. We considered the transition to TFRS 9 and impairment of financial assets as a key audit matter since;</p> <ul style="list-style-type: none"> • Amount of on and off balance sheet items that are subject to TFRS 9 expected credit loss calculation is material to the financial statements. • The effect of TFRS 9 transition on the Group's equity is %2 • There are complex and comprehensive requirements of TFRS 9 • The classification of financial instruments is based on the Group's business models and the characteristics of contractual cash flows in line with TFRS 9 and the Group uses significant judgment on the assessment of the business model and identification of the complex contractual cash flow characteristics of financial instruments • The Group determines the fair value of financial assets presented at fair value with respect to its relevant business model category and determines the financial inputs that are not-observable in the fair value measurement as Level 3 due to the existence of significant estimates and assumptions • Policies implemented by the Group management include compliance risk to the regulations and other practices • New or re-structured processes of TFRS 9 are advanced and complex • Estimations and assumptions used in expected credit losses are new, important and complex. • Complex and comprehensive disclosure requirements of TFRS 9. 	<p>In addition to our current audit procedures, our audit procedures include:</p> <ul style="list-style-type: none"> • Evaluating the appropriateness of accounting policies as to the requirements of TFRS 9, Group's past experience, local and global practices • Reviewing and testing of new or re-structured processes which are used to calculate expected credit losses by involving our Information technology and Process audit specialists • Evaluating the reasonableness of management's key judgements, estimates and data sources used in expected credit loss calculations considering the standard requirements, sectorial, local and global practices • Reviewing the appropriateness of criteria in order to identify the financial assets having solely payments of principal and interest and checking the compliance to the Group's business model • Analysis of the Group's financial instruments classification and measurement models (financial instruments identified as fair value hierarchy level 3) and comparison with the requirements of the TFRS 9 standard • Assessing the appropriateness of definition of significant increase in credit risk, default criteria, modification, probability of default, loss given default, exposure at default and forward looking assumptions together with the significant judgements and estimates used in these calculations to regulations and Group's past performance. Evaluating the compliance of those forward looking parameters to Group's internal processes where applicable • Assessing of the accuracy and completeness of information used during the calculation of expected credit losses • Testing the mathematical accuracy of expected credit loss calculation on sample basis • Evaluating the judgments and estimates used for the individually assessed financial assets. • Evaluating the accuracy and the necessity of post-model adjustments • Auditing of disclosures related to TFRS 9.

Derivative Financial Instruments	
<p>Derivative financial instruments including foreign exchange contracts, currency and interest rate swaps, currency and interest rate options and other derivative financial instruments which are held for trading are initially recognized on the statement of financial position at fair value and subsequently are re-measured at their fair value. Details of related amounts are explained in Section Five Note I.b.3. and Note II.b.</p> <p>Fair value of the derivative financial instruments is determined by selecting most convenient market data and applying valuation techniques to those particular derivative products. Derivative Financial Instruments are considered by us as a key audit matter because of the subjectivity in the estimates, assumptions and judgements used.</p>	<p>Our audit procedures included among others involve reviewing policies regarding fair value measurement accepted by the Group management fair value calculations of the selected derivative financial instruments and the assessment of used estimations and the judgements and testing the assessment of operating effectiveness of the key controls in the process of fair value determination.</p>

4) Responsibilities of Management and Directors for the Consolidated Financial Statements

Group management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the BRSA Accounting and Reporting Legislation and for such internal control as management determines is necessary to enable the preparation of the financial statement that is free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Bank's and its subsidiaries ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank and its subsidiaries or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

5) Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

In an independent audit, the responsibilities of us as independent auditors are:

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with BRSA Independent Audit Regulation and InAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with BRSA Independent Audit Regulation and ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. (The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.)
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank and its subsidiaries' internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank and its subsidiaries' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank and its subsidiaries' to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with government with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

B) Report on Other Legal and Regulatory Requirements

1) In accordance with Article 402 paragraph 4 of the Turkish Commercial Code ("TCC"); no significant matter has come to our attention that causes us to believe that the Bank's bookkeeping activities and financial statements for the period January 1 – December 31, 2018 are not in compliance with the TCC and provisions of the Bank's articles of association in relation to financial reporting.

2) In accordance with Article 402 paragraph 4 of the TCC; the Board of Directors submitted to us the necessary explanations and provided required documents within the context of audit.

The engagement partner who supervised and concluded this independent auditor's report is Yaşar Bivas.

SECTION ONE GENERAL INFORMATION

I. Parent Bank's date of establishment, beginning statute, its history including changes in its statute

Denizbank A.Ş. ("the Bank") was established as a public bank to provide financing services to the marine sector in 1938. In 1992, as a result of the resolution of the Government to merge some public banks, the Bank was merged to Emlakbank. Following the resolution of the High Council of Privatization numbered 97/5 and dated 20 March 1997 to privatize 100% of shares of Denizbank A.Ş., share sale agreement between Zorlu Holding A.Ş. and the Privatization Administration was signed on 29 May 1997 and the Bank started its activities on 25 August 1997 upon obtaining a permission to operate. Bank's shares have been quoted on Borsa Istanbul ("BIST") since 1 October 2004. 0,15% of the Bank's shares are publicly held as of 31 December 2018.

Dexia Participation Belgique SA, owned 100% directly and indirectly by Dexia SA/NV, acquired 75% of the outstanding shares of the Bank from Zorlu Holding A.Ş. on 17 October 2006, and subsequent to the transfer of shares, Dexia Participation Belgique's ownership rate increased to 99,85%.

Dexia has transferred 99,85% of shares of the Parent Bank to Sberbank with a total consideration of TL 6.469.140.728^(*) (Euro 2.790 million) which is the Preliminary Purchase Price determined as per the sale and purchase agreement as of 28 September 2012. Following the completion of the adjustment process of the Preliminary Purchase Price to Purchase Price in accordance with the terms in the Share Purchase Agreement, an additional amount of Euro 185 million which is equivalent of TL 430.947.685^(*) was paid on 27 December 2012. Ultimately the process was completed with a total Purchase Price of TL 6.900.088.413^(*) (Euro 2.975 million).

(*) Amounts are in full TL.

II. Capital structure, shareholders controlling the management and supervision of the Parent Bank directly or indirectly, and if exists, changes on these issues and the Group that the Parent Bank belongs to

⁽¹⁾ As of October 1, 2018, it was decided to appoint Dzhangir Dzhangirov with the decision of the Board of Directors dated October 2, 2018 instead of Alexander Vedyakhin, who resigned from his duty as a member of the Board of Directors.

⁽²⁾ Hakan Turan Pala, who has been serving as the Executive Vice President in charge of Corporate, Commercial and OBI Loans, has resigned from his duty as of September 30, 2018.

DENİZBANK ANONİM ŞİRKETİ

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Consolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

IV. Explanations regarding the real person and corporate qualified shareholders at the Parent Bank

Commercial Title	Share Amounts	Share Percentages	Paid-in Capital	Unpaid Capital
Sberbank of Russia	3.311.211	99,85%	3.311.211	--

Sberbank is the controlling party of the Parent Bank's capital having both direct and indirect qualified shares.

As of 31 December 2018 the capital structure of Sberbank is as follows:

Shareholders	Share Percentages
Central Bank of Russia	50,00 %
Publicly traded	50,00 %
Total	100,00 %

Central Bank of the Russian Federation holds 50%+1 share within 22.586.948.000 ordinary and preferred shares in total in Sberbank of Russia (the rate in 21.586.948.000 ordinary shares corresponds to 52,32%).

V. Type of services provided and the areas of operations of the Parent Bank

The Parent Bank is a private sector deposit bank which provides banking services to its customers through 710 domestic and 1 foreign branch as of 31 December 2018.

Activities of the Parent Bank as stated in the 3rd clause of the Articles of Association are as follows:

In accordance with the Banking Law and regulations;

- Performing all kinds of banking activities,
- Dealing with transactions on all kinds of capital market instruments within the limits set by the related regulations and Capital Market Law regulations,
- Establishing domestic and/or foreign entities and participating in existing entities. Entering into loan and intelligence agreements with domestic and international financial institutions. Participating in consortiums and syndications,
- Incorporating insurance companies, operating insurance agencies, participating in insurance companies which are existing or planned to be founded.

Apart from the above-mentioned activities, in case different activities deemed advantageous and necessary for the company are to be undertaken in the future, they will be submitted to approval of the General Assembly based on Board of Director's decision and the company will be able to implement activities after the relevant decision is made by General Assembly.

VI. A short explanation on the differences between the communiqué on consolidated financial statement reporting and the consolidation procedures required by Turkish Accounting Standards and about institutions that are subject to full consolidation, proportional consolidation, by way of deduction from capital or those that are subject to none.

Banks are obligated to prepare consolidated financial statements with their associates and subsidiaries qualifying as credit institutions and financial subsidiaries based on the "Communiqué on Preparation of Consolidated Financial Statements of Banks" by applying Turkish Accounting Standards. There is no difference between the consolidated financial statements based on the related Communiqué and those prepared in accordance with Turkish Accounting Standards except the scope difference regarding non-financial associates and subsidiaries. Information in regards to consolidated subsidiaries and consolidation methods are given in Note III of Section Three.

VII. Existing or potential, actual or legal obstacles to immediate transfer of capital between Parent Bank and its subsidiaries and repayment of debts.

None.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Consolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

SECTION THREE ACCOUNTING POLICIES

I. Basis of presentation

a. Preparation of the consolidated financial statements and the accompanying Footnote in accordance with Turkish Accounting Standards and Regulation on Principles Related to Banks' Accounting Applications and Preserving the Documents

Consolidated financial statements have been prepared in accordance with the regulations, communiqués, explanations and circulars published with respect to accounting and financial reporting principles by the Banking Regulation and Supervision Authority ("BRSA") within the framework of the provisions of the Regulation on the Principles and Procedures Regarding Banks' Accounting Applications and Document Keeping published in the Official Gazette no. 26333 dated 1 November 2006 in relation with the Banking Law no. 5411, as well as the Turkish Accounting Standards (TAS") and Turkish Financial Reporting Standards ("TFRS") enforced by the Public Oversight Accounting and Auditing Standards Authority ("POA") and the annexes and commentaries relating to these Standards (hereinafter collectively referred to as "Turkish Accounting Standards" or "TAS") if there are no specific regulations made by BRSA. The form and content of the consolidated financial statements which have been drawn up and which will be disclosed to public have been prepared in accordance with the "Communiqué on the financial Statements to be Disclosed to the Public by Banks and the Related Explanations and Footnote" and "Communiqué On Disclosures About Risk Management To Be Announced To Public By Banks" as well as the communiqués that introduce amendments and additions to this Communiqué. The parent shareholder Bank keeps its accounting records in Turkish Lira, in accordance with the Banking Law, Turkish Commercial Law and Turkish Tax legislation.

Consolidated financial statements have been prepared based on historical cost principle, except the financial assets and liabilities indicated at their fair values.

The amounts in the consolidated financial statements and explanations and Footnote relating to these statements have been denoted in Thousand Turkish Liras unless otherwise stated.

In the preparation of consolidated financial statements according to TAS, the management of the parent shareholder Bank should make assumptions and estimations regarding the assets and liabilities in the balance sheet. These assumptions and estimations are reviewed regularly, the necessary corrections are made and the effects of these corrections are reflected in the income statement. The assumptions and estimations used are explained in the related foot notes.

The Parent Bank and its consolidated subsidiaries are classified as "DFS Group" in the Footnote related to the consolidated financial statements.

Explanations on TFRS 16 Leases Standard

"TFRS 16 Leases" Standard was published in the Official Gazette dated 16 April 2018 and numbered 29826, to be applied in the accounting periods beginning after 31 December 2018. According to this standard, the difference between operating leases and financial leases has been eliminated and leasing transactions will be shown by the lessee on the balance sheet as the asset (utilization right) and financial debt related to lease payment.

DFS Group will apply this standard from 1 January 2019, that is the mandatory application date. DFS Group plans to use the simplified migration application and not to rearrange the comparable amounts for the prior year to the first implementation.

b. Accounting policies and changes in the presentation of financial statements

Accounting policies and valuation principles used in the preparation of the consolidated financial statements are determined in accordance with the regulations, communiqués, interpretations and legislations related to accounting and financial reporting principles published by the Banking Regulation and Supervision Agency ("BRSA"), and in case where a specific regulation is not made by BRSA, "Turkish Accounting Standards" ("TAS") and "Turkish Financial Reporting Standards" ("TFRS") and related appendices and interpretations put into effect by Public Oversight Accounting and Auditing Standards Authority ("POA").

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Consolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

In accordance with the transition rules of TFRS 9, the prior period financial statements and notes are not restated and presented in Section two.

Accounting policies and valuation principles used for the year 2018 and 2017 periods are separately presented in the notes and the accounting policies for the year 2017 are included in Section three notes XXV. Impacts of transition to TFRS 9 and its adoption is disclosed in Section three notes XXIV.

c. Additional paragraph for convenience translation:

The differences between the standards set out by BRSA Accounting and Financial Reporting Legislation and the accounting principles generally accepted in countries in which the accompanying consolidated financial statements are to be distributed and International Financial Reporting Standards (IFRS) have not been quantified in the accompanying consolidated financial statements. Accordingly, the accompanying consolidated financial statements are not intended to present the financial position, results of operations and changes in financial position and cash flows in accordance with the accounting principles generally accepted in such countries and IFRS.

II. Explanation on the strategy for the use of financial instruments and transactions denominated in foreign currencies

a. Strategy for the use of financial instruments

DFS Group's external sources of funds are comprised of deposits with various maturity periods, and short-term borrowings. These funds are fixed rate in general and are utilized in high yield financial assets. The majority of the funds are allocated to high yield, floating rate instruments, such as Turkish Lira and foreign currency government securities and Eurobonds, and to loans provided to customers on a selective basis in order to increase revenue and support liquidity. The liquidity structure that ensures meeting all liabilities falling due, is formed by keeping sufficient levels of cash and cash equivalents by diversifying the sources of funds. The Bank assesses the maturity structure of the sources, and the maturity structure and yield of placements at market conditions and adopts a high yield policy in long-term placements.

DFS Group assumes risks within pre-determined risk limits in short-term currency, interest and price movements in money and capital markets and market conditions. These positions are closely monitored by the Risk Management System of the Parent Bank and the necessary precautions are taken if the limits are exceeded or should there be a change in the market environment. In order to avoid interest rate risk, assets and liabilities with fixed and floating interests are kept in balance, taking the maturity structure into consideration. The asset-liability balance is monitored on a daily basis in accordance with the maturity structure and foreign currency type. The risks associated with short-term positions are hedged through derivatives such as forwards, swaps and options. No risks are taken as far as possible on foreign currencies other than US Dollar and Euro. Transactions are made under the determined limits to cover the position.

Net foreign currency position of DFS Group in foreign enterprises is considered along with the position of the Parent Bank and the specific position is evaluated within the risk limits.

b. Transactions denominated in foreign currencies

Foreign currency exchange rates used in converting transactions denominated in foreign currencies and their presentation in the financial statements

DFS Group accounts for the transactions denominated in foreign currencies in accordance with TAS 21 "The Effects of Changes in Foreign Exchange Rates". Foreign exchange gains and losses arising from transactions that are completed as of the balance sheet date are translated to TL by using historical foreign currency exchange rates. Balances of the foreign currency denominated assets and liabilities are translated into TL by using foreign currency exchange rates of the Parent Bank and the resulting exchange differences are recorded as foreign exchange gains and losses. The Parent Bank's foreign currency exchange rates are as follows:

	31 December 2018	31 December 2017
US Dollar	TL 5,2810	TL 3,7719
Euro	TL 6,0422	TL 4,5155

Foreign exchange gains and losses included in the income statement

As of 31 December 2018, net foreign exchange loss included in the income statement amounts to TL 2.076.255 (1 January – 31 December 2017: TL 38.161 net foreign exchange profit).

DENİZBANK ANONİM ŞİRKETİ

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Consolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

Total amount of valuation fund arising from foreign currency exchange rate differences

The assets and liabilities of foreign operations are translated to TL at foreign exchange rates of the Parent Bank ruling at the balance sheet date. The revenues and expenses of foreign operations are translated to TL at yearly average foreign exchange rates of the Parent Bank. The foreign exchange differences derived from translation of income statements of consolidated subsidiaries, and arising from the difference between TL equivalent of their equities and the Parent Bank's share in their net assets are recorded in "other profit reserves".

As of 31 December 2018, total foreign exchange differences in equity amount to TL 4.048.506 (31 December 2017: TL 2.105.383).

The foreign exchange difference of TL 69.078 (31 December 2017: TL 46.163) arising from the translation of the financial statements of Bahrain branch of the Parent Bank to Turkish Lira per TAS 21 is recorded in "other profit reserves".

DFS Group applies net investment hedge accounting to hedge from the foreign currency exchange risk arising from conversion of its investments in foreign currency denominated subsidiaries on a consolidated basis. Part of foreign currency deposits to the net investment amount is designated as hedging instrument and the effective portion of the foreign exchange difference of these financial liabilities is recognized under hedging funds in equity.

III. Information regarding the consolidated subsidiaries

Consolidated financial statements are prepared in accordance with TFRS 10, the "Turkish Accounting Standard for Consolidated Financial Statements".

The Parent Bank owns, directly or indirectly, the shares of Deniz Yatırım Menkul Kıymetler A.Ş. (Deniz Yatırım), Eurodeniz International Banking Unit Ltd. (Eurodeniz), Deniz Portföy Yönetimi A.Ş. (Deniz Portföy), Denizbank AG, JSC Denizbank, Deniz Finansal Kiralama A.Ş. (Deniz Leasing), Deniz Faktoring A.Ş. (Deniz Faktoring), Deniz Gayrimenkul Yatırım Ortaklığı A.Ş. (Deniz GYO), and CR Erdberg Eins GmbH & Co KG (CR Erdberg) and these subsidiaries are consolidated fully.

DFS Funding Corp., which is a structured entity, is also included in the scope of consolidation.

The non-financial subsidiaries of the parent bank; Intertech Bilgi İşlem ve Pazarlama Ticaret A.Ş. ("Intertech"), Deniz Kültür Sanat Yayıncılık Ticaret ve Sanayi A.Ş. ("Deniz Kültür") and Bantaş Nakit ve Kıymetli Mal Taşıma ve Güvenlik Hizmetleri A.Ş. ("Bantaş") which is jointly controlled company and affiliates of Intertech; Deniz Kartlı Ödeme Sistemleri A.Ş. and Açık Deniz Radyo ve Televizyon İletişim Yayıncılık Ticaret ve Sanayi A.Ş.; Ekspres Bilgi İşlem ve Ticaret Anonim Şirketi ("Ekspres Bilgi İşlem") subsidiary of Deniz Yatırım, and Deniz Immobilien Service GMBH ("Deniz Immobilien") subsidiary of Denizbank AG, since they are non-financial subsidiaries are excluded from the consolidation process.

Important changes on consolidated subsidiaries in reporting period

On 6 December 2018, the Parent Bank increased the share capital of Denizbank AG by Euro 50 million in cash.

Consolidation principles for subsidiaries

Subsidiaries are the entities controlled directly or indirectly by the Parent Bank. Subsidiaries are consolidated using the full consolidation method.

Control is defined as the power over the investee, exposure or rights to variable returns from its involvement with the investee and the ability to use its power over the investee to affect the amount of the Bank's returns.

According to this method, the financial statements of the Parent Bank and its subsidiaries are combined on a line-by-line basis by adding together like items of assets, liabilities, income, expenses and off-balance sheet items, in preparing consolidated financial statements. Minority interests are presented separately in the consolidated balance sheet and consolidated income statement.

The carrying amount of the Parent Bank's investment in each subsidiary and the Parent Bank's portion of equity of each subsidiary are eliminated.

All intercompany transactions and intercompany balances between the consolidated subsidiaries and the Parent Bank are eliminated.

The financial statements which have been used in the consolidation are prepared as of 31 December 2018 and appropriate adjustments are made to financial statements to use uniform accounting policies for transactions and events alike in similar circumstances, in accordance with the principal of materiality.

See Note 3.1.c*

IV. Explanations on forward transactions, options and derivative instruments

DFS Group's derivative transactions mainly consist of foreign currency and interest rate swaps, foreign currency options and forward foreign currency purchase/sale contracts.

In accordance with TFRS 9, forward foreign currency purchase/sale contracts, swaps, options and futures are classified as "Derivative Financial Assets/Liabilities at Fair Value Through Profit or Loss". Derivative transactions are recorded with their fair values at contract date. Also, the liabilities and receivables arising from the derivative transactions are recorded as off-balance sheet items at their contractual notional amounts.

The derivative transactions are valued at fair value subsequent to initial recognition and are presented in the "Derivative Financial Assets/Liabilities at Fair Value Through Profit or Loss" items of the balance sheet depending on the resulting positive or negative amounts of the computed value. Gains and losses arising from a change in the fair value are recognized in the income statement. Fair values of derivatives are calculated using either discounted cash flow model or market value.

V. Explanations on interest income and expenses

Interest income and expenses are recognized by applying the effective interest method. As of January 1, 2018, DFS Group has started to calculate accruals for its non-performing loans. The net book value of the non-performing loans (Gross Book Value - Expected Loss) is discounted with effective interest rate and recorded on the gross carrying amount of the non-performing loan.

VI. Explanations on fees and commissions income and expenses

Fees and commissions income and expenses are accounted for on an accrual basis or effective interest method and TFRS 15 "Revenue from Contracts with Customers" standard according to their nature excluding wage income related to certain banking transactions that are recorded as income in the period in which they are collected. Revenues provided through contracts or through services related to transactions such as the purchase or sale of assets for a third party or legal entity are recognized as income at the time of collection.

VII. Explanations on financial assets

DFS Group categorizes its financial assets as "Fair Value Through Profit or Loss", "Fair Value Through Other Comprehensive Income" or "Measured at Amortized Cost". Such financial assets are recognized or derecognized according to TFRS 9 Financial Instruments Part 3 Issued for classification and measurement of the financial instruments published in the Official Gazette No. 29953 dated 19 January 2017 by the Public Oversight Accounting and Auditing Standards Authority. Financial assets are measured at fair value at initial recognition in the financial statements. During the initial recognition of financial assets other than "Financial Assets at Fair Value Through Profit or Loss", transaction costs are added to fair value or deducted from fair value.

DFS Group recognizes a financial asset into financial statements when it becomes a party to the contractual terms of a financial instrument. During the first recognition of a financial asset into the financial statements, business model determined by the Parent Bank management and the nature of contractual cash flows of the financial asset are taken into consideration. When the business model determined by the Parent Bank's management is changed, all affected financial assets are reclassified and this reclassification is applied prospectively. In such cases, no adjustments is made to earnings, losses or interest that were previously recorded in the financial statements.

a. Financial assets at fair value through profit or loss

"Financial assets at fair value through profit or loss" are financial assets other than the ones that are managed with business model that aims to hold to collect contractual cash flows or business model that aims to collect both the contractual cash flows and cash flows arising from the sale of the assets; and if the contractual terms of the financial asset do not lead to cash flows representing solely payments of principal and interest at certain date; that are either acquired for generating a profit from short term fluctuations in prices or are financial assets included in a portfolio aiming to short-term profit making. Financial assets at the fair value through profit or loss are initially recognized at fair value and remeasured at their fair value after recognition. All gains and losses arising from these valuations are reflected in the income statement.

DENİZBANK ANONİM ŞİRKETİ

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Consolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

b. Financial assets at fair value through other comprehensive income

In addition to Financial assets within a business model that aims to hold to collect contractual cash flows and aims to hold to sell, financial asset with contractual terms that lead to cash flows are solely payments of principal and interest at certain dates, they are classified as fair value through other comprehensive income.

Financial assets at fair value through other comprehensive income are recognized by adding transaction cost to acquisition cost reflecting the fair value of the financial asset. After the recognition, financial assets at fair value through other comprehensive income are remeasured at fair value. Interest income calculated with effective interest rate method arising from financial assets at fair value through other comprehensive income and dividend income from equity securities are recorded to income statement. "Unrealized gains and losses" arising from the difference between the amortized cost and the fair value of financial assets at fair value through other comprehensive income are not reflected in the income statement of the period until the acquisition of the asset, sale of the asset, the disposal of the asset, and impairment of the asset and they are accounted under the "Accumulated other comprehensive income or expense to be reclassified through profit or loss" under shareholders' equity.

Equity securities, which are classified as financial assets at fair value through other comprehensive income, that have a quoted market price in an active market and whose fair values can be reliably measured are carried at fair value. Equity securities that do not have a quoted market price in an active market and whose fair values cannot be reliably measured are carried at cost, less provision for impairment.

During initial recognition an entity can choose in an irrevocable way to record the changes of the fair value of the investment in an equity instrument that is not held for trading purposes in the other comprehensive income. In the case of this preference, the dividend from the investment is taken into the financial statements as profit or loss.

c. Financial assets measured at amortized cost

Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are classified as financial assets measured at amortized cost.

Financial assets measured at amortized cost are initially recognized at acquisition cost including the transaction costs which reflect the fair value of those instruments and subsequently recognized at amortized cost by using effective interest rate method. Interest income obtained from financial assets measured at amortized cost is accounted in income statement.

DFS Group has government securities with a maturity of 5-10 years and indexed to CPI in the 3 month real coupon ratios that remain constant throughout the maturity in the "Fair value through other comprehensive income" and "Measured at amortized cost" securities portfolios. As stated by Secretary of Treasury in CPI indexed investor guide, the reference indexes used in calculating the actual coupon payment amounts of these securities are based on the CPI indexes of two months ago. DFS Group predicts the inflation rate in parallel to those.

VIII. Explanations on expected credit loss

As of 1 January 2018, the Bank allocates provisions for expected credit loss on financial assets measured at amortized cost and measured at fair value through other comprehensive income, also loan commitments and non cash loans that are not carried at fair value through profit or loss in accordance with TFRS 9 'Financial Instruments' standard requirements according to the "Regulation on the Procedures and Principles for Classification of Loans by Banks and Provisions to be set aside" published in the Official Gazette dated 22 June 2016 numbered 29750.

The expected credit loss provision is weighted according to the probabilities determined by taking into consideration possible results and reflects the time value of money as a unbiased amount, past events, current conditions and forecasts of future economic conditions as reasonable and supportable information that can be obtained without incurring excessive cost or effort at the reporting date.

According to TFRS 9, after each financial instrument has been recognized for the first time in the financial statements for which there is a need for an impairment assessment, if there is a significant increase in the credit risk at each reporting date.

Estimated credit loss provision is calculated to estimate the loss if the financial instrument defaulted.

DENİZBANK ANONİM ŞİRKETİ

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Consolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

Due to the deterioration in credit quality since their initial recognition, financial instruments are allocated to one of the following stages:

Stage 1: Financial instruments with 12-months expected credit loss provision calculated, no significant increase in credit risk;
Stage 2: Financial instruments with a significant increase in credit risk and where the expected credit loss provision is calculated for lifetime;
Stage 3: impaired, non-performing (defaulted) loans.

The financial instruments in Stage 1 are financial instruments that has been recognized for the first time in the financial statements or do not have a significant increase in the credit risk after the initial recognition in the financial statements. For these instruments, credit risk impairment provision is calculated as the expected credit loss provision for 12-months default risk from the reporting date.

After the initial reporting period, a significant increase is observed in the credit risk and result of the provision for credit risk impairment for the financial instruments mentioned in Stage 2 is calculated as the expected loss provision over the remaining life from the reporting date.

Financial instruments in Stage 3 are assumed to be defaulted and therefore impaired. For these assets, lifetime expected credit losses are recognized.

The expected credit loss provision is calculated as whole (collective) or separate (individual).

Financial instruments with common credit risk characteristics are grouped for the expected loan loss provisions calculated collectively.

In the Parent Bank, grouping of credit risks according to common characteristics was made according to 'risk segments'. The standards for the separation of credit risks by risk segments have been prepared in accordance with the Basel II recommendations for the assessment of capital adequacy based on credit risk in the context of the standard internal rating-based approach ("IRB"). The purpose of classifying credit risks according to risk segments is to determine the approach for analyzing and evaluating credit risk for the relevant risk segment.

The credit risk classification is as follows:

- Segment classification for non-retail loans is made at the counterparty level to collect all the risks of the counterparty only to a risk segment based on the credit products requested by the counterparty;
- Segment classification for retail loans is based on both product level and counterparty characteristics. This means that Credit risks of the other party can be classified into different risk segments.

The main groupings based on risk segments for the expected credit loss provision calculation are as follows:

- Corporate / Commercial loans
- OBI loans
- KBI loans
- Agricultural loans
- Consumer loans
- Mortgage loans
- Vehicle loans
- Overdraft
- Credit cards
- Loans granted to local governments
- Project financing loans
- Central administrations
- Banks

The expected loan loss provisions calculated collectively are calculated by using the components such as default amount (DA), default probability (DP), loss in default (LiD) and effective interest rate of the loan.

Default amount

The default amount is the expected economic receivable at the time of default.

In order to calculate the expected loan loss provision, the DA value of each loan is calculated by discounting the expected principal and interest payments from the future dates to the reporting date using the effective interest rate. The loan conversion rate is also applied to the DA value.

DENİZBANK ANONİM ŞİRKETİ

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Consolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

Probability of default

The probability of default indicates the probability of default of the debtor in a certain period of time.

There are two types of PD values calculated in accordance with TFRS 9 requirements:

- 12-month PD: Estimate the probability of default for 12 months after the reporting date of the financial instrument.
- Lifetime default probability: Estimated probability of default over the life of the financial instrument.

The credit ratings of the internal rating systems used by the Parent Bank in credit allocation processes are used to classify the customers in the expected credit loss provision calculations.

Internal rating systems used for non-individual customers are mainly divided into Corporate / Commercial, OBI, CBI and Agriculture model groups. The internal ratings in the Corporate / Commercial and OBI model groups take into account quantitative characteristics such as indebtedness, liquidity and size of the customer as well as qualitative assessment elements. The internal ratings in the KBI and Agriculture model groups reflect behavioral information such as the trend in the use rate of the entire banking sector in the banking sector, the duration of use of the CBM product in the Parent Bank, or the recent frequency of delays in loan payments.

Internal rating systems for retail consumers are differentiated at level Consumer, Mortgage, Vehicle Loans, Overdraft and Credit Card products group. In order to produce these scores, behavioral data such as the customer's trend in the limit usage rate in the Bank and the sector, the frequency of the delays in the current period, customers' ownerships of the cross products and their payment habits of the other products are used.

In the first step, the outputs of the internal rating systems are grouped on the basis of risk segments according to the common characteristics of credit risks for PD calculations in accordance with TFRS 9. Historical default data of these groups were prepared. A basket creation analysis was performed for the default data obtained for the purpose of obtaining reasonable and valid accumulated default rates.

PD curves are drawn by running regression method used by proper distribution through data obtained for the baskets. Since the PD values obtained represent PD values 'throughout the life cycle', they were converted to 'instant' PD values in accordance with TFRS 9. In the last step, macroeconomic expectations for PD value are reflected.

For credit risk groups that do not have sufficient historical default data, external default statistics or minimum PD rates in Basel documentation are used.

The internal validation of the process described above was carried out at the end of 2018.

Loss given default

In case of default, the loss refers to the ratio of the economic loss to the debtor has defaulted.

For the purpose of calculating the expected credit loss provision, two types of LGD rate is calculated: LGD ratio for the unsecured credit risk and LGD ratio for the collateralized credit risk.

The LGD ratio for unsecured credit risk was calculated using the Parent Bank's previous collection data and grouped on the basis of risk segments based on common characteristics of credit risks.

The following TFRS 9 requirements are taken into account for the LGD ratio calculation for unsecured credit risk:

- Long-term LGD is used (excluding regression effect)
- In the case of conservative approach it is excluded
- Excludes indirect costs in the case of existence
- The result figures are discounted by the effective interest rate

The LGD ratio for collateralized credit risk is calculated by considering the collateral structure for each loan. To calculate this ratio, the rates of consideration taken for the Parent Bank's collateral type, the periods of cash conversion and the effective interest rate of the loan to which the collateral belongs are used. Historical data and in the case of absent of it best estimates are used to determine the relevant rates of consideration and cash-through periods.

For unsecured credit risk groups with insufficient historical collection data, the standard rate included in the Basel documentation is used.

The internal validation of the process described above was carried out at the end of 2018.

DENİZBANK ANONİM ŞİRKETİ

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Consolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

Effective interest rate

The effective interest rate is the discount rate that equals the future expected cash receipts and collections that are expected to occur over the expected life of the financial asset or liability to the gross carrying amount of the financial asset or the amortized cost of the financial liability.

Other than the expected credit loss provisions calculated collectively, the expected credit loss provisions of the financial instruments that are subject to a coverage over a certain risk or which will be determined by the Parent Bank management are calculated based on the separate (individual) evaluation. In accordance with the Guideline on Calculation of Provision for Loan Losses in Accordance with TFRS 9 announced by the BRSA on 26 February 2018, the calculation was made using at least two scenarios for each financial instrument in accordance with the discounted cash flow method. The ultimate expected credit loss provision of the financial instrument is based on the fact that the expected credit loss provisions calculated for the related scenarios are weighted by the probability of realization of the scenarios.

Low credit risk

In accordance with TFRS 9, the risk of the default of the financial instrument is low, the borrower has a strong structure to meet the contractual cash flow obligations in the short term, and the negative changes in the economic conditions and operating conditions in the longer term reduce the power of the debtor to fulfill the contractual cash flow obligations. the credit risk of the financial instrument is considered to be low.

It has not been concluded that financial instruments have a low credit risk only if the risk of loss of the financial instruments is considered to be low due to the value of the collateral and if the credit risk of the related financial instrument is not evaluated as low.

Furthermore, it is not considered that the financial instruments have a low credit risk only because they have less risk than the other financial instruments of the enterprise or the credit risk of the region where the business is operating.

In the case of low risk determination of any financial instrument and also assuming that the first contact of the credit risk is not significantly increased after the financial statements, the relevant financial instrument is evaluated in Stage 1.

Financial instruments considered to have a low credit risk under TFRS 9 are presented below:

- Receivables from CBRT.
- Risks in the case of the counterparty is the TC Treasury
- Loans to subsidiaries of the main shareholder.
- Transactions with banks with AAA rating

The Participation of Senior Management of the Bank to the IFRS 9 Process

Principles and Procedures for the Classification of Loans and Provisions to be Reserved in the Official Gazette dated June 22, 2016 and numbered 29750 within the scope of the regulations related to internal systems, risk management, corporate governance and credit classification, which are issued pursuant to the Banking Law No. 5411 In accordance with Article 20 of the By-Law, 'TFRS 9 Management Committee' has been established in accordance with the 'Guide on the Calculation of Provision for Loan Loss Expected under TFRS 9' prepared by the BRSA.

In accordance with TFRS 9, the Committee is responsible for the control of the classification and measurement of financial instruments, the approval of business models and an adequate calculation of the expected credit loss provision. The Committee is also responsible for ensuring that the DFS Group's existing policies and processes' control to establish and maintain in accordance with TFRS 9 and relevant good practice guidelines

The Committee is responsible for ensuring that the expected credit loss provisions are based on reliable and robust methods, that these methods are documented, developed, updated in a timely manner and are accounted for as required.

Executive Board Member responsible for Loans, Assistant General Manager responsible for Financial Affairs, Assistant General Managers responsible for the duties of the Board member charging with loans and Assistant General Manager responsible for Risk Management are the among of members of Committee.

IX. Explanations on offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported in the balance sheet when the DFS Group has a legally enforceable right to offset the recognized amounts and there is an intention to collect/pay the related financial assets and liabilities on a net basis, or to realize the asset and settle the liability simultaneously.

DENİZBANK ANONİM ŞİRKETİ

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of

Originally Issued In Turkish,
See Note 3.1.c*

X. Explanations on sale and repurchase agreements and transactions related to the lending of securities

Government bonds and treasury bills sold to customers under repurchase agreements are classified according to purpose of being hold into portfolio on the assets side of the accompanying consolidated balance sheet within "Financial assets at fair value difference through profit or loss", "Financial assets at fair value difference through other comprehensive income" and "Measured at amortized cost" and are measured according to valuation principles of relating portfolio. Funds obtained from repurchase agreements are presented on the liability side of the consolidated balance sheet within the account of "Receivables from money market". The accrual amounts corresponding to the period is calculated over the sell and repurchase price difference determined in repurchase agreements. Accrued interest expenses calculated for funds obtained from repurchase agreements are presented in "Due to money markets" account in liability part of the consolidated balance sheet.

Securities received with resale commitments are presented under "Due from money markets" line in the balance sheet. The accrual amounts for the corresponding part to the period of the resale and repurchase price difference determined in reverse repurchase agreements are calculated using the effective interest method. The Parent Bank has no securities which are subject to borrowing activities.

XI. Explanations on assets held for sale and discontinued operations and related liabilities

Property and equipment held-for-sale consist of tangible assets that were acquired due to non-performing receivables, and are accounted in the financial statements in accordance with the regulations of "Turkish Financial Reporting Standard for Assets Held for Sale and Discontinued Operations (TFRS 5)".

A discontinued operation is a division of a bank that is either disposed or held for sale and represents a separate major line of business or geographical area of operations; or is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations; or is a subsidiary acquired exclusively with a view to resale.

As 31 December 2018, DFS Group does not have non-current assets held for sale and discontinued operations.

XII. Explanations on goodwill and other intangible assets

a. Goodwill

Goodwill represents the excess of the total acquisition costs over the shares owned in the net assets of the acquired company at the date of acquisition. The "net goodwill" resulted from the acquisition of the investment and to be included in the consolidated balance sheet, is calculated based on the financial statements of the investee company as adjusted according to the required accounting principles. Assets of the acquired company which are not presented on financial statements but separated from goodwill represented with fair values of tangible assets (credit card brand equity, customer portfolio etc.) and/or contingent liabilities to financial statements in process of acquisition.

In accordance with "TFRS 3 – Business Combinations", the goodwill is not amortized. It is tested yearly or if there is any indication of impairment according to "Turkish Accounting Standard 36 (TAS 36) - Impairment of Assets".

b. Other intangible assets

Intangible assets are initially measured at acquisition cost and other costs which are required for activation of the financial asset in accordance with TAS 38 "Intangible Assets" standard. Intangible assets are evaluated over excess value of net cost that derived from accumulated depreciation and accumulated impairment after recognition period.

The Group's intangible assets consist of software, license rights, data/telephone line, total values of credit cards and personal loans portfolio.

Intangible assets purchased before 1 January 2003 and after 31 December 2006 are amortized on a straight-line basis; and those purchased between the aforementioned dates are amortized by using the double-declining method. Useful life of an asset is estimated by assessment of the expected life span, technical, and technological wear outs of the asset. The amortization rates used approximate the useful lives of the assets.

Maintenance costs associated with the computer software that are in use are expensed at the period of occurrence.

DENİZBANK ANONİM ŞİRKETİ

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Consolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

XIII. Explanations on tangible assets

DFS Group has passed to revaluation model from cost model in the framework of TAS 16 "Tangible Fixed Assets" in valuation of properties in use as of 31 December 2016, while it tracks all of its remaining tangible fixed assets by cost model in accordance with TAS 16. Positive differences between property value in expertise reports prepared by licensed valuation firms and net carrying amount of the related property are recorded under equity accounts while negative differences are posted to the income statement.

	Estimated Economic Life (Year)	Depreciation Rate
Movables		
- Office machinery	4 Years	10 % - 50 %
- Furniture and fixtures	5 Years	10 % - 50 %
- Motor vehicles	5 Years	20 % - 50 %
- Other equipment	10 Years	2,50 % - 50 %
Real estate	50 Years	2 % - 3,03 %

Maintenance and repair costs that are routinely made on tangible assets are expensed. The capital expenditures incurred in order to increase the capacity of the tangible asset or to increase the future benefit of the asset are capitalized on the cost of the tangible asset.

There are no restrictions such as pledges and mortgages on tangible assets or no purchase commitments.

XIV. Explanations on investment properties

Land and buildings that are held for rental yields or for capital appreciation or both, rather than held in the production or supply of goods or services or for administrative purposes or for the sale in the ordinary course of business are classified as "investment property". Investment property is carried at fair value. Gains or losses arising from a change in the fair value of investment property are recognized in the income statement in the period in which they occur.

Investment property is derecognized through disposal or withdrawal from use and when no future economic benefit is expected from its disposal. Gains or losses arising from the disposal of investment property are recognized in the related statement of income or expense accounts in the period in which they occur.

XV. Explanations on leasing activities

Fixed assets acquired through financial leasing are recognized in tangible assets and depreciated in line with the fixed assets group they relate to. The obligations under finance leases arising from the lease contracts are presented under "Finance Lease Payables" account in the balance sheet. Interest expense and currency exchange rate differences related to leasing activities are recognized in the income statement.

DFS Group has finance lease transactions as "lessor" via its subsidiary, Deniz Leasing. The lease receivables related to leased assets are recorded as finance lease receivables. The asset subject to the financial leasing is presented in the balance sheet as receivable equal to the net leasing amount. Interest income is recognized over the term of the lease using the net investment method which reflects a constant periodic rate of return and the unrecognized portion is followed under unearned interest income account.

Transactions regarding operational agreements are accounted on an accrual basis in accordance with the terms of the related contracts.

XVI. Explanations on provisions and contingent liabilities

Provisions other than specific and general provisions for loans and other receivables and free provisions for probable risks, contingent liabilities are provided for in accordance with TAS 37 "Provisions, Contingent Liabilities and Contingent Assets". Provisions are accounted for immediately when obligations arise as a result of past events and a reliable estimate of the obligation is made by DFS Group management. Whenever the amount of such obligations cannot be measured, they are regarded as "Contingent". If the possibility of an outflow of resources embodying economic benefits becomes probable and the amount of the obligation can be measured reliably, a provision is recognized. If the amount of the obligation cannot be measured reliably or the possibility of an outflow of resources embodying economic benefits is remote, such liabilities are disclosed in the Footnote.

DENİZBANK ANONİM ŞİRKETİ

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Consolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

XVII. Explanations on obligations for employee benefits

Provision for employee benefits has been accounted for in accordance with TAS 19 "Employee Benefits".

The Parent Bank in accordance with existing legislation in Turkey, is required to make retirement and notice payments to each employee whose employment is terminated due to reasons other than resignation or misconduct. Except to the this extents, the Parent Bank is required to make severance payment to each employee whose employment is terminated due to retirement, death, military service and to female employees following their marriage within one year leave the job of their own accords by fourteenth clause of Labor Law.

DFS Group, in accordance with TAS 19 "Employee Benefits" realized provision registry under the condition of prediction of present value of possible liability in the future related to employee termination benefits. Losses and gains which occur after 1 January 2013 are adjusting under the Equity Accounts in accordance with updated TAS 19 Standard.

The Bank has recognized vacation pay liability amount which is calculated from unused vacation to financial statement as a provision.

XVIII. Explanations on taxation

a. Current taxes

By the provisional article added to Corporate Tax Law no.5520 by the Clause 91 of law no.7061, current tax rate is declared to be 22% for corporations in 2018, 2019 and 2020 taxation periods.

Companies file their corporate tax returns between the 1st and 25th days of the following four months period after to which they relate and the payments are made until the end of that month.

The provision for corporate tax for the period is reflected as the "Current Tax Liability" in the liabilities and "Current Tax Provision" in the income statement.

In accordance with the Corporate Tax Law, tax losses can be carried forward for five years. The tax authorities can inspect tax returns and the related accounting records back to a maximum period of five years.

Besides institutions reside in Turkey, dividends paid to the offices or the institutions earning through their permanent representatives in Turkey are not subject to withholding tax. According to the decision no. 2006/10731 of the Council of Ministers published in the Official Gazette no. 26237 dated 23 July 2006, certain duty rates included in the articles no.15 and 30 of the new Corporate Tax Law no.5520 are revised. In this respect, the withholding tax rate on the dividend payments other than the ones paid to the nonresident institutions generating income in Turkey through their operations or permanent representatives and the institutions residing in Turkey is 15%. While applying the withholding tax rates on dividend payments to the foreign based institutions and the real persons, the withholding tax rates covered in the related Avoidance of Double Taxation Treaty are taken into account. Addition of profit to capital is not considered as profit distribution and therefore is not subject to withholding tax.

The foreign subsidiaries of DFS Group that operate in Austria, the Russian Federation and Cyprus are subject to corporate tax rates of 25%, 20% and 2%, respectively.

Tax effects of items that are accounted for under the shareholders' equity are also recorded under equity accounts.

b. Deferred taxes

In accordance with TAS 12 "Income Taxes", DFS Group accounts for deferred taxes based on the tax effect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Individual deferred tax assets and liabilities of the consolidated entities have been offset in their separate financial statements, but have not been offset in the consolidated balance sheet. As a result of offsetting, as of 31 December 2018 deferred tax assets of TL 1.213.623 (31 December 2017: TL 216.618) and deferred tax liabilities of TL 25.828 (31 December 2017: TL 27.217) have been recognized in the accompanying financial statements.

Deferred tax liabilities are generally recognized for all taxable temporary and deferred tax assets are recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Deferred tax asset was not computed over general loan loss provisions according to the circular of BRSA numbered BRSA.DZM.2/13/1-a-3 and dated 8 December 2004. Deferred tax assets has started to be recognized over temporary expected provision losses differences according to TFRS 9 articles from 1 January 2018.

Deferred taxes directly related to equity items are recognized and offset in related equity accounts.

c. Transfer pricing

In the framework of the provisions on "Disguised Profit Distribution Through Transfer Pricing" regulated under article 13 of Corporate Tax Law no. 5520, pursuant to the Corporate Tax Law General Communiqué no. 1, which became effective upon its promulgation in the Official Gazette dated 3 April 2007 and numbered 26482, Corporate Tax Law General Communiqué no. 3, which became effective upon its promulgation in the Official Gazette dated 20 November 2008 and numbered 27060, Council of Ministers Decree no. 2007/12888, which became effective upon its promulgation in the Official Gazette dated 6 December 2007 and numbered 26722, Council of Minister Decree no. 2008/13490, which became effective upon its promulgation in the Official Gazette dated 13 April 2008 and numbered 26846, "General Communiqué No. 1 on Disguised Profit Distribution Through Transfer Pricing", which became effective upon its promulgation in the Official Gazette dated 18 November 2007 and numbered 26704 and "General Communiqué No. 2 on Disguised Profit Distribution Through Transfer Pricing", which became effective upon its promulgation in the Official Gazette dated 22 April 2008 and numbered 26855, "General Communiqué No. 3 on Disguised Profit Distribution Through Transfer Pricing", which became effective upon its promulgation in the Official Gazette dated 7 December 2017 and numbered 30263, profits shall be deemed to have been wholly or partially distributed in a disguised manner through transfer pricing if companies engage in the sales or purchases of goods or services with related parties at prices or amounts defined contrary to the arm's length principle. Buying, selling, manufacturing and construction operations and services, renting and leasing transactions, borrowing or lending money, bonuses, wages and similar payments are deemed as purchase of goods and services in any case and under any condition.

Corporate taxpayers are obliged to fill in the "The Form on Transfer Pricing, Controlled Foreign Corporation and Thin Capital" regarding the purchases or sales of goods or services they perform with related parties during a fiscal period and submit it to their tax office in the attachment of the corporate tax return.

Furthermore, the taxpayers registered in the Large Taxpayers Tax Administration (Büyük Mükellefler Vergi Dairesi Başkanlığı) must prepare the "Annual Transfer Pricing Report" in line with the designated format for their domestic and cross-border transactions performed with related parties during a fiscal period until the filing deadline of the corporate tax return, and if requested after the expiration of this period, they must submit the report to the Administration or those authorized to conduct tax inspection.

XIX. Additional explanations on borrowings

Borrowings are initially recognized at cost representing their fair value and remeasured at amortized cost based on the internal rate of return at next periods. Foreign currency borrowings have been translated using the foreign currency buying rates of the Parent Bank at the balance sheet date. Interest expense incurred for the period has been recognized in the accompanying financial statements.

General hedging techniques are used for borrowings against liquidity and currency risks. The Parent Bank, if required, borrows funds from domestic and foreign institutions. The Parent Bank also borrows funds in the forms of syndication loans and securitization loans from foreign institutions.

XX. Explanations on issuance of share certificates

As at 31 December 2018 and 2017, the Parent Bank does not have issuance of share certificates.

XXI. Explanations on acceptances

Acceptances are realized simultaneously with the customer payments and recorded in off-balance sheet accounts, if any.

As of the balance sheet date, there are no acceptances recorded as liability in return for assets.

XXII. Explanations on government grants

As of the balance sheet date, DFS Group does not have any government grants.

XXIII. Explanations on segment reporting

Segment reporting is presented in Note XII of Section Four.

XXIV. Explanations on TFRS 9 financial instruments standard

TFRS 9 "Financial Instruments", which is effective as at 1 January 2018 replaced TAS 39 Financial Instruments: recognition and measurement. TFRS 9 sets out the new principles for the classification and measurement of financial instruments, impairment for credit risk on financial assets and hedge accounting.

Classification and measurement of financial assets

According to TFRS 9 requirements, classification and measurement of financial assets will depend on the business model within which financial assets are managed and their contractual cash flow characteristics whether the cash flows represent "solely payments of principal and interest (SPPI)".

Assessment whether contractual cash flows are solely payments of principal and interest:

For the purposes of this assessment, "principal" is defined as the fair value of the financial asset on initial recognition. "Interest" is defined as consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the DFS Group considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Group considers contingent events that would change the amount and timing of cash flows, leverage features, prepayment and extension terms, terms that limit the Group's claim to cash flows from specified assets, features that modify consideration for the time value of money.

DFS Group fulfills the on-balance sheet classification and measurement criteria by applying the procedures described above for all financial assets.

Upon initial recognition each financial asset will be classified as either fair value through profit or loss, amortized cost or fair value through other comprehensive income. As the requirements under TFRS 9 are different than the assessments under the existing TAS 39 rules, the classification and measurement of financial liabilities remain largely unchanged under TAS 39.

Explanations of the effect of DFS Group's application of TFRS 9 can be found below.

a. Classification and measurement of financial assets

	Before TFRS 9		In scope of TFRS 9	
	Measurement base	Book value	Measurement base	Book value
Financial assets		31 December 2017		1 January 2018
Cash and Balances with the Central Bank	Amortized cost	16.968.812	Amortized cost	16.968.812
Banks and Money Markets	Amortized cost	11.443.300	Amortized cost	11.443.300
Securities	Fair value through profit or loss	81.955	Fair value through profit or loss	141.114
Securities	Fair value through other comprehensive income	7.046.033	Fair value through other comprehensive income	6.983.669
Securities	Amortized cost	5.335.639	Amortized cost	5.335.639
Derivative Financial Assets	Fair value through profit or loss	975.808	Fair value through profit or loss	975.808
Unconsolidated and Non-financial Subsidiaries	Historical cost	41.701	Fair value through other comprehensive income	645.552
Loans (Gross)	Amortized cost	117.957.915	Amortized cost	117.957.915

b. Reconciliation of statement of financial position balances from TAS 39 to TFRS 9

	Book value before TFRS 9 31 Dec. 2017	Reclassifications	Remeasurements	Book value after TFRS 9 1 Jan. 2018
Financial assets				
Fair value through profit or loss				
Balance before reclassification (trading purpose)	81.955			
Reclassified from available for sale financial assets		59.159	-	
Balance after reclassification				141.114
Fair value through other comprehensive income				
Balance before reclassification (available for sale)	7.046.033			
Valuation difference on available for sale fin. asset		-	(3.205)	
Reclassified to fin. assets at fair value through profit or loss		(59.159)	-	
Balance after reclassification				6.983.669
Unconsolidated and non-financial subsidiaries				
Balance before TFRS 9	41.701			
Fair value difference		-	603.851	
Balance after TFRS 9				645.552

The reasons for the classification of certain financial assets held by DFS Group as above in accordance with the TFRS 9 classification and measurement provisions are explained below.

Equity securities designated at fair value through profit or loss in accordance with TFRS 9 standard

The Group has classified equity securities amounting to TL 59.159, which were classified as available-for-sale financial assets to designated at fair value through profit or loss as of the first application date of TFRS 9.

Classification of financial instruments based on equity in accordance with TFRS 9 standard

The Group has decided to measure its unconsolidated and non-financial subsidiary, Intertech, which is not traded in an organized market, at Fair Value Through Other Comprehensive Income, irrevocably. The accumulated fair value changes of this subsidiary will not be reclassified to profit and loss if it is disposed of.

Reclassification of categorized items without a change in measurement

In addition to the statements above, since the previous categories under TAS 39 of the debt instruments below were "out of use", they are reclassified in new categories under TFRS 9 without changing any measurement principles:

- (i) Previously classified as "available-for-sale" and as of 1 January 2018 classified as "Fair Value Through Other Comprehensive Income".
- (ii) Previously classified as held-to-maturity and as of 1 January 2018 classified as "Measured at Amortized Cost".

c. Reconciliation of the opening balances of the provision for expected credit losses to TFRS 9

The table below shows the reconciliation of the provision for impairment of DFS Group as of 31 December 2017 and the provision for the expected loss model as measured in accordance with TFRS 9 as of 1 January 2018.

	Book value Before TFRS 9 31 December 2017	Remeasurements	Book value After TFRS 9 1 January 2018
Loans	4.828.247	884.279	5.712.526
Stage 1	1.015.986	110.857	1.126.843
Stage 2	299.763	1.184.549	1.484.312
Stage 3	3.121.676	(20.305)	3.101.371
Others (*)	390.822	(390.822)	-
Financial assets (**)	26.310	(13.841)	12.469
Non-cash loans (***)	204.037	472	204.509
Stage 1 and Stage 2	105.552	67.749	173.301
Stage 3	98.485	(67.277)	31.208
Total	5.058.594	870.910	5.929.504

(*) Includes free provisions that have been booked among "12.5 Other provisions" for certain risks that could have risen in the future by DFS Group at 31 December 2017.

(**) Within the scope of TFRS 9, provisions include provisions for Amortized Cost, Fair Value Through Other Comprehensive Income, Receivables from Banks, Receivables from Money Markets and Other Assets.

(***) Before TFRS 9, the expected credit loss for stage 1 and 2 non-cash loans is classified "12.1 General Provision" and expected credit loss for stage 3 non-cash loans is classified "12.5. Other Provisions" under liabilities. In accordance with TFRS 9, the expected loss provisions for the 1st, 2nd and 3rd stage non-cash loans are in the "10.4 Other Provisions" column in the liabilities.

d. TFRS 9 transition effects on equity

According to paragraph 15 of Article 7 of TFRS 9 Financial Instruments Standard, published in the Official Gazette numbered 29953 dated 19 January 2017, it is stated that it is not compulsory to restate previous period information in accordance with TFRS 9 and if the previous period information is not revised, it is stated that the difference between the book value of 1 January 2018 at the date of application should be reflected in the opening aspect of equity. The explanations about the transition effects to TFRS 9 presented in the equity items under the scope of this article are given below.

Negative difference of TL 870.910 between the provision for impairment of the previous period of DFS Group and the provision for expected credit loss that is measured in accordance with TFRS 9 as of 1 January 2018 is classified as "Prior Period Net Profit / (Loss)" while difference of TL 2.904 is classified as "Other Accumulated Comprehensive Income That Will Be Reclassified in Profit or Loss" in shareholders' equity.

As stated in the Communiqué on "Uniform Chart of Accounts and Prospectus" issued on 20 September 2017, for general provisions (TFRS 9 expected credit loss provisions for Stage 1 and Stage 2 loans), recognition of deferred tax assets has started as of 1 January 2018. Within this scope, deferred tax assets amounting to TL 535.517 have been reflected to the opening financials of 1 January 2018 and the related amount has been classified under "Prior Period Net Profit / (Loss)" in shareholders' equity. For the specific provisions (TFRS 9 expected credit loss provisions for Stage 3 loans), which have been cancelled due to TFRS 9 transition, corporate tax loss amounting to TL 26.310 is also classified under "Prior Period Net Profit / (Loss)" in equity as of 1 January 2018.

Negative remeasurement difference amounting TL 2.500, after tax, for the security amounting to TL 3.205 priorly classified among available for sale securities and measured at historical cost before 1 January 2018 and reclassified to fair value through other comprehensive income after TFRS 9, is classified as "Other Accumulated Comprehensive Income That Will Not Be Reclassified in Profit or Loss" in shareholders' equity. Additionally, remeasurement difference amounting TL 14.839, after tax, for the security amounting to TL 59.159 priorly classified among available for sale securities before 1 January 2018 and reclassified to fair value through profit or loss after TFRS 9, has given way to a transition between "Other Accumulated Comprehensive Income That Will Be Reclassified in Profit or Loss" and "Prior Period Net Profit / (Loss)" in shareholders' equity. Remeasurement difference amounting TL 603.851 for Intertech, the unconsolidated and non-financial subsidiary of DFS Group, which was being measured at historical cost and that is reclassified to fair value through other comprehensive income after TFRS 9, is classified as "Other Accumulated Comprehensive Income That Will Not Be Reclassified in Profit or Loss" in shareholders' equity.

XXV. Explanations on prior period accounting policies not valid for the current period

TFRS 9 standard came into effect instead of TAS 39 standard as of 1 January 2018. Accounting policies that have lost their validity with the transition of TFRS 9 are given below:

Financial assets are classified in four categories; as financial assets at fair value through profit or loss, financial assets available-for-sale, investments held-to-maturity, and loans and receivables. Sale and purchase transactions of the financial assets mentioned above are recognized and derecognized at the "Settlement dates". The appropriate classification of financial assets of the Bank is determined at the time of purchase by the Bank management, taking into consideration the purpose of the investment.

a. Financial assets at fair value through profit or loss

Financial assets held for trading

Trading financial assets are financial assets which are either acquired for generating a profit from short-term fluctuations in prices or are financial assets included in a portfolio aimed at short-term profit making.

Trading financial assets are recognized at their fair value in the balance sheet and remeasured at their fair value after recognition.

All gains and losses arising from valuations of trading financial assets are reflected in the income statement. In accordance with descriptions of the uniform chart of accounts, favorable difference between acquisition cost of a financial asset and its discounted value are recognized in "Interest Income"; and in the case of fair value of asset is above its discounted value, favorable difference between them are recognized in "Capital Market Transactions Profits" account, in the case of fair value is below discounted value, unfavorable difference between them are recognized in "Capital Market Transactions Losses" account. In the case that the financial asset is sold before its maturity, consisted gains or losses are accounted with the same principals.

Derivative financial assets are classified as trading financial assets unless they are used for hedging purposes.

Financial assets designed at fair value through profit or loss

DFS Group does not have any securities designated as "financial assets at fair value through profit or loss".

b. Investment securities available-for-sale

Available-for-sale assets are financial assets that are not loans and receivables, held to maturity investments and financial assets at fair value through profit or loss.

After the recognition, financial assets available for sale are remeasured at fair value. Interest income arising from available for sale calculated with "Effective interest method" and dividend income from equity securities are reflected to the income statement. Unrealized gains and losses arising from the differences of fair value of securities classified as available for sale and that is representing differences between amortized cost calculated with effective interest method and fair value of financial assets are recognized under the account of "Marketable securities valuation differences" under shareholder's equity. Unrealized profits and losses are not reclassified to the income statement until these securities are sold or matured and the related fair value differences accumulated in the shareholders' equity are then transferred to the income statement.

c. Investment securities held-to-maturity

Held to maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity that an entity has the positive intention and ability to hold to maturity other than those that the entity upon initial recognition designates as at fair value through profit or loss, those that the entity designates as available for sale; and those that meet the definition of loans and receivables.

Held to maturity financial assets are initially recognized at acquisition cost including the transaction costs which reflects the fair value of the those instruments and subsequently recognized at amortized cost by using effective interest rate method.

Interest income obtained from held to maturity financial assets are presented in the line of "interest received from securities portfolio – investment securities held-to-maturity" in the consolidated statement of income.

There are no financial assets that are banned from being classified as investment securities held-to maturity for two years due to the violation of the tainting rule.

Originally Issued In Turkish,
See Note 3.1.c*

DFS Group has government securities with a maturity of 5-10 years and indexed to CPI in the 3 month real coupon ratios that remain constant throughout the maturity in the available for sale and held to maturity securities portfolios. As stated by Secretary of Treasury in CPI indexed investor guide, the reference indexes used in calculating the actual coupon payment amounts of these securities are based on the CPI indexes of 2 months ago. DFS Group predicts the inflation rate in parallel to those.

d. Loans and specific provisions

Loans and receivables are non-derivative financial assets that are not classified as either financial assets at fair value through profit or loss or financial assets available for sale, are unlisted in an active market and whose payments are fixed or can be determined. Loans and receivables are carried initially by adding acquisition cost to transaction costs which reflect fair value and subsequently recognized at the discounted value calculated using the "Effective interest rate method".

Foreign currency loans are subject to evaluation and currency exchange differences arising from such re-measurements are reflected in "Foreign Exchange Gains/Losses" account in the consolidated income statement. Foreign currency-indexed loans are initially recognized in their Turkish Lira equivalents; repayments are calculated with exchange rate at payment date, and currency exchange differences occurred are reflected in profit/loss accounts.

Specific and general allowances are calculated in accordance with the "Regulation on the Principles and Procedures Related to the Determination of the Loans and Other Receivables for which Provisions Shall be Set Aside by Banks and to the Provisions to be Set Aside" published in the Official Gazette numbered 26333 dated 1 November 2006. On the other hand, deferred tax asset is not allocated over the amount of general loan loss provisions for possible losses in accordance with the circular of BRSA dated 8 December 2004 no. BRSA.DZM.2/13/1-a-3.

When collections are made from loans that have been provided for, they are credited to the income statement accounts "Provision for Loan Losses or Other Receivables" if the provision was made in the current year, otherwise such collections are credited to "Other Operating Income" account with respect to allowances made in prior years. The interest income recovered is booked in "Other Interest Income" account.

e. Explanations on impairment of financial assets

The existence of objective evidence whether a financial asset or group of financial assets is impaired, is assessed at each balance sheet date. If such evidence exists, impairment provision is provided.

Impairment for held-to-maturity financial assets carried at amortized cost is calculated as the difference between the present value of the expected future cash flows discounted based on the "Effective interest method" and its carrying value. Regarding available-for-sale financial assets, when there is objective evidence that the asset is impaired, the cumulative loss that had been recognized in other comprehensive income shall be reclassified from equity to profit or loss as a reclassification adjustment even though the financial asset has not been derecognized.

XXVI. Explanations on other matters

None.

c. Main differences between "Equity" amount mentioned in the prior tables' equity statements and "Equity" amount in consolidated balance sheet arise from general provisions and subordinated loans. The portion of main amount to credit risk of general provision up to 1,25% and subordinated credits are considered as supplementary capital in the calculation of "Equity" amount included in equity statement as result of deductions mentioned in scope of Regulation on Equity of Banks. Additionally, Losses reflected to equity are determined through excluding losses sourcing from cash flow hedge reflected in equity in accordance with TAS which are subjects of discount from Core Capital. On the other hand, leasehold improvement costs monitored under Plant, Property and Equipment in balance sheet, intangible assets and deferred tax liabilities related to intangible assets, net carrying value of properties acquired in return for receivables and kept for over three years and certain other accounts determined by the Board are taken into consideration in the calculation as assets deducted from capital.

II. Explanations related to the consolidated credit risk

a. Information on risk concentrations by debtors or group of debtors or geographical regions and sectors, basis for risk limits and the frequency of risk appraisals

Credit risk is the risk and losses likely to incur due to the counterparties of the Parent Bank and/or its consolidated subsidiaries and associates not meeting in full or in part their commitments arising from the contracts.

Credit risk limits of the customers are allocated based on the customers' financial strength and the credit requirement, within the credit authorization limits of the branches, the credit evaluation group, the regional directorates, the executive vice presidents responsible from loans, the general manager, the credit committee and the Board of Directors; on condition that they are in compliance with the related regulations.

Credit risk limits are determined for debtors or group of debtors. Credit risk limits of the debtors, group of debtors and sectors are monitored on a weekly basis.

Information on determination and distribution of risk limits for daily transactions, monitoring of risk concentrations related to off-balance sheet items per customer and dealer basis

Risk limits and allocations relating to daily transactions are monitored on a daily basis. Off-balance sheet risk concentrations are monitored by on-site and off-site investigations.

Information on periodical analysis of creditworthiness of loans and other receivables per legislation, inspection of account vouchers taken against new loans, if not inspected, the reasons for it, credit limit renewals, collaterals against loans and other receivables

The Group targets a healthy loan portfolio and in order to meet its target there are process instructions, follow-up and control procedures, close monitoring procedures and risk classifications for loans in accordance with the banking legislation.

In order to prevent the loans becoming non-performing either due to cyclical changes or structural problems, the potential problematic customers are determined through the analysis of early warning signals, and the probable performance problems are aimed to be resolved at an early stage.

It is preferred to obtain highly liquid collaterals such as bank guarantees, real estate and ship mortgages, pledges on securities, bills of exchange and sureties of the persons and companies.

Explanations related to the definitions of the loans, which have been overdue and impaired, value adjustments and provisions

Explanation is given in Note VIII-c-4-i of Section Four.

b. Information on the control limits of the Group for forward transactions, options and similar contracts, management of credit risk for these instruments together with the potential risks arising from market conditions

The Group has control limits defined for the positions arising from forward transactions, options and similar contracts. Credit risk for these instruments is managed together with those arising from market conditions.

c. Information on whether the Group decreases the risk by liquidating its forward transactions, options and similar contracts in case of facing a significant credit risk or not

Forward transactions can be realized at maturity. However, if it is required, reverse positions of the current positions are purchased to decrease the risk.

d. Information on whether the indemnified non-cash loans are evaluated as having the same risk weight as non-performing loans or not

Indemnified non-cash loans are treated as having the same risk weight as non-performing loans.

DENİZBANK ANONİM ŞİRKETİ

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Consolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

Information on whether the loans that are renewed and rescheduled are included in a new rating group as determined by the Bank's risk management system, other than the follow-up plan defined in the banking regulations or not; whether new precautions are considered in these methods or not; whether the Bank's risk management accepts long term commitments as having more risk than short term commitments which results in a diversification of risk or not

Loans that are renewed and rescheduled are included in a new rating group as determined by the risk management system, other than the follow-up plan defined in the banking regulations.

Long term commitments are accepted as having more risk than short term commitments which results in a diversification of risk and are monitored periodically.

e. Evaluation of the significance of country specific risk if the banks have foreign operations and credit transactions in a few countries or these operations are coordinated with a few financial entities

There is no significant credit risk since the Parent Bank's foreign operations and credit transactions are conducted in OECD and EU member countries in considering their economic climate.

Evaluation of the Bank's competitive credit risk as being an active participant in the international banking transactions market

Being an active participant in the international banking transactions market, the Parent Bank does not have significant credit risk as compared to other financial institutions.

f. DFS Group's

1. The share of the top 100 and 200 cash loan customers in the total cash loans portfolio

The share of the top 100 and 200 cash loan customers comprises 39% and 47% of the total cash loans portfolio (31 December 2017: 30%, 36%).

2. The share of the top 100 and 200 non-cash loan customers in the total non-cash loans portfolio

The share of the top 100 and 200 non-cash loan customers comprises 50% and 62% of the total non-cash loans portfolio (31 December 2017: 43%, 55%).

3. The share of the total cash and non-cash loan balance of the top 100 and 200 loan customers in the total assets and off-balance sheet items

The share of the total cash and non-cash loans from its top 100 and 200 loan customers comprise 26% and 33% of the total assets and off-balance sheet items (31 December 2017: 20%, 26%).

g. DFS Group's general loan provision for its loans

As at 31 December 2018, DFS Group's general loan provision amounts to TL 3.221.135 (31 December 2017: TL 1.440.765).

n. Risk Classifications

Ratings issued by Fitch, international credit rating agency, are being used in determining risk weights for the regulatory calculation of capital adequacy.

The scope of asset classes that the credit ratings are considered are receivables from central governments or central bank, receivables from banks and brokerage houses as being limited with those residing abroad and corporate receivables from residing abroad.

Other	5.653.288	--	5.653.288

III. Explanations related to the consolidated foreign exchange rate risk

a. Foreign exchange rate risk the Group is exposed to, related impact estimations, and the limits set by the Board of Directors of the Parent Bank for positions which are monitored daily

Foreign currency exchange rate risk can be taken by DFS Group within defined position and value at risk limits. Measurable and manageable risks are taken within legal limits.

Foreign exchange rate risk is monitored along with potential evaluation differences in foreign currency transactions in accordance with "Regulation on Bank's Internal Systems and Internal Capital Adequacy Assessment Process". Value at Risk approach is used to measure the exchange rate risk for trading positions and calculations are made on a daily basis.

Based on general economic environment and market conditions the Parent Bank's Board of Directors reviews the risk limits and makes changes where necessary.

See Note 3.1.c*

b. The magnitude of hedging foreign currency debt instruments and net foreign currency investments by using derivatives

In accordance with TFRS 9, DFS Group applies net investment hedge accounting to avoid foreign currency exchange rate risk arising from retranslation of its foreign investments in its consolidated financial statements.

Information relating to investment hedge to avoid foreign currency exchange rate risk arising from retranslation of its foreign investments are explained in Note XI-a of Section Four.

c. Foreign currency risk management strategy

Foreign exchange risk can be taken by DFS Group within defined position and value at risk limits. Measurable and manageable risks are taken within legal limits.

d. The Parent Bank's spot foreign exchange bid rates as of the balance sheet date and for each of the five days prior to that date

US Dollar purchase rate as at the balance sheet date TL 5,2810

Euro purchase rate as at the balance sheet date TL 6,0422

Date	US Dollar	Euro
25 December 2018	5,3034	6,0419
26 December 2018	5,2832	6,0185
27 December 2018	5,2889	6,0245
28 December 2018	5,2609	6,0280
31 December 2018	5,2810	6,0422

e. The basic arithmetical average of the Parent Bank's foreign exchange bid rate for the last thirty days prior to the balance sheet date

The arithmetical average US Dollar and Euro purchase rates for December 2018 are TL 5,3010 and TL 6,0359.

IV. Explanations related to the consolidated interest rate risk

Interest rate risk arises from disagreements between the repricing dates of the assets, liabilities and off-balance sheet items (for floating-rate products) or maturities (for fixed-rate products). Although this dispute is a structural situation in the banking system, it may affect the bank's interest income and expense and the economic value of the balance sheet if there are unexpected changes in interest rates.

The ultimate responsibility for managing the interest rate risk is in the Asset and Liability Committee (ALCO). However, the Treasury and Asset Liability and Capital Management units are responsible for identifying the most appropriate strategies for interest rate risk management and recommending them to decision makers. There are limits approved by the Board of Directors for the control of interest rate risk.

a. Interest rate sensitivity of assets, liabilities and off-balance sheet items (Based on repricing dates):

c. Interest rate risk on banking book

The interest rate risk arising from banking accounts is managed according to the principles stated in the "Interest Rate Risk Management Policy".

Sensitivity limits were determined by the Parent Bank for possible negative developments in the market. Among the metrics; the sensitivity of the net present value of the balance sheet to certain interest rate shocks, the sensitivity of the net interest income, Financial Assets at Fair Value Difference to Other Comprehensive Income has impact and interest rate gap analysis on the CAR. These criteria are not only monitored in weekly ALCOs, but are also submitted to the senior management and the Board of Directors due to the limits set forth in the risk appetite declaration.

Interest rate risk calculation and reporting arising from banking accounts according to the "Regulation on Measurement and Assessment of the Interest Rate Risk from Banking Accounts" published in the Official Gazette no. 28034 dated 23 August 2011. The related ratio is prepared monthly as the other interest rate metrics that the Parent Bank follows. In addition, it is provided with close monitoring by weekly estimation studies and submitted to ALCO.

Cross currency swaps or interest swaps are used to hedge up to 10 years against the negative effects of interest rate risk.

The Group's economic value differences arising from the interest rate fluctuations pursuant to the "Regulation on the Measurement and Assessment of Interest Rate Risk Arising from Banking Accounts According to the Standard Shock Method" in a manner separated by different currencies are demonstrated in the following table as of 31 December 2018.

Current Period: 31 December 2018		Shocks Applied	Gains/Losses	Gains/Equity -
Type of Currency		(+/- x basis points)		Losses/Equity
1 TL	(+)	500 bps	(1.700.918)	(7,48%)
2 TL	(-)	400 bps	1.534.786	6,75%
3 Euro	(+)	200 bps	(554.954)	(2,44%)
4 Euro	(-)	200 bps	654.163	2,88%
5 US Dollar	(+)	200 bps	68.445	0,30%
6 US Dollar	(-)	200 bps	(57.231)	(0,25%)
Total (of positive shocks)			(2.187.427)	(9,62%)
Total (of negative shocks)			2.131.718	9,38%

Prior Period: 31 December 2017		Shocks Applied (+/- x	Gains/Losses	Gains/Equity -
Type of Currency		basis points)		Losses/Equity
1 TL	(+)	500 bps	(2.089.734)	(11,36%)

VI. Explanations related to the consolidated liquidity risk

Liquidity risk can form as a result of significant changes which can happen in market liquidity or a general funding risk. Funding risk states the risk of not meeting cash outflows completely because of maturity mismatch between assets and liabilities while market liquidity risk states the risk of not liquidating assets because of a collision in market conditions or insufficient market depth.

Information on liquidity risk management, including the Parent Bank's risk capacity, responsibilities and structure of liquidity risk management, liquidity risk reporting in the Parent Bank, liquidity risk strategy, policy and practices, communication with the board of directors and business lines

Within the Parent Bank, the procedures and principles regarding liquidity risk management are determined by the "Liquidity Risk Management Policy" approved by the Board of Directors. This policy includes the basic duties and principles of liquidity risk management within the Bank including the related methods, procedures, controls and reporting framework. The "Liquidity Emergency Action Plan" was established within the Liquidity Risk Management Policy, enclosing possible precautions which can be taken against unexpected liquidity squeezes.

"Risk Appetite Statement" is reviewed annually in order to manage risks in accordance with the Parent Bank's strategy and its financial power. Risk Appetite Statement includes limits towards liquidity risks besides other risk limits. Risk appetite limits are reported to senior management monthly in scope of risk management activities. In the risk appetite declaration (RAD), limits were set based on the loan / deposit ratio and the LCR criteria for liquidity risk. Other indicators followed outside these metrics are; liquidity buffer, large consistent deposits, and core deposits.

Short-term liquidity management of the Parent Bank is under the responsibility of Treasury Group. Treasury Group weekly reports to Assets and Liabilities Committee (ALCO) related to liquidity structure. ALCO has an active role in establishing related systems and monitoring and decision making processes regarding liquidity risk management. ALCO is also responsible and authorized for monitoring current liquidity position and legal and internal liquidity indicators and taking decisions related to liquidity management taking risk appetite framework into consideration. Different departments of the Parent Bank such as the Treasury Group, Financial Institutions Group, Financial Affairs Group and Risk Management Group contribute to the liquidity management process of the Bank in accordance with the ALCO decisions and also provide the necessary support to the ALCO with the information, analysis and recommendations needed in the decision-making process.

Information on the centralization degree of liquidity management and funding strategy and the functioning of the Parent Bank's partnerships:

Liquidity risk management is performed as par consolidated and non-consolidated. In this context, liquidity monitoring and management in subsidiaries are performed by the related subsidiary and monitored closely by the Parent Bank. In order to meet the liquidity needs of partnerships in case of emergency, limits are allocated by the Parent Bank.

Information on the Bank's funding strategy, including policies on the diversity of fund resources and durations

Management of risk sourcing from funding presents the fundamental of liquidity management activities of the Bank. Main funding source of the Bank is deposits since it is a more stable funding source compared to other sources and it provides a diversified source of funding. Additionally, security issuance and borrowing activities are performed in order to extend the maturity of funding.

On the other hand, the securities portfolio of the Parent Bank carried in order to liquidity risk management that maintain in CBRT and BIST is structured in a way to consist of sovereign securities issued by Treasury of Turkey in order to reduce liquidity risk sourcing from market to minimum level. Criteria and principles related to security investments which shall be received to this portfolio are committed on paper and approved by the related committee.

Information on liquidity management on the basis of currencies constituting a minimum of five percent of the Parent Bank's total liabilities

A large majority of Bank's liabilities consist of TL, US Dollar, Euro and gold. The main foreign currency funding source of the Parent Bank is deposit and borrowings provided from credit agencies. Foreign currency liquidity risk is at a low level since the foreign currency sources of the Parent Bank are at a higher level and have longer maturity than assets. For this reason, Turkish Lira is created by swap transactions using the current foreign currency liquidity. In other words, foreign currency liabilities are used in the funding of Turkish Lira assets.

Information on liquidity risk mitigation techniques used

Reducing the liquidity risk continues to prepare and follow up liquidity buffer where possible fund outflows exist. Securities required to manage short-term risks are kept within the balance sheet together. On the other hand, in order to reduce structural liquidity risk, diversified funding sources are aimed to be diversified and the maturity structure will be expanded. Another important element is the strategy of spread to deposit base.

Explanations related to using the stress test

Scenario analyses, including specific conditions having significance with respect to liquidity which have been experienced or which shall possibly be experienced, are performed in order to measure liquidity level under stress conditions. A liquidity level at a sufficient amount to meet all liabilities even under stress conditions is aimed in scope of this scenario analyses through evaluating measures which can be taken. Assumptions related to liquidity stress tests are reviewed annually at minimum. Periodical stress tests are performed within the determined scenarios and liquidity situation is monitored and the duration of the Bank can survive is calculated and the results are compared with the determined limits and presented to the related committees.

General information on the liquidity emergency and contingency plan

In order to be prepared for the liquidity crises that can be experienced and to make the management in a healthy and planned manner, "Liquidity Unexpected Situation Plan Regulation" has been set up to prepare appropriate processes and guide these processes. In this document, early warning indicators, action plans, duties and responsibilities of the units within the Bank are used to determine the unexpected liquidity situation.

In addition, in order to ensure that the Parent Bank maintains its liquidity in all circumstances and meets its liquidity obligations, an emergency liquidity limit to be used by the shareholder to be used within the framework of emergency liquidity management is defined. The mentioned limit is reviewed every year in the budget period and approved by the prevailing partner in the Board of Directors.

a. Liquidity coverage ratio

Liquidity coverage rates calculated in accordance with the Regulation on Calculation of Bank's Liquidity Coverage rate published in Official Gazette dated 21 March 2014 and numbered 28948 are as follows. Consolidated foreign currency rate calculated for the last three months is at the lowest level in 311,18 in December and at the highest level in October 374,66 while the liquidity coverage rate is at the lowest level in November 145,07 and at the highest level in December 147,77.

Calculation table of liquidity coverage rate is reported to BRSA monthly and monitored daily in the Bank.

High quality liquid assets consist of cash assets, reserves kept in Central Bank of Republic of Turkey and unrestricted marketable securities. Cash outflows consist of deposits, bank borrowings, non-cash loans, derivatives and other liabilities without a certain maturity. Additionally, several bank borrowings are shown as cash outflow regardless of their maturity since they include contingent early payment condition. In addition, additional collateral liability that may arise from the possible changes in the fair value of derivative transactions within the cash outflows are included. Cash inflows consist of credits having maturity less than 30 days and a certain payment due date and receivables from banks and derivative products.

LCR is considered as an important liquidity management criterion for our Bank. The Bank managed to manage the LCR management in terms of the minimum limits that would reach 80% for the foreign currency in 2019 and 100% for the total by searching by the Regulation in terms of 10% each year. In the Risk Appetite Declaration, internal limits are set above the legal minimum limits for the LCR and the related ratio is reported and monitored at the level of ALCO, senior management and the Board of Directors.

VIII. Explanations on Risk Management

Notes and explanations in this section have been prepared in accordance with the Communiqué on Disclosures about Risk Management to be Announced to Public by Banks that have been published in Official Gazette no. 29511 on 23 October 2015 and became effective as of 31 March 2016. As the Standard Approach is used in calculating the Parent Bank's capital adequacy , the tables to be prepared under the Internal Rating Based Approach (IRB) have not been presented yet as of 31 December 2018.

The risk management disclosures were prepared as to comply with the internal control process that is approved by the Board of Directors.

a. Risk management and overview of risk weighted assets

1. Disclosures related to the risk management approach

Risks, exposed as a result of business model of the Bank, are determined on a consolidated basis through risk identification and materiality assessment of the Bank. Risk mitigation factors and monitoring activities are established for significant risks which are identified. Limits are identified for risks, considered to be significant, in Risk Appetite Declaration of the Bank and those limits are approved by the Board of Directors. Developments with respect to risk limits determined in Risk Appetite Declaration are monitored on a monthly basis and actions which are pre-determined in risk appetite declaration if those limits are exceeded.

Denizbank Risk Management Group Directorate is an internal systems unit responsible for carrying out risk management activities working subject to Board of Directors. It directly reports to Board of Directors. Risk Management Group is responsible to carry out processes such as definition and measurement of risks, establishment and application of risk policies and implementation procedures, analysis, monitoring and reporting of risks in the framework of principles determined by Senior Management of the Bank and Risk Management Group and approved by Board of Directors.

Delegation levels of groups, formed by client and clients at the Bank, are determined in accordance with risk categories established based on limit amount and credit grade components within the body of the Bank.

Rating process executed by Credit Analysis department and reviews of Credit Allocation department are periodically audited by Credit Risk Control in line with determined rules and the related outputs are presented to the Rating Committee.

Main components of risk measurement systems and its scope

The Bank, including its subsidiaries, has a comprehensive risk identification process. The process aims to determine significant risks specific to the Bank based on a broad list including inherent risks of banking and it is performed on an annual basis. Opinions and reviews of expert individuals within the body of the Bank during the determination of materiality level of risks. Review outputs are used in reports and form a basis to internal capital adequacy assessment processes of the Bank.

The purpose of the studies made in the scope of measurement of risks includes measuring of financial risks exposed by the Bank and its subsidiaries in order to prepare internal and legal reports and form a relation between carried risks and estimated profitability and evaluation of validity of parameters and assumptions used in risk measurement.

It determines which type of reports shall be prepared as consolidated and unconsolidated. It ensures to establish an effective internal audit system which shall prevent to take risk exceeding targeted risk level and limits determined by regulatory authority. Risk limits, approved by Board of Directors for each type of risk types, are taken into account while controlling and reporting of risks.

There is an effective control system to prevent the risk level from being taken and the limits determined by the regulatory authority. The risk limits that are approved by the Board of Directors are taken into account for each type of risk during the control and reporting of risks.

The Risk Management Group, provides the coordination of the internal capital adequacy assessment process (ICAAP) and the measurement of the risks undertaken by the bank. The annual stress test report, which presents the bank's capital and liquidity, is reported to the BRSA by the scenarios in which the macroeconomic variables are taken into account within the framework of the annual ICAAP report and the 3-year strategic plan. The Bank internally monitors the capital requirement level on a monthly basis.

Disclosures on risk reporting processes provided to Board of Directors and senior management, especially the scope and main content of the reporting

Risk Management Group performs reporting to Senior Management and Board of Directors through Audit Committee, ALCO and Rating Committees. Audit Committee holds quarterly meetings in ordinary situations. Activities performed by the Risk Management Group and risk indicators are presented to the Committee.

ALCO holds weekly meetings. Risk-limit follow-up and detailed analysis related to indicators such as interest and liquidity risk, capital adequacy are presented.

Rating Committee: Rating Committee holds meetings on a quarterly basis. It is the Committee to which the Risk Management presents its evaluation, analysis and findings regarding Internal Rating processes.

Model Risk Management and Validation Committee: It is the committee that the Risk model validation results, prepared within the frame of annual plan, are presented to and approved.

b. Linkages between financial statements and exposures

1. Mapping and differences between accounting and regulatory scopes of consolidation

Regulatory consolidation refers to the consolidation that includes the consolidation of subsidiaries which are credit institutions or financial institutions in accordance with Article 5 paragraph 1 of the Communiqué on the Preparation of Consolidated Financial Statements of Banks published in the Official Gazette dated 8 November 2006 and numbered 26340. Accounting consolidation refers to the consolidation in which all of the subsidiaries are included in the scope of consolidation in accordance with the Article 5 paragraph 6 of the same communiqué, irrespective of whether these subsidiaries are credit institutions or financial institutions, or not.

^(**) It includes risk which are included in credit risk calculation.

3. Disclosures on differences between amounts valued in accordance with TAS and risk exposures

Differences between valued amounts in accordance with TAS and risk exposures:

It is obtained through addition of potential risk exposures according to type of transaction and maturity to risk exposure renewal costs in derivative transactions included in counterparty credit risk and through offsetting of cash amount subject to amount adjusted with volatility made to related security in repo and reverse repo transactions.

Amounts of items which are value in accordance with TAS and subject to market risk indicate fair value of financial instruments held for trade. Amounts in line of risk amount related to aforementioned transactions indicate principal amount subject to market risk sourcing from capital requirement calculated related to potential losses which can be caused by interest rate risk, share price risk, exchange rate risks in scope of "Communique on Measurement and Evaluation of Bank's Capital Adequacy".

Disclosures on controls performed and systems used in order to ensure prudence and reliability of valuations estimates of the Bank in accordance with prudential valuation principles and procedures included in accompanying Annex-3 to Communique on Measurement and Evaluation of Bank's Capital Adequacy:

If the financial instruments recognized through fair value have an active and deep market, valuation is performed based on prices included in market in question. Reliability of market data used in valuations is examined periodically. The Bank does not operate in markets which do not have a depth. Discounted cash flow model is mainly used in the evaluation of derivative instruments and generally accepted valuation models are used for derivative transactions including optionality. Accuracy of market data and model outputs used in valuations are periodically controlled and differences between counterparty valuations and bank's evaluations are monitored regularly.

c. Credit risk

1. General qualitative information about credit risk

How does the business model of the Bank transform to components in its credit risk portfolio

Credit risk within the body of the Parent Bank is managed in the framework of Credit Risk Management Policy approved by Board of Directors. Risk, related to credit, are defined, duties of departments are determined and main principles of credit risk management are brought in aforementioned policy document. Departments assigned in credit management and their authorization/responsibilities are defined in aforementioned document.

DENİZBANK ANONİM ŞİRKETİ

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

AS OF 31 DECEMBER 2018

(Currency: Thousands of TL - Turkish Lira)

*Convenience Translation of
Consolidated Financial Report
Originally Issued In Turkish,
See Note 3.1.c*

In this direction, main limitations related to credit risk are determined in Risk Appetite Statement approved annually by Board of Directors and reported throughout the year by Risk Management Department. Concentration limits on the basis of sector, customer segment and risk groups are determined. Actions which shall be taken in case of a possible overflow are also determined in this document.

In this scope, credit portfolio of the Bank draws a dispersed view with respect to customer segments and sectors.

Criteria and approach used while determining credit risk policy and credit risk limits

Risk limits defined to all counterparties in monitoring of credit risks are tracked on the basis of products, customers and risk groups separately by systems and it is not permitted to take risks exceeding determined limits. Many factors such as ability to pay, features of the sector and possible impacts of geographical and economic conditions are taken into consideration while determining the credit limits of counterparty. If deemed appropriate, it is tried to reduce possible losses of the Bank to minimum through applying required risk mitigation techniques. All documents required by the related legislation should be taken into account during credit examinations. Credit worthiness of counterparty is periodically controlled for limits provided for multi-use and limits are revised considering changes and requirements in the credit worthiness of counterparty. Customers/ transactions are classified based on their credit worthiness by credit allocation officers and respective classes are changed, if required.

Structure and organization of credit risk management and control function

Credit allocation and monitoring is performed in accordance with segregation of duties and therefore, the credit can be reviewed in an objective manner during its economic life. Risk models are used in order to measure credit risk of customers in both allocation and monitoring groups in an accurate and objective manner. Early Warning Systems are used for the monitoring of credit customers and signals received are regularly tracked by Monitoring groups and pre-determined action plans are taken with allocation groups if pre-determined triggers are detected.

Relation between credit risk management, risk control, legal compliance and internal audit functions

The newly developed credit risk models undergo validation process before its implementation, after the approval of The Bank's Model Risk Management and Validation Committee, they are used in the risk management processes. Validation of Credit risk models in use are repeated at least on an annual basis and the results are presented to the Model Risk Management and Validation Committee.

Credit Risk Control periodically presents analysis and results of execution of internal rating systems, evolution of credit rating grades, documentation of changes made in credit grade and compliance to internal limitations to Rating Committee. Compliance of Credit Risk Control activities to intra-bank arrangements and regulations and guides is periodically audited by internal audit departments of the Bank and issue requiring to be developed are monitored following their identification.

Scope and main content of reporting which shall be made to senior management and members of board of directors regarding credit risk management function and exposed credit risk

Board of Directors determines policy of the Group in credit management field and ensures establishment of required conditions to perform determined policies in an effective manner. In this scope, it defines sections related to measurement and management of credit quality and approves documents having primary importance related to credit risk such as Risk Appetite Statement.

^(*) It doesn't include off-balance sheet receivables.

^(**) It indicates sales made from non-performing loans portfolio.

4. Additional disclosure related to the credit quality of assets

(i) Scope and definitions of "overdue" receivables and "provisioned" receivables used for purposes of accounting

The Parent Bank considers loans that have overdue principal and interest payments and are classified as second group according to the "Communiqué on "Determining the Quality of Loans and Other Receivables by Banks and Procedures and Principles of Provisions to be made" as "past due loans." Loans that have overdue principal and interest payments for more than 90 days after the maturity date or the debtor of which are deemed unworthy by the Bank are considered as "impaired loans."

(ii) Part of overdue receivables (over 90 days) which are not considered as "Provisioned" and reasons for the implementation in question.

Loans that have overdue principal and interest payments for more than 90 days after the maturity date are transferred to "Nonperforming loans" accounts and the Bank calculates "specific provisions" for such loans in compliance with the "Communiqué on "Determining the Quality of Loans and Other Receivables by Banks and Procedures and Principles of Provisions to be made".

(iii) Definitions of methods used while determining amount of provision

The methods used in the calculation of the provision amount are presented in Note VIII of Section Three.

(iv) Definitions of restructured receivables

The Bank can restructure both of its first and second group credits and its nonperforming credit and receivables. Restructuring in first and second group of credits and in other receivables are made in order to improve repayment ability of the customer as well as including changes made in contract terms with the request of the customer independent from credit risk of the customer. Restructurings made in nonperforming claims and receivables are changes made in payment plan of the credit towards ensuring of collection of the receivable.

Loans under close monitoring and restructured from other receivables	4.577.399
Restructured from non-performing loans	298.597

5. Credit risk mitigation techniques

The Parent Bank uses balance sheet netting and / or uses a general netting contract by taking into account the provisions related to risk mitigation of private equity instruments. As of the reporting date, financial collaterals are valued at their latest values and included in the credit risk mitigation process. While the allocation of the collateral amount to the loan is taken into consideration, the risk mitigation effects are calculated over the collateral values by taking into account the possible loss in the value of the collateral in terms of collateral value and credit risk mitigation is made according to the comprehensive financial collateral method. The legal validity of real estate mortgages is ensured by the timely and duly registered registration of the mortgage; material changes in market conditions are followed.

The Parent Bank performs credit risk mitigation according to comprehensive financial collateral method in accordance with "Communique on Credit Risk Mitigation Techniques". Exchange mismatch between receivable and collateral and cut-off rates based on type of collateral are considered through inspecting standard cut-off ratios mentioned in annex of the communique while maturity mismatch between receivable and collateral is taken into account in accordance with method mentioned in the Article 40. In credit risk mitigation, cash, financial debt securities, real estate mortgages and Treasury guaranteed Credit Guarantee Fund bails are used.

Credit policies establish an operational link between the Bank's operations and risk capacity and cover the main areas of activity consistent with the target portfolio structure, risk targets related to expected and unexpected losses in line with risk capacity and limits on risk concentration. It is ensured that the limits are complied with the relevant legislation and the limitations set by the regulatory and supervisory authorities. The Bank uses a holistic approach in concentration risk management in which all risk concentrations are identified, monitored and evaluated. For this reason, not only the loans extended to individuals and companies, but also the market, sector, country and activity areas are taken into consideration. In line with its policy and internal procedures, the Bank takes maximum care to ensure that credit and market risk is not concentrated in a specific counterparty or risk category.

6. Credit risk mitigation techniques – overview

7. Disclosures on rating grades used while calculating credit risk with standard approach

Ratings provided by international rating agency Fitch are used for the determination of risk weights which shall be applied in the calculation of capital adequacy. The scope, in which the credit rating grades are taken into consideration, covers receivables from governments or central banks and receivables from banks and intermediary institutions and corporate receivables for those having residence abroad.

The matching of risk ratings with risk weights according to credit quality level and risk classes are shown in the table below.

d. Counterparty Credit Risk

1. Counterparty credit risk (CCR) explanations

Policies regarding counterparty credit risk management; Turkish Banking Legislation is determined by the Board of Directors in compliance with the regulations of the Banking Regulation and Supervision Agency and international standards.

Counterparty credit risk is included derivative financial products and repo transactions. Counterparties are divided into segments as financial institutions, corporate-commercial customers, SME-Micro-Gold-Agriculture customers and individual customers. In order to determine the products and services to be offered to customers, "Conformity Test" is applied according to the product information, financial status and frequency of transactions of the customers. Conformity testing is not mandatory for customers classified as professionals.

The counterparty's creditworthiness is analyzed and re-evaluated at regular intervals before the transactions with counterparties. The limits are set separately for each counterparty and for the counterparties within the same risk group. Limits are approved in the relevant credit committees according to the segment of counterparties. The revision of the limits is made at least once a year. If deemed necessary, the approved limits are blocked by the approval of the Credit Committee / Credit Allocation Department.

Risk monitoring of transactions within the scope of CCR; the potential risk and daily valuation method, which are calculated by multiplying the rates varying by type, maturity and type of foreign currency by the nominal amount of the transaction, is carried out by monitoring the current risk. Risk reduction methods included in international agreements such as ISDA, CSA, GMRA and EMA signed with the counterparty are used in transactions with financial institutions. For other counterparties, collateral adequacy rates are monitored on a daily basis within the scope of the Bank's current credit policies and procedures, and where necessary, collateralization and margin completion practices and risk mitigation are carried out. The margins to be used in collateral agreements are reviewed regularly. Margins; is determined according to the volatility and liquidity of the collateral. The risks of transactions that are subject to netting and which are subject to netting are monitored together. In the event of a decrease in the Bank's credit rating, the Bank's obligation to provide additional collateral is followed.

The Bank also takes into account the risk of countertrend risk in the credit evaluation of counterparties. Countertrend risk; the risk of general adverse trend and specific countertrend risk arise in two ways.

General countertrend risk; denotes the risk that occurs when there is a positive correlation between the probability of default of counterparties and general market risk factors.

Originally Issued In Turkish,
See Note 3.1.c*

Specific countertrend risk; states the risk that occurs when there is a positive correlation between the risk amount and the probability of default of the counterparty due to the nature of the transaction. Where the counterparty is expected to have a high probability of default, the risk of a specific countertrend risk will be expected if the future risk amount is expected to increase.

f. Market Risk

1. Explanations on market risk

Within the scope of financial risk management, market risk management activities are defined in accordance with the "Regulation on the Banks' Internal Systems and Internal Capital Adequacy Assessment Process" and the "Regulation on Measurement and Assessment of Capital Adequacy Ratios of Banks" and necessary measures are taken in order to avoid excessive market risk.

Standard method and internal model are used for the measurement of market risk. The principals of standard method are defined by BRSA and calculation is performed monthly for the consolidated and non consolidated scope. Risk measurement with the internal model is performed on a daily basis and risk indicators such as value at risk, interest rate sensitivity and option sensitivities are monitored. The "Trading Book" classification defined by the regulation is used for market risk measurement. Limits based on risk indicators and stop-loss limits are set by the Board of Directors in order to control the market risk exposure.

2. Standardised approach

Principal amount subject to operational risk is calculated through using year-end gross income of 2017, 2016 and 2015 of DFS Group belonging to last 3 years via "Basic Indicators Approach" dated in accordance with "Communique on Measurement and Evaluation of Bank's Capital Adequacy" published on Official Gazette dated 23 October 2015 numbered 29511.

2. Basic indicators approach

	31/12/2015	31/12/2016	31/12/2017	Total/Positive GI year number	Ratio(%)	Total
Gross Income	4.699.298	6.104.710	7.247.218	6.017.075	15	902.561
Amount Subject to Operational Risk						11.282.016

IX. Presentation of financial assets and liabilities at their fair value

a. Calculation of financial assets and liabilities at their fair value

The fair value of financial assets measured at amortized cost are determined based on market prices, or when they are not available, based on market prices quoted for other securities subject to similar terms of interest, maturity and other conditions.

The expected fair value of the demand deposits represents the amount to be paid upon request. The fair value of the overnight deposits and floating rate placements represent their carrying value. The expected fair value of the fixed rate deposits are determined by calculating the discounted cash flows using the market interest rates of similar instruments.

Fair value of credits are calculated by discounting cash flow with current market interest rate.

Estimated fair value of banks, funds provided from other financial entities, issued securities and deposits is calculated through determination of discounted cash flows using current market interest rates.

The following table summarizes the carrying value and fair value of financial assets and liabilities. The carrying value represents the sum of the acquisition costs and interest accruals of financial assets and liabilities.

	Book Value Current Period	Fair Value Current Period
Financial Assets	159.846.452	154.128.735
Interbank Money Market Placements	9.780	9.780
Banks	6.625.768	6.627.163
Financial Assets at Fair Value Through Other Comprehensive Income	7.914.489	7.914.489
Financial Assets Measured at Amortized Cost	6.239.810	5.819.732
Loans	139.056.605	133.757.571
Financial Liabilities	167.981.742	167.208.476

See Note 3.1.c*

Movement table of financial assets at level 3

	Current period
Balance at the beginning of the period	--
Purchases	--
Amortization and sales	--
Transfers	323.627
Balance at the end of the period	323.627

Investment property of DFS Group and property held under tangible fixed assets at fair value are classified as level 3.

X. Transactions carried out on behalf and account of other parties and fiduciary transactions

a. Information on whether the Group performs sales, purchase, management, consultancy and custody services on behalf and account of others, or not

DFS Group performs sales, purchase, management, consultancy and custody services on behalf and account of others.

b. Transactions directly realized with other financial institutions depending on fiduciary contracts and probability of material effect of such transactions on the financial position of the Bank.

None.

XI. Explanations related to hedging transactions

a. Net Investment Risk

DFS Group applies net investment hedge strategy to hedge against the currency risk arising on a consolidated basis from the net investments amounting to a total of Euro 1.347 million and US Dollar 7 million of subsidiaries Denizbank AG and Eurodeniz. The part consisting of the same amounts of its foreign currency deposit has been defined as "hedging instrument". The effective part of the change in value of the foreign currency deposit arising from exchange rate has been recognized as "hedging funds" under equity.

On the other hand, as of 1 April 2014, the Parent Bank stopped applying net investment hedge accounting due to its net investment to hedge against the currency risk on the subsidiary of JSC Denizbank, and the total hedging fund which is booked under equity for that subsidiary is amounting to TL (57.744).

Total net investment hedging funds recognized under equity is amounting to TL (3.292.504) as of

31 December 2018 (31 December 2017: TL (1.741.301)).

b. Cash Flow Hedge

Within the scope of foreign exchange risk management, Deniz Leasing started to apply cash flow hedge accounting as of April 1, 2018 by matching the future Euro lease receivables and the estimated future sales of used cars, whose fair values are followed by Euro, in accordance with the agreements.

In the accounting for hedge of cash flow that Deniz Leasing has started to implement; the Company has identified forward-looking future rental sales of Euro-denominated operating lease receivables and their fair values in EUR, and the credit in Euro terms has been taken as a hedging tool.

Profit/ (loss) after tax TL (29.409) which is accounted under shareholders' equity as cash flow hedge accounting as of December 31, 2018 (31 December 2017: None).

XII. Explanations related to the consolidated segment reporting

DFS Group is active in four areas; namely, wholesale banking, SME and agricultural banking, retail banking, and treasury.

Wholesale banking offers financial and banking solutions to large-scale local and international corporate and commercial customers. In order to meet customer needs related to projects, investment and working capital, corporate banking offers short and long-term working capital loans, investment loans, financial and operational leasing and factoring services, non-cash loans, foreign exchange transactions, export finance, project finance, structured finance, corporate finance, and deposit products and cash management services.

The Bank offers loan products (consumer loans, mortgage, vehicle, agricultural and investment loans), distinctive credit cards, producer card, investment products (mutual funds, shares, government bonds/treasury bills, and repos), deposit products (time, demand, protected), insurance products, SME loans, agricultural loans, financial and operational leasing and factoring services to the customers classified under retail, SME and agricultural segments. Alternative distribution channels allow customers to meet their banking needs without the need to physically visit the branches. Among products that meet every day needs of customers are overdraft loans, automated bill payment, checkbooks and rental safes.

Within treasury; sales, prop-trading and private banking departments offer spot and forward TL and foreign exchange transactions, trading of treasury bills, bonds and other local and international securities and derivative products. Providing medium and long-term financing, diversification of funding and maintenance an international investor base are also the activities defined in this segment.

Segment information is prepared in line with the Parent Bank's Management Information Systems and the prior period figures are also revised accordingly.

Segment information of the Group is presented in the following table:

	Wholesale Banking	SME & Agricultural Banking	Retail Banking	Treasury & Other	Total

	Prior Period	
	TL	FC
Unrestricted Demand Deposits	894.109	1.715.718
Unrestricted Time Deposits	1.072.212	--
Restricted Time Deposits	--	11.390.634
Total	1.966.321	13.106.352

3. Information on reserve requirements

As per the Communiqué no. 2013/15 "Reserve Deposits" of the Central Bank of the Republic of Turkey ("CBRT"), banks keep reserve deposits at the CBRT for their TL and FC liabilities mentioned in the communiqué.

As of 31 December 2018, all banks operating in Turkey should provide a reserve in a range of 1,5% to 8% (31 December 2017: between 4% and 10,5%) depending on the terms of the deposits for their liabilities in Turkish Lira and in a range of 4% to 20% (31 December 2017: between 5% and 19%) in US Dollars or standard gold for their liabilities in foreign currencies.

CBRT began paying interest for the reserve deposits maintained in Turkish Lira as from November 2014 and for the reserve deposits maintained in US Dollar as from May 2015. The interest income of TL 193.978 derived from the reserve deposits maintained by the Parent Bank at CBRT (1 January – 31 December 2017: TL 101.420) has been recorded under the account "interests derived from reserve requirements".

d. Information on financial assets at fair value through other comprehensive income

1. Major types of financial assets at fair value through other comprehensive income

Financial assets at fair value through other comprehensive income consist of share certificates, debt securities representing government bonds, Eurobonds and foreign currency government bonds issued by the Turkish Treasury and foreign private sector debt securities.

2. Financial assets at fair value through other comprehensive income given as collateral and book value

Financial assets at fair value through other comprehensive income which were collateralized consist of securities offered to various financial institutions, primarily the Central Bank of the Republic of Turkey and İstanbul Takas ve Saklama Bankası A.Ş. (Settlement and Custody Bank) for interbank money market, foreign exchange market and other transactions. Such financial assets include government bonds and Eurobonds, and their total book value amounts to TL 238.181 (31 December 2017: TL 754.234).

11. Liquidation policy for uncollectible loans and receivables

For uncollectible loans, the Bank tries to solve the issue with the customer. If no result is obtained, all legal actions are taken. Such actions are completed when the insufficiency of collaterals is documented or a certificate of insolvency is obtained.

12. Information on write-off from assets policy

The general policy of the Bank is to write-off the receivables that are documented as not possible during the legal follow-up process.

f. Information on lease payables

None.

1. Changes in agreements and further commitments arising

None.

2. Obligations under finance leases

None.

3. Explanations on operational leases

DFS Group has operational lease agreements for its bank branches, motor vehicles and ATM locations. Rental payments for the majority of these agreements are made and expensed on a monthly basis. The unexpired portion of prepayments made for rent agreements on a yearly basis are accounted for under prepaid expenses in "other assets".

4. Explanation on "sell-and-lease back" agreements

There is no sale and lease back transactions in the current period.

g. Information on liabilities arising from hedging purpose derivatives

None.

h. Explanation on provisions

1. Information on general provisions

	Prior Period
Provisions for Loans and Receivables in Group I	1.035.450
Additional Provision for Loans with Extended Maturities	29.113
Provisions for Loans and Receivables in Group II	299.763
Additional Provision for Loans with Extended Maturities	158.654
Provisions for Non Cash Loans	105.552
Other	--
Total	1.440.765

2. Provision for currency exchange gain/loss on foreign currency indexed loans

As of 31 December 2018, there are no reserves allocated for the exchange rate differences of loans indexed to foreign currency amount (31 December 2017: TL 11.313). Provisions for exchange rate differences pertaining to loans indexed to foreign currency are netted off against the loans and receivables under assets in the financial statements.

3. Liabilities on provision for employee benefits

TAS 19 requires using the actuarial method for calculation of obligations the company.

Accordingly, the following actuarial assumptions were used in the calculation of the total reserve for employee termination benefits:

	Current Period	Prior Period
Discount rate	5,45%	4,69%
Interest rate	16,00%	11,50%
Expected rate of salary/limit increase	10,00%	6,50%

As of 31 December 2018, TL 130.477 of provision for employee termination benefits (31 December 2017: TL 111.109) and TL 92.583 of unused vacation accruals (31 December 2017: TL 32.549) were reflected to the consolidated financial statements.

1. Paid-in capital

	Current Period
Common Stock	3.316.100
Preferred Stock	--
	Prior Period
Common Stock	3.316.100
Preferred Stock	--

Paid-in capital of the Parent Bank is shown at nominal value.

2. Paid-in capital amount, explanation as to whether the registered share capital system is applied at the bank; if so the amount of registered share capital

Registered paid-in capital system is not applied.

3. Information on share capital increases and their sources; other information on any increase in capital shares during the current period

None.

4. Information on share capital increases from revaluation funds

None.

5. Capital commitments in the last fiscal year and at the end of the following period, the general purpose of these commitments and projected resources required to meet these commitments

The capital is totally paid in and there are no capital commitments.

6. Prior period indicators of the Parent Bank's income, profitability and liquidity; and possible effects of the predictions on equity, considering uncertainty indicators

Balance sheets of the entities under DFS Group are managed prudently, to minimize the negative effects of interest rate, foreign currency and credit risks. This policy contributes to the progress of DFS Group's profitability with a steady increasing trend.

7. Information on the privileges given to stocks representing the capital

The Parent Bank does not have any preferred stocks.

c. Subsequent events

On 22 May 2018, Emirates NBD Bank PJSC (Emirates NBD) and Sberbank of Russia (Sberbank) announced that they have signed a definitive agreement about selling 99,85% of Denizbank's shares, which is owned by Sberbank to Emirates NBD.

Sberbank's shareholding in Denizbank will expire with the completion of the sales transaction. In the direction of the signed agreement, the sales price of the 99,85% shareholder was determined as 14.609 million TL with Denizbank's price fixing mechanism based on the equity size in the consent of DenizBank on 31 October 2017.

Additionally, Emirates NBD will pay interest that is over the transfer fee, on Sberbank for the period between October 31, 2017 and the closing date of the sales transaction. The profit to be earned by Denizbank from 31 October 2017 until the closing date of the sales transaction will be recorded at Emirates NBD's account. As part of the transfer process, with the closing of the sales transaction, Emirates NBD will also own the ownership of subordinated loans granted to Denizbank by Sberbank in the past.

The completion of the transaction, Turkey, Russia and the United Arab Emirates and is subject to approval by the regulatory authorities of other countries in which it operates Denizbank.
